H. R. 1768. A bill for the relief of the Jefferson and Plaquemines Drainage District and certain persons whose properties abut on the Federal Government's right-of-way for Harvey Canal in Louisiana (Rept. No. 1346);

H. R. 1910. A bill for the relief of Blanka Goldstein (Rept. No. 1347);

H. R. 2273. A bill for the relief of Der Chuck Yee and Wu Mei On (Rept. No. 1348);

H. R. 2278. A bill for the relief of Consuelo Calderon de Villarreal (Rept. No. 1349);

H. R. 2296. A bill for the relief of Simone Gilliland (Rept. No. 1350);

H. R. 2466. A bill for the relief of Marino and Giselda Proni (Rept. No. 1351); and

H. R. 2467. A bill for the relief of Ivo and Elia Monari (Rept. No. 1352).

By Mr. KILGORE, from the Committee on the Judiciary, with an amendment:

S. 185. A bill for the relief of Mrs. Agnes Thompson (nee Mannhardt) (Rept. No. 1353);

S. 419. A bill for the relief of Eli E. Hood (Rept. No. 1354);

S. 1037. A bill for the relief of Chung Herp Youn (Rept. No. 1326);

S. 1067. A bill for the relief of Tiber Horvath (Rept. No. 1355);

S. 1182. A bill for the relief of Haim Cohen (Haim Braun) (Rept. No. 1356);

S. 1244. A bill for the relief of Eva Gershbein Rubinstein (Rept. No. 1357);

S. 1616. A bill for the relief of Sumiko Ariumi Bilson (Rept. No. 1330);

H. R. 1146. A bill for the relief of the Pacific Music Supply Co. (Rept. No. 1358);

H. R. 1447. A bill for the relief of Aleksandra Borkowski (Rept. No. 1359); and

H. R. 1637. A bill for the relief of Sam H. Ray (Rept. No. 1360).

By Mr. KILGORE, from the Committee on the Judiciary, with amendments:

S. 1034. A bill conferring jurisdiction upon the United States District Court for the Eastern District of Michigan to hear, determine, and render judgment upon certain claims of Mr. and Mrs. Donald D. Parrish (Rept. No. 1361);

S. 1062. A bill for the relief of Renato Noe and Angela Noe (Rept. No. 1362); and

S. 1183. A bill for the relief of Len Ching Chen and Dr. Rose Hu Chen (Rept. No. 1363).

By Mr. O'MAHONEY, from the Committee on the Judiciary, without amendment:

S. Con. Res. 59. Concurrent resolution requesting the President to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week (Rept. No. 1364); and

H. Con. Res. 199. Concurrent resolution extending the felicitations of the Congress to those participating in the celebration of the 250th anniversary of the birth of Benjamin Franklin (Rept. No. 1365).

By Mr. SPARKMAN, from the Committee on Banking and Currency:

S. Res. 160. Resolution authorizing further expenditures and temporary employment of additional assistants by the Committee on Banking and Currency to study public and private housing; without amendment (Rept. No. 1367).

By Mr. FULBRIGHT, from the Committee on Banking and Currency:

S. Res. 155. Resolution authorizing the Committee on Banking and Currency to investigate certain matters and authorizing expenditures therefor; without amendment (Rept. No. 1366).

REPORT OF COMMITTEE ON BANKING AND CURRENCY ENTITLED "FEDERAL DISASTER INSURANCE" (S. REPT. NO. 1313)

Mr. FULBRIGHT. Mr. President, from the Committee on Banking and Currency I submit a report, consisting of a staff report on Federal disaster insurance, and ask unanimous consent that it be printed, with illustrations.

The VICE PRESIDENT. Without objection, it is so ordered.

REPORTS ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON of South Carolina, from the Joint Select Committee on the Disposition of Executive Papers, to which were referred for examination and recommendation two lists of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted reports thereon, pursuant to law.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time and, by unanimouse consent, the second time, and referred as follows:

By Mr. GEORGE:

S. 2863. A bill for the relief of Margarete Lewis; and

S. 2864. A bill for the relief of Waltraud Grete Schramm; to the Committee on the Judiciary.

By Mr. KNOWLAND:

S. 2865. A bill to authorize the acceptance by the Government of gifts to be used to reduce the public debt; to the Committee on Finance.

By Mr. MORSE (for himself, Mr. SPARKMAN, and Mr. LEHMAN):

S. 2866. A bill to amend the Small Business Act of 1953, as amended; to the Committee on Banking and Currency.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mrs. SMITH of Maine:

S. 2867. A bill for the relief of Izzie Holden; to the Committee on Post Office and Civil Service.

By Mrs. SMITH of Maine (by request):

S. 2868. A bill for the relief of Ethelyn G. Warren; to the Committee on the Judiciary.

By Mr. WILEY:

S. 2869. A bill to amend the Agricultural Act of 1949, as amended, so as to continue and increase the consumption of fluid milk by children in nonprofit schools of high school grade and under; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. WILEY when he introduced the above bill, which appear under a separate heading.)

By Mr. HOLLAND:

S. 2870. A bill to provide for research and technical assistance relating to the control of salt-marsh and other pest mosquitoes of public-health importance and mosquito vectors of human disease; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HOLLAND when he introduced the above bill, which appear under a separate heading.)

By Mr. THYE:

S. 2871. A bill to authorize the Secretary of Agriculture to establish policies and programs for the use of acreage voluntarily retired from production; to the Committee on Agriculture and Forestry.

By Mr. SPARKMAN (for himself and Mr. HILL):

S. 2872. A bill to provide that measurement prior to planting of cotton acreage allotments made at the request of farmers shall be without cost to them; to the Committee on Agriculture and Forestry.

By Mr. HUMPHREY (for Mr. MURRAY):

S. 2873. A bill for the relief of Francesco Longo; to the Committee on the Judiciary.

By Mr. SMATHERS:

S. 2874. A bill for the relief of Ethel Kallins; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina:

S. 2875. A bill to revise the Civil Service Retirement Act; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. JOHNSTON of South Carolina when he introduced the above bill, which appear under a separate heading.)

By Mr. MALONE (for himself and Mr. BARRETT):

S. 2876. A bill to amend the Domestic Minerals Program Extension Act of 1953 in order to strengthen national defense and to further extend the program to encourage the discovery, development, and production of certain domestic minerals; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. MALONE when he introduced the above bill, which appear under a separate heading.)

By Mr. NEUBERGER (for himself and Mr. MORSE):

S. 2877. A bill to revoke the license granted by the Federal Power Commission to the city of Eugene, Oreg., for a hydroelectric project in the upper McKenzie River area; to the Committee on Public Works.

By Mr. WILLIAMS (for himself and Mr. FREAR):

S. 2878. A bill to amend the act entitled "An act authorizing the State of Delaware by and through its State highway department to construct, maintain, and operate a toll bridge across the Delaware River near Wilmington, Del.," approved July 13, 1946; to the Committee on Public Works.

By Mr. BENNETT:

S. 2879. A bill to promote the dispersal of industrial facilities in the interest of national defense; to the Committee on Banking and Currency.

By Mr. DUFF:

S. 2880. A bill to provide for the ascertainment of claims of American citizens for spoliations committed by the French prior to the 31st day of July 1801; to the Committee on the Judiciary.

(See the remarks of Mr. DUFF when he introduced the above bill, which appear under a separate heading.)

By Mr. THURMOND:

S. 2881. A bill to direct the Secretary of Commerce to collect and publish annually statistics as to the number of certain types of textile looms in place and in operation on a State-by-State basis; to the Committee on Post Office and Civil Service.

By Mr. CARLSON:

S. 2882. A bill for the relief of Mrs. Geraldine Elaine Sim; and

S. 2883. A bill for the relief of Dr. Yong Whan Kim; to the Committee on the Judiciary.

By Mr. YOUNG (for himself, Mr. LANGER, Mr. THYE, Mr. HUMPHREY, Mr. MUNDT, Mr. MURRAY, Mr. KNOWLAND, and Mr. KUCHEL):

S. 2884. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture and Forestry.

By Mr. YOUNG (for himself, Mr. LANGER, Mr. THYE, Mr. HUMPHREY, Mr. MUNDT, Mr. CASE of South Dakota, Mr. MURRAY, and Mr. MANSFIELD):

S. 2885. A bill to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agriculture and Forestry.

By Mr. MAGNUSON:

S. 2886. A bill to amend paragraph 1629 of the Tariff Act of 1930 so as to provide for the free importation of tourist literature; to the Committee on Finance.

By Mr. EASTLAND (for himself and Mr. JENNER):

S. 2887. A bill to further protect and assure the privacy of grand or petit juries in the courts of the United States while such juries are deliberating or voting; to the Committee on the Judiciary.

By Mr. LANGER:

S. 2888. A bill for the relief of Elizabeth Dummer; to the Committee on the Judiciary.

By Mr. NEUBERGER (for Mr. MURRAY and Mr. SCOTT):

S. 2889. A bill providing for the preservation of certain records of the Department of the Interior pertaining to mineral lands or operations, mines, or minerals which were formerly held by the Reconstruction Finance Corporation, or any of its subsidiary corporations; to the Committee on Interior and Insular Affairs.

By Mr. MONRONEY (for himself, Mr. FULBRIGHT, Mr. ANDERSON, and Mr. DANIEL):

S. 2890. A bill to require disclosure on monthly gas bills of domestic gas consumers in the District of Columbia of the average rate paid by such consumers and the portion of that rate received by producers, pipelines, and the distributing company, respectively; to the Committee on the District of Columbia.

(See the remarks of Mr. MONRONEY when he introduced the above bill, which appear under a separate heading.)

By Mr. DANIEL:

S. 2891. A bill to amend section 709 of title 18 of the United States Code so as to prohibit the use by certain businesses of the initials "U. S." in the business or firm name or pictures of the Capitol Building and other public buildings of the United States in their advertising, and to increase the penalties for violation of such section; to the Committee on the Judiciary.

(See the remarks of Mr. DANIEL when he introduced the above bill, which appear under a separate heading.)

By Mr. SMITH of New Jersey (for himself, Mr. BRIDGES, Mr. BUSH, Mr. DIRKSEN, Mr. ALLOTT, Mr. DUFF, Mr. MARTIN of Pennsylvania, Mr. POTTER, Mr. PURTELL, Mr. COTTON, Mr. PAYNE, Mr. BENDER, Mr. THYE, Mr. BUTLER, Mrs. SMITH of Maine, Mr. SALTONSTALL, Mr. FLANDERS, Mr. CARLSON, Mr. AIKEN, Mr. CAPEHART, Mr. IVES, Mr. CASE of New Jersey, and Mr. BEALL):

S. 2892. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

(See the remarks of Mr. SMITH of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. KEFAUVER (for himself, Mr. O'MAHONEY, and Mr. ANDERSON):

S. J. Res. 112. Joint resolution to provide for the appointment of a chief special counsel and an assistant special counsel to represent the United States in litigation brought against the United States to recover damages under the so-called Dixon-Yates contract; to the Committee on the Judiciary.

(See the remarks of Mr. KEFAUVER when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. SPARKMAN:

S. J. Res. 113. Joint resolution to permit FHA Title I repair assistance to new homes damaged by major disasters; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. PASTORE:

S. J. Res. 114. Joint resolution to change the name of Bedloe's Island in New York Harbor to Liberty Island; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. PASTORE when he introduced the above joint resolution, which appear under a separate heading.)

AMENDMENT OF SMALL BUSINESS ACT OF 1953

Mr. MORSE. Mr. President, on behalf of myself, the Senator from Alabama [Mr. SPARKMAN], and the Senator from New York [Mr. LEHMAN], I introduce, for appropriate reference, a bill to amend the Small Business Act of 1953. This bill is designed primarily to provide additional disaster loan authority for the Small Business Administration. Under existing law that agency is limited to a ceiling of $25 million outstanding at any one time for disaster loans. This fund has been completely exhausted by loans made to homeowners and small-business men whose properties were destroyed or damaged in the disastrous hurricanes and floods of 1955. In fact, I understand that the Small Business Administration has made over $10 million in loans from the business loan fund which otherwise would have been disaster loans, if the disaster loan fund had not been exhausted.

This bill would combine the business loan fund—$150 million—and the disaster loan fund—$25 million—and increase this sum by $50 million, thus making a total combined fund of $225 million. This action will accomplish four purposes:

First. It will increase the total authorization for disaster loans and business loans by $50 million, and thereby restore the unusual drain on the authorization caused by the disasters of 1955.

Second. It will provide funds anticipated to be required by the recent floods in Oregon, California, and Nevada.

Third. It will provide a cushion of loan funds which may be needed in future disasters.

Fourth. It will combine the disaster loan fund and the business loan fund so that in an extreme emergency, such as we experienced in the fall of 1955, the agency will not be faced with an arbitrary ceiling on the loans which can be made to relieve adversities suffered by disaster victims.

The administration has proposed to solve this shortage of disaster loan money merely by combining the business loan fund and the disaster loan fund. This is not a satisfactory solution and might result in a shortage of funds for the regular small business loan program of the agency. To prevent the possibility of such a shortage, I propose to increase the authorization by $50 million.

I have also included an amendment to the basic law to specify that no disaster loan can bear interest at a rate greater than 3 percent. Although this maximum 3 percent interest rate for disaster loans was intended by the Congress in last year's amendments, the language of those amendments is not clear; and I think that the change which is in my bill is necessary.

In addition, I am offering language to correct some technical imperfections in the law which occurred in the rush of business during the closing hours of the last session. While these changes are not substantive in nature, and have not impaired the administration of the law, it is nevertheless desirable that they be made.

I do not look upon the disaster loan program of the Small Business Administration as an adequate solution to the suffering and property losses experienced by the residents of areas stricken by disasters. However, at the present time, this disaster loan program is the only program we have, and I hope that legislation granting an additional $50 million in loan authorization will be passed promptly by the Congress.

I send the bill to the desk and ask for its appropriate reference.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2866) to amend the Small Business Act of 1953, as amended, introduced by Mr. MORSE (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. MORSE. I yield.

Mr. BUSH. I did not quite get what the Senator said about the administration's attitude on the consolidation of the disaster and ordinary business loans.

Mr. MORSE. I do not consider the program adequate to meet the disaster problems of our country. It is the only loan program we have at the present time. I think we ought to combine the two loans and increase the amounts available for loans.

Mr. BUSH. Perhaps the Senator is aware of the fact that I introduced a bill on last Thursday to do exactly that. As I understand the bill of the Senator from Oregon, it would increase the amount only by $25 million.

Mr. MORSE. That is pretty important to the people who need the $25 million.

Mr. BUSH. I am not questioning that, but I thought the Senator said that the administration has opposed the consolidation of those loans.

Mr. MORSE. No, I did not say that.

Mr. BUSH. I am sorry. I misunderstood the Senator.

FUNDS FOR SCHOOL MILK PROGRAM

Mr. WILEY. Mr. President, I am glad to join in recommending to the Senate that in accordance with a request in President Eisenhower's farm message, the Congress take prompt action to provide supplemental funds to complete the special school milk program for the current fiscal year.

Because of rapid expansion, the program requires an additional $10 million, if it is to operate adequately through the end of the current year. And I am also recommending that, through the Committee on Agriculture and Forestry, the Agricultural Act of 1949, as amended, be quickly amended to increase the amount of funds for the program from $50 to $60 million for the 1955–56 year. The money is urgently needed to avoid a slowdown in the distribution of milk to the schools.

REASON FOR SUPPLEMENTAL FUNDS

There is ample justification for these additional funds. The rapid expansion of the program increased the number of schools participating in the program from 42,000 to 62,000—a 48 percent increase during the last 9½ months—March to mid-December—of 1955.

The expenditures which were at approximately $17 million level in the school year 1954–55, are estimated to exceed $50 million for 1955–56. The consumption of milk for the current year is estimated to be over 1.3 billion half pints of milk. This is a remarkable record.

Our whole Nation, of course, is deriving benefits from this program. The health of our school youngsters is vastly improved by the additional milk in their diet. This too, is a good commonsense way to dispose of our surpluses.

The dairy industry has pioneered in the school milk program. Prominent in the industry for its contribution to the program's success is the National Milk Producers' Federation, ably represented by Mr. E. M. Norton, secretary. Mr. Willis Tobler is legislative secretary of the federation.

LETTER FROM STATE EDUCATION DEPARTMENT

An excellent picture of the progress of the special school milk program in Wisconsin was sent to me this week from Mr. G. E. Watson, by Gordon W. Gunderson, supervisor of the school lunch program.

I request unanimous consent that an excerpt from this letter be printed, at the conclusion of my remarks in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

(See exhibit A.)

INTRODUCTION OF BILL TO EXPAND MILK PROGRAM

Mr. WILEY. At this time, I introduce, for appropriate reference, a bill to provide a larger amount of funds for the special school milk program during the coming 1956–57 school year. My bill proposes to increase the total amount of money allocated for the special school milk program from $50 million to $75 million. I may say incidentally that I regard this $75 million figure a minimum floor, not a maximum ceiling.

I respectfully urge early action on this bill, for two specific reasons: First, the schools now under the program need to be assured of a continued program, so that they may plan accordingly; and, second, new schools, or those not now under the program, need time to set up the machinery for participation in the 1956–57 program.

I hope the Senate will give this fine program its unanimous, bipartisan approval.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2869) to amend the Agricultural Act of 1949, as amended, so as to continue and increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, introduced by Mr. WILEY, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

EXHIBIT A

THE STATE OF WISCONSIN,
DEPARTMENT OF PUBLIC INSTRUCTION,
Madison, Wis., January 6, 1956.

The Honorable ALEXANDER WILEY,
United States Senate, Senate Office Building, Washington, D. C.

DEAR SENATOR WILEY:

* * * * *

As of January 5 there were 3,291 public schools of Wisconsin participating in the special school-milk program. The average daily attendance in these schools is 469,204 children. Since the total average daily attendance in all Wisconsin public schools is estimated at 538,000 children, you will note that approximately 87 percent of the children in average daily attendance are attending schools which are participating in the special school-milk program. Small rural schools located a long distance from a city or village, making it extremely difficult to obtain milk deliveries, are about the only schools which are not participating in the program at the present time.

To give you some idea of the increase in consumption of fluid milk since the inauguration of the special school-milk program, we can cite the following facts:

The highest milk consumption prior to the beginning of the school-milk program took place in March 1954, when children in public schools of the State consumed 2,807,982 half pints of milk.

In October 1954, after the start of the special school-milk program, 2,611,409 half pints of milk were consumed. Of this number, 2,111,522 half pints were used in the school-lunch program and 499,887 were used under the special school-milk program. This

was early in the year and the program had not as yet gained its full momentum.

In October of this year, 7,830,800 half pints were consumed. Of this number 2,375,800 were consumed in the school-lunch program and 5,455,000 were consumed under the special school-milk program. In other words, we used nearly 5 million more half pints of milk in October of this year than we did in the same month last year, and we anticipate that there will be a continuous increase until March when we usually have the peak participation in both school-lunch and special school-milk programs.

If the 7,830,000 half pints of milk consumed as a beverage in October were to be converted into manufactured dairy products, it would result in a production of 176,824 pounds of butter plus 294,707 pounds of powdered, skim milk (6 carloads of butter and 8 carloads of powdered milk) or 378,910 pounds of American Cheddar cheese (approximately 12 carloads). For the total school year, the above figures may be multiplied by 9.

In addition to the millions of half pints of fluid milk which will be diverted from manufactured products through the special school-milk program, the public schools of Wisconsin will use during the current school year about 753,000 pounds of butter, 402,000 pounds of American Cheddar cheese, and 139,300 pounds of powdered, skim milk, all of which will be donated from Government-owned surplus stocks. Donations of these items to institutions and for relief purposes will be in addition to the above.

Most of the children in Wisconsin's public schools are getting their half pint of milk at a cost of 1 cent and in numerous school districts the children are given the milk entirely free of charge. In these districts the difference between the cost of the milk and the reimbursement from Federal funds is paid out of school district appropriations. The cities of Appleton and Ashland and the village of Baldwin are typical examples of districts in which this practice is followed. In Baldwin the school board has provided a milk dispenser in the study hall so that the high-school children may go to the dispenser and help themselves to free milk at any time. This is in addition to all of the milk they wish to drink with their noonday lunch.

To give you some idea also of the tremendous progress under the special school-milk program this year over that of a year ago, I wish to give you the following examples using the month of October as the basis of comparison:

	October 1954 one-half pints	*October 1955 one-half pints*
Appleton	2,038	61,436
Eau Claire	28,432	84,426
Milwaukee	496,960	687,830
Ashland	15,400	36,640
Marinette	7,775	23,784
Fort Atkinson	6,900	24,669
Baldwin	1,941	10,790
Chippewa Falls	12,629	18,734

The above are but random samples of what has been taking place in the special school-milk program throughout the State.

We now have eight counties in which all of the public schools are participating, namely, Adams, Ashland, Buffalo, Florence, Forest, Jackson, Price, and Marinette.

As stated in Superintendent Watson's letter to Mr. Garber, Director of the Food Distribution Division of the United States Department of Agriculture, on December 14, Wisconsin will need at least twice as much money as has been tentatively allocated if we are to continue our special school-milk program at existing rates to the end of the school term.

Your sincere interest and cooperation is greatly appreciated.

Cordially yours,

G. E. WATSON,
State Superintendent.
GORDON W. GUNDERSON,
Supervisor, School Lunch Program.

RESEARCH AND TECHNICAL ASSISTANCE IN CONTROL OF CERTAIN MOSQUITOES

Mr. HOLLAND. Mr. President, I introduce, for appropriate reference, a bill to provide for research and technical assistance relating to the control of salt-marsh and other pest mosquitoes of public health importance and mosquito vectors of human disease.

I ask unanimous consent that a statement which I have prepared concerning this legislation be printed in the RECORD at this point.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 2870) to provide for research and technical assistance relating to the control of salt-marsh and other pest mosquitoes of public health importance and mosquito vectors of human disease, introduced by Mr. HOLLAND, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The statement presented by Mr. HOLLAND is as follows:

STATEMENT BY SENATOR HOLLAND

At the request of the Florida State Board of Health and the chairman of the legislative committee of the American Mosquito Control Association, Inc., I have introduced today mosquito control legislation. Also, the governing council of the American Public Health Association, at its annual meeting in Kansas City on November 16, 1955, adopted the following resolution on this general subject:

"RESEARCH ON PEST MOSQUITOES

"Whereas increasing mosquito problem arising from the further development of resort areas, especially coastal areas affected by salt marsh mosquitoes, of irrigation and other water resource undertakings, and the suburbanization of the United States, has been a cause of important concern to many public health agencies; and

"Whereas the conference of State and Territorial health officers has expressed concern on behalf of official health agencies by passage of a resolution requesting a comprehensive program of research, demonstration, and technical consultation in salt marsh mosquito control by the United States Public Health Service: Therefore be it

"*Resolved*, That the American Public Health Association recommends that a program of research, demonstration, and technical consultation in control of mosquito breeding in salt marshes, irrigation systems, and other water resources developments, be undertaken by the United States Public Health Service and by State health departments."

I am informed that a similar resolution was adopted by the State and Territorial health officers at their annual meeting in Washington on November 8, 1955.

STATE AND LOCAL GOVERNMENTS TO BEAR PRIMARY RESPONSIBILITY

This proposed legislation recognizes the fact that the eradication and control of mosquitoes is and should be primarily the duty and responsibility of State and local governments but establishes a policy and program of aiding and supporting research carried on for the purpose of devising methods of extermination and control of mosquitoes, and provides for Federal technical facilities and services to aid States in the formulation and execution of State and local mosquito research and control programs. This program would be carried out by the Surgeon General, acting under the supervision and control of the Secretary of Health, Education, and Welfare.

This legislation, if enacted, would require the Surgeon General to—

1. Establish a program to promote and encourage cooperative activities by State and local governments in the extermination and control of mosquitoes;

2. Collect and disseminate information relating to mosquitoes and the extermination and control thereof;

3. Conduct within the Public Health Service technical research and demonstrations for the purpose of developing methods for the extermination and control of mosquitoes, and aid and support State and local governments, other public agencies, and private agencies and institutions in the conduct of such research and demonstrations; and

4. Make available to State and local governments, other public agencies and interested private agencies and institutions, the results of the surveys, studies, investigations, or demonstrations which may be carried out by the Surgeon General and which relate to mosquitoes and the extermination and control thereof.

For the purposes of carrying out the provisions of this bill, there is included an authorization for an annual appropriation to the Department of Health, Education, and Welfare of a sum not to exceed $2.8 million per year beginning with fiscal year 1957, and to the Department of Agriculture, for the purpose of carrying on investigations of the effects produced on livestock by mosquitoes of a sum not to exceed $200,000 per year beginning with fiscal year 1957.

Mr. President, history records the fact that during the early development of the United States, and particularly in various southern areas, epidemics of mosquito-conveyed yellow fever and malaria retarded the efforts of our forefathers, sometimes causing panic and, as a matter of fact, even wiping out some small cities. Yellow fever was eradicated in this country years ago. Malaria remained for many, many years a scourge in many areas. Now, thanks to a cooperative mosquito-control program between the States and the Federal Government, available facts indicate that, for all practical purposes, malaria has been eradicated in the United States.

Some species of mosquitoes still present a public health and comfort problem in certain areas of the United States. To an astonishing degree, these dreaded insects are retarding the development and expansion of industry, housing developments, farming, and recreational facilities, and the time has now come, in my judgment, to launch an all-out effort to eradicate this pest by a Federal and State cooperative program for research and technical assistance.

Millions and millions of dollars are spent annually in an effort to control the mosquito, and unfortunately the great part of this is for temporary control only. I think it will amaze many Members of the Senate to know just how much money is spent each year in the United States for mosquito-control activities. In order to clearly show what these costs have been in the past, I call attention to a table entitled "Costs of Mosquito-Control Activities in the United States," together with explanatory notes,

which has been supplied to me by the Florida State Board of Health:

Costs of mosquito control activities in the United States [1]

State	Expenditures		
	State	Local	Total
Arkansas		$443,750	[2] $443,750
Arizona		34,400	[3] 34,400
California	$696,766	2,547,282	[4] 3,244,048
Connecticut	45,000		[5] [6] 45,000
Delaware	50,000	7,500	[3] 57,500

Total	2,832,595	11,058,573	13,891,168
Less costs of controlling vectors other than mosquitoes			1,311,150
Total for mosquitoes (local and State funds)			12,580,018
Calculated total for entire United States (local and State funds)			17,613,072
Estimated costs (Federal, industrial, individual)			30,000,000
Total			47,613,072

[1] The costs for State and local mosquito control activities were obtained principally from the last (1952) nationwide survey made by the Communicable Disease Center of mosquito control activities. More current or more complete data are included where known. Current data would doubtless show increases for many of the States. Recent information indicates a great increase in interest in, as well as control activities of, salt-marsh mosquitoes. Further, these figures do not include the salary, travel, and general operations costs of State health and other department organizations which spend full time on mosquito or at least vector control.

In some States all of the work being conducted on general mosquito control may not be known to State departments of health. Numerous communities have developed control programs independent of State assistance.

Data were available from only 29 States. From this figure there was calculated a cost for the entire United States. Allowances were made for the fact that expenditures in Florida and California greatly exceeded the national average for States.

The figure of $30 million estimated for other costs of mosquito control includes funds expended by military establishments in their many control programs, by the numerous industries which find it necessary to maintain operations, by individuals for the purchase of household insecticide and repellents, and by agriculturists for protection of their animals. Indirect costs of the mosquito problems, such as required better housing for protection against mosquitoes, medical expenses resulting from primary and secondary infections following mosquito attacks, time lost, and real-estate values depressed as well as area development retarded or prevented, and others, probably make this the most conservative of the figures shown.

[2] Based on 1953 data.
[3] Based on 1952 data.
[4] Based on 1954 data.
[5] Based on 1955 data.
[6] Figure for salt-marsh mosquito control only.
[7] Based on 1952 and 1955 data.
[8] Based on 1950 data.

It will be noted that definite data were available from only 29 States, and from this information was estimated the cost for the entire United States. The calculated total of local and State funds for the entire United States is $17,613,072 and the estimated costs to individuals, industry, and the Federal Government is $30 million, making a total for mosquito control activities of $47,613,072. The figure of $30 million estimated for Federal, industry, and individual expenditures includes funds expended by military establishments and their many control programs, by the numerous industries which find it necessary to maintain mosquito control operations, by individuals for the purchase of household insecticides and repellents, and by agriculturists for protection of their animals. Indirect costs of the mosquito problem, such as required better housing, medical expenses resulting from primary and secondary infections following mosquito attacks, time loss and real estate values depressed, as well as area development retarded or prevented, and others, as stated in the explanatory notes, probably make this the most conservative of the figures shown in the chart.

From this chart it is quite evident that local units of government are working diligently to eradicate this pest, but it is quite clear that a tremendous amount of basic information is needed if we are to permanently eradicate it, and those who are most familiar with this problem feel that it can be ultimately eliminated only if the Federal Government will furnish leadership, knowledge and skill in an all-out effort to do so.

SALT-MARSH MOSQUITO

There are many types of mosquitoes found in the United States, and one of the most prevalent and most annoying is the salt-marsh mosquito, which breeds along the Atlantic, gulf, and Pacific regions in the coastal marshes, swales, mangrove swamps, and depressions flooded by high tides and inundated by rainfall.

Although many millions of dollars have been spent in an effort to eliminate the salt-march mosquito along our coasts, last year was one of the worst mosquito years experienced in these areas for many years. It is my understanding from those who are closest to the mosquito problem in Florida that the salt-marsh mosquito problems can be expected to become much worse in the coastal areas if we do not initiate immediately an active control problem because the mean sea level has been shown to be rising at the rate of three-tenths of a foot each 10 years, and a significant population migration is now under way to coastal areas of the southern and western regions of the United States.

Last year the Atlantic coast from Maine to Florida suffered severely from the salt-marsh mosquito because of a succession of Atlantic storms which caused abnormally high tides that inundated large breeding areas. Even inland cities from 40 to 50 miles distance from the coast suffered because of the long flight range of this species of mosquito. Naturally the coastal cities are doing everything possible to help themselves because of their great importance as recreational areas for all the people of the United States, but they need assistance from the Federal Government in collecting much-needed basic information.

FLOODWATER MOSQUITO

The problem of the floodwater mosquito is becoming much more critical each year because of the increasing acreage being irrigated for cultivated crops or pasture lands, especially in the Western States, and this trend will continue until a concerted effort is made to wipe out the mosquitoes. Several Western States have suffered because of epidemics of encephalitis, which is transmitted by mosquitoes, and this disease is much feared because of its high mortality rate and the permanent damage it often causes to brain cells.

Obviously this difficult problem can be expected to increase in direct proportion to the amounts of new land brought under irrigation in the coming years. Of course we must increase this expansion, but as we do so, it it imperative that we increase our efforts to control the floodwater mosquito which accompanies it.

MOSQUITOES ASSOCIATED WITH SEWAGE AND INDUSTRIAL WASTES

There are still other species of mosquitoes associated with sewage and industrial wastes which breed prolifically in contaminated waters containing organic matter from canning plants and other types of industrial wastes and the discharge waters from sewage-treatment plants.

The ever-increasing problems created by mosquitoes of various types and in various localities of the United States require an intensive and coordinated all-out attack by Federal, State, and local governments. The legislation I have introduced today is designed to provide a comprehensive program of basic and operational research, demonstrations, and technical consultations to control the salt-marsh and other pest mosquitoes of public-health importance and mosquito vectors of human disease.

Mr. President, there is no doubt that mosquito problems have become alarmingly serious and that they will continue to increase unless a concerted effort is made to eradicate the various species of the mosquito. As I have stated previously, the States and local governments do not ask the Federal Government to shoulder this task alone but recognize that the primary responsibility rests with them and merely ask that the Federal Government provide leadership in the fight by conducting research activities and cooperating with the local units of government in their own efforts. The suggested sum of $3 million a year is relatively small in comparison with the amounts of money spent now by the Federal Government, by individuals, industry, and local governments in an effort to rid themselves of a pest which is not only annoying but which jeopardizes the health of millions of people. I sincerely hope that the Congress will recognize the urgent need for this legislation and will enact it into law at an early date in order to initiate, as soon as possible, a program which those who know most about the situation feel will ultimately eradicate one of the greatest pests known to man.

REVISION OF CIVIL SERVICE RETIREMENT ACT

Mr. JOHNSTON of South Carolina. Mr. President, the civil service retirement and disability program was established in 1920 to furnish retirement, death, and disability benefits to employees of the Federal Government. Since that time the act has been amended many times until today it is one of the most complex measures on the statute books. The present law is difficult to administer, numerous inequities have developed and grown over the years, and full understanding of the law escapes all except the few who work with it on a full-time basis.

In recognition of these facts, the 82d Congress enacted Public Law 555—approved July 16, 1952—authorizing the establishment in the executive branch of a Committee on Retirement Policy for Federal Personnel to conduct an exhaustive study of this matter that is of such grave importance to well over 2 million Federal employees, and report thereon to the Congress. The report of that Committee was submitted during

the 1st session of the 84th Congress. Since that time the report and a multitude of related material has been the subject of long and careful study.

I introduce, for proper reference, a bill to accomplish a complete overhaul of the Civil Service Retirement Act. However, of vastly greater importance than the accomplishment of this highly desirable objective is the fact that the bill—

First. Provides a more favorable factor for the computation of retirement benefits for employees generally;

Second. Permits optional retirement after 30 years of service regardless of age;

Third. Reduces the penalty—or reduction—in annuities in the case of employees who are under the age of 60 at the time of retirement;

Fourth. Extends and increases survivorship benefits to more closely parallel those that accrue to employees of private industry under the social-security program; and, finally, the bill—

Fifth. Removes numerous inequities now existing in a number of areas.

I propose to ask for early hearings on the bill, and I hope that it may be possible for the bill to be considered and favorably acted upon in the Senate at a very early date.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2875) to revise the Civil Service Retirement Act, introduced by Mr. JOHNSTON of South Carolina, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

IN THE INTEREST OF THE NATIONAL ECONOMY AND NATIONAL DEFENSE — DEVELOPMENT AND PRODUCTION OF CERTAIN DOMESTIC MINERALS

Mr. MALONE. Mr. President, on behalf of myself, and the Senator from Wyoming [Mr. BARRETT], I introduce, for appropriate reference, a bill to amend the Domestic Minerals Program Extension—Malone-Aspinall—Act of 1953 in order to strengthen national defense and to further extend the program to encourage the discovery, development, and production of certain domestic minerals.

EXTEND THE 1953 MALONE-ASPINALL ACT

The bill would extend the 1953 Malone-Aspinall Act providing for the purchase of 7 critical and strategic minerals from American producers for 5 years following the present termination dates. The minerals are tungsten, manganese, chromite, mica asbestos, beryl, and columbium-tantalum.

VITAL TO NATIONAL ECONOMY AND DEFENSE

The extension is vital to national defense and to the national economy and is the only solution to maintaining a sound mobilization base in strategic minerals pending repeal of the 1934 Trade Agreements Act which transferred the constitutional responsibility of Congress to regulate the national economy and foreign trade to the executive branch which in turn transferred this vital responsibility to the General Agreements on Tariff and Trade at Geneva, Switzerland.

The proposed legislation continues unit prices established in the Domestic Minerals Program Extension Act of 1953, and in effect continues the rate of purchases the Government is authorized to make from domestic producers.

To maintain the going concern production of critical materials vital to our national defense and our national economy under our wage standard of living there must be a flexible duty or tariff based on fair and reasonable competition, or a guaranteed unit price making up the difference in our wage-living standard and in the chief competitive nation on each product.

I ask unanimous consent that the bill, together with the quarterly report of purchases under domestic purchase regulations, as of September 30, 1955, prepared by the General Services Administration, be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill and report will be printed in the RECORD.

The bill (S. 2876) to amend the Domestic Minerals Program Extension Act of 1953 in order to strengthen national defense and to further extend the program to encourage the discovery, development, and production of certain domestic minerals, introduced by Mr. MALONE (for himself and Mr. BARRETT), was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this act may be cited as the "Domestic Minerals Program Extension Act of 1956."

SEC. 2. Section 3 of the Domestic Minerals Program Extension Act of 1953 (67 Stat. 417) is amended to read as follows:

"SEC. 3. In accordance with the declaration of policy set forth in section 2 of this act, the termination dates of all purchase programs designed to stimulate the domestic production of tungsten, manganese, chromite, mica, asbestos, beryl, and columbium-tantalum-bearing ores and concentrates and established by regulations issued pursuant to the Defense Production Act of 1950, as amended, shall each be extended (1) an additional 5 years beyond the termination date of such program under the extension provided for in accordance with the provisions of this act prior to its amendment by the Domestic Minerals Program Extension Act of 1956, or (2) until such time prior to the termination of such 5-year extension if and when there have been purchases under such extension equal in quantity to the purchases under such program prior to its extension under such act of 1956: *Provided*, That this section is not intended and shall not be construed to limit or restrict the regulatory agencies from increasing the quantity of materials that may be delivered and accepted under such program as permitted by existing statutory authority: *Provided further*, That the extended termination date provided by this section for such critical materials purchase program shall not apply to the purchase of ores and concentrates of foreign origin."

The report presented by Mr. MALONE is as follows:

General Services Administration activities under the Defense Production Act, as amended—quarterly report of purchase under domestic purchase regulations as of Sept. 30, 1955

(Pursuant to sec. 4, Public Law 206, 83d Cong., the tabulation below details the quarterly and cumulative purchase under purchase regulation noted)

Regulation	Expected completion dates as of December 1955	Termination date	Units	Quantity			
				Program limitation	Purchases [2] during quarter	Amount	Cumulative purchases [1] through end of quarter
Asbestos	Oct. 1, 1956	Oct. 1, 1957	Short tons, crude No. 1 and/or crude No. 2, asbestos	1,500	130		1,093
			Short tons, crude No. 3		84		540
						1,494,690	
Beryl	Dec. 31, 1956	June 30, 1957	Short dry tons, beryl ore	1,500	66	421,545	774
Chrome	June 1957	do	Long dry tons, chrome ore and/or chrome concentrates	200,000	6,152	9,104,279	93,985
Columbium-Tantalum [3]	Dec. 31, 1955	Dec. 31, 1958	Pounds contained combined pentoxide	15,000,000	1,648,748	50,766,526	13,446,027
Manganese	June 30, 1958 [3]						
Total						(32,616,119)	
Butte-Phillipsburg		June 30, 1958	Long ton units, recoverable, manganese	6,000,000	81,416	2,597,380	1,809,417
Deming		do	do	6,000,000	1,199,794	8,587,903	4,459,646
Wenden		do	do	6,000,000	0	10,743,179	6,108,316
Domestic small producers		do	Long ton units, contained manganese	19,000,000	998,493	10,687,655	4,493,499
Mica	June 1957	June 30, 1957	Short tons, hand-cobbed mica or equivalent	25,000	714	9,189,973	6,999
Tungsten	June 1956	July 1, 1958	Short ton units, tungsten trioxide	3,000,000	223,073	135,786,244	2,153,101
						264,359,382	
Balance in ODM fund Sept. 30, 1955						435,557,000	

[1] Quantities represent deliveries.

[2] Columbium-tantalum regulation provides for both domestic and foreign purchases. Report includes both. Foreign forward commitments have caused the program limitation to be exceeded. No further purchases of foreign ore or concentrates will be made.

[3] The buying stations at Deming and Wenden have already been closed as the goals have been met. Butte-Phillipsburg and Domestic Small Producers, which means a carlot program, undoubtedly will go to 1958 without the goals having been met.

NOTE.—Under Public Law 206 purchases were extended 2 years beyond the time limits in the purchase regulations or until the goals were met.

RETURN TO CONSTITUTION

Mr. MALONE. I will shortly introduce proposed legislation to return to the specific provisions of the Constitution of the United States in the regulation of foreign trade and the national economy, article 1, section 8, and in that event no special purchase legislation would be necessary.

MINERALS INDUSTRY—INSTRUMENT OF FOREIGN POLICY

Under the Trade Agreement Act, the State Department has made our critical minerals industry an instrument of foreign policy. Distant fields always look greener and the welfare of hundreds of millions abroad is of greater concern than the economic welfare of our own people at home.

REVOCATION OF LICENSE FOR HYDROELECTRIC PROJECT IN UPPER McKENZIE RIVER AREA, OREGON

Mr. NEUBERGER. Mr. President, I am about to introduce a bill, and I ask unanimous consent that I may speak on it in excess of the 2 minutes allowed under the order which has been entered.

The VICE PRESIDENT. Without objection, the Senator from Oregon may proceed.

Mr. NEUBERGER. Mr. President, in this crowded and turbulent age, we have all too few realms where mankind can escape from the turmoil of civilization.

Such an area is the beautiful upper McKenzie River watershed, in my native State of Oregon. Now, however, the Federal Power Commission has licensed the Eugene Water and Electric Board to proceed with a hydroelectric-power project which would disturb much of the McKenzie's scenic and recreational value. Because this power project would, in my opinion, be of far less advantage to the Pacific Northwest than the recreational assets it might destroy, I am introducing proposed legislation, for appropriate reference, to revoke and cancel the license issued by FPC to the Eugene Water Board.

I am happy to say that I am being joined in sponsorship of this bill by my distinguished senior colleague from the State of Oregon [Mr. MORSE].

Every generation of Americans must decide whether exploitation of a natural resource is more advisable than preservation of that resource for its scenic and esthetic merits. This question confronts us almost daily. Sometimes we decide that recreation must give way to commercial exploitation. But at Beaver Marsh on the upper McKenzie, I believe every logical argument dictates the protection of scenery and recreation, and definitely against exploitation.

Let me explain my reasons for this position.

The Beaver Marsh project would generate only 30,000 kilowatts of peaking power. This is far less than half the output of one single generator at a great Columbia River project like McNary Dam. Despite these facts, the Eugene Water & Electric Board had one of its staff officials testify at Senate Interior Committee hearings, last April, against construction of the high Federal dam at Hells Canyon on the Snake River, which would add 914,000 kilowatts of energy to the Bonneville Power Administration system.

Despite the relatively low power production of the Beaver Marsh project, it would endanger the water level of beautiful Clear Lake, one of Oregon's famous habitat for cutthroat trout and for rainbow trout. The project also would shut off and on, like a spigot, the majestic Koosah and Sahalie Waterfalls, which are a short distance downstream from the outlet of Clear Lake.

OUTDOOR GROUPS OPPOSE BEAVER MARSH PROJECT

Ray Atkeson, one of the most famous of western photographers, has told me that the Beaver Marsh project would imperil an area which he considers one of the most lovely and scenic in the Nation; and Mr. Atkeson has become famous as an authority on natural beauty, through his magnificent outdoor photographs.

In protesting construction of the Beaver Marsh project, Rollin E. Bowles, president of the Izaak Walton League of Oregon, told the Federal Power Commission examiner:

> Under natural conditions the minimum discharge of water from Clear Lake into the McKenzie River is approximately 25 cubic feet per second. The proposal to reduce this amount of water to less than one-tenth of the present volume during the period from May to October, a period when the area is most heavily utilized by recreation seekers, will mean to all intent and purposes the destruction of the scenic grandeur of the magnificent Sahalie and Koosah Falls. * * *
>
> There is at present and for many years past a substantial industry located on the upper McKenzie River, devoted to the proposition of making the area available to the many recreation seekers and fishermen who come there from all parts of the world, many of whom have been coming there annually for a substantial number of years. Among this group is ex-President Herbert Hoover to name one of many. * * *
>
> The Beaver Marsh powerhouse will have an installed capacity of 30,000 kilowatts, but since it is a peaking operation, it will produce on the overall far less than that amount of power constantly. In fact, the applicant does not feel that it will be able to deliver at the load center more than 8,000 kilowatts on a constant basis. In the overall picture, 8,000 kilowatts is an insignificant amount of power to be wrung out of a stream of the character of the McKenzie, at such a great loss to the general public, and at such tremendous expense in construction.

Mr. President, I want to indorse what Mr. Bowles had said. His warnings are valid. I subscribe to them thoroughly.

This is no Johnny-come-lately cause with me. I was born in Oregon. I had visited the upper McKenzie before I quit my Boy-Scout days. My wife and I have enjoyed its scenic magnificence, its impressive majesty. We do not want to see its lakes lowered, its fish destroyed, and its waterfalls dried up, for the sake of 8,000 firm kilowatts and 30,000 part-time kilowatts.

And it is certainly grim irony that this is being done by a Eugene water and electric board which opposed high Hells Canyon Dam, with 914,000 firm kilowatts. What kind of organization would sacrifice 914,000 firm kilowatts at Hells Canyon, where the famous biologist, Dr. Ira Noel Gabrielson, of the Wildlife Management Institute, says there would be no peril to wildlife and scenery, and yet will jeopardize the fisheries and foaming cataracts of the upper McKenzie to secure only 8,000 firm kilowatts? Mr. President, I say "No" to the Beaver Marsh project—a thousand times "No."

LETTER TO FPC URGED PROTECTION OF SCENIC VALUES

It was long my firm conviction that the Beaver Marsh project was not in the public interest. Accordingly, on July 18, 1955, I addressed to the Chairman of the Federal Power Commission a letter protesting any decision to approve by a license this proposed project. I ask unanimous consent, Mr. President, that a copy of my letter to Mr. Kuykendall, of the Federal Power Commission, appear in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> UNITED STATES SENATE,
> COMMITTEE ON INTERIOR
> AND INSULAR AFFAIRS,
> *July 18, 1955.*
>
> Hon. JEROME K. KUYKENDALL, *Chairman,*
> *The Federal Power Commission,*
> *Washington, D. C.*
>
> DEAR MR. KUYKENDALL: As a Senator from Oregon, I should like to express my unequivocal opposition to any licensing of either a publicly-owned system or a private power company for hydroelectric development in the Beaver Marsh area of the upper McKenzie River. This question is now before an examiner (Francis Hall) of the FPC for decision.
>
> I base my opposition on one major premise. It is my firm conviction that any power production to result from such a project would not justify the loss in scenic, wildlife and recreational values on one of the most picturesque streams in North America. I disagree with the letter of the Interior Department to you from Assistant Secretary Aandahl, claiming that conservation interests would not be adversely affected by the Beaver Marsh development.
>
> Although a comparatively short river, the McKenzie is unparalleled in what it offers people who love the outdoors. I doubt if the Beaver Marsh power project can be undertaken without substantially impairing the McKenzie's recreational attractions. The marvelous waterfalls at Koosah and Sahalie will be vastly reduced in volume. The unique fish population of Clear Lake, a part of the McKenzie watershed, will be hard put to survive if the lake is tapped for water-power production. The food for all aquatic life is certain to be imperiled as the water level of the McKenzie system is altered.
>
> When we consider the enormous amounts of energy still to be generated at major sites in the Columbia River Basin—sites such as Hells Canyon and John Day—it is obvious to me that the comparatively small amount of power to be generated by the Beaver Marsh project would not warrant the damage to be done to the McKenzie and its waterfalls and fish life. Furthermore, from the standpoint of power consumers, I believe that additional kilowatts generated on the main stem of the Columbia and the Snake will be far cheaper than any energy to be produced on the upper McKenzie. The entire Beaver Marsh project would yield only 30,000 kilowatts of power. This is less than one generator at a plant like Grand Coulee, Hells Canyon, or John Day.
>
> For all these reasons, I urge the Federal Power Commission not to grant a license either to a public or private electrical system for the development of the Beaver Marsh project on the upper McKenzie River of Oregon. I am convinced that this realm can

more meritoriously be used for the enjoyment of outdoor recreation than for the manufacture of hydroelectric power.

With good wishes, I am,

Sincerely,

RICHARD L. NEUBERGER,
United States Senator.

Mr. NEUBERGER. Mr. President, it is well for us to remember the lesson which Switzerland learned long ago. That little nation in the Alps realized that such resources as magnificent vistas and wildlife, left untrammelled by commercialism, could gain far more for Switzerland financially than any amount of exploitation or destruction of those resources. The Swiss have been able to develop necessary hydroelectric power without abandoning this priority. In Oregon we have seen a marvelous river like the Clackamas lose much of its recreational value through rather reckless commercial use. Let us avoid this mistake on the McKenzie. Let us remember that the tourist trade is Oregon's third largest industry, exceeded only by lumber and agriculture.

I repeat, Mr. President, that we in Oregon should depend upon the untapped hydroelectric reserves still lurking in the main reaches of the Columbia and Snake Rivers for most of our new power supply. Let us leave for fisheries, scenery, recreation, and just plain esthetic appeal a lilting, murmuring stream like the upper McKenzie. This relatively small river is more adapted, anyway, to fishing, to white-water boating, and to sightseeing than it is to being siphoned off for conversion in the penstocks of a powerplant. I feel certain that such Oregon communities as Springfield, McKenzie Bridge, and even Eugene itself, will suffer adversely, in the long run, if we sacrifice the McKenzie's tourist-trade assets on the skimpy altar of 8,000 kilowatts of full-time power and 30,000 kilowatts of part-time energy.

How can we justify such a sacrifice when we are abandoning the huge 914,000-kilowatt development at Hells Canyon? Such logic does not make sense from any standpoint of the national, regional, or local interest.

I wish to emphasize, Mr. President, that Secretary of the Interior Douglas McKay has announced that he, personally, is definitely opposed to the Beaver Marsh project, although his Interior Department has approved it. I object to this political run-around, by which the Secretary tries to absolve himself with the conservationists, while his Department accedes to the wishes of the Oregon State government, and the Eugene water board and approves the construction which would imperil the scenery of the upper McKenzie.

The American people like men in public life who take one position at a time on the issues.

My position on the Beaver Marsh project is, and always has been, that it is adverse to the welfare of the State of Oregon and of the Nation. Therefore, I am introducing this bill to cancel the FPC license which allows the undertaking of the project.

I ask unanimous consent that the bill may be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2877) to revoke the license granted by the Federal Power Commission to the city of Eugene, Oreg., for a hydroelectric project in the upper McKenzie River area, introduced by Mr. NEUBERGER (for himself and Mr. MORSE), was received, read twice by its title, referred to the Committee on Public Works, and ordered to be printed in the RECORD as follows:

Be it enacted, etc., That the license, granted by the Federal Power Commission under the provisions of the Federal Power Act to the city of Eugene, Oreg., acting by and through its Eugene Water and Electric Board, to construct, operate, and maintain a hydroelectric project (known as the Beaver Marsh project) in and along the McKenzie River in Lane and Linn Counties, Oreg., is hereby revoked.

INDUSTRIAL DISPERSION

Mr. BENNETT. Mr. President, I introduce, for appropriate reference, a bill to promote industrial dispersion in the interest of national defense. I also ask unanimous consent that the bill appear at this point in my remarks. I invite any of my colleagues who may so wish to join in cosponsoring this bill.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2879) to promote the dispersal of industrial facilities in the interest of national defense, introduced by Mr. BENNETT, was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. BENNETT. I wish to make a few remarks concerning this proposed legislation. For some time I have been very concerned over the concentration of American industry which makes it vulnerable in the event of enemy atomic attack. Because of this concern I introduced a bill during the last session which would have established a special commission to study the problem of industrial dispersal and make recommendations to Congress, the executive department, and industry. This commission was recommended by Mr. Flemming, Director of the Office of Defense Mobilization. The commission idea also has the support of various other groups. I believe such a study would still be wise; but in view of the rapidity with which international events are moving, it seems only prudent for Congress to set forth a policy on industrial dispersal without further delay.

In this connection, I call to the attention of my colleagues last week's announcement by the Secretary of Defense, Director of the Office of Defense Mobilization, and the Administrator of Civil Defense of a broad new program for non-military defense. This resulted from a review of Project East River, a 1952 study of this problem. One of the conclusions of the review committee was that our progress in decentralizing our industry has been very disappointing. The committee concluded that leadership in the field of industrial dispersion is essentially a Federal problem and called for increased attention and action to meet this challenge. Underlining that recommendation is the grim assertion that the intercontinental ballistic missile is a likely reality within 6 to 10 years.

For some time, of course, we have had this partial program of dispersal. But it has suffered from a lack of congressional interest and support. The Defense Department has encouraged dispersal where it could. In November, the Department of Defense issued a directive on dispersal. This was a laudable move. However, it still seems imperative to me that Congress assert itself in this vital area. The bill which I have just introduced would declare the policy of Congress and would require the Defense Department to take cognizance of the dispersal factor in the construction of any new facilities—giving adequate attention, of course, to cost, economic dislocation, and delay.

It is noteworthy that the Air Force has recently announced a policy on industrial production readiness. Within the policy, weapons and material of the most important type, which would be of the highest value in an emergency, have been called category A weapons. The Air Force will apparently strive to establish at least two sources of supply for such weapons—one of which must be located in a dispersed site. Production amid disaster is the goal of the Air Force. This new policy is also commendable, but it should be underwritten with a declaration of congressional policy which would give it the impetus needed in this critical effort to prepare ourselves to survive an enemy attack.

Up to now in my remarks I have assumed most everyone knows that our industry is concentrated. If anyone doubts that sad strategical fact, here are a few examples of the tempting targets we present to an enemy as revealed by several separate studies.

Sixty percent of America's industrial production lies in a "heartland" running from Illinois to lower New England. With the fall-out problem being what it is, this entire area could be blanketed with destruction. Similarly, 45 percent of this Nation's industry is within range of submarine launched missiles. Further, 77 percent of the Nation's total coke capacity, 82 percent of our iron capacity, 73 percent of our ingot capacity are contained within 10 districts. One H-bomb exploded near the center of each district would severely damage these vital capacities. Only two of these H-bombs would be required to take out one-third of the Nation's total steelmaking capacity. Four H-bombs could destroy more than 40 percent of our petroleum refining capacity, and 46 percent of our petroleum chemistry plants. In the Great Lakes region, for example, are to be found 47 percent of the Nation's electrical machinery manufacturing and 40 percent of the nonelectrical machinery production. Saturation nuclear bombing of this area could prove disastrous for dependent industries.

Examples might be multiplied. I realize, of course, that there are practical limits on dispersal. My concern is,

however, that we do all we can. Certainly, a minimum contribution to dispersal would be to steer new critical facilities in which the Government has a financial interest into areas where we would not be pyramiding vital industries. That is the objective of this bill.

As we strive to maintain our Armed Forces in top fighting trim, we should also be very concerned with the retaliatory and recuperative powers of our industry which stands behind our military might. Soviet technological advances underline with unparalleled urgency the problem of defense. Dispersal is not the whole answer to our defense problem but it must be a part of any realistic overall program of national defense. I urge my colleagues to consider this measure carefully.

ASCERTAINMENT OF CLAIMS OF AMERICAN CITIZENS FOR CERTAIN FRENCH SPOLIATIONS

Mr. DUFF. Mr. President, I introduce, for appropriate reference, a bill to provide for the ascertainment of certain claims of American citizens for spoliations committed by the French prior to the 31st day of July 1801.

This bill does not validate any claim or admit liability of the United States to pay such claim.

The bill merely confers jurisdiction upon the court of claims of the United States for a period of 1 year from enactment to hear certain claims. Jurisdiction is limited to those claims which have heretofore been presented to the court under the act of 1885 and which have never been dismissed.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2880) to provide for the ascertainment of claims of American citizens for spoliations committed by the French prior to the 31st day of July 1801, introduced by Mr. DUFF, was received, read twice by its title, and referred to the Committee on the Judiciary.

THE ADMINISTRATION'S AREA DEVELOPMENT PROGRAM

Mr. SMITH of New Jersey. Mr. President, on behalf of myself, the senior Senator from New Hampshire [Mr. BRIDGES], the senior Senator from Connecticut [Mr. BUSH], the senior Senator from Illinois [Mr. DIRKSEN], the Senator from Colorado [Mr. ALLOTT], the junior Senator from Pennsylvania [Mr. DUFF], the senior Senator from Pennsylvania [Mr. MARTIN], the Senator from Michigan [Mr. POTTER], the junior Senator from Connecticut [Mr. PURTELL], the junior Senator from New Hampshire [Mr. COTTON], the junior Senator from Maine [Mr. PAYNE], the Senator from Ohio [Mr. BENDER], the Senator from Minnesota [Mr. THYE], the senior Senator from Maryland [Mr. BUTLER], the senior Senator from Maine [Mrs. SMITH], the Senator from Massachusetts [Mr. SALTONSTALL], the junior Senator from Vermont [Mr. FLANDERS], the Senator from Kansas [Mr. CARLSON], the senior Senator from Vermont [Mr. AIKEN], the Senator from New York [Mr. IVES], my colleague, the junior Senator from New Jersey [Mr. CASE], the junior Senator from Maryland [Mr. BEALL], and the Senator from Indiana [Mr. CAPEHART], I introduce, for appropriate reference, a bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes. I ask unanimous consent to speak longer than the two minutes allowed under the order which has been entered.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the Senator from New Jersey may proceed.

The bill (S. 2892) to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes, introduced by Mr. SMITH of New Jersey (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Banking and Currency.

Mr. SMITH of New Jersey. Mr. President, the bill which I have sent to the desk will, if enacted, translate into law the administration's program for economic redevelopment in areas of low employment and is sponsored by the administration. It is the administration bill. It is cosponsored by many of my colleagues, who agree that it is essential that the Federal Government act now to expand and strengthen the Federal program to eradicate conditions of unemployment which exist in some areas of our economy, even while we as a Nation enjoy unparalleled prosperity and record employment.

As of this moment the following Senators have asked to be listed as cosponsors:

The senior Senator from New Hampshire [Mr. BRIDGES].

The junior Senator from Illinois [Mr. DIRKSEN].

The senior Senator from Pennsylvania [Mr. MARTIN].

The junior Senator from Pennsylvania [Mr. DUFF].

The senior Senator from Massachusetts [Mr. SALTONSTALL].

The senior Senator from Michigan [Mr. POTTER].

The senior Senator from Connecticut [Mr. BUSH].

The junior Senator from Connecticut [Mr. PURTELL].

The junior Senator from New Hampshire [Mr. COTTON].

The senior Senator from Maine [Mrs. SMITH].

The junior Senator from Maine [Mr. PAYNE].

The junior Senator from Ohio [Mr. BENDER].

The senior Senator from Minnesota [Mr. THYE].

The senior Senator from Maryland [Mr. BUTLER].

The junior Senator from Vermont [Mr. FLANDERS].

The senior Senator from Vermont [Mr. AIKEN].

The junior Senator from Kansas [Mr. CARLSON].

The senior Senator from New York [Mr. IVES].

The junior Senator from New Jersey [Mr. CASE].

I request unanimous consent that the bill be held open until the close of business Thursday, January 12, 1956, for such additional sponsors—Democrat or Republican—as care to join me on this bill.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. SMITH of New Jersey. President Eisenhower, in his 1955 Economic Report to the Congress, referred to the willingness of the Federal Government to assist depressed communities in developing workable solutions of their problems. Accordingly, he specifically recommended to the Congress that the Area Redevelopment Program of the Department of Commerce be further strengthened. He also recommended that, for the time being, at least, the Federal Government continue its policy of granting special tax-amortization benefits for new defense facilities located in surplus labor areas and of placing Government contracts, as far as feasible, in these areas.

In its budget request for fiscal 1956, the administration asked for $370,000 for the Office of Area Development—an increase of $310,000 over the amount requested for fiscal 1955. Had this increase been granted the Office of Area Development would have been able to strengthen and enlarge its program of research on location factors in various industries. It would also have been able to enlarge the advisory services which it gives to depressed areas on ways and means of attracting new industry and on ways and means of taking advantage of existing Federal tax amortization and procurement policies.

Thereafter, on October 24, 1955, it was announced that President Eisenhower would ask Congress in 1956 for specific legislation to establish a domestic technical-assistance program to aid the Nation's depressed areas. That intention was reiterated by the President himself in his state of the Union message of January 5, 1956.

Spot unemployment is of two types: First, the temporary or fluctuating kind which appears and disappears with the seasonal and other fluctuations in our economy; and, second, the chronic or long-term type which persists year in and year out even in the midst of good times elsewhere in our economy.

The program recommended by the administration, which is embodied in the bill which I have introduced, is designed to overcome both temporary and chronic spot unemployment.

The program has four major aspects. The first and probably the most significant of these is the establishment of a $50-million revolving Federal loan fund to be used in making loans where needed in areas of substantial and persistent unemployment to help finance industrial development projects which have been worked out at the local level and are approved by the State. The loans will be made to local public agencies and to private persons approved by the State. The loans may be used for such purposes as: (a) preparing land for commercial or industrial use; (b) constructing new

factories; and (c) modernizing old factories.

Loans are conditioned on State and local participation. State and local organizations must participate to a minimum of 15 percent and the project must have the approval of the State government.

Federal participation is limited to not more than 25 percent of the estimated cost of the project and it must be shown that funds are not otherwise available on reasonable terms.

Federal funds will not be advanced for working capital or for the purchase of machinery or equipment.

Federal funds will not be advanced if the project would increase unemployment in another community.

The second major aspect of the administration's proposed program calls for an annual authorization of $1.5 million for the making of grants for technical assistance, including studies to evaluate needs and methods for economic development of areas of substantial and persistent unemployment.

The third aspect of this bill would strengthen and expand the Federal Government's existing technical assistance program by creating in the Department of Commerce an Area Assistance Administration to be headed by an Area Assistance Administrator at the Assistant Secretary level. In this respect it should be noted that an Area Development Division was established in the Department of Commerce by Departmental Order No. 65 of March 20, 1947. On August 12, 1955, the Secretary of Commerce, in recognition of the importance of this activity, elevated the Area Development Division to the status of an Office.

The fourth major aspect of the administration's plan provides for the coordination of the proposals contained in the bill with other Federal programs and policies affecting local areas, such as the urban renewal program of the Housing and Home Finance Agency and the Department of Labor's vocational retraining and skill improvement programs.

By way of conclusion, I wish to note for the record that underlying the entire program is the basic principle of helping low employment communities to help themselves. It is not a handout program. It is a program of assistance to those communities which are willing to make an effort to help themselves.

I wish to emphasize that the program embodied in this bill aims at lasting improvement. It is not a program for temporary relief.

I wish also to emphasize that the program embodied in this bill seeks to create new job opportunities. It does not seek to transfer job opportunities from one community to another.

In some respects, this bill embodies new measures for dealing with a problem which has existed ever since the end of World War II.

Although this problem of surplus labor areas—on a nationwide scale—is fortunately not as acute now as it has been in the past, nevertheless, we must recognize that there are communities which are not fully sharing in the Nation's general prosperity. We must recognize this and we must act promptly to assist those communities.

This bill will do just that. It may be that, as we give further study in committee to this legislation, changes and amendments will be made, which will make our efforts even more effective. I know such improvements, if offered, will be welcomed.

I earnestly urge my colleagues to join me in assuring that this legislation will be approved by the Congress, so that each American and each community may share in the prosperity and well-being which the great majority are already enjoying.

SPECIAL COUNSEL FOR THE UNITED STATES IN CONNECTION WITH DIXON-YATES CONTRACT

Mr. KEFAUVER. Mr. President, on behalf of the Senator from New Mexico [Mr. ANDERSON], the Senator from Wyoming [Mr. O'MAHONEY], and myself, I introduce, for appropriate reference, a joint resolution to provide for the appointment of a special counsel to represent the United States in litigation brought against the United States by two utility holding companies commonly referred to as Dixon-Yates under the so-called Dixon-Yates contract. Indentical joint resolutions are being introduced in the House by Representative MELVIN PRICE, of Illinois, and Representative CHET HOLIFIELD, of California.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 112) to provide for the appointment of a chief special counsel and an assistant special counsel to represent the United States in litigation brought against the United States to recover damages under the so-called Dixon-Yates contract, introduced by Mr. KEFAUVER (for himself and other Senators) was received, read twice by its title, and referred to the Committee on the Judiciary.

Mr. KEFAUVER. We hope, Mr. President, that after consideration by the appropriate committee, this resolution will be approved bipartisanly, with votes from both sides of the aisle.

We have not, as will be noted from reading the resolution, engaged in any prejudgment of the case. Therefore, we believe that it can enjoy bipartisan support.

We have simply sought to assure that the defense of the Government will be conducted by counsel who has not had responsibility for the contract and has not heretofore rendered any opinion with respect to its validity and enforcibility. That we believe to be an elemental necessity in any lawsuit. Certainly it is the very least that the citizens of the United States, who will have to pay the damages if any are approved, can expect from their Government.

Ordinarily, the defense of the Government in a case of this kind would be conducted by the Attorney General, or, should he so designate, by the General Counsel of the Atomic Energy Commission. They are men of ability and I do not disparage their honor or legal competence, but neither of these gentlemen should be asked to assume responsibility for this litigation. They have both approved the Dixon-Yates contract. Both, on occasion, have ruled it legal and binding. Both, it would seem to me, should welcome this resolution relieving them of the burden of defending a case on which they have previously taken various positions.

In these circumstances the only way that the position of the United States in this litigation can be adequately advanced and argued is through the appointment of counsel who has not had legal responsibility for the contract, the negotiations leading to the contract, or its defense.

In a case of this kind there is no way of knowing what questions might arise in the course of the trial which could be extremely embarrassing for counsel who had previously taken a position which the other side might be quick to use against him. Thus, the interests of the United States Government can be protected only if counsel is completely free to argue any and all positions which might be available to him.

For example, the Attorney General rendered a formal opinion to the Atomic Energy Commission with respect to the validity of the Dixon-Yates contract. Counsel representing him appeared in the proceedings before the Securities and Exchange Commission and argued the validity of the contract.

The Attorney General filed a brief, and representatives of the Department of Justice appeared in the United States Court of Appeals for the District of Columbia to argue the validity and effectiveness of the contract.

The General Counsel of the Atomic Energy Commission likewise rendered an opinion with respect to the contract both prior to its formal execution and subsequent thereto. He argued this position before the Joint Committee on Atomic Energy, and his representatives also appeared in the proceedings before the Securities and Exchange Commission and in the case filed with the United States Court of Appeals for the District of Columbia.

The resolution itself simply provides for appointment of a chief special counsel and an assistant special counsel who would have charge and control of all litigation in which the United States might have an interest with respect to the Dixon-Yates matter. The special counsel would have full power and authority to conduct all such litigation, notwithstanding any provision of law relating to the powers and duties of the Attorney General of the United States. The resolution would give to the special counsel full access to all records and files and would authorize such counsel to appoint professional, technical, and clerical assistance.

This is necessary if he is properly to defend the Government. The resolution provides for compensation to special counsel and assistant special counsel at the rate of $18,000 per annum, and it authorizes to be appropriated to the President such sums as may be necessary for the purpose of paying the compensation of special counsel and that of his assistants and staff.

There are precedents for this action. The late Justice Owen J. Roberts was appointed as a special counsel to defend the Government with the oil-lease contracts of the Department of the Interior executed by then Secretary Fall. When Francis Biddle was Attorney General he asked that special counsel be appointed by Congress to defend the constitutionality of a statute which he, as Attorney General, had attacked as unconstitutional.

Mr. O'MAHONEY. Mr. President, inasmuch as I cooperated with the Senator from New Mexico [Mr. ANDERSON] and the Senator from Tennessee [Mr. KEFAUVER] in the preparation of this joint resolution, and sat through the hearings which were held under the leadership of the Senator from Tennessee, by a subcommittee of the Senate Judiciary Committee, I merely wish to say for the record that this joint resolution is drafted upon the basis of the resolution which was introduced during the administration of President Coolidge, when the disposal of Teapot Dome naval oil reserve by the Secretary of the Navy became a question of great national interest.

There was so much concern about the manner in which Teapot Dome, in my State, had been handled by the executive department that the Senate adopted a resolution demanding the resignation of Secretary of the Navy Edwin Denby. The resolution was carried by a vote of 47 to 34, although the President's party was in control. The President denied that Congress had any right to demand the resignation of an executive officer; and I think there was a great deal of basis, in constitutional law and in logic, to support the position President Coolidge took. In any event, however, on the following day at a Lincoln Day banquet in New York City, President Coolidge asserted that there would be immediate action without politics or partisanship. A few days later Secretary Denby resigned.

A similar resolution was introduced with respect to the then Attorney General, Mr. Daugherty. Mr. Daugherty did not resign at the moment, but, of course, the eventual result was that in order to remove all possibility of doubt that the interests of the United States would be handled impartially and in a bipartisan manner, and without regard to any other factors or considerations whatever other than the defense of the Government the Congress passed a joint resolution upon which the present joint resolution is based, authorizing the appointment of special counsel to take action to recover the Teapot Dome.

The result was the appointment by the President, with confirmation by the Senate, of Owen Roberts, afterwards appointed to the Supreme Court, and former Senator Atlee Pomerene as the counsel to represent the Government of the United States in the courts.

This resolution, introduced today, has been carefully drafted to make it clear that the President shall have the right to appoint and the Senate the right to confirm, and that the attorneys who are to defend the United States against any claims arising out of the Dixon-Yates contract shall have a free hand in obtaining the evidence which is needed to protect the United States against the claim of some three or three and a half million dollars which has been made by the Dixon-Yates interests against the Government by reason of the termination by the President of the attempt to make the contract. The precedent made in the Coolidge administration is ideally suited to the present case, and I hope that the bill will be speedily passed so as to eliminate all possibility of favoritism in the handling of the Dixon-Yates claim.

The VICE PRESIDENT. The Chair would remind Members of the Senate that the Senate is still operating under the 2-minute rule. That rule will be liberally construed. However, the Chair would suggest, if Senators feel they will require more than 2 minutes for their statements, they might ask unanimous consent to extend the time.

Mr. ANDERSON. Mr. President, I ask unanimous consent that I may be permitted to exceed the 2-minute limitation by an additional 2 minutes.

The VICE PRESIDENT. Without objection, the Senator from New Mexico may proceed.

Mr. ANDERSON. Mr. President, I wish it to be clearly stated in the RECORD that my sponsorship of the joint resolution is not to be regarded as any reflection on the Department of Justice, nor as an inference that I believe the Department of Justice is incapable or unwilling to conduct a defense in the case.

I am basing my sponsorship of the resolution on testimony which was taken before the Joint Committee on Atomic Energy, at an open hearing on July 13, 1955, in which the attorney for the Atomic Energy Commission clearly stated his belief that the Government was liable. The Senator from Rhode Island [Mr. PASTORE] asked the attorney:

Senator PASTORE. Your opinion leads to complete liability?

Mr. MITCHELL. Yes, sir.

Subsequently it was pointed out that apparently the attorney was not trying to defend the interest of the United States, and the Senator from Rhode Island said:

Senator PASTORE. The only thing I am concerned about with your opinion is that the other side I do not think has to hire a lawyer.

Then on page 40 of the hearings I finally said:

I want to say, Mr. Chairman, that I am greatly disturbed over the fact that the attorney for the Atomic Energy Commission has abandoned your case before the opposition has ever presented its claim.

I recognize that the attorneys find themselves in a rather difficult position, inasmuch as that previously when they had been called upon to advise agencies of the Government with respect to the validity of the contract involved they based their advice on one set of facts. I realize it makes it somewhat embarrassing for them now to turn completely around and proceed in the opposite direction.

I call attention to page 8 of the brief the attorneys filed before the Securities and Exchange Commission. They said:

In any event, the contract is valid and effective.

Under those circumstances it is extremely difficult for the Attorney General and other members of his staff to now go into court and contend that the contract is not valid.

For that reason I believe it would be desirable to appoint special counsel.

ASSISTANCE FOR REPAIRS TO NEW HOMES DAMAGED BY MAJOR DISASTERS

Mr. SPARKMAN. Mr. President, I introduce, for appropriate reference, a joint resolution to permit FHA title I repair assistance to new homes damaged by major disasters. I ask unanimous consent that an explanation of the joint resolution, prepared by me, be printed in the RECORD.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred; and, without objection, the explanation will be printed in the RECORD.

The joint resolution (S. J. Res. 113) to permit FHA title I repair assistance to new homes damaged by major disasters, introduced by Mr. SPARKMAN, was received, read twice by its title, and referred to the Committee on Banking and Currency.

The explanation, presented by Mr. SPARKMAN, is as follows:

EXPLANATION OF PROPOSED JOINT RESOLUTION

The joint resolution would remove an obstacle to the use of FHA title I insurance for home repairs in the current west coast flood disaster relief program and similar disaster programs. This obstacle is the present statutory provision that title I loans cannot be made for repairs to new homes that have not been completed and occupied for at least 6 months.

A number of new homes occupied less than 6 months have been damaged by floods on the west coast, and the owners are not eligible for title I loans because of this existing provision. The provision was not intended to prevent the use of title I in this type of case. It was enacted as part of the Housing Act of 1954 to prevent certain abuses involving tie-in sales of title I improvements with sales of new homes covered by mortgage insurance under FHA programs.

CHANGE IN NAME OF BEDLOE'S ISLAND IN NEW YORK HARBOR TO LIBERTY ISLAND

Mr. PASTORE. Mr. President, the Statue of Liberty is, beyond all doubt, the most famous and majestic symbol of the United States of America—a symbol recognized and revered not only by Americans themselves, but also by all the people of the world. It is our one great national monument dedicated to an ideal rather than to a person or an historic event.

It has seemed strange to many people that this Nation has not expended more thought and effort on providing a more dignified and appropriate physical setting for the great symbol of our liberty.

For nearly 50 years after its dedication in 1886 the Statue of Liberty was, in

effect, a neglected stepchild of the Government. First custodian of the monument was the old Lighthouse Board of the Treasury Department. The Army took over shortly after the turn of the century, simply because the statue stands in the center of Fort Wood, an old star-shaped harbor defense installation which was then still active as a military post.

Naturally, the primary concern of both the Old Lighthouse Board and the Army was with matters other than the glorification of the statue as a national shrine. Thus, it was not until the National Park Service of the Department of the Interior was given custody of the statue in 1933 than an agency interested and experienced in the maintenance of national monuments turned its attention to the statue.

Under the National Park Service, there has been a gradual change for the better at the Statue of Liberty. The island has been made more attractive in appearance. Modern restaurant and administration buildings have been constructed. Ferry service to and from Manhattan has been improved. In general, a serious effort has been made to improve the statue's surroundings.

Now, at long last, the Statue of Liberty is to be given a setting worthy of its preeminent place as the inspiring symbol of the United States and of our American way of life.

A number of distinguished and public-spirited citizens have organized to establish at the foot of the statue what will probably become, with the statue, the paramount shrine of all Americans: The American Museum of Immigration.

In this high endeavor they have the enthusiastic endorsement of the President and the cooperation of the National Park Service. The latter will be the eventual custodian of the museum, which itself will be an integral part of the Statue of Liberty National Monument.

Let me emphasize that establishment of the American Museum of Immigration is not a Government project in the sense that Federal funds will finance its construction. Rather, the museum is to be financed by the gifts—large and small—of individual Americans. Every American is invited to contribute, and I most devoutly hope that millions of us from coast to coast will do so, each according to his conscience and his means.

Participation of all Americans in establishment of the museum is of the highest significance, for this voluntary participation is what gives the project life, soul and spirit.

Every man, woman, and child who bears the proud title of American citizen is either an immigrant or the descendant of one. We are a nation of nations—the only true nation of nations in the history of mankind.

People have been coming to these shores, since the earliest times, in search of freedom and opportunity. Each immigrant has brought some contribution which has gone into the making of America. From millions America has received contributions of brawn, contributions of brain, contributions of soul and spirit. These contributions from all the creeds and countries and cultures of the world have been woven into the very fabric of our American life, whether in the field of business and industry, in the field of science, or in the field of the arts.

There is no one of us who does not share, through his ancestry, in the historic process by which America, in the short span of some 350 years, has been converted from primitive wilderness to the greatest and most powerful Nation in the annals of world history.

The American Museum of Immigration will perform a permanent service not only to the United States, but also to a confused and doubting world by telling now and to posterity how people of the most diverse backgrounds have joined together to build this Nation. The story will be told by the latest museum techniques. The specific content of the story is being decided by a committee of distinguished historians, headed by Dr. John A. Krout, provost of Columbia University, with the cooperation of the National Park Service.

The story will be told in the light of historical perspective, as viewed by distinguished scholars of American immigration, without emphasizing or minimizing the contributions of any group beyond the bounds of the record of history.

I cannot stress too strongly the constructive effect which I believe the American Museum of Immigration will have in these United States. Some 800,000 people a year visit the Statue of Liberty nowadays—95 percent of them from outside New York City. They come from the Midwest, the Far West, the South, the North.

The museum at the foot of the statue undoubtedly will multiply this annual number of visitors. These visitors will return to their respective States, with a clearer understanding of the fact that all the American people—not any one part of them—are the source of our greatness, our freedom, and our strength.

Thus the museum will give members of all groups a keener appreciation of what other groups have given to the making of America. And this appreciation of the common heritage and achievements shared by all of us will do more than almost anything else could do to strengthen and maintain the national unity of the American people.

I need hardly emphasize how important it is that the unity of the American people be stronger in these years of stress and strain than it ever has been before. We must stand united in our free democratic beliefs, in our tolerance, in our allegiance to the Constitution, in our abiding and basic respect for the dignity of every man.

In my opinion, establishment of the American Museum of Immigration will be an historic event in the development of our national life. It will be historic because it will create the great shrine at which American national unity will be nourished in our time and in all the ages to come.

The American Museum of Immigration will be historic, also, because it will provide the Statue of Liberty, for the first time in her life of nearly 70 years, with a setting appropriate to her everlasting majesty, as the universal symbol of America.

As a part of this effort to add brilliant new meaning to the setting of the Statue of Liberty, it has been suggested by the trustees of the American Museum of Immigration—headed by U. S. Grant 3d, major general, United States Army, retired, and Pierre S. du Pont 3d—that the name of the island on which the statue stands be changed to one more relevant and meaningful than Bedloe's Island.

In this suggestion I most heartily concur.

Since the beginning of recorded history, the island has had at least a half dozen other names than the one it now bears. The Indians had a name for it. Under the Dutch administration of New Amsterdam, it was called by two different titles. The English changed it in the middle of the 17th century. It was changed again when the island was given by the British Governor of New York to a French friend of his named Isaack Bedloo. This is the first appearance of the present name, though in a slightly different spelling.

About 1750, the name again was switched to Kennedy's Island. After the Revolution the island was renamed Corporation Island, when it became the property of the corporation of the city of New York.

During the 19th century, the island again became known by the name of the French friend of the old British Governor, Bedloe.

For a number of years, during the time funds were being raised for the pedestal of the Statue of Liberty, the site was known as Liberty Island, but the name did not stick.

I suggest, however, that the appropriate name actually is Liberty Island and that the Congress should permanently establish that name for the site of the Statue of Liberty.

The citizens of this country are organizing to establish the American Museum of Immigration at the foot of the statue as the great shrine of our national unity. The museum will vastly enhance the setting in which the statue stands.

I suggest that the Congress should do its part to give the statue the most meaningful environment possible, so that the message of the majestic symbol of America may be made more brilliant to all the peoples of the world.

Therefore, to this end I take pride and pleasure in introducing for appropriate reference, a joint resolution of the Congress to change the name of the site of the Statute of Liberty from Bedloe's Island to Liberty Island.

The VICE PRESIDENT. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 114) to change the name of Bedloe's Island in New York Harbor to Liberty Island, introduced by Mr. PASTORE, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

INCREASED EXPENDITURES AND TEMPORARY ASSISTANTS FOR COMMITTEE ON BANKING AND CURRENCY

Mr. SPARKMAN (for himself and Mr. CAPEHART) submitted the following resolution (S. Res. 160), which was referred to the Committee on Banking and Currency:

Resolved, That the Committee on Banking and Currency, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV (1) (d) 4 of the Standing Rules of the Senate, to make a complete study of any and all matters pertaining to public and private housing.

SEC. 2. For the purposes of this resolution the committee from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee under this resolution, which shall not exceed $120,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

AMENDMENT OF NATURAL GAS ACT—AMENDMENTS

Mr. KILGORE. Mr. President, on May 17, 1955, I introduced in the Senate S. 2001 for the purpose of amending the Natural Gas Act in several respects. I introduced the bill to correct certain deficiencies in the Natural Gas Act to the extent that the existing legislation fails adequately to protect the interest of the public in view of the enormous expansion of the natural gas industry since the passage of the act in 1938. In my speech before the Senate at the time of the introduction of my bill, I outlined the reasons and justifications for serious consideration of the proposals that were inherent in my bill, S. 2001.

The Senate now has upon its calendar two bills, S. 1853 and H. R. 6645, designed wholly to comply with the understandable desire of the natural gas producers to be free from Federal regulation of their industry. This is a principle that I can support only if all of the other elements of the public interest are considered at the same time. If the Congress is voluntarily to relinquish the field as it pertains to the production and gathering of natural gas, which enters the stream of interstate commerce, we should make certain that all the remaining interstate aspects of the distribution and sale of natural gas fall within adequate regulatory powers of the Federal Government, in view of the monopoly characteristics of the pipeline systems in the United States.

I am disturbed by one feature of both bills which are pending on the Senate calendar. Each proposes to remove Federal controls of interstate natural gas at the production level without having any corresponding obligation placed upon the Federal Power Commission as administrator of the Natural Gas Act to exercise any conservation powers with respect to the diminishing reserves of this valuable natural resource—natural gas. Throughout the testimony of the proponents of both S. 1853 and H. R. 6645, it was asserted that the result of passage of either of the bills in question would be that additional volumes of natural gas would be available for distribution and sale in the natural gas pipeline systems of the country. This inevitably would mean that a consequence of the passage of either bill would be further heavy withdrawals from the remaining available reserves of natural gas. Since I believe the testimony of the producers and their supporters on this point, and because passage of either S. 1853 or H. R. 6645 will result in greater withdrawals of natural gas, I believe that the Congress has an imperative duty to require the Federal Power Commission to "give effect to sound principles of conservation in the administration of the act." Accordingly, I am today introducing a conservation amendment with respect to each of the bills.

My record in the Congress has demonstrated my high interest in all matters pertaining to the conservation of the Nation's natural resources. Yes, Mr. President, I have a particular interest in the welfare of coal as a natural resource; but this interest is not such that it precludes an equal interest in conservation of all of our natural resources, including natural gas. I number among my constituents large numbers of gas producers, as well as gas consumers. The people of the United States have a vested interest in the proper distribution and use of natural gas, which is in relatively short supply. How much natural gas is left? Are proper conservation principles being observed, in view of the enormous expansion of the natural-gas industry under the Natural Gas Act? These are vital and important questions, standing alone, and without regard to the Fulbright or Harris bills; but these questions become doubly important and vital when it is realized that the Congress is about to amend the Natural Gas Act in such a way as to accentuate the already known fact that our supply of natural gas is low. The facts are that the reserve life index of natural gas has declined in the 10 years since 1946. The figures of the American Gas Association show that, as of December 1954, the present reserve life index of natural gas, based upon present consumption, is less than 22½ years. This alarming figure shows that the heavy capital investment in natural-gas pipelines and the growing and widespread dependence upon natural gas for fuel in many areas mean that a new and high public trust is reposed in the hands of the Federal Power Commission to make certain that the small reserves left are not dissipated, contrary to the best interest of the public and the need for the longest possible continued service for the many users of natural gas.

The sad fact is that nowhere in the Natural Gas Act, as it is presently written, is there sufficient legislative direction by the Congress to the Federal Power Commission which would require or authorize it to exercise the necessary conservation measures in this highly important field. The Members of the Senate do not have to take my word for this statement. They need only examine the recommendations of the Federal Power Commission itself on numerous occasions, in its annual reports to the Congress. A broadening of its power in this field is inherent in the recommendations set forth in the 20th Annual Report, 1940; the First Five Years, 1944; The Smith-Wimberly Report of the Natural Gas Investigation, 1948; the 31st Annual Report, 1951; the 33d Annual Report, 1953; and the 34th Annual Report, 1954. On December 15, 1955, the United States Court of Appeals for the District of Columbia Circuit in the case of the City of Detroit against the Federal Power Commission, returned the Panhandle Eastern rate case to the Commission, stating that the Natural Gas Act does not authorize the Commission to deal with considerations of conservation or accelerated usage in a natural gas rate case.

Against this background, the Federal Power Commission is daily going forward with proposals designed to authorize greater withdrawals of natural gas and, therefore, a further reduction in the life index of the natural gas reserves. The public interest requires that the Congress give a legislative mandate to the FPC to give effect to "considerations of conservation" in the performance of its duty to protect the public's interest in the existing and future natural gas pipeline systems. The Federal Power Commission should be charged with the specific duty of conserving the remaining reserves of this valuable natural resource. The Congress has recognized the need for conservation in other important fields, such as water, soil, forests, wildlife, and other natural resources.

Accordingly, today I am introducing a simple amendment which would amend section 1 of the Natural Gas Act by the addition of the following language:

The Federal Power Commission shall give effect to sound principles of conservation in the administration of this act.

Who can quarrel with the introduction of this necessary principle into the Natural Gas Act? It is abundantly clear that the producers of natural gas, the transporters thereof, the distributors, and particularly the consumers of natural gas, have a high stake in the immediate introduction of conservation principles into the overall administration of the Natural Gas Act. The consumers of natural gas have a right to have their dependency upon the remaining available reserves protected by the Federal Power Commission. It is not reasonable

for the Federal Power Commission to be required to certificate any and all projects simply because of the failure of the word "conservation" to appear anywhere in the Natural Gas Act. In view of the fact that the Federal Power Commission has been entrusted with the stewardship of the growth and expansion of the natural-gas industry, under the Natural Gas Act, it follows that the Commission can also be entrusted with the further authority to "give effect to sound principles of conservation" in the administration of the act. The record will not justify a conclusion that this additional authority would be administered in any way other than in the best long-term interests of the producers, the transporters, the distributors, and the consumers of natural gas, as well as the general interest of the public. Since there exists a great, demonstrable need for this amendment, and because the Federal Power Commission and the courts have pointed out the absence of sufficient congressional mandate in the field of conservation, I urge the Congress to adopt this simple amendment in the best interests of conservation of our valuable and limited natural-gas reserves.

I send to the desk proposed amendments to each of two bills now pending before this body.

The VICE PRESIDENT. The amendments will be received, printed, and lie on the table.

ADDITIONAL COSPONSORS OF BILLS

Pursuant to the order of the Senate of January 5, 1956, the name of the Senator from Utah [Mr. BENNETT] was added as an additional cosponsor to the bill (S. 2854) to amend the National Housing Act, as amended, introduced by Mr. BUSH.

Pursuant to the order of the Senate of January 5, 1956, the name of the Senator from Utah [Mr. BENNETT] was added as an additional cosponsor to the bill (S. 2856) to increase the amount of appropriations authorized for disaster loans, and for other purposes, introduced by Mr. BUSH.

Pursuant to the order of the Senate of January 5, 1956, the name of the Senator from Utah [Mr. BENNETT] was added as an additional cosponsor to the bill (S. 2858) to amend the Small Business Act of 1953, introduced by Mr. BUSH.

Pursuant to the order of the Senate of January 5, 1956, the name of the Senator from Massachusetts [Mr. SALTONSTALL] was added as an additional cosponsor to the bill (S. 2860) to authorize the construction of additional flood-control reservoirs in the Connecticut River Basin, introduced by Mr. BUSH.

Pursuant to the order of the Senate of January 5, 1956, the names of the Senator from Massachusetts [Mr. SALTONSTALL] and the Senator from Oklahoma [Mr. KERR] were added as additional cosponsors to the bill (S. 2861) to authorize an increase of emergency relief highway funds from $10 million to $30 million for the fiscal year ending June 30, 1956, introduced by Mr. BUSH.

Pursuant to the order of the Senate of January 5, 1956, the names of the Senator from Minnesota [Mr. THYE], the Senator from Wyoming [Mr. BARRETT], the Senator from Ohio [Mr. BENDER], and the Senator from North Dakota [Mr. YOUNG] were added as additional cosponsors to the bill (S. 2862) to provide for an experimental national flood indemnity and reinsurance program, and for other purposes, introduced by Mr. BUSH.

FLOOD INSURANCE—ADDITIONAL COSPONSORS OF BILL

Mr. SALTONSTALL. Mr. President, last week, on the opening day of the session, I introduced, for myself and in behalf of my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], and other Senators, Senate bill 2768, relating to flood insurance.

I should like to have added to the bill as cosponsors the junior Senator from New Jersey [Mr. CASE], the senior Senator from Pennsylvania [Mr. MARTIN], the junior Senator from Rhode Island [Mr. PASTORE], and the senior Senator from Utah [Mr. WATKINS].

The VICE PRESIDENT. Without objection, it is so ordered.

PROPOSED INCENTIVE CONTRIBUTIONS AWARDS BOARD IN DEPARTMENT OF DEFENSE—CHANGE OF REFERENCE

Mr. SALTONSTALL. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of S. 2157, a bill to authorize the establishment of an Incentive Contributions Awards Board within the Department of Defense, and for other purposes, and that the bill be referred to the Committee on the Judiciary. I am informed that H. R. 2383, a similar House bill, passed the House on July 30, 1955, and was referred to the Senate Judiciary Committee.

The VICE PRESIDENT. Without objection, it is so ordered.

RELIEF OF CERTAIN MEMBERS OF THE ARMED FORCES—CHANGE OF REFERENCE

Mr. SALTONSTALL. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of the bill (S. 796) to provide for the relief of certain members of the Armed Forces who were required to pay certain transportation charges covering shipment of their household goods and personal effects upon return from overseas, and for other purposes, and that the bill be referred to the Committee on the Judiciary. I am informed that H. R. 2121, a similar House bill, passed the House on March 15, 1955, and was referred to the Senate Judiciary Committee.

The VICE PRESIDENT. Without objection, it is so ordered.

PRINTING OF REVIEW OF REPORT ON ST. JOSEPH HARBOR, MICH. (S. DOC. NO. 95)

Mr. CHAVEZ. Mr. President, I present a letter from the Secretary of the Army, transmitting a report dated November 1, 1955, from the Chief of Engineers, United States Army, together with accompanying papers and illustrations, on a review of report on St. Joseph Harbor, Mich., requested by a resolution of the Committee on Public Works of January 22, 1954. I ask unanimous consent that the report be printed as a Senate document, with illustrations, and referred to the Committee on Public Works.

The VICE PRESIDENT. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

PRINTING OF REVIEW OF REPORT ON TUALATIN RIVER, OREG. (S. DOC. NO. 94)

Mr. CHAVEZ. Mr. President, I present a letter from the Acting Secretary of the Army, transmitting a report dated June 13, 1955, from the Chief of Engineers, United States Army, together with accompanying papers, on a review of report on Tualatin River, Oreg., requested by a resolution of the Committee on Commerce of July 22, 1940. I ask unanimous consent that the report be printed as a Senate document, and referred to the Committee on Public Works.

The VICE PRESIDENT. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

NOTICE OF HEARING BY FOREIGN RELATIONS COMMITTEE ON NOMINATION OF MAX WALDO BISHOP, OF ARKANSAS, TO BE AMBASSADOR TO THAILAND

Mr. GEORGE. Mr. President, the Senate received today the nomination of Max Waldo Bishop, of Arkansas, a Foreign Service officer of class 1, to be Ambassador of the United States of America to Thailand. I give notice that this nomination will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

NOTICE OF HEARINGS ON CERTAIN NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

Mr. GEORGE. Mr. President, the Senate received today a list of 234 persons appointed during the last recess of the Senate, in the Foreign Service of the United States. The list appears elsewhere in the Senate proceedings of today. I give notice that these nominations will be considered by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were

ordered to be printed in the RECORD, as follows:

By Mr. WILEY:

Address delivered by him on January 9, 1956, at the Mayflower Hotel, Washington, D. C., before the meeting of consumer-labor-women's-business groups opposed to natural gas exemption bill.

CEREMONIES AT CHRISTMAS PAGEANT OF PEACE

Mr. MANSFIELD. Mr. President, for many years in Washington, D. C., we have had the institution of the President's Christmas tree on the White House Grounds, which is decorated and lighted annually with appropriate Christmas ceremonies.

For the past 2 years the idea of the President's Christmas tree has been expanded to make it a Washington citizens' observance, to bring our 48 States and Territories and the Embassies in Washington into these observances so as to dramatize the Christmas message: "Peace on earth; good will toward men."

In these 2 years we have seen the idea of a Christmas Pageant of Peace develop spontaneously and beautifully. It has grown beyond the idea of a simple Christian observance to encompass not only Christians and Jewish organizations, but also the non-Christian religions of Asia, Buddhism, Hinduism, the Orthodox religions of Greece, and, in fact, any religious groups which are ready to come in under the banner of "Peace on earth; good will toward men."

This year envoys of some 35 nations joined with the Washington citizens sponsoring the Pageant of Peace by erecting symbols on the pathway of peace, presenting folk dances or country dances representative of their countries, and so on. Many of my colleagues may have seen these symbols and cultural programs on the television screen during the holiday season.

A highlight of the Christmas Pageant of Peace was the Ambassadors' broadcast on Saturday, December 31, 1955, and Sunday, January 1, 1956, from the Ellipse stage.

Two distinguished Members of the United States Senate acted as chairmen for these New Year's greetings to the American people.

Saturday, the Senator from Rhode Island [Mr. GREEN] acted as chairman for the first half of the Ambassadors' broadcast, and the Senator from Utah [Mr. WATKINS] presided on Sunday for the concluding session, in which Ambassadors from nations all over the world expressed their New Year's greetings to the American people, and enunciated their hopes and prayers that, under God, we would find the path to world peace.

It was a most impressive ceremony, and I ask unanimous consent to incorporate in the CONGRESSIONAL RECORD the remarks of the Senator from Rhode Island [Mr. GREEN], together with the New Year greetings from the Ambassadors to the people of the United States and the world as delivered on Saturday, December 31.

There being no objection, the remarks of Senator GREEN and the greetings were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR GREEN AT THE CHRISTMAS PAGEANT OF PEACE, DECEMBER 31, 1955, WASHINGTON, D. C.

Members and friends of the Christmas Pageant of Peace, we are met here this afternoon to impress upon the American people, and we hope, also, the people of the world, the importance to them all of peace. No time could be more propitious than the Christmas season with the message brought by the angels from heaven, "Glory to God in the highest, and on earth, peace, good will toward men."

This is not an American meeting. It is a meeting of many widely scattered nations, represented by their Ambassadors to our country.

As a ranking member of the Senate Foreign Relations Committee, I have seen at firsthand the enormous pressures which lead to war and to international conflict. I have seen very clearly that the only hope for peace on earth comes out of the minds and hearts of men. It is based on a belief in a divine providence and a humble seeking for divine guidance. This is a simple formula, but it is also a very difficult one to carry into action.

The president of the Christmas Pageant of Peace, Mr. Carr, has provided the spirit and the leadership for such action, of which this meeting is an illustration. The people and the leaders of many religions, who have joined in support of this Christmas Pageant of Peace, have provided the idealism and the religious conviction which have brought together people of many faiths in this quest for peace on earth, good will toward men.

I commend Mr. Carr, the officials, the participants in and the loyal supporters of the Christmas Pageant of Peace, for a great contribution to the realization of this hope, and I trust that this group will decide to make the pageant an annual affair in this city of Washington.

Here on this platform are meeting distinguished representatives of many nations from different parts of the world, each one of whom has a message for us and for the world at large. And now may I present the representatives of the various countries assembled on the Ellipse stage:

NEW YEAR'S MESSAGE OF MR. ALBERTO BENEGAS LYNCH, MINISTER COUNSELOR, REPUBLIC OF ARGENTINA

At it was pointed out by the great newspaper the New York Times in its issue of last Sunday, Christmas in Argentina this year is the first one in many years that takes place in an atmosphere of freedom.

My country suffered truly during 12 long years the darkness of tyranny. Our libertarian revolution, that recently brought to my country the atmosphere of freedom, was made possible thanks to the vigorous struggle kept up by many free Argentines during the time tyranny was in power. These fighters were found in all sorts of people: politicians, journalists, professors, students, industrialists, workers, etc.; they never surrendered to tyranny. Among these fighters, a special mention must be made to the Argentine youth who, in the civil sphere as well as in the military, naval and aviation sphere, proved moral integrity and courage. We, Argentines, are proud of the way we recovered liberty.

Thus, Christmas in Argentina has been celebrated this year in accordance with Christ's doctrine, which stands for freedom. We must never forget that Christ was the main victim of lack of liberty. He was persecuted and condemned to death because, with his Apostles, he preached a different faith than the one the government wanted to impose on the people.

History demonstrates that those who begin wars are always some kind of totalitarian government. People do not want aggressive war. If tyranny could be defeated everywhere it exists, the danger of war would substantially diminish. As a matter of fact, when a country returns to the path of liberty, it can be said that in some measure it has made a contribution toward peace.

As Minister Counselor of the Argentine Embassy, and as a citizen who participated in the struggle for freedom in my country, it is a privilege for me to deliver this short speech extending my best wishes in the New Year to the American people and their democratic government; to the American people who are supporting the heaviest task in the common effort toward peace; to this country—blessed by God—that is the hope of all free men who want true peace, that is to say: not the peace of jail but peace with freedom. I also take the opportunity to hope that, from the New Year into the future, all over the world, the increasing understanding of true peace will make it possible some day for every man to enjoy peacefully full individual liberty for the benefit of mankind.

NEW YEAR MESSAGE OF THE AMBASSADOR OF BURMA, HIS EXCELLENCY MR. U. WIN

As Ambassador of the Union of Burma to the United States, I have much pleasure in conveying to you the warm greetings and best wishes of the people of Burma and of myself for the New Year.

Nineteen fifty-five has been on the whole a year of hope. It is marked by a new thinking in terms of living together in a world freed from the dread of utter destruction of man by his own weapons of mass annihilation.

The causes that lie behind the differences which divide mankind have taken a firm root in our own minds. We have lived with them for so long that it will be like asking for a miracle to happen if we expect them to be resolved at once.

Nineteen fifty-five has seen a beginning made. Mankind all the world over yearns for peace. I think we can ultimately have peace if we strive on without a let-up and without despair. The gap that divides us today seems basically one of ignorance and misunderstanding, which bring in their wake mistrust and fear.

We all desire peace. Let us therefore in the new year resolve to continue to seek it with faith and hope and good will and understanding, and with tolerance for peoples and systems different from our own. Mankind has throughout the ages searched the secrets of the universe and his mind to find peace and happiness. Let us continue the quest in the coming year and strive to our utmost to reduce, if not resolve, some of the differences that confront us today.

May peace and good will prevail throughout the world.

NEW YEAR'S MESSAGE OF THE AMBASSADOR OF CAMBODIA, HIS EXCELLENCY MR. NONG KIMNY

At this time of the holidays of Christmas and the New Year, I am happy to forward to the American people the friendly wishes of the Cambodian people and their message of hope, peace, and good will.

Despite the distance which separates us the people of Cambodia rejoice to know that this year, as last, throughout the United States the great feasts of Christmas and New Year are celebrated in an atmosphere of hope and general optimism.

This year is the second that the world has celebrated a Christmas and New Year without war.

We rejoice that the world welcomes the new New Year under the symbol of peace; a peace based upon justice, human dignity, liberty, and independence of peoples.

My country, Cambodia, is a peace-loving nation. Under the enlightened direction of our beloved sovereign, His Majesty Nordom Suramarit, and behind our great leader and national hero, H. R. H. Norodom Sihaunouk, our people have concentrated their efforts and sacrificed much for the goals of peace, security, and liberty.

The United States, for its part, under the guidance of President Eisenhower, whom the world today regards as a champion of peace, pursues the same ideals of peace and liberty. It is this unity of objectives which permits, and I am certain will permit, sincere, friendly, and fruitful cooperation between Cambodia and the United States. May today's peace endure forever for the greater benefit of mankind.

NEW YEAR'S MESSAGE OF HIS EXCELLENCY MR. R. S. S. GUNEWARDENE, AMBASSADOR OF CEYLON

It is indeed a great pleasure for me to extend to you, the people of the United States, and to our friends all over the world the best wishes of my countrymen for a happy and peaceful New Year.

This is a time when we as individuals are inclined to look back on the year which has passed and make new resolutions for the year that lies ahead. Some of us have reason to be thankful for what we have achieved; others look back with regret on opportunities that have been missed or mistakes which have been committed. In either event, however, the thinking is confined to our own hopes and fears or to those of our families. Very rarely do we think in terms of the peace and well being of the larger entities to which we belong—the nation and the world as a whole. Yet unless the world is at peace and there is goodwill among nations, we as individuals can never know happiness and prosperity.

Today the world is at peace—but it is an uneasy peace. As I speak the defenses of many countries in the West and in the East remain ever watchful and ever alert; and in many American homes, as in homes overseas, many families will miss the presence of the thousands of young men who are serving those defenses. It is not my purpose here to consider the events which have led to this situation. I only wish to say how very concerned we in Ceylon are at this sad reminder of the fundamental lack of good will among nations; and to express the hope that in the year ahead more progress will be made in achieving peace on earth and good will toward men.

The past year has seen a certain degree of relaxation of tension. We in Ceylon are happy that the epoch-making Asian-African Conference at Bandung, of which we were one of the sponsors, was to a large extent responsible for this. Now that we have taken our seat in the General Assembly of the United Nations, we are better equipped to make our contribution to the growth of international understanding and cooperation. Ceylon is a small country with no axes to grind in the field of international politics. But although we are a new nation we are an old people with over 2,000 years of recorded history to inspire us. It is my earnest hope that this accumulated experience of the centuries will help us to promote understanding and goodwill among the nations of the world. We know that in this task we can draw upon the great fund of human goodwill that exists in all parts of the world. During my stay in the United States I have been extremely impressed by the friendliness of American people and their earnest desire for peace. The Christmas Pageant of Peace here in Washington, D. C., is in itself an indication—and if I may say so, a very impressive indication—of this desire. In other parts of the world, too, there are people who are similarly disposed to subordinate their prejudices and suspicions to the overwhelming need to work for world peace. I am confident, therefore, that the task that lies ahead is not incapable of fulfillment.

In the coming year we in Ceylon will celebrate the 2500th anniversary of the Parinibbana or the passing away of the Buddha. This will not only be an opportunity for Buddhists all over the world to pay homage to one of the greatest men of history, it will also, I hope, remind all of us who uphold spiritual values of the need for tolerance, which is one of the basic tenets of the Buddhist religion. International understanding can be achieved only if we are prepared to be tolerant of other faiths, other beliefs, and other ideologies.

One final word before I close. It is customary at this time to wish our friends peace and prosperity in the coming year. Let us not forget while we do this that there are millions of people throughout the world—and more particularly in Asia and Africa—who have never known what prosperity is, who are at this very moment living in grinding poverty and despair. We must endeavor to raise the living standards of these people and eradicate thereby the atmosphere in which hatred and suspicions can flourish.

May this New Year bring peace, happiness, and prosperity to us all.

NEW YEAR'S MESSAGE OF THE AMBASSADOR OF CHILE, MR. FERNANDO SILVA, SPEAKING FOR AMBASSADOR RODRIGUEZ

Ladies and gentlemen, I have the signal privilege, as a member of the staff of the Chilean Embassy in Washington, to convey the greetings of the people of the Republic of Chile to the great people of the United States of America.

Both countries—born to freedom and democracy within a short span of some 30 years—have always shown a parallel zeal in their defense of freedom and their undying love for peace.

And both countries, one as a small nation, the other as a big one, have not only boasted of, but have proven by their deeds, their love for peace, a feeling that is only equaled by their love for their common heritage of freedom

This is, then, the meaning of the greeting from the people of Chile to the people of the United States of America, and to the peoples of the world at the birth of 1956: may nothing but our common love for freedom prevail over the universal love for peace during the year that is about to begin.

Thank you.

NEW YEAR'S GREETING OF THE COLOMBIAN AMBASSADOR, DR. FRANCISCO URRUTIA

It is our duty at the end of every year to meditate and ponder if the history and facts of the last 12 months show any improvement toward our common aim for the ideal of peace.

For the first time in many years we had no fighting war in any place in the world during the first months of 1955, and also for the first time in many years it was not the fear of a new world war, but the confidence and hope of peace, that seemed to guide the destinies of the Western World after the Geneva Conference.

During the summer of 1955 the cold war appeared to come to an end, the idea of peaceful coexistence to be not only an ideal but a real possibility, and we all thought that an effective system of disarmament and a settlement of the German problem would be achieved in a matter of a few months.

Unfortunately, while the hope of peace prevailed in Europe, the danger of war increased in other parts of the world. Only a few weeks after the Geneva Conference, shooting started again in the Holy Land, the hopes of settlement of the German and other European problems vanished, and by the end of the year we realized how far we were from peaceful coexistence in the Far East.

The year of 1956 will certainly mark a crucial stage in the international relations of the Western and Eastern Powers.

The world faces an era of unprecedented challenge.

Either with God's help the governments find a way to establish world peace, or we shall all face the specter of an atomic war and the probable destruction of our civilization.

Among many others, we see two definite ways to avoid this tragedy. The first is the strengthening of the unity and collaboration between all the countries of this continent. A united and strong American hemisphere would have the necessary power to help the collective security systems to avoid wars in other parts of the world.

The second, and by far the most important, is disarmament and control of the atomic energy.

On Christmas Eve, speaking from the Vatican throne, His Holiness Pope Pius XII warned the world of the perils of an atomic war and proposed a disarmament and atomic control plan which has already received the wholehearted approval of all the most important leaders of the world.

In this, the 11th year of the atomic age, let us pray and hope that His Holiness' suggestion will be adopted to avoid the path of death over the pulverized ruins that an atomic war would bring to all of us.

GREETINGS FROM THE AMBASSADOR OF ECUADOR, DR. JOSE R. CHIRIBOGA V.

We have come to the threshold of a new year filled with hopes, doubts, and questions. Mankind has made multiplied efforts to keep peace and to lay down the foundations for its spiritual tranquility. We may feel ourselves proud of every endeavor and sacrifice made for the sake of this cause, even if we cannot boast ourselves of the practical results. The world breathes an air of uncertainty, of a sort of pessimism and general insecurity. The so-called cold war has changed into a new shape, but in essence it continues unchangeable. Some nations are still subject to the despotism that knows of no principle of human dignity. Liberty has been outcast from countries which were torches of independence only yesterday. The frontiers, the national integrity of small and peaceful countries continue to be threatened by ambitious expansionist states.

But humanity goes forward seeking justice, peace, and liberty. This permanent desire so many times repeated in the international forum and wherever the voice of the peoples has brought to us their message constitutes a well-founded base to hope that the new year may represent a decisive step in the crusade toward the harmony, confidence, security to all men in all the regions of the world.

For the noble and industrious people of the United States of America the new year is shaping up with radiant signs of an increasing trend of production. Manpower is more vigorous than ever. There is economical stability and confidence in business. Living standard, per capita, is higher every day.

Notwithstanding the year to come will bring to this great Nation more responsibilities as leader of the democratic cause, if the United States keep their traditional firmness and perseverence in the defense of the human values, in the preservation of independence and integrity of all the small countries, 1956 will be a year of peace and general progress. If the United States maintain the adherence to the ideals which inspired the Declaration of Philadelphia, we may rest assured that 1956 will give us the spiritual tranquillity and optimism that is so much needed.

Ecuador as a true and loyal friend of the United States, greets cordially to this great

country, model of progress and great supporter of public liberties, and avails herself of this opportunity to renew her indeclinable determination to continue cooperating for the maintenance of peace and justice among the nations.

Mankind has put many hopes in 1956. But they will come true only if everyone shares in the great task of helping the world to attain its most cherished goals. We must put our faith and enthusiasm in this great effort of pacifying the spirit, of the moral and material disarming of all the peoples, so that we may give our children the peace the world demands for the collective well-being.

NEW YEAR'S GREETINGS DELIVERED FOR HIS EXCELLENCY THE AMBASSADOR OF EGYPT, DR. AHMED HUSSEIN, BY MR. MOHAMED HABIB, PRESS ATTACHÉ OF THE EGYPTIAN EMBASSY

It is an honor and a privilege to have a part in this inspiring Pageant of Peace. I am grateful to the citizens of Washington for giving me an opportunity to greet them and their fellow Americans on this New Year's Eve.

In spite of the woes of the world, there is always, in the hearts and minds of men, the hope of a better life. The people of Egypt, like the people of the United States, are filled with this hope.

Egypt has made tremendous strides in the past 3 years, and it looks forward to the coming year with confidence and determination. We know our task will require our whole effort. We know, too, that in building a better Egypt, we are contributing to the building of a better world. We are resolved to do our modest share in this great aim.

On behalf of my fellow countrymen, I extend to the people of the United States our sincere good wishes for the New Year. We devoutly hope that 1956 will bring peace and happiness to all men.

NEW YEAR'S MESSAGE OF HIS EXCELLENCY, THE AMBASSADOR OF EL SALAVADOR, DR. HECTOR DAVID CASTRO

A new year seems to be a golden opportunity for new thoughts, new ideas and new plans which are intended to make our lives better and more fruitful.

There are many things that we have left undone and of which we intend to take care in the year that lies ahead. Many ways can be improved and many good intentions may be carried into effect, if we only devote to them more time and attention.

It is indeed our food fortune that the new year comes at the end of the Christmas season when men seem to become more human and to be eager to become better neighbors to their fellowmen, showing a greater interest in their prosperity and general welfare. Christmas means the fulfillment of a promise which was repeatedly made to the human race during hundreds of years. Its meaning is more spiritual than material and it conveys an invitation to all of us to improve our lives constantly in order to make them better adapted to the Christian principles which are the only ones upon which the peace of the world may safely rest. That we may do so is the fervent wish that I express at this time.

I want to extend to the people of the United States of America and to the peoples of all nations, in behalf of the people and the Government of El Salvador, sincere best wishes for a happy 1956.

NEW YEAR GREETINGS OF THE AMBASSADOR OF ETHIOPA, HIS EXCELLENCY MR. YILMA DERESSA, AMBASSADOR

On behalf of the Imperial Ethiopian Embassy, I wish to thank the citizens of this Nation's capital who through the Committee of the Pageant of Peace have given us the privilege of participating in this Christmas event by erecting a symbol on the pathway of peace.

Ethiopia, an ardent advocate of peace, joins America and the other nations in their unswerving loyalty to the cause of freedom embodying peace for this planet of ours.

It is timely to convey from my august sovereign and from my nation a message to the people of the United States wishing them a New Year of continued peace and prosperity.

NEW YEAR'S GREETING OF HIS EXCELLENCY GEORGE V. MELAS, AMBASSADOR OF GREECE

I am grateful to the Pageant of Peace for the opportunity to join with the representatives of many nations in sending a word of goodwill and friendship to the American people.

The spirit of Christmas brings a special glow to the hearts of all people who are dedicated to high ideals. That is why we see here about us at the Pageant of Peace, the symbols of many lands and many peoples, who, although dissimilar in language, religion, and culture, share a common devotion to the ideals of the Christmas season, peace on earth and good will to men.

In this atmosphere of brotherhood, it is clear that it is high time we cast aside hatred among human beings, installing in its place, in triumph, love and understanding among peoples.

To achieve this noble end, it is the imperative duty of all to contribute to the elimination of all reasons for discord, especially where such discord may exist between friends. We must, in the new year ahead, rededicate ourselves to this important task so that the true destiny of every people may be realized in a world that enjoys peace and justice, and strives only for human progress.

MESSAGE OF MR. TOUSSAINT, COUNSELOR, SPEAKING FOR THE AMBASSADOR OF HAITI

It is a great honor, indeed, to have been appointed by the Ambassador of Haiti, the Honorable Jacques Leger, to deliver a message of peace and goodwill in the spirit which has prevailed throughout the Yuletide.

This is the time when men, the world over, conscientiously evaluate their accomplishments during the year and sadly appraise that which, notwithstanding the fervor of their efforts, could not be fulfilled during this same period.

And it is at this time that they determine, with firm resolve, the means to assure the continued success of their mission in the coming year.

And the example of this thinking on the part of such men is vividly witnessed in this country, whose noteworthy statesmen deserve special commendation for their ceaseless efforts to combat the many-sorted evils confronting freedom loving people. These men are truly apostles of peace and goodwill. Ceaselessly, they have toured the world in an effort to gap any breach through which a single spark might pass to ignite this planet of ours.

There were, of course, and there still are some weak spots where turbulence and strife could not be prevented; however, these were local affairs, which, due to their keen statesmanship, did not spread out to bring a world war III.

As a result, this year is closing on a note of peace. The world has been spared the impact of misery and suffering occasioned by international strife, and the pattern has been laid for a peaceful year ahead.

It is fitting, too, at this time, to render a tribute of gratitude to our forefathers, namely, George Washington, Bernardo O'Higgins, San Martin, Sucre, Simon Bolivar, Alexandre Pétion, Toussaint Louverture and Jean-Jacques Dessalines, and other men of vision, whose genius has inspired statesmen throughout the American Continent in their vigilance to preserve peace, maintain goodwill and thus strengthen democracy, to the end that our children, grandchildren and all generations to come, may live and enjoy a life, free from the fear of destruction.

While there has been much accomplished in the passing year, a vast job lies ahead would we insure the benefits of democracy to our people, and may the year 1956 see fashioned into a garment of lasting peace the pattern which was laid therefor.

MESSAGE OF HIS EXCELLENCY GENERAL CARLOS IZAGUIRRE, AMBASSADOR OF HONDURAS

Citizens of Honduras and friends, from Washington, metropolis of the world; beholding the lofty dome of the Capitol; standing on the gardens of the White House; and facing the Christmas tree recently lighted-up by President Eisenhower with thousands of multicolored lights, I am sending to you all my salutations and New Year greetings.

While there are men and governments in many parts of the world that do deny the truth of God and promote misunderstanding and discord into the consciences and souls of human beings, we, Hondurans, must raise our prayers to the Lord singing our "Glory be to God on high, and peace on earth to all men of good will."

May the Divine Redeemer take into His protection our dear country illuminating its pathways with the lights of duty and tolerance, so that the year that is about to begin in a few hours may be remembered in the future with pride and satisfaction as a year prodigal in accomplishment, prosperity, and good fortune.

From this lofty abode of liberty, amid glorious symbols and surroundings, and in the presence of several thousand American citizens, as a Honduran, I send greetings to all my fellow countrymen and to His Excellency, the Supreme Chief of the State, Don Julio Lozano, invoking upon them all the graces of peace and prosperity and the highest blessings of the Almighty.

ADDRESS BY AMBASSADOR THOR THORS OF ICELAND

Today we again stand on the threshold of a New Year. The old year will pass by tonight, disappear with all its moments of joy or sorrow, with all its bright achievements or bitter disappointments. Its memories however will live with us and we may live with them for years untold.

As before mankind faces the New Year with good intentions. At least we want to do so ourselves and we want to believe that all others do likewise. The many pleasant and fortunate events of the passing year give us encouragement and enkindle hope. The approachment of contact and exchange of views of the leading statesmen of the world in Geneva last August gave humanity great expectations. We thought at that time that the road to peace was widening and extending. But, alas during the last months of this year our hopes have been dimmed. The present world situation is wrapped in shadows and clouds of mistrust. However, all clouds pass by and let us hope good will will prevail over ill will. Let us remember that good will and naivete are two different ideas, and that continuous and constant mistrust can lead only to mutual frustration, tragic conflict and ultimate destruction.

The year 1955 was marked with difficulties and some disappointment. But it has also been a year of peace and prosperity for most of mankind. So blessed be its memory.

The year 1956 faces us with great international problems. But problems are there to be solved. It is of the utmost importance that every man and woman in every land let the feeling of good will to men that characterizes the Christmas season stay with them in their hearts and minds. With that noble

feeling toward each other and to other peoples we shall all be the peacemakers of the world, and blessed are the peacemakers for they shall be called the children of God. Our feeling of good will and understanding shall give us all and each of us the feeling of freedom and peace of mind and in its ultimate course lead to peace on earth.

May the New Year bring happiness and peace to every nation of the world and to all of you in every land.

Happy New Year.

MESSAGE OF AMBASSADOR G. L. MEHTA, OF INDIA

Friends, as the representative of the Government and the people of India in the United States, I have the privilege of participating in the Pageant of Peace organized by the citizens in this Nation's Capital. This is a season of universal rejoicing all over the world. On this occasion of ringing in the advent of the New Year our thoughts naturally turn toward the great and momentous issues of peace, brotherhood, and goodwill among all nations. As part of the display in the Pageantry of Peace on the Ellipse, we have erected a symbol of India with some appropriate decorations. The many hundreds who visit these grounds will see the portrait of the great leader of India of our times; I refer to Mahatma Gandhi. Some of the very memorable sayings of this apostle of peace and nonviolence are displayed on the Christmas wreath. It is perhaps fitting that we should not only read these sayings but also imbibe the thought contained in them. One reads: "Intolerance betrays want of faith in one's cause" and another says: "Religions are not for separating men from one another, they are meant to bind them." Yet another proclaims: "Truth is an exclusive property of no single scripture." And another declares: "Man is superior to the system he propounds."

All the great religions of the world and their great prophets and their scriptures speak of the supreme virtue of tolerance and harmony.

The peoples of India like peoples in all parts of the world yearn for an era of peace and common welfare. We share with you in this traditional celebration of 20 centuries and I take pleasure in conveying to the peoples of your great country greetings and good wishes of my own people from across the oceans.

NEW YEAR GREETINGS BY S. SURJOTJONDRO, COUNSELOR, EMBASSY OF INDONESIA

On behalf of the Indonesian people I extend my heartfelt greetings to the people of the United States of America now that we are about to enter a new year.

The year that is coming to a close today has seen many efforts in various parts of the world aimed at strengthening the pillars of international peace.

The Indonesian people continue their readiness to explore new ways, including those so far untried, if they enhance the chances of leading toward a durable and just peace, everywhere in the world.

May the New Year bring continued prosperity for all of us and cooperation in greater harmony among all of us so that mankind may face a brighter future.

NEW YEAR'S GREETINGS FROM THE AMBASSADOR OF IRAQ, HIS EXCELLENCY DR. MOUSSA AL-SHABANDAR

I am privileged and pleased to participate in this year's celebrations in the Pageant of Peace on behalf of the people of Iraq, and wish to take this opportunity to extend to the people of the United States of America our best wishes for a very happy and prosperous New Year.

We Moslems wish to share with our brethren of the Christian faith the sincere hope that the New Year will bring with it the enjoyment of mankind's most cherished dream of everlasting peace and harmony among the nations of the world, and we will continue in our joint efforts to bring freedom, security and friendship to all the peoples of this universe. We look forward to a world free from the evils of war and hatred, where all nations no matter how big or small will cooperate constructively and happily, dedicating all their combined efforts to overcome mankind's enemies such as slavery, poverty, ignorance and disease and promote the cause of freedom and human dignity.

The ties of amity and friendship that bind the American and Iraqi peoples are but an example of the relations we hope to see among each and every other nation.

I am very pleased, therefore, to add my voice to the very sincere expressions of hope and good will which we are privileged to hear today in these New Year's festivities and join with the worshipers of all faiths in a prayer to Almighty God to guide the leaders of the world in their efforts to restore peace and friendship among their respective peoples.

REMARKS BY DR. YOU CHAN YANG, KOREAN AMBASSADOR TO THE UNITED STATES

PEACE MUST BE PLANNED FOR—WORKED FOR

This is the season of the year when everyone is especially longing for peace, in a spirit of good will and universal brotherhood.

It is also the season in which George Washington changed the whole course of the American Revolution by mustering his Continental troops out into the snow and cold to cross the Delaware River and launch a surprise attack against the Hessian forces at Trenton.

We would all be mightily pleased if we could relax in the warm comfort of our homes—enjoy the hopefulness of the New Year in the midst of the grateful memories of Christmas—and forget if we can that peace is not one of the presents we found in our stockings.

Unhappily, this is not a time when we can enjoy the great luxuries of relaxation and forgetfulness. The cold war waged by the Communists is not lessened, but is more threatening now than at any time since 1945. The advances in undermining the free world which the Soviets have made since the Geneva Conference are even more rapid and more sweeping than those they achieved after Yalta. This is the dread fact which we dare not ignore nor underestimate.

Traditionally, the New Year is the time for making resolutions. With the aim of safeguarding the security of freedom, I have several resolutions to suggest.

First, we in the free world will not again retreat from any areas threatened by the Communists (as we did in Korea and Indochina), no matter how remote or unimportant those areas seem to be.

Second, we in the free world will no longer be blindly tolerant while formerly friendly people shift over toward support of the Communists. If they insist upon choosing sides against us, we should try to persuade and help them to stand firmly by our side. But if they persist in a pro-Communist course, we shall no longer assist them as they do so.

Third, we shall adopt policies that are consistent with the traditional principles of democratic freedom, the integrity of the individual, and justice for all peoples. We shall not be frightened from the adoption of such policies by a puny fear that to do so might displease the Communist aggressors.

Fourth, when we in the free world do adopt a positive policy (such as that represented in the United Nations vote of October 7, 1950, to reunify all Korea under its own free government) we shall not retreat from such a policy as soon as it is denounced or opposed by the Communists.

Fifth, we shall each of us, as individuals, highly resolve to make any personal sacrifices—including life itself—to preserve our democratic Christian civilization from destruction by the Communist dictatorship. Much as we cherish peace, we can never accept the pitiful doctrine of peace at any price.

These resolutions that I have proposed may not be stated in exactly the way you would phrase them for yourselves. But I have talked to many thousands of people in recent months, and I do believe that such resolutions as these represent very much what the common people of the free world most devoutly and earnestly believe.

As we enter the new year of 1956, we can—if only we will—make it a true turning point in history—a turning back toward the ideals of justice and freedom and manly independence—the ideals which created the democracy which we inherited from our forefathers and which we owe it to our children to pass on, still living and vital to them.

My message to you, then, is the old, traditional Happy New Year—a year of happiness that will be supported by the knowledge we are coming at last to do what is necessary and right, in order that free celebrations such as this may go on, and on, and on.

NEW YEAR'S MESSAGE OF THE AMBASSADOR OF SYRIA, HIS EXCELLENCY FARID ZEINEDDINE

Nineteen hundred and fifty-five was, for peace, a year of hope. The Meeting at the Summit was held. No matter what the intrinsic value of that meeting is, its importance is durable and great. The Meeting at the Summit was a response to the meeting of the minds of peoples at the base, in their general dislike of war and their seeking for peaceful developments and progress. The year which ends, was, therefore, very indicative. It showed that the trend for peace is general and practically irreversible. Nineteen hundred and fifty-six is stepping in. May it be a year of greater realization of the human hopes for peace.

What is it, that makes the everlasting yearning of peoples for peace tend, more and more, to become a reality?

Is it the stalemate in atomic and hydrogen armor, a shaky equilibrium of power? That equilibrium might offer some reason. Peace, in that respect, would be the resultant of mutual fear.

Is it the advancement of man's political and international thinking that is bringing us nearer to peace? Surely, there is an advancement in that direction; yet that advancement has not been relatively great in the most advanced and powerful countries, which can make peace and war.

Is the United Nations Organization contributing for a peaceful trend of mind and action? There is not much in the United Nations, beyond what its members like to accord it.

The factors that are changing the mood of the world and making its psychology more peaceful, are multiple. Some of them call for particular attention.

One is the liberation during the last decade of about 700 million peoples in Asia and Africa. These peoples, previously captive, have been liberated and their immense potentialities are being turned into effective capabilities. Their impact on international policies is continually increasing. They want peace for development. Peace, to them, is a vision. Their philosophy of life is not based on power. A decade ago, these peoples had no voice in world affairs. In 1955, their voice calling for peace was conveyed from the Asian-African Conference at Bandung. It was heard clear, distinct, and emphatic.

The second factor is the development, now under way, in the underdeveloped areas of the world. More than two-thirds of the

human race live in South America, Asia, and Africa, areas which were under some form or another of foreign political preponderance, economic exploitation, or backwardness, and cultural frustration. These areas are moving nearer and nearer to the more developed areas. A better state of international equilibrium and harmony is being created, and a wider one. World peace is getting to be, more and more, assessed on a worldwide basis of international harmony and genuine mutual cooperation.

Lastly, there is a general realization of the peoples of the world that war is futile. It may destroy victors and vanquished. War has never been able to destroy an ideology. It has always been good to create the practical setting for revolutionary ideologies. War has always been held to be an evil; today, war is more than an evil. It is a great blunder, irreparable and unexcusable. General war, thus, is an irrational act.

We Arabs, by our conception of life, cannot separate any discipline from its governing spiritual, and moral norms. A peaceful discipline in our view should be morally sound. Discipline should be the instrument and sustainer of Justice. To us Arabs, peace without justice is either inconceivable or undurable. Real peace cannot be imposed by deceit or violence. Peace is an act of cooperation emanating from rightful dealings.

As an Arab, and as Ambassador of an Arab State, Syria, to the United States, I would like to extend to the wonderful American people our heartfelt greetings. We Arabs want to see more understanding and cooperation develop between the American and Arab nations, along the path of justice, liberty, and peace. We do stand for a general international cooperation of all peoples on this basis.

The effort needed is, surely, many sided and great. It is an endeavor. May God in His wisdom bestow upon us all His greatest bounty, the bounty of the friendship and confidence of our fellow men.

AMERICA'S DEFENSES

Mr. SYMINGTON. Mr. President, I ask unanimous consent to have printed in the body of the RECORD an article entitled "The Budget Hat Trick," written by Joseph and Stewart Alsop, published in the press December 23, 1955.

It would appear that there is a broad misunderstanding as to what these proposed budget figures mean.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of December 23, 1955]

THE BUDGET HAT TRICK

(By Joseph and Stewart Alsop)

The real story of next year's budget is very different indeed from the story suggested by the recent barrage of headlines about defense increases, foreign aid increases and the like.

It is first of all the story of a hat trick that did not quite work. The authors of the hat trick were Secretary of the Treasury George M. Humphrey and Budget Director Rowland Hughes. Both Hughes and Humphrey are long-headed men. With some help from the congressional economizers, they prepared their coup no less than 12 months ago.

The preparations were simple indeed. Extensive one-shot economies were made in the last Defense budget, and these savings kept the Defense spending level down to $34.5 billion. In the same fashion, both the military and economic foreign aid programs were largely financed by running down unexpended balances, and these savings kept last year's foreign aid appropriations down to $2.7 billion. Thus the hat trick was prepared. The trick consisted of a simple policy directive to hold the defense and foreign aid items in this year's budget down to the level of last year's appropriations.

Last year's savings could not be repeated. Hence last year's appropriations level could not be attained without making savings somewhere else. Thus the real effect of the Humphrey-Hughes directive was to require a sharp permanent cut in American fighting power and an even more drastic permanent reduction in foreign aid.

Moreover—and here was the real beauty of it—this weakening of our defenses and slackening of our cold war effort would hardly be noticeable. The Congress would be asked to vote the same sums as were voted last year. The country could therefore be told that we were carrying on as before.

There is every reason to believe that the Humphrey-Hughes hat trick would have worked to perfection, if the Kremlin had not meanwhile extended and intensified its cold war offensive. But the Soviet intrusion into the Middle East spread the deepest alarm through all the staff levels of the administration. And it also mobilized the group of higher policy-makers led by Vice President NIXON and Nelson A. Rockefeller, who came to be called The Young Turks.

While Messrs. Humphrey and Hughes were indirectly demanding the weakening of our defenses and the slackening of our cold-war effort, NIXON and Rockefeller passionately advcated exactly the opposite policy. They warned that the whole world balance of power was rapidly tilting in favor of the Soviets. They asked, with natural anxiety, how any American administration could permit this to happen. They urged a "bold new program" to reverse the trend.

In the ensuing struggle, a great deal more bad feeling was generated than has yet been admitted in public. The intra-administration struggle reached its climax in the all-day meeting of the National Security Council at Camp David. The outcome, as so aften in this administration, was a compromise between the two conflicting viewpoints.

Our defenses were not to be weakened. Thus the requested Defense appropriation had to be raised to $35.5 billion. The cold-war effort was not to be slackened either. Thus large sums had to be asked to build up the depleted foreign aid balances, so that spending could continue at the old rate. In short, the real meaning of all the recent commotion about increases in these budget items is simply that we really are carrying on as before, instead of just pretending to.

But there is another meaning, too, in this decision taken at the Camp David National Security Council meeting which was the real cause of the President's temporary fatigue.

The recent extension and intensification of the Kremlin's cold-war offensive constitute one great challenge. The massive recent progress of the Kremlin's armament programs constitutes another great challenge. These challenges almost certainly mean that the world power balance is now moving in the Soviet's favor, just as Messrs. NIXON and Rockefeller maintained. Yet the decision at Camp David was to ignore these challenges, and to let the world power balance tilt against us.

This is a national choice of the most far-reaching importance. It has been carefully shrouded, as the custom now is, from the vulgar gaze of the American public. Yet events will tear aside the veil sooner or later, when the Joint Chiefs of Staff have to tell the Congress the real state of our defenses, or when some development abroad causes more searching inquiries than are now being made.

Mr. SYMINGTON. Mr. President, this article gives figures and names names—and it is a sad and shocking report.

The American people have the right to know that these responsible journalists are right when they report that the two gentlemen in question warned that "the whole world balance of power was rapidly tilting in favor of the Soviets."

Mr. President, I ask unanimous consent also to have printed in the body of the RECORD an article entitled "What Kind of War?" This article was written by the same two newspapermen who wrote that of December 28. If the article is correct, the Army of the United States, already in size but a small fraction of the size of the armies of the possible enemy, is in no sense modern. It is an obsolete Army, built on the basis of the tradition of World War II instead of with recognition of the tremendous progress since 1945 in this air-atomic age.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of December 28, 1955]

WHAT KIND OF WAR?

(By Joseph and Stewart Alsop)

Atomic bombs about the size of a grapefruit can be fitted as warheads to small rockets, baby versions of such existing rockets as the "Honest John." Three or four of these baby rockets with baby atomic warheads can easily be carried in a jeep.

Thus, a couple of GI's in a jeep could have at their disposal the firepower of 200 World War II blockbusters. This suggests how new weapons developments are revolutionizing ground warfare. It also suggests an interesting question: What kind of war are we preparing to fight?

The summit meeting is supposed to have led to a tacit agreement by both sides not to resort to the nation-destroying intercontinental weapons. If so, we should logically be going all out to prepare our ground forces to fight localized wars with revolutionary means. Are we doing so?

The answer is that the Army is more than ever the stepchild of the services. Moreover, it remains essentially a World War II Army. This is not because the revolutionary means are unknown. On the contrary, some brilliant advances have been made by Army researchers. For example:

The "space-linked track" and the "terradynamic vehicle" have been developed by the Army's land locomotion research laboratory in Detroit. Enthusiasts say that the "space-linked track" is as big an advance in land locomotion as the jet engine in aviation; and that the "science of terradynamics" will do for movement on the surface of the earth what aerodynamics has done for movement in the air.

Great advances have already been made in this field, like the experimental "Groundhog," which will go virtually everywhere; and the brilliantly successful M-59 troop carrier, an early prototype of which was given credit for winning the battle of Porkchop Hill at the end of the Korean war.

Or take "automation artillery" and "burnable case ammunition." New "automation" devices make it possible for a heavy artillery piece to fire a shell a second, and the piece is serviced by 3 men, instead of 13. And it is also possible to make a shell whose case is burned up in the firing, thus immensely simplifying the supply problem.

Then there are such advances as the new gas turbine tank engine developed by Cadillac, which makes possible a tank with a previously unprecedented fuel range. Finally, and perhaps most important of all, major

breakthroughs in electronics have provided the means for really sure communication at very great distances, such that a commander can maintain control over even his smaller units when they are dispersed over hundreds of square miles.

In short, the means are already at hand for a real atomic age army. An atomic age army, according to official Soviet military doctrine, must be capable of "quick, decisive action of cooperating groups of dispersed small units." It must also, as our own Nevada nuclear tests proved last spring, have maximum armor for protection against nuclear heat, blast and radiation.

And, especially for an ocean-surrounded power like the United States, it must have maximum mobility, not only on the ground, but by air for long distances.

This is the kind of army the Russians are building. They have broken up their divisions into six brigades capable of fighting on their own. They have put enormous emphasis on armor and mobility. Nineteen of the 20 Soviet forward divisions in Europe, and 75 of the grand total of some 175 Red army divisions have been fully or partially atomicized, or prepared for modern war.

We are not building such an army, except in the blueprints. A start has been made on atomicizing 2 of our 19 divisions (of which 7 are not really fighting divisions at all).

But air transport is woefully inadequate. During the Guatemalan crisis, for example, the possibility arose of armed intervention on an emergency basis, but it turned out that there was hardly transport enough for a single regiment.

The Germans, who are no fools about warfare, plan to have 600 vehicles like the M–59 in each of their new divisions, the object being to give every soldier protection from nuclear weapons. American infantry divisions are provided with just seven such vehicles. And the Army is profiting from other technical advances only on a test or prototype basis.

Given the supremacy of this country in the automotive and communications field, we ought to be able to beat the Communist world, with its unchallengeable manpower superiority, all hollow in this respect. But we are not doing it.

The main reason is, of course, money. A rough but expert guess is that it would cost upward of $3 billion to atomicize 12 divisions. That is a lot of money. But losing wars, even small wars, or not being able to fight them at all, can be very costly too.

Mr. SYMINGTON. Mr. President, this too is a sad and shocking report. The American people have the right to know whether their Army, tiny in size as compared to the Soviet Communist and Chinese Communist armies, is not being modernized because some think balancing the budget is more important than national security.

Mr. President, I also ask unanimous consent to have printed at this point in the body of the RECORD an article by the same newspapermen, entitled "We've Been Warned," published January 2, 1956.

If there is a "gap of 3 to 4 years" between the time the Communists have the intercontinental ballistic missile and this country has it, according to high military authority, the Communists will be in position to "blackmail the world."

Again, the American people have the right to know if the Communists are this far ahead in the development of the so-called "ultimate weapons."

If so, or even if there is any possibility of its being so, are we doing everything possible, 24 hours a day, 7 days a week, to catch up?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of January 2, 1956]

WE'VE BEEN WARNED

(By Joseph and Stewart Alsop)

Last Thursday, Marshal Bulganin grimly boasted to the meeting of the Supreme Soviet in Moscow that the Soviet armed forces would soon have an intercontinental ballistic missile, or ICBM in current Pentagon jargon. After this, at any rate, no one can deny we have been warned.

To be sure, it can be rather positively stated that the Soviets have not yet tested one of these huge rockets that can carry an H-bomb warhead from a Russian launching site to an American target.

Firing of such rockets will unavoidably produce atmospheric and other aftereffects. These aftereffects can be detected by appropriate devices all the way 'round the world, as firings of nuclear weapons can also be detected. The American detection devices have not yet registered the firing of a Soviet ICBM. This perhaps explains the curious mixture of private complacency and public untruth that has been the Pentagon reaction to the news from Moscow.

But if Secretary of Defense Charles E. Wilson and his subordinates are greatly reassured by the silence of our detection devices, they must have comfortably forgotten all the ugly lessons of the last 10 years.

The truth is that the Soviets have quite regularly telegraphed their weapons-development punches, boasting about each new weapon as soon as they were confident they had solved the design problem and were preparing for a test. For instance, Vyacheslav Molotov told another Moscow audience that the Soviets already possessed an A-bomb, just about a year before the first Soviet A-bomb test in September, 1949.

Much the same thing happened with the Soviet H-bomb; and it happened too, although in a more general way, with the remarkable postwar development of the Soviet aircraft industry.

Why the Soviets follow this strange pattern is a fascinating problem in itself; but the point here is that they have followed it to date with great faithfulness. Hence it is only prudent to expect that sometime within the next year or so, the Soviets will successfully test one of these intercontinental ballistic missiles, which are also called, and quite properly called "the ultimate weapons."

This will not be especially surprising either, as readers of many anxious reports in this space will readily recognize. As previously disclosed, the official United States intelligence forecasts some time ago named the year 1958 as the first probable date of a Soviet test of the ultimate weapon. But from the time of the A-bomb onward, these American official forecasts have invariably underestimated future Soviet achievements in weapons development by at least 2 years. All the known facts, in short, fit together only too neatly.

Meanwhile, where do we stand? The answer is easy. When Secretary Wilson took office, he seriously tried to cancel the American long-range missile projects, which he denounced as "visionary." Our armed services, he declared, were spending outrageous sums on research and development. The percentage of income that General Motors spent for such purposes, he pointed out, was much, much less.

It may sound like a joke, but it actually happened. Fortunately, Wilson was finally persuaded not to cancel the long-range missile projects altogether. Yet he caused them to be shelved, for all practical purposes, for the first 2 years of his administration of the Pentagon.

Then more and more disturbing reports began to come in, showing a wide Soviet lead in missile development. The so-called Killian report, which was first summarized in this space, revealed an acutely dangerous situation. Some months ago, the National Security Council voted to give an overriding first priority to missile development. And the Pentagon is now going all-out to build missiles, at least to the extent that the Wilson Pentagon is capable of going all-out in any field of weapons development.

As a result, very important breakthroughs have been made already. Yet only a few days before Bulganin spoke, Secretary Wilson himself publicly stated that it would probably be about 5 years before we could fire an ICBM. Thus, on present prospects, there will be a gap of 3 to 4 years between the first Soviet test of the ultimate weapon, and the equivalent American test.

This fateful prospect has hardly caused a ripple in this country, because of public ignorance and self-interested official poohpoohing. Instead, the whole country ought to be up in arms. A series of reports in this space will, therefore, be devoted to the meaning of this and other current changes in the vital air-atomic balance between the United States and the Soviet Union.

Mr. SYMINGTON. Mr. President, I likewise ask unanimous consent to have printed at this point in the body of the RECORD an article, by the same newspapermen, entitled "Going, Going, Going," published January 4. This article asserts United States "is now losing the air-atomic lead to the Soviet Union."

Mr. President, if it is true that the Communists are now producing many times more modern jet fighters than are we, and over twice as many modern long-range intercontinental jet bombers, this country is condoning policies which will ultimately insure its destruction.

In any case, the people have the right to know whether these assertions are true.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of January 4, 1956]

GOING, GOING, GOING

(By Joseph and Stewart Alsop)

The biggest, most disturbing feature of the present world situation can be rather simply summed up. The United States is now losing its air-atomic lead to the Soviet Union. Or you might say that the sole defense of the free world is being limply cast away.

One indicator of the general trend is the Soviet progress with intercontinental ballistic missiles, discussed in the last report in this space. The ICBM is rightly called the Ultimate Weapon. Yet these vast rockets are such complex mechanisms that there will be no overnight revolution because of the mere testing of a prototype.

For some years to come, manned aircraft will certainly continue to dominate the air-atomic weapons system. For the immediate future, therefore, the most important indicators of the present trend are the figures on Soviet and American production of combat planes of advanced types.

In brief, Soviet output is now far ahead of American output in 3 of the 4 major categories of combat aircraft, day fighters, night fighters, and long-range jet bombers. These are the categories, moreover, of highest importance to this country. Concerning these categories, the figures speak for themselves.

In the category of night fighters, the United States has no advanced type worth mentioning except the F–102. About 10 F–102's are now being produced each month, and no step-up is promised.

The Soviet Flashlight night fighter is rated at least as good as the F–102, if not somewhat better. The Soviets are now producing at least 50 Flashlights each month—or 5 times as many advanced night fighters as we are producing. Furthermore, Flashlight output is going up.

In the category of day fighters, the United States has only two advanced types, the F–101B and the F–104, that are fit to meet the new Soviet "Farmer" fighter in the air. A great increase in output of these planes was promised by Secretary of Defense Charles E. Wilson, last spring, after the Moscow over-flights. If anything, however, output has been slowed down. Present output is an inconsiderable trickle, and we shall be lucky to be getting a score or so per month of F–101B's and F–104's by the end of next year. Meanwhile, Soviet production of the "Farmer" fighter is already running at the rate of at least 60 per month; and it is also going up. Overall, Soviet output of advanced day-and-night fighters may well be running at a combined rate of around 200 to 250 per month by the end of 1956; as against an American production rate that will still be trifling.

But the figures are still more astonishing in the category of the overlord of the air, the long-range jet bomber. Last spring, American production target was ostensibly raised to 17 of our great B–52 bombers per month—which was a long way to go, since production was then virtually nil. Today, however, we are actually turning out not more than 5 B–52's per month; and restrictions on subcontracts suggest to insiders that the real Pentagon target still very distant, remember, is no more than 13 B–52's per month.

Meanwhile, the Soviets are already producing more than 13 per month of their "Bisons," which are broadly comparable to our B–52's. Furthermore, there has been a drastic change since last spring, when eventual Soviet capacity was believed to be 17 "Bisons" per month, and 17 B–52's became the American target.

Since then, new information has caused the estimates to be revised. By the end of this year, the Soviets are expected to be turning out 25 "Bisons" per month, or about twice as many of the overlords of the air as will be turned out in America. Moreover, the change in estimates of Soviet output has caused no change in the American production target. In the most vital of all categories of combat aircraft, we are apparently content to stay far behind.

That leaves the single category of medium-range jet bombers, in which Soviet output has not yet overtaken American output. The Soviets are turning out something like 30 of their new "Badger" bombers each month. But we got a head start with our comparable B–47. We now have about 1,500 B–47's in the Strategic Air Command, and these planes constitute SAC's main striking force.

Unfortunately, however, this complete reliance on medium range bombers is plainly regarded intensely dangerous by SAC's brilliant commander, Gen. Curtis LeMay. One of the great secret dramas of the struggle over this year's budget was caused by LeMay's bold demand for an urgent program to produce no less than 1900 B–52s. His purpose was to replace his B–47s with planes of true intercontinental range.

But it is current doctrine that the richest country in the world is too poor to pay for its own defense. So of course LeMay's request was rejected.

Mr. SYMINGTON. Mr. President, finally I ask unanimous consent to have printed in the body of the RECORD an article entitled "The Decline of SAC." This article, by the same authors, and published January 6, states in part:

Within a rather short time, the American Strategic Air Command will be measurably weaker than its Soviet competitor, the Strategic Air Army of the Red Air Force.

Mr. President, if that is true, the future security of the United States will shortly be in jeopardy.

If the plane production figures given in this and the preceding article are correct, the American people are approving, through ignorance, policies which can only lead to disaster.

They have the right to know the facts, because, as the majority leader, the Senator from Texas [Mr. JOHNSON] said last spring:

The strength of a nation depends upon the will of the people. In a democratic form of government that will can only function if the people are informed.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of January 6, 1956]

THE DECLINE OF SAC

(By Joseph and Stewart Alsop)

Within a rather short time, the American Strategic Air Command will be measurably weaker than its Soviet competitor, the Strategic Air Army of the Red Air Force.

It may sound a bit nightmarish to say that SAC is now losing the predominant strength that has been the heart and center of the free world's defense for the last decade. But no other conclusion can be reasonably drawn from the American Government's own intelligence forecasts, as agreed and approved by the National Security Council itself.

The melancholy contrast between Soviet and American rates of production of advanced aircraft types was disclosed in the last report in this space. It was disturbing enough. But the really disturbing feature of the present situation is the way these production rates must inevitably change the balance of air-atomic power.

As the Russian air production program indicates, the Soviet Strategic Air Army is being lavishly re-equipped. Its slow, short TU–4 bombers are being sloughed off. Their places are being taken by excellent jet bombers, the medium-range Badger and the long-range Bison, which are comparable to our own B–47 and B–52.

Within about 24 months, the Soviet Strategic Air Army will consists of somewhere between 600 and 800 long-range "Bisons" and somewhere between 800 and 1,000 medium-range "Badgers." These manned aircraft will be importantly supplemented, moreover by the medium-range ballistic missiles, capable of reaching any European target, which the Soviets are also turning out in quantity.

In the same period, the American Strategic Air Command will retain its existing medium-range force of 1,500 B–47's. The only improvement will be made in SAC's 11 long-range groups, which have a total complement of no more than 330 aircraft. In these groups, obsolete B–36's are being replaced by B–52's, but this replacement is going so slowly that it is unlikely to be finished within 24 months.

By the end of 1957, therefore, the Soviet Strategic Air Army, with its "Badgers" and its guided missiles, will have medium-range striking power at least equal to the power of SAC's 1,500 B–37's. Meanwhile, with 600 to 800 "Bisons," the Strategic Air Army will have at least twice the long-range striking power of SAC—and the disproportion may be considerably greater. On a straight plane-for-plane basis, the Strategic Air Army will then have the edge on SAC.

But SAC's brilliant commander, Gen. Curtis LeMay, and the Soviet Strategic Air commander, Lieut. Gen. V. I. Aladinski, will not just be counting planes and missiles as they measure their relative strength. They will be thinking a great deal, for example, about their relative freedom of action.

General Aladinski will have absolute freedom of action. General LeMay will have none. For his big punch, General LeMay will still have to depend on his medium-range force; and this force of B–47's will still be utterly dependent on its bases overseas. In fact, denial of those bases will have the same effect as the total destruction of about two-thirds of SAC's airplanes before the shooting even starts.

In other words, General Lemay will be in pawn to the nations that control those overseas bases—the nations that may so easily deny those bases to SAC under threat of Soviet H bombardment. That was of course why General LeMay asked this year for an urgent program to provide SAC with 1,900 B–52's.

General LeMay's request was refused for the usual budgetary reasons. This SAC's future inferiority to the Soviet Strategic Air Army was by implication accepted by the administration policymakers. And in another area of Defense budgetmaking, this future inferiority of SAC was doubly assured.

In brief, the United States Air Defense Command now has almost no fighters fit to intercept the new Soviet jet bombers. American fighters of advanced type, F–102's, F–101B's, and F–104's, are good enough to do the job. But mere trickles of these advanced fighters are being ordered under the current defense program. Thus this country will still have no interceptor force worthy of the name, when the Soviet bomber force reaches full strength.

Meanwhile, the Soviet Air Defense Command is being very rapidly re-equipped with the remarkable "Flashlight" night fighter and "Farmer" day fighter. The "Farmers" and "Flashlights" must be expected to impose heavy losses on General LeMay's bombers—perhaps half the planes engaged in each attack. But General Aladinski, with slightly more strength than General LeMay, will need to fear only the most trifling losses. This, in itself, will drastically alter the balance.

If you can add up these facts to any other conclusion except the one stated above, you must employ the peculiar mathematics that can only be learned on the highest level at the Pentagon.

SPECIAL SCHOOL MILK PROGRAM

Mr. HUMPHREY. Mr. President, I wish to comment briefly about the special school milk program, authorized by section 201 (c) of the Agricultural Act of 1949, as amended.

Much too much has been written and said in criticism of our abundant production of milk and dairy products. Too little has been written and said in appreciation of the real contribution this production can make to our daily diet. The gap between our milk production and our milk consumption is not large. We have seen in a short span of 12 months what congressional leadership can do to help close this gap.

In 1954 the Congress authorized the expenditure of up to $50 million of Commodity Credit Corporation funds to encourage the consumption of fluid milk by school children. It was our hope that

this program would make milk—the almost perfect food—more available to that segment of our population most vulnerable to deficient diets. We were also hopeful that the program would slow up the accumulation of dairy products in CCC warehouses and thus narrow the gap between production and consumption, thereby improving the economic atmosphere in which dairy farmers were trying to exist.

The program began operating in September 1954. Being a new program, its start was understandably slow. However, in spite of a late and slow start, the program last year proved itself. It was responsible for increasing fluid milk consumption over 200 million pounds among school children. This year's program should exceed this record substantially. My own State of Minnesota will need additional funds to maintain the program for the remainder of this school year. I understand many other States are in a similar position. Unless additional funds are authorized immediately, the program in many States will be in jeopardy. Any regression in program operations now can undo a great deal of the progress the program has made.

When we realize that on the average only about 3 percent of our total milk production is the extra production that creates problems for our dairy farmers and our Government, and the opportunity for increasing fluid-milk consumption by schoolchildren, we can appreciate the need for continuing the special school milk program.

Some action already has been taken on the extension of this program. The farm bill, H. R. 12, as passed by the House, provides $75 million annually for the fiscal years ending June 30, 1956, and June 30, 1957. Under existing law, authorization for the program expires June 30, 1956, with $50 million of CCC funds to be used to increase fluid-milk consumption.

The prompt enactment of the authorization, as passed by the House, would take care of the emergency needs for the remainder of this school year and assure the continuation of the program for another year.

However, at the present time we do not know when the farm bill will become law. It is therefore important that prompt action be taken now to assure adequate funds for the remainder of this year and also authority for the continuation of the program so plans may be made now for the next school year.

I propose to urge the Senate Committee on Agriculture, of which I am privileged to be a member, to consider immediately legislation as already passed the House relating to this very worthwhile program. Under such legislation, an additional $25 million of CCC funds may be used by the Secretary of Agriculture for this program for the balance of this school year. It is not mandatory. The Secretary of Agriculture may use any amount he deems necessary. If the entire $25 million is not needed, the Secretary may use a smaller amount. Perhaps only $10 million additional is required, maybe more. Whatever the amount, the Secretary will have authority to make the necessary transfer of CCC funds.

For the long-range school-milk program, it is my intention to urge the Senate Committee on Agriculture, in its consideration of the farm bill, to include authority for further extension of this program and, in addition to nonprofit schools, to make the program available to other recipients, such as nonprofit nursery schools, child-care centers, settlement houses, summer camps, and similar nonprofit institutions devoted to the care and training of children.

My colleagues may recall that I introduced proposed legislation for that purpose during the first half of the 84th Congress. Similar proposed legislation has also been sponsored by my colleague the senior Senator from Minnesota [Mr. THYE], for continuing this program. My purpose today is to emphasize the necessity for acting soon on this question, to make sure there is no cutback in the program this year, rather than to let it get lost in the shuffle of the general farm bill. I urge all of my colleagues from dairy States who have shared my interest in this special school-milk program, to support my request to the Senate Agriculture Committee.

Mr. President, I now desire to refer to a kindred subject.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

DECLINE IN FARM PRICES

Mr. HUMPHREY. Mr. President, the press has reported that the distinguished junior Senator from North Dakota [Mr. YOUNG] will propose a congressional investigation of the spread between prices farmers receive and the prices consumers have to pay for food products.

I am heartily in favor of such a congressional study, for I do not believe that any study in the field made by the United States Department of Agriculture would be credited with even reasonable objectivity by the people of this Nation.

Secretary of Agriculture Benson, who is surrounded by consultants from the agricultural industries, and has recently been given the services of the Safeway Stores publicity house, Braun & Co., is too partisan to head such a study.

At the outset of his administration, as members of the Committee on Agriculture and Forestry will remember, Secretary Benson sounded the call for a consumer rebellion against the farm programs, publicly speculating on when the consumers would rise up and smite down programs which allegedly kept their food prices up.

This failed. Labor groups rallied behind the farm programs. And the falsity of blaming the farm programs for high food costs was demonstrated by the fact that, although the administration let farm prices drop disastrously, food prices stayed at record high levels.

Having failed to set labor against the farmers, Benson has now reversed his field. He is trying to make farmers mad at workers by talking about "soft wage increases". He intimates that they are responsible for consumer prices staying high despite declining farm prices.

In my judgment, this will not work either. It is too obvious that wage increases are not responsible for 80-cent pork chops in this day of 10-cent hogs. There have been no wage increases holding the price of pork up in the past few months while the farm price of hogs declined to 1932 levels.

Mr. Walter Reuther, president of the United Auto Workers Union, has recently released an open letter to Secretary Benson and a study of the Secretary's fake claims about increased labor costs which completely refute the claim that wage increases have forced higher consumer prices.

I ask unanimous consent to have the two documents included in the RECORD at this point in my remarks.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

AN OPEN LETTER TO SECRETARY OF AGRICULTURE BENSON FROM WALTER P. REUTHER, PRESIDENT, UAW-CIO

SEPTEMBER 23, 1955.

HON. EZRA TAFT BENSON,
Secretary of Agriculture,
Washington, D. C.

DEAR MR. SECRETARY: I have read your address to the Farm Equipment Institute at New Orleans on September 20. You stated that farmers will find it extremely difficult to take an increase in farm machinery prices at this time.

We share your concern in this matter, especially in view of the steady decline in farm prices and the continuing contraction of farm incomes.

We are greatly disturbed by the increase in steel prices which we know was not justified by the wage increase granted steelworkers.

We are equally disturbed by the already announced and anticipated increases in automobile prices which also are not justified by the wage gains won by automobile workers.

We are further disturbed also by the announced increase in farm-machinery prices because we know that no such increase is justified by the wage increases won by workers in that industry.

You expressed the opinion that most manufacturers can justify their price increases on the basis of wage increases.

You are misinformed as to the facts. Moreover, in making a public statement of this kind without basis in fact you run the risk of lending your office to the discredited, shopworn efforts of those misguided persons who too often in the past have sought to set farmers against workers, and workers against farmers.

Surely you do not believe that a remedy for the present badly unbalanced condition, in which farm prices keep falling while wages and profits are rising, will be found by extending to the whole economy the difficulties which farmers are facing.

The solution to the problem of decreasing income to American farmers will not be found in denying millions of city workers and their families higher living standards made possible by advancing technology. The answer must be found by providing American farmers full economic equity with other groups within the framework of a dynamic, expanding economy based upon full employment and full production.

Our union has always endorsed firm Government price supports for farm products and other measures designed to assure economic justice and security of income to farm families. We know from experience that when farmers' incomes fall, the workers who build automobiles, trucks, and farm machinery are directly affected. We believe most farmers understand, also, that wage gains for city workers provide better markets

for the sale of farm products. We know that neither farmers nor city workers can genuinely prosper unless they prosper together, for in truth they are each other's best customers and their economic well-being is inseparably tied together.

If you share, as I'm sure you do, this belief in the close interdependence of farm and city welfare, I think you will want to join your efforts to ours in seeking to get the truth about these price increases for steel, autos and farm equipment before the American people.

On July 7, 1955, the UAW–CIO International Executive Board urged the United States Congress to investigate announced or contemplated price increases in the automobile and steel industries. We offered at that time to present evidence before the appropriate congressional investigating committee to show that such price increases were not justified on the basis of increased labor costs. I am enclosing a copy of the statement adopted by the International Executive Board at that time.

I urge you to join with the UAW–CIO in pressing for congressional inquiry into wages, prices, and profits in the steel, automobile and farm equipment industries so that farmers and consumers generally may have all of the facts placed before them, and, based upon the facts, fix both the economic and moral responsibility where it properly belongs for the higher prices that are being imposed upon the American consumers.

American farmers and consumers generally have a right to know the facts. A congressional investigation is the most effective way to insure that all of the facts will be made available to the public. We trust that you will join with us in securing a prompt congressional investigation so that the facts can be made available.

May I hear from you?

Sincerely yours,

WALTER P. REUTHER,
President, UAW–CIO.

WAGE INCREASES ARE NOT TO BLAME FOR THE FIX THAT FARMERS ARE IN—EXPOSURE OF THE FAKE CLAIMS BY WHICH THE SECRETARY OF AGRICULTURE IS TRYING TO ESCAPE RESPONSIBILITY FOR THE FAILURE OF HIS FARM PROGRAM

With an election year coming up, Secretary of Agriculture Benson is trying desperately to escape the wrath of the farmers over the failure of his farm program and shift blame from himself to the labor unions that have secured wage gains for their members in 1955 contracts.

Here are the Benson lies:

1. Farmers are not being hurt by low farm prices and shrinking farm incomes, but by the higher prices they have to pay for farm equipment and other things.

2. These higher prices have been forced on farmers because of the wage contracts which the unions have made their employers sign this year.

Here are the facts:

1. Farmers have been hurt far more by falling prices of the products they sell than by rising prices of the things they buy.

2. But with farm prices and incomes going down, increased prices of industrial products make bad matters worse for the Nation's farmers.

3. These price increases are being imposed upon farmers by manufacturers whose profits already were greater than ever before and are now headed toward new peaks of profiteering.

4. The attempt made by these manufacturers—and by Benson—to make farmers believe that labor's 1955 wage contracts are responsible for the unjustified price increases of steel, autos, trucks, tractors, and other farm machinery is a fraud, deliberately designed and intended to transfer the farmers' justified resentment against profiteering corporations and bankers—and Benson—to wage earners and their unions.

Take these in order.

PRICES RECEIVED AND PAID BY FARMERS

Here is what the Department of Agriculture reports show:

Since January 1953, when Secretary Benson took over at the Department of Agriculture, farm prices have fallen from 94 percent of parity to 82 percent of parity.

During this period of less than 3 years, prices received by farmers for their crops fell 12 percent, for their livestock and livestock products 16 percent, and for all these combined 14 percent.

Net income of farm operators was over $14 billion in 1952. By the third quarter of 1955 it was running $10.3 billion.

While prices received by farmers were falling 14 percent during this period, the prices, interest, taxes, and wage rates which they pay fell only 1½ percent.

Prices paid by farmers for commodities used in production fell 7 percent and for commodities used in family living rose 2 percent. The rate of interest they pay on borrowed money rose 16 percent; their taxes rose 10 percent; wage rates for hired farm labor fell 1 percent.

Included among the commodities farmers buy are products of farm origin (like food, feed, seed, livestock) and industrial products (like clothing, machinery, autos, farm supplies).

During this period the average prices they pay for farm products fell 9 percent, the prices they pay for industrial products rose 2 percent.

Coming at a time when the prices they receive were going down, this rise in industrial prices made bad matters worse for the farmers, even though the rise of 2 percent was small compared with the 14 percent decline in prices received.

Largest increase in prices of industrial products bought by farmers was the 4.3 percent increase reported for building and fencing materials. Smallest was the 1.7 percent increase reported for automobiles, trucks, and tractors bought for farm use. Farm machinery prices rose 3.5 percent. On the other hand, average prices reported for farm supplies (hand tools, rope, etc.) fell 8 percent, fertilizers fell 3.2 percent and household appliances, furniture, and furnishings fell 1.5 percent.

It is plain unvarnished falsehood to claim, as Secretary Benson does, that increases in prices of industrial products have hurt the farmers more than the fall in farm prices which his policies have permitted and encouraged, and which, even today, he attempts to justify.

The largest increase in prices paid by farmers was in the price they pay for borrowed money—the interest rate on farm loans. The interest rate charged farmers went up 16.2 percent during this period.

This increase in the cost of borrowed money was imposed on farmers as a result of steps deliberately taken by the Republican administration to curtail the supply of money and force interest rates up. Bankers' profits have soared during these 2 years, while farmers and other borrowers have had to pay higher and higher rates on their loans.

Benson gave active support to this hiking of interest rates which has cost farmers $14 million a year in higher rates on price-support loans. For example—

His Commodity Credit Corporation borrows money from private banks at 2½ percent which it could borrow from the Treasury at 1½ percent.

Without public announcement or explanation, he boosted the rate on farm disaster loans from 3 percent to 5 percent. When the press discovered this 3 months later, Congress unanimously approved a bill putting it back to 3 percent.

This is the Benson who now tries to speak for those who, quite rightly, protest the rising costs that are being imposed on farmers by the banking and industrial monopolies.

To repeat—since Eisenhower and Benson took over, farm prices have fallen 14 percent, the prices farmers pay for industrial products have risen 2 percent, and the prices they pay for all commodities, interest, taxes, and hired labor have fallen 1½ percent.

Benson's allegation that farmers have been hurt more by rising farm costs than by falling farm incomes is preposterous, but they are being hurt by price increases for which there is no justification.

PROFITEERING BY INDUSTRIAL CORPORATIONS

After the dismal record he has made as Secretary of Agriculture, it is not surprising to find Benson lining himself up with the profiteers of big business to help them put over the falsehood that their 1955 wage contracts have forced them to raise prices.

Twice in the past 2 years Benson has tried to incite city consumers to rebel against farm price supports. Now he is trying to incite farmers to rebel against workers—a rebellion which would help only the bankers and businessmen who are the senior working partners of the Eisenhower team.

Benson lies when he tells farmers that wage increases made these price increases necessary. When asked by UAW-CIO President Reuther to join with him in urging Congress to investigate this profiteering and publicly fix the responsibility for it, Benson repeated his falsehood, but made no move to ask Congress to dig out the facts about wages, prices, and profits and to lay them out for the people to see.

Following is evidence, which, on its face, shows how the wage increases of 1955 are being used by the manufacturers as an excuse to swindle the farmers and to try to make the workers their scapegoats.

STEEL

United States Steel Corp. launched the profiteering parade of 1955 when it raised steel prices $7.50 a ton in July. Other steel corporations followed promptly and to the penny, as they always do.

United States Steel said its price increase was made necessary by the new wage contract it had made with the steelworkers, and because of increasing material costs, and also because it needed additional capital to expand its facilities.

That wage increase of 15 cents an hour added not more than $2.50 per ton to the cost of producing a ton of steel.

The price increase of $7.50 a ton was at least three times the amount of the increased labor cost.

When that wage contract was negotiated last June, the steel corporation was making higher profits than at any time in its history.

Second quarter profits of $209 million before taxes and $105 million after taxes set new high records for the corporation. In the 5 years preceding, best in its history, its average quarterly profits were $116 million before taxes and $48 million after taxes.

Material costs of the corporation in the second quarter added up to only 33 cents per dollar of sales, as compared with an average of 40 cents per dollar of sales during the last 5 years. Obviously, this excuse, like the excuse of the wage increase, fails to justify the profiteering price increase of $7.50 a ton.

As for the corporation's claim it must raise prices to obtain capital for expansion, this is a preposterous proposal to exact capital contributions from its customers. This is a new kind of holdup. If it gets away with this, steel consumers will be putting up the capital which will then be owned by U. S. Steel stockholders. One group will give, the other will get.

Results of the third quarter, now published, show how profitable the hijacking of

a $2.50 wage increase into a $7.50 price increase has been for U. S. Steel Corp.

Despite reduced shipments of steel in this quarter—a factor which always boosts unit costs and cuts profits—its profits were $178 million before, and $89 million after, taxes. These were 54 percent and 87 percent, respectively, above average quarterly profits of the last 5 years. The $89 million profit after taxes gave the stockholders a return of 14 percent (annual rate) on their equity in the corporation, far more than in any recent year, and a 60-percent greater rate of return than they averaged during the last 5 years.

The first 9 months of 1955 brought U. S. Steel a profit of $1.32 for every man-hour worked by its labor force, another new record. Best previous year, 1951, yielded a profit of $1.02 per man-hour, and the 5-year average was 83 cents.

In view of these record-breaking profits both before and after the wage increase, there is no shadow of excuse for the steel corporation to blame increased prices on the wage gains won by its workers in 1955. The irresponsible profiteering of this corporation and of the other steel corporations who followed its lead should be thoroughly investigated by an appropriate committee of Congress to lay out the facts for the public to see and to fix the blame squarely where it belongs.

This is what UAW-CIO wants. This is what Secretary Benson apparently does not want.

AUTOMOBILES

General Motors Corp. has announced price increases of 4½ percent on its 1956 Chevrolets and from 2½ to 7 percent on other GM lines.

The 21-cent-an-hour wage increase would have added about $49 million to GM labor costs in the second quarter 1955. A 5-percent price increase would have added $170 million to GM sales—more than three times the cost of the wage increase.

GM could have taken that added cost in stride without raising prices and still would have been the world's most profitable corporation.

When it signed the UAW-CIO contract, GM was taking in profits before taxes at a rate of just under $3 billion a year. This was profit at an annual rate of 89 percent of the stockholders' total investment in GM. Repeat—89 percent. Not a misprint. What do such gigantic profits mean?

They mean that GM was collecting a profit of $3.20 for each hour worked by each of its production workers. It paid them $2.39 an hour and took $3.20 an hour for itself.

They mean that GM could have paid the 21 cents an hour additional wage bill in the second quarter and still collect $2.99 an hour in profit.

They mean that GM could have paid the added wage cost and still come out with profits, after taxes, at an annual rate of 39 percent on the stockholders' investment (net worth).

They mean that if GM raises its prices 5 percent, it will increase the rate of return on net worth from 39 percent to 49 percent.

They mean that GM could cut prices 15 percent, pay the 21 cents wage increase and still come out with a profit of 10 percent on its net worth.

During the third quarter, with model changeover under way, with the new wage contract in effect, but with no increase in prices in effect at that time, GM earned profits, after taxes, at an annual rate of 30 percent on net worth. In 9 months of 1955, it had accumulated over $900 million of profits after taxes and was well on the way to clearing more than a billion dollars of profit in a single year for the first time in the history of American corporations.

And this is one of the corporations that is falsely telling the public that it must raise prices to cover the cost of the wage increase. It was one of the first, in fact, to indicate its purpose to extend and expand the wave of profiteering which the Steel Corp. started in July.

Ford Motor Co. has raised prices on its 1956 Fords by 5 percent, on Mercurys 2 to 5½ percent, and on Lincolns, 1 to 6½ percent.

Alone among the large corporations of America, Ford totally conceals its profits. Yet Ford, too, while hiding behind this curtain of concealment, announced to the public that the wage contract forced it to raise prices, and gave the same lame excuse to farmers for boosting its tractor prices.

Henry Ford II recently boasted that 1955 will be the most profitable year in its history. Another Ford spokesman said earlier that no one in the industry has lower costs than Ford. There is virtually no doubt that Ford, like GM, could absorb the 21 cents an hour wage increase with no increase in prices and without showing a scratch on its high-luster profits.

Chrysler's wage-price-profit position is hard to explore because its last complete figures cover a subnormal sales year (1954) when the payroll burden must have been abnormally high. Payroll figures for earlier years are not now applicable because Chrysler has absorbed the Briggs Body Division into its financial report.

However, even if we apply the high payroll burden of 1954 to Chrysler's interim profit report for the first 6 months of 1955, and even if we assume that unorganized Chrysler employees also got a 10 percent wage increase when the union's contract was signed, we find that—

It could have absorbed all of the 10 percent wage and salary increase and come out with profits after taxes equal to a return of 15 percent on its net worth;

When it raised car prices 5 percent it was collecting $1.64 from its customers for every added dollar it was paying its workers, and

This hijacking of the customers probably boosted its profits, after taxes, to a return of 29 percent on its net worth.

FARM MACHINERY

Next in the profiteering parade of 1955 come the farm machinery manufacturers.

Ford Motor Co. launched the 1955 price increases in this industry when it boosted prices of its farm tractors by 3¼ to 8½ percent.

Other manufacturers appear to have come to an agreement on a 7-percent price increase. Harvester, Deere, Case, and Caterpillar have announced price increases at this figure.

Financial reports permitting analysis of their wage-price-profit situation are available for four manufacturers in this industry.

Assuming that each of them adopts the 7-percent price-increase pattern, here is what the figures show:

Deere & Co. collects $1.96 from its customers for every added dollar paid to the workers.

Oliver Corp. collects $2.05 from its customers for every added dollar paid to the workers.

Allis-Chalmers collects $2.19 from its customers for every added dollar paid to the workers.

International Harvester collects $2.79 from its customers for every added dollar paid to the workers.

That's the story for farm machinery so far.

PROFITS AND DIVIDENDS BREAKING ALL RECORDS

Thus the profiteering pattern of 1955 spreads out from the price increases announced by United States Steel Corp. in July. Corporations are using the 1955 wage contracts as a facade of falsehood behind which they try to pin the blame on the workers for the price gouging which they are inflicting on their customers.

This outbreak of profiteering in 1955 comes at a time when profits and dividends are already at the highest levels in our history.

Here is the recent historical record taken from reports published by the Council of Economic Advisers in the Executive Offices of the President. They ought to know.

Alongside these figures of booming prosperity for corporations, we show what has been happening to farm operators' net income.

[In billions of dollars]

Year	Corporation profits before taxes	Corporation profits after taxes	Dividends paid by corporations	Farm operators' net income
1945–49 average	26.0	15.2	6.3	14.4.
1950–54 average	37.9	18.2	9.3	13.0.
1955	43.0 [1]	21.4 [1]	10.9 [2]	10.3.[3]
Highest previous year for comparison	41.2 (1951)	22.1 (1950)	10.0 (1954)	17.2 (1947).
Percentage change from 1945–49 to 1955	Up 65	Up 41	Up 73	Down 28.

[1] 2d quarter, seasonally adjusted annual rate.
[2] August, seasonally adjusted annual rate.
[3] 3d quarter, seasonally adjusted annual rate.

Note that dividends being paid to stockholders this year are larger than total net income earned by all the farm operators of America. It is the first time this has occurred since the years of the great depression.

The contrast between soaring profits and shrinking farm income makes powerfully clear why farmers object, and should object, to the price increases they are being forced to pay for the things they have to buy from prosperous profiteering manufacturers.

It explains also why Secretary Benson is desperately trying to make workers the scapegoat for his own failure, which is so dramatically pictured in the shrinkage of almost $4 billion in farm income during his term of office.

But it does not explain why Benson fails to vent his wrath on these profiteering corporations, nor why he fails to demand, as UAW-CIO demands, that Congress expose this scandal so that the public can place the responsibility exactly where it belongs.

FREEDOM OF THE PRESS

Mr. LEHMAN. Mr. President, on Thursday, January 5, I inserted in the CONGRESSIONAL RECORD a stirring editorial which had appeared that morning in the New York Times entitled "The Voice of a Free Press." This editorial dealt with the hearings of the Eastland Senate subcommittee investigating alleged subversive infiltration of the press. On the same day the Washington Post and Times Herald, another great independent newspaper, carried a thought-providing editorial dealing with the same subject, entitled "Thin Ice." On January 7 the Washington Post and Times Herald carried a further editorial entitled "Subverting the Press."

I consider the subject of these statements so important that I ask unanimous consent to have the two latter editorials

printed at this point in my remarks in the body of the RECORD.

I strongly urge that Members of Congress and the American public generally read carefully these several editorials and ponder them deeply. Truly, we are treading on thin ice.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of January 5, 1955]

THIN ICE

Despite its repeated protestations that it is not investigating the press, the Eastland subcommittee's current questioning of newsmen is moving in a dangerous direction. "We are not investigating newspapers or any one newspaper," Senator EASTLAND declared on Tuesday. But the persons subpenaed to testify at the subcommittee's executive sessions last month were employees of newspapers; and, in point of fact, they were predominantly employees of one newspaper.

Senator EASTLAND expressed hot indignation the other day at an admonitory statement issued by the American Civil Liberties Union. The ACLU warned the subcommittee against trespassing on the area protected by the first amendment, and Mr. EASTLAND accused it of trying to establish "guilt by anticipation"—a nice phrase but not a valid one. For the subcommittee's excursions in the past have compelled libertarians to be suspicious of it; for example, the subcommittee undertok what amounted to a purge of university professors while insisting piously that it was in no sense investigating universities.

Newspapermen do not have any special immunity by reason of the first amendment; they are, of course, as subject as any other citizens to the lawful processes of courts or congressional committees. But when they are questioned, as newspapermen, about past political vagaries which are suspected of having in some way influenced the editorial policies of their newspapers, the inquiry intimately touches the press as an institution.

The responsibility for keeping editorial staffs free from subversive influences, like the responsibility for determining editorial policies, belongs to the publishers and editors of newspapers. It is not a responsibility that can be shared in any way with the Government; and any assumption of this responsibility by a congressional committee, no matter how helpfully intended, is an unwarranted intrusion. In the American system, the press, so far from being subject to censorship of any kind by the Government, was meant, as Thomas Jefferson put it, to serve as a censor of the Government. It can fulfill this vital function only if it remains wholly independent of the Government—wholly free of any kind of governmental control or manipulation.

Senator EASTLAND may not intend to impair the freedom of the press but his investigation threatens to do so. It threatens to impair newspaper independence by making newspapermen fearful that they may be haled before a committee of Congress and called to account for the opinions and associations—or for criticism of congressional committees. It threatens to impair newspaper independence by taking over an aspect of managerial responsibility from editors and publishers. The American press under private management has certainly not been free from serious defects and shortcomings. Nevertheless, it must remain exclusively under private direction if it is to remain American—and free in the American sense of the term. The Eastland subcommittee is skating on thin ice over treacherous and turbulent waters.

[From the Washington Post and Times Herald of January 7, 1956]

SUBVERTING THE PRESS

"The power to investigate, broad as it may be, is also subject to recognized limitations," Mr. Chief Justice Warren said in *Quinn* v. *United States*. "It cannot be used to inquire into private affairs unrelated to a valid legislative purpose. Nor does it extend to an area in which Congress is forbidden to legislate." The hearings conducted by the Eastland Subcommittee during the past 3 days need to be considered in the light of this authoritative injunction by the Supreme Court. Whatever Senator EASTLAND may say on the subject, notwithstanding, his inquiry has certainly extended into an area in which the Constitution explicitly forbids Congress to make any law. Senator THOMAS C. HENNINGS, Jr., described the hearings—and Senator EASTLAND agreed with him—as an effort to show "such attempt as may be disclosed on the part of the Communist Party in the United States or elsewhere, indeed, to influence or to subvert the American press."

This is an approach to the press which opens up fascinating, though dangerous, possibilities. It might afford a justification for some other committee of the Senate to investigate selected newspapers in an effort to show such attempt as may be disclosed to influence or subvert them on the part, say, of the China lobby or the public utilities, or the National Association of Manufacturers. It is perfectly possible that a reporter here or there has been a member of the Ku Klux Klan or has accepted a subsidy from some special interest group or is secretly working in behalf of a political party or candidate. Perhaps such persons ought to be weeded out of newspaper staffs. But the responsibility for weeding them out belongs, in the American system, to publishers and editors, not to Congress.

Quite apart from the admittedly difficult question whether the Constitution of the United States is breached by an investigation which impinges, as Senator EASTLAND's does, upon the independence of the press, there is a fundamental question as to the prudence of such an inquiry. Senator EASTLAND may think that the New York Times was influenced or subverted by Communists. Senator X and Senator Y and Senator Z may think that other papers have been influenced or subverted by other agents or propagandists. But if they all start investigating in an effort to show such attempt as may be disclosed * * * to influence or to subvert the American press, they will end by subverting it themselves. There will be precious little freedom of the press if newspapermen fear that they may be summoned before congressional committees and required to confess all their past vagaries and illusions. Whatever the constitutional rule may be, the whole of the American heritage cries out against this kind of congressional intrusion into the affairs of a press which needs, above all, to be independent of the Government if it is to fulfill its essential censorial function.

THE NIAGARA POWER PROJECT

Mr. LEHMAN. Mr. President, I ask unanimous consent that a statement I have issued in comment upon recent developments with regard to the Niagara power project be printed in the body of the RECORD.

The question of Niagara power authorization is presently pending before the Senate and House Public Works Committees, and I believe that every effort must be made to dispel the recent confusion resulting from the challenge posed by Mr. Robert Moses, chairman of the New York Power Authority, to the validity of the Niagara treaty reservation, unanimously adopted by the United States Senate in 1950.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HERBERT H. LEHMAN

The action of Mr. Robert Moses, chairman of the New York Power Authority, in continuing to press publicly his challenge to the validity and constitutionality of the United States Senate's reservation to the 1950 Niagara Treaty—which reserves to Congress the right to decide the manner in which the power potential made available under that treaty should be developed—surprises me.

I had been under the impression that an informal understanding had been reached that there should be a concentration of effort, on the part of all those who favor public development of the Niagara waters, on getting the appropriate legislation through the new session of Congress. Previously existing differences on this subject had been either resolved or, I had believed, been submerged. Certainly as between myself and Governor Harriman, identity of attitude had been achieved and, I believe, still exists. Mr. Moses' recent activities, including his publication and broadside issuance of the Jessup-Lissitzyn brief,[1] strikes, therefore, a jarring and potentially disruptive note.

The 2d session of the 84th Congress is about to convene. Great progress was made in the previous session on proposals to turn the great Niagara water resources over to New York State under conditions which will guarantee the maximum benefit to the consumers, the State and the Nation. My own proposal, S. 1823, is the product of 5 years of study and deliberation. In its current form, this proposal has the full support of Governor Harriman and of the State administration, as well as of all public-interest groups concerned with the development of Niagara power under public auspices.

Public hearings on this legislation have been completed before both the House and Senate Public Works Committees. Indeed, the Senate committee has, by formal resolution, scheduled an executive session for January 16 to determine the further disposition of this legislation. The majority leader of the Senate has publicly indicated his intention of bringing legislation on this subject before the Senate for a vote. The prospects for legislative action have been bright indeed.

In the face of these prospects, the chairman of the New York Power Authority has undertaken a course of action which can have but one immediate effect: to encourage opposition to constructive legislative action at this session of Congress.

In my own judgment—and I am not a constitutional lawyer—the Moses thesis is based on completely mistaken assumptions. But before commenting on that aspect, I must point out that the whole approach and the whole tactic is both questionable and dangerous.

It is dangerous because it seeks to link the Niagara issue with the entire complex question of the extent of constitutional limitations on the treatymaking power, and the nature of limitations, if any, on the authority of the Senate to approve treaties and to attach conditions thereto. This is the heart of the argument over the so-called Bricker amendment. To drag the Niagara question into the embattled Bricker amendment arena

[1] A legal opinion, prepared for the New York Power Authority by Profs. Philip C. Jessup and Oliver J. Lissitzyn, and recently released to the press by Chairman Moses. This followed a legal memorandum prepared by counsel to the New York Power Authority, also published in the press.

is a most unwise tactic from the viewpoint of the interests of New York State.

It is questionable because it seeks to pit the State of New York against the Senate of the United States which, in 1950, decided by unanimous vote to attach the reservation leaving to the whole Congress the disposition of the Niagara waters made available for power purposes under the terms of the treaty.

What is the end object of this approach? It is to show that the Federal Power Commission is superior to the Senate and can issue a license for the Niagara development, despite the restraint imposed by the Senate.

Further, the object is to give the Federal Power Commission a free hand to dispose of this vast additional power potential, independent of the will of the Congress which created the Federal Power Commission.

It is to be remembered that if the Federal Power Commission were, in fact, to be given jurisdiction over this Niagara power potential made available by treaty, it would be within the discretion of the FPC to turn over this resource to a private power monopoly, if the FPC so saw fit.

I have been unofficially informed that there is no intention of making a legal test of the Senate reservation at this time. Governor Harriman has stated publicly that he does not approve of such a move and would not support it.

What is the reason then for continuing to publicize the press and challenge to the reservation, and to the power of the Senate? Can it be because Mr. Moses wishes to confuse the issue at the present time and forestall congressional action on my bill at this session? If that is his motive, I propose to do my best to see that this does not happen, and that Congress will, indeed, act favorably on a bill for public development of the Niagara, with adequate safeguards of the consumer interest.

Now as to the merits of the argument. I cannot pit my knowledge of constitutional law against that of the experts marshalled by Mr. Moses to support his thesis. Their citations of precedents dealing with international law and the conclusions drawn therefrom need to be answered by other experts in the field. I am sure they will be.

But I must say, as a layman who has had some experience in the application of constitutional principles to the authority and prerogatives of the Senate and of the whole Congress, that all the arguments and conclusions seem based on assumptions which are demonstrably unwarranted and irrelevant. The briefs and legal opinions in support of the Moses thesis make up a towering structure of constitutional critique and analysis resting, however, on an incredibly flimsy foundation.

The principal assumption is that the reservation to the 1950 treaty amended the Federal Power Act. But there is no real basis for this assumption. The reservation did not amend the Federal Power Act. The reservation simply suspended, subject to the decision of Congress, one aspect of the treaty which would have otherwise, without Congressional deliberation and action on the subject, greatly increased the authority of the Federal Power Commission. Ratification of the treaty without the reservation would have given the Commission jurisdiction over waters which, preceding the negotiation of the treaty, the Federal Power Commission did not have and could not have acquired even by act of Congress.

The purpose of the reservation, therefore, was to prevent the treaty from being self-executing with respect to the disposition of the additional water power potential made available under the terms of the treaty. Other aspects of the treaty, such as the agreement to construct remedial works to preserve and enhance the beauty of the falls, were permitted by the Senate, in its wisdom, to be self-executing. Congress has not to this day enacted legislation expressly authorizing appropriations for remedial works at Niagara Falls, yet Congress has appropriated money for those remedial works on the simple authorization of the treaty provisions. The urgent work of building structures to preserve the beauty of the falls, work agreed upon under the treaty, is well under way today.

What Mr. Moses is challenging, then, is the right of the Senate to exercise its discretion with respect to provisions of a treaty which are otherwise self-executing and to suspend, by reservation, the domestic effectiveness of any one or more of those provisions, pending a review and a decision on them by the Congress of the United States.

If the Senate does not in fact have this power—a power which it has repeatedly exercised in the past, as, for example, in the Mexican Water Treaty of 1945—then, indeed, there would be basis for the fears so frequently and mistakenly expressed by the advocates of the so-called Bricker amendment. If the Senate cannot, by reservation, forestall the effect of a particular treaty provision upon the laws of the United States or of the individual States, then Senator BRICKER would have some logic on his side. But, of course, it is ridiculous to suggest that the Senate does not have such power. It is an essential part of the authority given the Senate under the Constitution to consent to or reject treaties. Moreover, the Supreme Court has held repeatedly that Congress may terminate or nullify a treaty by a simple act, and it would seem rather ridiculous to say that Congress has power to repeal an entire treaty, but the Senate lacks authority to suspend self-executing provisions until Congress acts.

As far as the Federal Power Act is concerned, it was not affected at all by the reservation to the treaty. The authority of the Federal Power Commission was neither extended nor decreased. The Senate reserved to the Congress the right to decide subsequently on this matter.

Congress could subsequently: (1) place these additional waters under the jurisdiction of the Federal Power Commission; (2) authorize a specific public development under specific conditions; or (3) authorize a specific private development under specific conditions, or under no conditions at all. In fact, separate pieces of legislation to achieve each of these purposes have been introduced and considered by the Congress. The Congress is today in the process of deciding among these various courses of action.

The arguments presented in the various briefs and memoranda circulated by Mr. Moses are based on the assumption that the 1950 reservation directed a specific and particular disposition of the Niagara waters. But the reservation did nothing of the sort. It merely reserved to Congress the right to decide what that disposition should be.

Thus the references in the various briefs to President Truman's message of transmittal of the treaty, in which he said that the disposition of the waters was a matter of domestic concern and hence should not be dealt with in the treaty, are grossly misleading. The President was referring to the question of whether the power development should be public or private. This question, he indicated, should be decided by the Congress of the United States and not by treaty. The reservation specifically carried out the President's stricture. Otherwise that question would have actually been decided by the treaty, since at that time, in August 1950, the Federal Power Commission, had it been given the jurisdiction over the Niagara waters, could have granted a license only to the Niagara Mohawk Power Co., which was at that time the only qualified applicant for a license. In that event the decision to which Mr. Truman referred would have been implicitly made by the treaty and the Senate failed to attach the reservation, and such a situation would have been contrary to and not in accordance with the President's views.

The briefs and memoranda submitted on behalf of Mr. Moses are full of such misleading references and mistaken assumptions. Thus the Jessup brief describes the reservation as having been inspired by me, or as being of my authorship. I would be glad to claim the credit for it, but unfortunately I cannot. I had absolutely nothing to do with either the preparation or the submission of the reservation. I knew nothing about it until it was on the point of being offered by Senator AIKEN of Vermont. At that time I gladly lent my support to the reservation, but my support was really not required.

The fact is that the reservation was informally offered by Senator AIKEN (he was not then a member of the Foreign Relations Committee), was sponsored in the committee by Senators GREEN and WILEY, among others, and was unanimously adopted by that committee.

The chairman of the Foreign Relations Committee at that time was Senator Connally of Texas. The ranking Republican was the late Senator Vandenberg. Other members of that committee at the time were such outstanding authorities on constitutional law as Senator Henry Cabot Lodge, Jr., and the late Senator Brien McMahon. The reservation was unanimously adopted by the committee and, in a separate vote, unanimously adopted by the Senate itself. I regret that I cannot claim that I was the author and chief sponsor of this essential provision, and can only claim to have been a soldier in the ranks in support of that proposition.

I would make one further comment as to the completely erroneous assumption that the reservation amended the Federal Power Act. Those who challenge the validity of the reservation appear to believe that the Federal Power Commission has been vested by the Congress with total authority and jurisdiction over hydroelectric developments, and that for the Congress to assume jurisdiction over one or more of these hydroelectric developments requires amendment of the Federal Power Act, either expressly or by implication. This is at variance with the facts. Within the last 20 or 30 years the Federal Power Commission has only rarely issued licenses for major hydroelectric developments. The rule, rather than the exception has been for Congress to authorize these developments. The instances are too obvious and too well known to need recital, including such developments as TVA, Bonneville, Grand Coulee, Boulder Dam, Chief Joseph Dam, etc.

Section 7–B of the Federal Power Act expressly directs the Federal Power Commission to recommend to the Congress "the development of any water resources for public purposes." In fact it has become the almost invariable practice for Congress to take and exercise jurisdiction over these resources and to decide the specific method and conditions for the development of these resources.

It was specifically to prevent the Niagara Mohawk Power Co. from entering its application with the Federal Power Commission for a license to develop the Niagara waters on the day of the ratification of the treaty—as the Niagara Mohawk Power Co. had publicly announced its intention of doing—that the Senate adopted the reservation.

It was the logical and natural way to forestall a result which the Senate did not desire to flow from the approval of the treaty one of whose primary purposes was to preserve and enhance the beauty of Niagara Falls as well as to develop the additional waterpower. If the Senate had thought that such a result would automotically ensue and could not be forestalled by reservation, the

Senate would not, in my judgment, have consented to the treaty.

It is exceedingly strange to hear Mr. Moses make an argument today which—if it were a valid argument—would have permitted the Niagara Mohawk Power Co. in 1950 to take control of this precious water resource belonging to all the people of the State and the Nation.

CELEBRATION OF 81ST BIRTHDAY OF FORMER PRESIDENT HOOVER

Mr. SMITH of New Jersey. Mr. President, on the 10th day of August last, our distinguished former President, Mr. Herbert Hoover celebrated his 81st birthday in Newberg, in the State of Oregon. On that occasion he delivered a very significant address, entitled "Our American Way of Life," which I read with great enthusiasm at the time. As the Senate was not in session, I have held the address to offer for the RECORD at the opening of this session. I ask unanimous consent that this address delivered by former President Hoover be published in full in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

OUR AMERICAN WAY OF LIFE

(Address by Herbert Hoover on the occasion of his 81st birthday celebrated by the State of Oregon, at Newberg, Oreg., August 10, 1955)

It is indeed a great honor to have been invited by the Governor and Legislature of Oregon to spend my birthday on the scenes of my boyhood.

Also, it is a pleasure to take part in the dedication of this cottage. Its restoration is due to the effort of my boyhood friend Burt Brown Barker with the co-operation of Rev. Levi Pennington and this community. Mr. Barker has risen high in the service of this State and the Nation. Dr. Pennington has given this community years of spiritual leadership.

This is a time and place of stimulated affections and recollections. In this cottage and orchard, with its cherries, its apples and its pears, I spent formative years of my boyhood. Here I roamed the primitive forests with their carpets of flowers, their ferns, their never forgettable fragrance. There were no legal limits on the fish you could catch. No warden demanded to see your license. From those impressions on Oregon boys comes always the call to return to her again and again. I have omitted any reference to my boyhood contacts with poison oak—that is not part of the call.

I was brought here 70 years ago to live in the family of my uncle, Dr. Henry John Minthorn, a country doctor.

My first day in Newberg was spent in making acquaintance with lovable Aunt Laura. My aunt was rather a stern person with disciplinarian ideas. She had few words and they were mostly devoted to moral requirements. But she relaxed at moments when I needed to go fishing or to explore the woods.

When I arrived on the Oregon scene she was busy with my girl cousins making the winter store of pear butter, from pears which grew prolifically in this yard. I had never eaten a pear before as my family circumstances in the Midwest did not permit that exotic luxury. She showed me how to stir the kettle and indicated that I had to keep going without any stops. But at the same time she said, "Thee can eat all the pears thee likes." I liked the idea, and I liked it too much. And then she tucked a sick, small boy into bed. I ceased to eat pears—for a while.

One of my chores was to split the wood for stove-size current use. I have had little opinion of split wood as a household fuel ever since. But I can still hear Aunt Laura calling me from much more desirable occupations, "It is time thee gets in the wood."

My activities hereabouts did not make any great transformation of human society. But something else does warrant the restoration and dedication of this cottage. That is expressed in the plaque you have put upon it: "This house was the home of Dr. Henry John Minthorn, a beloved physician in this community."

I am honored to be mentioned on the plaque.

What you have done here is to pay a tribute to all the pioneering country doctors of our Nation. There are thousands of cottages in this land which should be marked with plaques recalling their devotion.

John Minthorn was one of those devoted men. He was born 110 years ago in the Quaker faith. He practiced his healing profession mostly in this State for 45 years and he lies buried in this village.

As a boy he witnessed the underground in the Midwest, where during the nights the Quakers transported Negroes escaping from slavery northward to the freedom of Canada. He reached maturity during the Civil War and joined the Union Army out of conviction in the matter of human slavery. Quaker pacifism did not extend into that area of thought. Returning from the war, he graduated from the medical schools of Iowa, of Pennsylvania, and of Ohio. He was equipped with the full medical skills of his day.

In those early days the patients often could not pay the doctor, and Uncle John at intervals in his life taught school or did missions to the Indians for the Government in order to make ends meet. But even along with these duties, he was still the incarnation of the country doctor.

Let no one think that the country doctor of a generation ago was not a skilled man. Without the amazing modern aids of diagnosis, he was a sure diagnostician of the major ills of mankind. Without antibiotics, without vaccines—except for smallpox—without vitamins, without the X-rays and fluorescent photographs of your innards, the country doctor did healing in an amazing degree. Hot towels and cold towels were substituted for aspirin and codeine. No doubt Mother Nature used more pain in her healing processes. But statistics show that a host of his charges reached old age safely.

But beyond his healing art, the country doctor did far more. He instilled the community with the common sense of preventive medicine. He brought sympathy, spiritual strength, and courage to the troubled patients. He healed their spirit.

He brought their babies into the world. He piloted the youngsters safely through their measles, chickenpox, and mumps without the aids of modern medicine. His major word of comfort was "You cannot have it twice." He gave counsel and courage to the young and helped them to find a job.

He was their lifelong friend. He was the confidant of the family and he healed many a family conflict. He was a leader in the affairs of the community.

The plaque on this cottage is a tribute to a great profession which has made much of the spiritual backgrounds of the American people.

The species of the country doctor is not extinct. With urban life, paved roads, and the automobile, he has changed his name to that of the family doctor. He is better equipped to fight disease and accident, but the family doctor has the same qualities of moral strength, friendship, and family guidance as of old.

And it is the family doctor's knowledge that these needed moral and spiritual services could not survive socialized medicine that leads him to fight it at every turn.

And this is no disparagement of the great specialists who daily save the lives of thousands of our people. But America needs more family doctors.

This occasion also recalls the part of pioneer men and women in the Northwest. Today we can recall again memories of the courage with which the pioneers felled these forests to make their farms, of their stanch fidelities to the ideals of free men and the moral and spiritual life with which they endowed our generation.

Once upon a time it was the custom of our people to gather on the Fourth of July and someone would read the Declaration of Independence with the Stars and Stripes in the background. Someone spoke on freedom and the greatness of America. It was in this village that I first had that inspiring experience—and from Dr. Minthorn.

In order to do our part we, the oncoming generation, packed a drain tile with appropriate gunpowder, tamped both ends hard with clay, and fixed a fuse. The fuse was short—and tile proved more powerful than we expected. Dr. Minthorn was busy for hours picking pieces of tile out of the skins of small boys. He engaged in no reprimands.

Dr. Minthorn and his generation had deep convictions on the American way of life. Their fathers were the sons of men who had fought the war for American Independence. They themselves had fought the Civil War to free the slaves. Their lights along the way of American life were the Declaration of Independence, the Constitution, Washington's Farewell Address and Lincoln's Emancipation Proclamation. They held that the function of the Federal Government was to safeguard the individual freedoms and trust to the initiative of men to generate progress.

Probably some will say that the recalling of those times, of those men, and of those beliefs is an expression of longing to go backward in American life. No sane person ignores the shifting scene on our national stage. But do not forget the many thousands of Dr. Minthorns and their wives who sustained and enlarged the spiritual forces which give the impulse to our way of life today.

During the last score of years our American way of life has been deluged with criticism. It comes from our own people who deplore our faults and genuinely wish to remedy them. Among these I myself have joined because of my anxieties over mistaken policies and especially the influence of Karl Marx on our way of life. Criticism comes daily from the habit of our political parties to deplore the opposition. It arises from the forthright refusal of the American people to wash their dirty linen in secret. It comes from our love of sensational incidents where villainy is pursued by law and virtue triumphs.

And it comes from the fuzzy-minded totalitarian liberals who believe that creeping collectivism can be adopted without destroying the safeguards of free men. It comes bitterly and daily from the Communists at home and abroad who would overthrow our American system. And it even comes from free nations whom we have tried to help.

Altogether, if we look at the criticisms alone, we seem to be in a very, very bad way and engaged in our decline and fall.

In all this clamor we might occasionally mention something good about ourselves.

We could point out that our American way of life has perfected the greatest productivity of any nation on earth; that our standard of living is the highest in the world. We could point to our constantly improving physical health and lengthening span of life. We could point out that the mechanical genius of our people has, by millions of

labor-saving machines, taken the sweat from the backs of most of our people.

In the governmental field, we could suggest that our supposedly decadent people still rely upon the ballot and the legislative hall to settle their differences without a secret police with slave camps.

In the cultural field, we could point out that with only about 6 percent of the world's population we have more youth in our institutions of higher learning than all the rest of the world put together. We could probably enumerate more libraries and more printed serious words than all other 94 percent of all the people of the earth put together.

On the moral and spiritual side, we have more hospitals and charitable institutions than all of them.

And we could suggest that we alone, of all nations, fought in two world wars and asked no indemnities, no acquisition of territory, no domination over other nations.

We could point to our advancement of the spirit of compassion. We could prove it by the billions of dollars we have made as gifts to save millions from famine and governments from collapse.

Much as I feel deeply the lag in giving full equal chance to our Negro population, yet I cannot refrain from mentioning that our 14 million American Negroes own more automobiles than all the 200 million Russians or the 300 million Negroes in Africa.

All of which is not boasting, but just fact. And we could say a good deal more.

What does all this mean? It means that freedom of mind, of spirit, and of initiative still lives in America. It means that our people are strong in religious faith. Here alone are the open windows through which pours the sunlight of the human spirit. Here, alone, even with all its defects, is human dignity not a dream but an accomplishment.

These ideals of freedom and religious faith guarantee there will be no decline and fall of American civilization.

Therefore we should lift our eyes unto the hills from whence cometh our help.

God bless you all.

SENATORS WHO HAVE SERVED ALSO AS STATE GOVERNORS AND AS MEMBERS OF THE HOUSE OF REPRESENTATIVES

Mr. CARLSON. Mr. President, on February 23, 1953, in the 1st session of the 83d Congress, I called to the attention of the Senate the fact that there were at that time six members serving in the United States Senate who have had the privilege of serving as governors of their States, in the United States Senate, and in the House of Representatives.

At that time I presented a list submitted to me by the Legislative Reference Service of the Congressional Library, giving the names and the period of service of the men who had served in these three capacities since 1789.

As the junior Senator from Kansas has had the privilege of serving as Governor of the State of Kansas and in the House of Representatives, he thought at that time it might be of interest to Congress to have the information I had obtained.

At the present time there are three other Members serving in the United States Senate who have served as governors of their States, in the United States Senate and House of Representatives. They are the distinguished senior Senator from Kentucky [Mr. CLEMENTS], the distinguished junior Senator from West Virginia [Mr. NEELY], and the distinguished senior Senator from Wyoming [Mr. BARRETT].

Recently the Legislative Reference Service of the Congressional Library made a further study and check of the Members of Congress who have had the honor of serving in these three capacities, and they submitted to me a corrected list.

I ask unanimous consent, Mr. President, that the statement I made on February 23, 1953, be made a part of the RECORD, together with the list which has just been submitted to me by the Legislative Reference Service of the Congressional Library.

There being no objection, the statement and list were ordered to be printed in the RECORD, as follows:

Mr. CARLSON. Mr. President, as the reading of George Washington's Farewell Address has just been concluded, a review of some history since 1789 might be of interest to the Senate.

Last summer one of my friends suggested to me that there were less than 100 men who have served in both branches of the Congress and as governors of their States. This statement rather intrigued me and I requested the Legislative Reference Branch of the Congressional Library to assist me in research on this matter.

As the junior Senator from Kansas has had the privilege of serving as Governor of the State of Kansas, in the United States Senate, and the House of Representatives, I thought it might be of interest to Congress to have the information that I have obtained.

I find in checking the records that 89 men have had the privilege of serving in these positions since our Nation adopted its Constitution in 1789.

In addition to the junior Senator from Kansas, there are five other Members of the United States Senate who have served as governors of their States, in the United States Senate and the House of Representatives. They are the distinguished Senator from Kentucky [Mr. CLEMENTS], the distinguished Senator from New Hampshire [Mr. TOBEY], the distinguished Senator from North Carolina [Mr. HOEY], the distinguished Senator from West Virginia [Mr. NEELY], and the distinguished Senator from Wyoming [Mr. BARRETT].

It is interesting to note that of the list of 89 Members, 2 of them became President of the United States, namely, Andrew Jackson and Andrew Johnson, both of them from the State of Tennessee.

In checking the list further, I find that there are 13 States in which no person has served in all three places. They are as follows: Arizona, Delaware, Idaho, Iowa, Michigan, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Pennsylvania, South Dakota, and Utah.

There are 16 States, including my home State of Kansas, which have had 1 person who has served in the 3 positions. Those States are Arkansas, California, Colorado, Illinois, Kansas, Minnesota, Missouri, Montana, New Jersey, Oregon, Rhode Island, Texas, Washington, West Virginia, Wisconsin, and Wyoming.

There are 5 States that have had 2 persons serve in the 3 capacities—Alabama, Florida, Indiana, Mississippi, and Vermont.

There are 4 States that had 3 persons who have served in these capacities—Louisiana, Massachusetts, New Hampshire, and Ohio.

There are 3 States that had 4 serving in these various capacities—Maine, Maryland, and New York.

There are 2 States which had 5 persons serving in the 3 positions—Connecticut and Georgia—and 4 States had 6—North Carolina, South Carolina, Tennessee, and Virginia.

Of all the States of the Union, Kentucky has had the largest number of persons privileged to serve in these 3 places, namely, 8.

Another interesting sidelight on the men who had such service is that four of them, including Andrew Jackson, who became President of the United States, did not render their service from the same State for all 3 positions. Andrew Jackson served in the House and Senate from Tennessee and as Governor of the State of Florida.

Samuel Houston, of Tennessee, served as a Member of the House of Representatives from the State of Tennessee, and as Governor of that State, but he also served as Governor of Texas and as United States Senator from that State.

John Branch, of North Carolina, served as Governor of North Carolina and as Senator and Representative from that State and also as Governor of Florida.

John B. Weller, of California, served as Governor of California and as a Senator from that State, but he also served as a Representative from the State of Ohio.

I ask unanimous consent to have placed in the RECORD the names of those who have served in these capacities, together with the names of the States and the date of service.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Names of persons who have served as State Governors, United States Senators, and United States Representatives, 1789–1955 [1]

Name	State	Governor	Senator	Representative
Adair, John	Kentucky	1820–1824	1805–1806	1831–1833
Barrett, Frank A	Wyoming	1951–1953	1953–	1943–1949
Bibb, William W	Alabama	1817–1820

RELIEF OF FARMERS FROM FEDERAL TAX ON GASOLINE USED FOR FARM PRODUCTION

Mr. CARLSON. Mr. President, one of the most helpful and constructive suggestions in the President's message to the Congress on farm problems is the recommendation that legislation be enacted to relieve the farmer of the Federal tax on the purchase of gasoline used for farm production.

Since the Federal gasoline tax is considered a "use" tax, that is a tax for using the highways, then in my opinion, it is clearly inconsistent to collect the tax on gasoline used for non-highway purposes.

Gasoline used on a farm is one of a number of farm production supplies—gasoline, farm machinery, insecticides, feed, fertilizer, and so on. There is no relationship whatsoever between these production supplies and the use of the highways.

It would be just as illogical to tax fertilizer and to use the tax for building highways as it would be to tax gasoline used on the farm for this purpose. I do not know of any other industry in which a production supply is taxed to build highways.

Farmers should pay their fair share of the cost of building highways, as measured by their use of the highways. They should pay both the State and Federal gasoline tax on gasoline used on the highways. But merely because gasoline happens to be the major source of power for farm production is no reason why farmers should pay the gasoline tax on gasoline that is not used on the highways.

On March 8 of last year, I introduced S. 1336, which provides for a refund or credit for tax used or resold for certain farm equipment. The senior Senator from Minnesota [Mr. THYE] is a cosponsor of that bill.

S. 1336 was referred to the Senate Finance Committee of which I am a member and today I have written the Senator from Virginia [Mr. BYRD], chairman of the Senate Committee on Finance, urging that he hold early hearings on this important matter.

Mr. President, I ask unanimous consent that the text of the letter I have written the chairman of the Finance Committee be printed in the RECORD as a part of these remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 9, 1956.

Hon. HARRY BYRD,
Chairman, Senate Committee on Finance, Washington, D. C.

DEAR MR. CHAIRMAN: The President today in his message to Congress recommended that legislation be passed to relieve the farmer of the Federal tax on purchases of gasoline used on the farm for farm production.

On March 8, 1955, I introduced S. 1336, a bill providing for a refund or credit for tax on gasoline used or resold for certain farm equipment. This bill was cosponsored by the senior Senator from Minnesota, Mr. THYE. It was referred to the Senate Committee on Finance, of which you are chairman.

Since the Federal gasoline tax is considered as a "use" tax, that is a tax for using the highways, then in my opinion, it is clearly inconsistent to collect the tax on gasoline used for nonhighway purposes.

The farmers have long felt that gasoline used on the farm for production and not used on the highways, should be exempt from the present Federal tax.

In view of the President's message and the urgent need for action on this proposal, I would urge that the Senate Finance Committee hold early hearings on S. 1336 and other pending legislation which would carry into effect the recommendations of the President on this important matter.

Sincerely yours,

FRANK CARLSON.

OIL AND GAS LEASES—WILDLIFE REFUGE LANDS

Mr. WATKINS. Mr. President, I ask unanimous consent that I may be permitted to address the Senate for 8 minutes.

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). Is there objection? The Chair hears none, and the Senator from Utah may proceed.

Mr. WATKINS. Mr. President, as a lifelong conservationist, I do not like to see the conservation of our national wildlife refuge lands made a political football.

The problems of developing and conserving lands and other natural habitats required to conserve the dwindling population of wildlife in this country are so vast and complex, that they deserve the continuing interest and support of all sections of the country and of a large and loyal following in both political parties.

We in the West are acutely aware of this problem, because a large part of the refuge lands are in the West. In fact, one of the country's outstanding pioneer developments in migratory bird refuges is located in the northern part of my State, the Bear River Refuge.

Most true conservationists are well aware of the long-range implications of the conservation movement. They also are essentially fairminded individuals.

I am sure that these individuals have been disturbed at the tempest in a teapot which has been created following the recent issuance by the Department of the Interior of new regulations on oil and gas leasing on wildlife refuge lands.

Much of the steam has been generated by a deplorable lack of information in the admittedly complicated field of public land use. Much of this misinformation, fortunately, was dispelled by a conference conducted with conservation leaders in the District here on January 4 of this year. The information brought out in that conference is so basic to a complete understanding of the problem that I ask unanimous consent to have the transcript of the proceedings printed in the RECORD, at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. WATKINS. Mr. President, it is unfortunate that such a conference was not held prior to the announcement of the new regulations. If such action had been taken, I am sure that some of the misunderstandings that have arisen would never have materialized.

However, in fairness to Secretary McKay, I wish to point out that he did refer the proposed regulations to the Department of Interior's Advisory Committee on Conservation. Under the circumstances, it appears that the Department should consider whether the Advisory Committee should be broadened to bring in a wider cross section of geographic and conservation interests to help prevent or reduce such misunderstandings.

The publication of the proceedings at the Department's conference with District conservation leaders should adequately disclose that Secretary McKay's action to stop leasing in 1953 and to provide tighter restrictions on such leasing in the 1955 order was a real conservation measure, and one deserving praise, instead of censure, from conservationists.

The transcript also sets forth the complete record on this incident, and shows conclusively that the Department has a very good record on this matter, and that Secretary McKay has nothing to fear from any investigation that may be inspired by the misinformation and steam generated by pronouncements following the issuance of the Secretary's order, if, indeed, one is ordered.

It is to the Secretary's credit that he did not attempt to make administration of the wildlife refuges a political football, when he stopped leasing in 1953 and ordered a thorough study of this matter. If the issuance of 1 lease in 1955 is such a horrible crime against conservation, then certainly the large number of leases applied for and granted prior to Secretary McKay's administration are even more worthy of investigation, and I wish to assure my colleague in the House who has proposed a House investigation of this matter that I am preparing to make a study of the leasing activities prior to 1953, and will see to it that this hitherto-overlooked record is brought to the attention of Congress if a politically inspired investigation results from Secretary McKay's efforts to tighten up refuge leasing.

It is my firm conviction that unwarranted investigations and counterinvestigations of this type will not solve the problem presented herein, and that such activities will not contribute to the progress of the conservation movement.

However, it is apparent that some conservationists are deeply concerned about the need for any additional petroleum leasing of wildlife refuge lands, except to control peripheral drainage.

It is equally apparent that Secretary McKay, with the full approval and cooperation of the career specialists in the Fish and Wildlife Service, has taken action to effectively supervise and control any such leasing deemed appropriate under the terms of Federal mineral leasing laws now in effect.

Under the circumstances, I wish to provide an opportunity for Secretary McKay's position in connection with the argument to be given a public airing. To that end I have requested the Secretary to provide me with statements giving his side of the argument over oil and gas leasing regulations.

Also, I have assembled the pertinent legislation and Executive orders applying to this problem, and a short fact sheet giving answers to certain charges that have been made.

I ask unanimous consent that the documents to which I have referred be printed in the RECORD, as a part of my remarks.

There being no objection, exhibit 1 and other documents were ordered to be printed in the RECORD, as follows:

EXHIBIT 1

MONTHLY CONFERENCE WITH CONSERVATION LEADERS IN THE DISTRICT OF COLUMBIA

(John L. Farley, Director, Fish and Wildlife Service, Department of the Interior, presiding, Wednesday, January 4, 1956, Secretary's conference room, Department of the Interior, Washington, D. C.)

PROCEEDINGS

Mr. FARLEY. While we are waiting for Mr. Donohue to arrive, possibly since we last assembled we have some new faces here, and to be sure they are not unknown, I would like to introduce Mr. Robert Johnson, Assistant Director for Wild Life. He is sitting over there in the corner.

Next to him is Bob Wells, who is Assistant to the Director. He is assigned to a multitude of tasks.

Next I would like to introduce Lester Bagley. Lester Bagley is assistant for our field operations. That is a new position that was created under the recommendations of the survey team to bring the work of the regional directors a little closer to the central office. Perhaps I better put it in a more realistic way, to bring the central office a little closer to the regions, as that is the objective that was attempted to be obtained.

The others we have, of course, I think all of you know. I am sure all of you know each other.

In the meanwhile, we can open the discussion with a few questions, if you have any now which I can answer. We can reserve the special subjects until we have everybody here.

Mr. FRED M. PACKARD (National Parks Association). I can never think of any questions when I am asked that way. I go blank.

Mr. FARLEY. Mr. Donohue, I have already explained that this meeting is really in two parts. The first part is to hear from you the results of your assignment to go to the Wichita refuge and report to the Secretary on your observations.

The Wichita has been so much in our minds that I thought this group would be particularly interested in hearing the reactions of Mr. Donohue.

And so, Mr. Donohue, I have already, I believe, stated that you were Special Assistant to the Secretary for the land areas, and that you had that assignment, and that you are to comment on your observations. So will you please take that over now?

Mr. HARRY J. DONOHUE (Special Assistant to Assistant Secretary). I might say first that I will give you my report as I submitted it to the Secretary. A press release is being prepared on the report, and will be released about 3 o'clock. That is, it will be available here in this room about 3 o'clock. I would like to read you now my report, a memorandum, to the Secretary.

"Subject: Report on visit to Wichita Mountains Wildlife Refuge.

"On December 8 and 9 I visited the Wichita Mountains Wildlife Refuge for the purpose of getting an on-the-spot view of the 10,700 acres of refuge land that the Army is interested in obtaining for its use.

"Immediately upon arriving in the general area, I visited the office of the Commanding General of Fort Sill, accompanied by Ernest J. Greenwalt, Superintendent of the Wichita Mountains Wildlife Refuge. Major General Williams was in conference, so Mr. Greenwalt and I talked with Colonel Crandell, his Chief of Staff. After a short discussion we departed and met with representatives of the press in Lawton, Okla. During the rest of the daylight hours on Thursday, I toured the 10,700 acres in dispute. That evening I met with Mr. Emmett Keough, president of the Lawton Chamber of Commerce. The following morning, December 9, I met and talked with Major General Williams at Fort Sill and his G–3 Col. Thomas J. Counihan. Following this meeting, I met with Messrs. John I. Taylor, Frank Rush, and Wayne Rowe, of the Land Owners' Association, to discuss the Army expansion. After this meeting I visited the grave of Quanah Parker, last Chief of the Comanches, and spent the rest of the day, until my departure from the general area, visiting more of the refuge.

"While the chief purpose of my visit was to see the physical layout of the refuge, the discussions I had with local people was of considerable assistance in clarifying many of the problems affecting the Department, and I believe it enabled me to set forth clearly the position of the Secretary in this matter.

"Accompanied by Mr. Greenwalt I covered the entire 10,700 acres in dispute in a most thorough manner. I was very much impressed by the value of this area for wildlife purposes. During the approximately 6 hours I spent going over the area by automobile and by foot, I saw buffalo, longhorn cattle, deer, and wild turkeys in considerable number. This wildlife was ranging throughout the flatland which makes up well over 30 percent of the area. In addition, there are countless draws reaching into the high rocky ground which tracks proved were being heavily used by wildlife. Even in the high rocky ground it was obvious that there was considerable forage available for wildlife feeding, and I was led to conclude that there is very little of the 10,700 acres which is not useful, and, in fact, important for wildlife management.

"The area, particularly when viewed from a distance, presents a rocky and rugged appearance. Close examination of it, however, reveals considerable ground covered as previously noted. I can in no sense agree with the Army's statement that this is an area of rocks and rattlesnakes. The interesting fact about the rocks, of which there are a great number, is that the high rocky ground of which they speak is considerably more valuable to this Department for wildlife purposes than it would be to the Army. Of the 10,700 acres, the Army is principally interested in the flat, heavily wooded and heavily grassed areas. The rest of the area constituting perhaps 70 percent of the 10,700 acres is so rocky and rugged that the Army could use it for nothing except to set up observation posts. The excellent flatlands which are of prime importance to the Army form a general circle immediately within the boundary of the disputed area with the high rocky ground in the middle thereof.

"Discussions with Army officers at Fort Sill brought out clearly, as had not been done in previous meetings in Washington, the use to which the Army intended to put the area in dispute. In all of the previous discussions the Army had emphasized the need of the disputed area in order that they might fire their new long-range 280-millimeter cannon. The local officers, however, emphasized the need for having the 10,700 acres for maneuver purposes in order to set up firing positions for short-range weapons which would fire directly south into what is now private land. In establishing this maneuver area the Army would install equipment on a permanent basis. They informed me that they would lay down wire lines throughout the 10,700 acres in order that as they moved the firing positions from one place to another, it would be necessary only to 'plug in' to the local installation. It is obvious, therefore, why the Army desires exclusive use of the area. After observing certain areas previously used by the Army for temporary installations, and having in mind the character of use to which the area would be put under an exclusive use permit, there is no question but that the usefulness of the area for wildlife purposes would be destroyed.

"Under the circumstances, I believe the Department has no alternative but to refuse to permit the Army to have exclusive use of the 10,700 acres of land. I believe the position previously established in discussions with the Army is a correct one. That would provide the closing of a buffer zone south of the Indiahoma Highway to the public during firing periods. The buffer zone would extend east beyond the Indiahoma Highway on the same line for approximately 2 miles and then south to the refuge border. Even in this area, the Army should not be granted an exclusive use permit. The public should be barred only during firing periods, and no permanent installations should be permitted. In addition, a firebreak should be set up by the Army immediately south of the refuge fence which extends all along the south boundary of the refuge.

"In conclusion, I would like to say that I was impressed by the Wichita refuge as being a unique national asset, teeming with wildlife in a rugged natural setting. I think it is a matter of vital importance to preserve the refuge from further encroachment. While the Wichita refuge is even now the most heavily visited of our wildlife refuges, the surface has hardly been scratched. When the story of the Wichita is told, I believe it will become a mecca for the touring public. Every child in the Nation should have an opportunity to visit this unique and beautiful area. Adults will be enthralled as well. If you find it possible to inspect it personally, I believe you will look back upon it as a memorable occasion." [Applause.]

Mr. DONOHUE. I will be glad to answer any questions regarding it. As I say, that report will be released this afternoon.

Mr. C. R. GUTERMUTH (Wildlife Management Institute). Mr. Chairman, as one who is thoroughly familiar with the Wichita refuge, and who can agree wholeheartedly with the factual report that was presented by Mr. Donohue, I also would like to say that he should be commended very, very highly for presenting the situation as it truly exists. That is an invaluable area. As has been stated over and over again, it should not be destroyed by the uses to which the Army intends to put it. I think that the group here will agree wholeheartedly when I say that we should express our thanks to the Secretary for having this personal inspection made of the property, because I think that he now is in a much better position to defend the stand that he has taken.

Mr. FARLEY. Thank you very much.

Mr. DONOHUE. I would like to add one more thing. I am submitting another report to Secretary McKay regarding Mr. Greenwalt. I was very much impressed by him. He has been in a most difficult situation. Many local people are not talking to each other about this matter down in Oklahoma. People outside of Lawton refuse to spend money in Lawton because one group is in favor of the Army expansion program and the other is not. The newspapers have taken a very firm stand favoring the expansion program. Of course all of you can realize the impact that the Army can have in taking a local position.

In spite of all this, and in spite of the fact that Mr. Greenwalt has been perhaps the individual closest—well, there is no question about it, he has been the individual closest to the local people representing the Secretary's position—he has maintained the respect and has the high regard and respect of everyone I talked to.

I haven't seen a better example of an outstanding job done by a public servant. He has done a tremendous job from the public-relations standpoint. He has made people appreciate the value of the refuge, even though they may be opposed to the position that the Department has taken regarding it. I have written a report to the Secretary in regard to that. He certainly should be commended.

Mr. FARLEY. Those are very welcome words. Perhaps you can understand why I thought it was particularly appropriate to have a firsthand report from Harry Donohue on his visit. Sometimes those of us that are so close to the fish and wildlife problems are accused of putting on pretty rosy glasses when we look at some of the values of our activities and properties, but I don't think we could have sent down even Clark Salyer to make the report on the refuge and come back with a more enthusiastic report supporting the position taken by the Service as to the value of the Wichita refuge.

It is particularly gratifying, not that it changes in any way our opinions but confirms them, and gives us still further assurance that we are right in our assessment of values.

Are there any other questions or comments on this?

Mr. GUTERMUTH. There might be one, Director Farley. From within the last couple of weeks, I have clippings on my desk of articles that have been appearing in the Oklahoma papers where the members of the Army are going around throughout Oklahoma, in Oklahoma City and elsewhere, and they have already sold, or maybe I should say one, the support of the local chambers of commerce and that sort of thing, all of these civic organizations, by singing one theme song, and that is that if they do not get all of the land they want that Fort Sill is going to be moved out of Oklahoma. I think that those tactics, on the part of the Armed Forces, are reaching the point of being disgraceful in this country. I think that some steps ought to be taken to put some kind of a checkrein on that sort of thing.

They go out here and they build up a fear in the minds of the people. You take the city of Lawton, for example. It is dependent largely upon Fort Sill, and the business created by that big military installation. Naturally, if those people are led to believe that the future of Fort Sill is in jeopardy, if the Army is not given each and every thing that it wants, of course they are going to rise up and try to help the Army get whatever it wants.

That sort of sales talk has gone on all over Oklahoma until they have gotten the fear of God thrown into those people down there, that if they can't have what they want, that they are going to pick up their marbles and get out. I can say that I, for one, think that that sort of thing ought to be stopped in this country. These things ought to be considered on their merits, and if they have a real, honest to goodness right and need for expansion and development, and whatnot, those things should be determined on their merits and they should not be accomplished by merely attempting to throw terrible fears into people down there that they are going to lose their business and their values of their properties and that sort of thing if they don't go along with these requests.

Mr. FARLEY. Are there any other comments?

Our hour has about arrived for our next subject. Is Mr. Hoffman here?

Come up here, please, Mr. Hoffman, where we can see you.

Mr. Hoffman is the mineral leasing expert for the Bureau of Land Management.

For the next part of the program, we have representatives of the Department, Mr. Hoffman representing the Bureau of Land Management, who can answer questions on interpretations probably better than anyone else on the laws and regulations that affect the leasing of lands for mineral use, and we also have Clark Salyer, in the back of the room, there, who I think all of you know as Chief of our Branch of Wildlife Refuges, who can answer questions as to the refuge problems that are involved in the oil and prospecting leases.

My proposal was to ask Mr. Donohue first to cover the subject in a general way as it was reviewed by the Department, and then there will be opportunity for questions covering the things which he brings up. They may be directed to him or maybe technical questions as to the leasing arrangements or maybe management questions as to management of the refuges. Then I propose to rather close up the discussion with a brief summary of it.

However, just so that we will all be thinking about the same thing, I would like to direct your attention to this little chart on the board. This big triangle represents in a general way all of our wildlife refuges. Under block A I have represented those which are included in appendix A, which you will hear about, the acreages involved. Under B, I have the refuges or parts of refuges included in a supplement under appendix B. Then in the third one I have all the other refuges. This whole block represents more than 17 million acres, with nearly 3,200,000 in A, some 6 million in class B, and nearly 8 million in the other classifications. That is the total of our refuge area.

It gives you a little idea of what the relative areas are, and then the details about them will come out during the course of the discussion.

Mr. Donohue, will you take over now?

Mr. DONOHUE. I would like to begin by reading this statement which I think may answer many of your questions, and then I will throw the meeting open to a question and answer period.

In response to inquiries prompted by widespread misunderstanding of the public laws and departmental regulations governing oil and gas leasing on national wildlife refuge lands, the following background information has been prepared:

Thirty-five years ago Congress authorized the issuance of oil and gas leasing on public domain lands within national wildlife refuges under provisions of the Mineral Leasing Act of February 23, 1920 (41 Stat. 437).

This national policy was reaffirmed in the Act of August 8, 1946 (60 Stat. 950), which amended the Mineral Leasing Act of 1920.

A number of prospecting permits and leases within fish and wildlife refuges have been issued since the passage of the basic law of February 25, 1920.

On August 31, 1953, a stop order was issued suspending action on applications for oil and gas leases on wildlife refuges which had been filed under departmental regulations issued in 1947.

This action was taken after it became clear that the 1947 regulations failed to provide adequate protection to the wildlife values of the refuges and the publicly owned oil reserves underground.

The order clearly stated its purpose: "A study is now being conducted * * * of a possible revision of policy and regulations in the issuance of oil and gas leases within wildlife refuges, both on the public domain and acquired lands. Pending the completion of this study and the possible revision of existing regulations, you will suspend action on all pending oil and gas lease offers and applications for lands within such refuges."

Thereafter, Secretary McKay, on several occasions, enunciated Departmental policy with this statement: "It has been, and remains, our announced determination that no new regulations will be authorized which do not afford the wildlife refuges greater protection than they had before the 'stop order' was issued."

Meanwhile, production of oil and gas continued within the boundaries of several wildlife refuges on privately owned developments over which the Department lacked control.

On December 8, 1955, 25 months after issuance of the stop order Secretary McKay authorized the issuance of revised regulations after pointing out that their stringent provisions "are designed to assure the wildlife values of each refuge maximum protection and I propose to see that these conditions are rigidly enforced."

Before they received secretarial approval, the language and effect of the new regulations were reported to the Secretary of the Interior's Advisory Committee on Conservation on December 1, 1955. This committee, organized in 1948, is composed of leading conservationists from throughout the country.

After considering the regulations in executive session, the advisory committee unanimously passed the following resolution:

"We believe that the proposed regulations will provide reasonable protection for wildlife refuges if vigorously administered."

In reporting this decision to Secretary McKay, Mr. Bestor Robinson, of Oakland, Calif., the chairman of the committee, speaking informally on behalf of the membership, said: "We like the regulations." Mr. Robinson represents the Sierra Club.

The new regulations have the full endorsement and support of the career specialists of the Fish and Wildlife Service who are responsible for their administration and enforcement. They were consulted fully during the more than 2 years that the leasing program was under study. Before final approval was obtained every Fish and Wildlife Service recommendation was accepted and made a part of the regulations.

The new regulations specifically provide that areas indispensable for the protection and preservation of rare and endangered species, remnant big-game herds and irreplaceable examples of unique plant or animal ecology are not available for leasing under any conditions. Presently eliminated from the operations of the leasing act under schedule A of the new regulations are the Aransas and Santa Ana Reserves in Texas, the National Elk Reserve in Wyoming, the Sullys Hill Reserve in North Dakota, the National Bison Range and Red Rock Lakes in Montana, the Fort Niobrara Reserve in Nebraska the Okefenokee Reserve in Georgia, the Patuxent in Maryland and certain reserves in the Aleutian and Hawaiian Islands.

At least half of the remaining national wildlife refuges listed in schedule B of the new regulations are placed under most severe restrictions. These refuges are designated as wilderness, recreational, water development or marsh areas. For them no lease may issue until a complete and detailed operating plan insuring the full protection of the wildlife values in a manner prescribed by refuge technicians has been aprpoved by the Fish and Wildlife Service.

The regulation provides further that in the future areas may be added to both the schedule A and the schedule B categories. In fact, under an order of December 22, 1955, a continuing review of these areas is being made with a view to determining the advisability of further additions to schedule A and schedule B of the new regulations. Pending completion of the study by the Fish and Wildlife Service, lease applications in these areas are being held in abeyance.

However, in every instance where a lease is issued—including the areas outside as well as within the first two restricted categories—the following stringent conditions must be met. Not one of these protective requirements was contained in the old regulations:

A. Geological and geophysical prospecting conducted on the leased premises shall be of a type and at a time satisfactory to the Fish and Wildlife Service.

B. No drilling operations shall be conducted under the lease until such lease has been committed to an approved unit plan which provides for the consent and approval of the Fish and Wildlife Service as to the time, place, and nature of such operations.

C. No plan of development may be approved without the concurrence of the Fish and Wildlife Service. This provides a double protection on critical areas, since even though an operating plan may be approved prior to issuance of a lease, it is necessary to have the development plan reviewed and approved again after committing the lands to a unit agreement under terms of the lease. On noncritical areas this insures that no development can proceed without concurrence of the Fish and Wildlife Service.

D. Lessees are required to observe and comply with all State and Federal laws and regulations relating to wildlife and will be required to take such action as is necessary to assure observance and compliance with these laws and regulations by lessees, employees, and agents.

Issuance of the August 31, 1953, stop order, which suspended action on pending applications within wildlife refuges, led to a widespread misconception that this halted all oil and gas operations within these reserves. That was not the case.

A number of oil and gas leases had been issued on public domain lands within wildlife refuges prior to 1953. These, of course, were not affected by the stop order halting action on new applications.

Since the Mineral Leasing Act of 1920 provides for issuance of the right to prospect for oil and gas on Fish and Wildlife reserved land, the Secretary of the Interior could not properly suspend the issuance of oil and gas leases in such lands indefinitely. Although painstakingly prepared to afford full protection to refuge areas, the new regulations recognized the policy and intent of Congress that oil and gas development should proceed in those areas.

It is significant that the first leases issued under the new regulations involved the Lacassine Waterfowl Refuge in Cameron Parish, La.

Sixty percent of the area of the Lacassine Refuge was under active mineral development by nine companies through private leases before these first Federal leases were approved. Nine producing wells were in operation within the refuge, but outside the area covered by the new leases. The private operations had not been affected by the stop order.

These operations in the northern section of the refuge were possible because when the United States purchased those lands the oil and gas rights were reserved by the original owners. Consequently, the United States has no jurisdiction over drilling in this area. Similar situations exist on numerous other refuges.

On September 30, 1955, the Frankfort Oil Co. submitted a memorandum requesting the Secretary of the Interior to issue mineral leases on approximately 13,140 acres in the Lacassine Waterfowl Refuge, Cameron Parish, La. In submitting the memorandum, the Frankfort Oil Co. stated: "The company assumes the responsibility for undertaking a mineral-development program which will satisfy the Secretary that the highest standards are met in the development and conservation of mineral and wildlife resources. The company recognizes its responsibility, in support of national policy, to develop the area so as to achieve its maximum utility in the public interest. To this end, in the course

of developing the mineral resources, the company intends to employ the most constructive methods to preserve and improve the ecological conditions of the refuge and thereby insure the adequate utilization of the lands for the primary purposes for which they have been acquired."

The operating program which was then spelled out in detail in the memorandum was specifically designed to preserve the ecological and biological conditions of the refuge and to improve the refuge at no cost to the United States Government. This program as subsequently amended after discussions with the Fish and Wildlife Service officials was approved by the Fish and Wildlife Service.

The leases issued on the basis of the approved operating program are considered by refuge men to be a model for what is required to protect wildlife values. These leases were issued on December 6, and made retroactive to December 1, as provided in regulation in effect since 1947.

The most important provisions of the operating program require:

(a) The construction of a dyke network that will put fresh water on additional areas of marsh and increase the waterfowl carrying capacity of the refuge.

(b) The construction of a road on top of the dyke network which will include provision for the establishment of culverts and bridges at specified intervals in the dykes so that improved manipulation of water for wildlife purposes will be possible.

(c) The height of the dyke will be established at a level which will make possible certain higher water levels necessary in pest weed control and rejuvenation of the marsh at intervals.

(d) Construction of adequate ring dykes around the well and drilling equipment.

(e) Procedures for the prevention of wastes entering the marsh.

(f) Protection against salt water intrusion.

(g) Protection against drilling mud entering the marsh.

(h) The planting of certain grasses at designated places.

(i) The elimination of pest weeds at specified places.

(j) That no well drilling of major construction activity may take place between September 1 and April 1 to prevent any possible interference with the use of the refuge as a winter feeding area by waterfowl.

(k) At such time as operations end all roads and dykes may be left where they are or may be altered or removed, as the Fish and Wildlife Service may determine will be most advantageous from a wildlife management standpoint. Any expense involved in connection with this must be borne by the lessee.

The old regulation provided no means by which such private development could be controlled by the Fish and Wildlife Service. The new regulation provides an important measure of protection in this regard. In the future, the Fish and Wildlife Service, by means of its authority to approve the conditions of required unit agreements and control the nature of all operations under such agreements, can protect the refuge by requiring that operators on lands where rights are privately held meet the same stringent requirements which must be met by developers of Federal rights as a precedent to approval by the Fish and Wildlife Service of a unit agreement covering such lands.

It is of particular interest that in the same general area as the Lacassine is the Rockefeller Refuge, which is administered by the State of Louisiana but for which the Fish and Wildlife Service is the custodian. On this refuge, at the direction of State officials, but with the approval of the Fish and Wildlife Service, oil and gas development has been permitted for several years, under similar but less complete restrictions than provided by the new regulation. State personnel have reported no unfavorable effects, and in fact have stated that the carefully planned and executed development has provided an improved environment on the refuge from the standpoint of waterfowl management.

The leases issued to the Frankfort Oil Co. embrace acquired lands as distinguished from the public domain. The act of August 7, 1947 (61 Stat. 913), known as the Acquired Leasing Act, provides that acquired lands "may be leased by the Secretary under the same conditions as contained in the leasing provisions of the mineral leasing laws, subject to the provisions thereof."

The law provides that when lands are not within any known geologic structure of a producing oil or gas field, the person first making application for a lease shall be entitled to a lease without competitive bidding. The royalty rates for noncompetitive leases is established by law and the Secretary of the Interior is without authority to change it.

Section 5 of the act of August 6, 1946, under whose provisions noncompetitive leases are issued, provides "such leases shall be conditioned upon the payment by the lessee of a royalty of 12½ percent in amount of value of the production removed or sold from the lease."

Provisions of the laws cited above applied with regard to royalty and issuance of leases noncompetitively to the lands embraced by the Frankfort Oil Co. leases after the Geological Survey reported those lands are not on a structure of known oil or gas field.

For comparative purposes copies of the Departmental regulations which were suspended by the stop order in 1953, and the new regulations are attached.

Under the old regulation, subject to certain conditions under which the Fish and Wildlife Service had the opportunity only to advise the Secretary, any and all refuge lands were available for oil and gas leasing.

Under the new regulations areas determined to be indispensable for the preservation areas determined to be indispensable for the preservation of rare or endangered species, remnant big-game herds, and irreplaceable examples of unique animal or plant ecology are classed as inviolate sanctuaries and these lands are not available for leasing. The regulations provide also that in the future new areas may be added to this inviolate category.

The new regulations further provide that on wilderness, recreational, water development or marsh areas, no leases may issue until a complete and detailed operating plan insuring the full protection of the wildlife values in a manner prescribed by refuge technicians has been approved by the Fish and Wildlife Service. Even after a lease issues on the above areas, stringent protective conditions must be met under the terms of the lease. The same conditions apply to the remaining refuge areas not classified as inviolate or so critical as to require the submission of an operating program in advance of the issuance of a lease. These are areas where it is considered that oil and gas development is not at all incompatible with the primary purposes for which the refuges were established.

None of these protective provisions was included in the old regulations. While they required the submission of a unit plan, they did not require Fish and Wildlife Service approval of the plan. The old regulation permitted drilling and prospecting on refuge lands if consented to by the Secretary of the Interior upon the advice of the Fish and Wildlife Service.

The old regulations further provided that even if these conditions were not met leases might nevertheless issue if the Fish and Wildlife Service reported that oil and gas development could be conducted without destroying the usefulness of the lands as a sanctuary for wildlife or in the absence of such a report wherever the Secretary determined that the national interest in securing the contemplated oil and gas production outweighed the importance of maintaining the refuge as a sanctuary for wildlife. Thus, while the old regulation permited oil and gas development to proceed, it provided no protective devices nor authority to the Fish and Wildlife Service to insure that the integrity of the refuge areas would be preserved.

It was the admitted laxity of this regulation that led the Department to issue a stop order on all applications until a fully protective regulation could be promulgated. Such a regulation is now in force.

The development program made possible under the new regulations is an outstanding example of the multiple use concept of Federal lands which has always been a basic policy of Congress.

It is perhaps not generally known that many national wildlife refuges are managed intensively in order to meet wildlife requirements. About 100,000 acres of refuge lands are farmed in order to supply supplemental food for waterfowl needs. On refuge grasslands regulated grazing is permitted where such use is important in the growing of proper grassland habitat for nesting waterfowl and other species of wildlife. Timber management is essential in the maintaining of favorable habitat conditions for woodcock, wild turkeys and deer. Thus, in meeting the various wildlife habitat and feeding requirements on refuge lands, it is necessary to engage in many land use and management practices, and on such lands oil and gas development controlled by adequate protective regulations can often be permitted without any reduction in wildlife values.

Mr. FARLEY. Thank you, Harry, for presenting that. Shall I say, there being no questions, we can move on, or do you wish to have some questions? Please feel free to ask any questions you think are appropriate.

Mr. CARL D. SHOEMAKER (National Wildlife Federation). What I wanted to ask was under the new regulations, Harry, do you consider that the Fish and Wildlife Service has an absolute veto over any application for oil and mineral development or oil drilling?

Mr. DONOHUE. I would say unquestionably. The authority and responsibility is placed with the Director of the Fish and Wildlife Service, who, of course, is going to make his decision on the basis of what the Refuge technicians recommend.

Mr. MICHAEL NADEL (the Wilderness Society). Mr. Donohue stated that additions may possibly be made to schedule A and schedule B. Then these two schedules do not comprise all of the refuges?

Mr. FARLEY. No. I tried to indicate on the chart here the present acreage in the 3 types, those under appendix A, the 3 million, under appendix B, 6 million, and there are still unclassified in either of those categories these 7,800,000.

First of all, Mr. Donohue mentioned there is a stop order, a hold order, on oil leasing on these remaining refuges to further consider them and see if they should be put in either category A or B.

Are there other questions?

Mr. RICHARD W. WESTWOOD (American Nature Association). Criticism has been made, and I am curious, that this regulation would serve to stimulate application for leases.

Is there any reason to assume that it would?

Mr. FARLEY. I have no evidence of that, but that is rather natural. We do not get the applications until they come over from the Bureau of Land Management, and it is my understanding, and Mr. Hoffman will confirm it, that the central office does not get them until they have been processed in their regional organizations. It would be too early to give any information on that. We have had, I believe, two or perhaps three

letters inquiring about them, which would indicate some interest generated by the publicity given to this.

Mr. LEWIS HOFFMAN (Bureau of Land Management). I might add there, Mr. Farley, that we have teletyped to our regional offices pending applications that were not acted on in Fish and Wildlife refuges. To date, with the exception of Montana, Nevada, and Alaska, which have not replied to our teletype—all other offices have—we only have pending 293 applications. When you consider that the maximum area of an application embraces 2,560 acres, it is a comparatively small area that has been applied for. But as far as these regulations being an incentive or encouragement to file oil and gas leases, nothing is needed as an incentive to the oil and gas people to look for new sources of supply.

Mr. FARLEY. These 200 are not new since the regulations?

Mr. HOFFMAN. No, they are pending.

Mr. RICHARD SISEMORE (United Press). There were 200 pending before the stop order, is that right?

Mr. HOFFMAN. Two hundred and ninety-three. Not before the stop order, sir. That was before September 2, when the regulations were approved by the Secretary, the new regulations.

Mr. SISEMORE. How many were pending before the stop order? Do you have that figure?

Mr. HOFFMAN. No, I do not; except that it is close to that figure. In three instances, two in Nevada and one in New Orleans, we waived the stop order because the operators have submitted for approval to the Secretary unit plans of operation which he approved and which protected both the fish and wildlife. Incidentally, under one group of those leases, the first discovery in Nevada of oil and gas was made.

Mr. SISEMORE. I understand you to say you do not anticipate any more leases.

Mr. HOFFMAN. I did not say that, that we do not anticipate; I said the oil industry needs no incentive.

Mr. SISEMORE. You said the new orders would stimulate more leases?

Mr. HOFFMAN. I said I did not think it would.

Mr. SISEMORE. I got the impression that this whole thing was prepared because you did anticipate more leases.

Mr. HOFFMAN. It was prepared for the added protection of fish and wildlife areas.

Mr. MICHAEL HUDOBA (Sports Afield magazine, Outdoor Writers Association). First, may I ask if a copy of the material that Mr. Donohue read is going to be available?

Mr. DONOHUE. Yes, sir; it is available just outside.

I might add one point: There has been reference made to the point that no leases should be issued until an Executive order has been signed by the President. It is in error to refer to the Atomic Energy Act, passed by the 83d Congress, in reference to this leasing program. The provisions of the Atomic Energy Act provide that no leases will be issued by the Atomic Energy Commission for fissionable materials exploration on park and wildlife lands unless the President, by Executive order, authorizes that. But those provisions pertain only to leasing by the Atomic Energy Commission of fissionable materials exploration permits.

Mr. HUDOBA. Is there also one for the Minerals Leasing Act?

Mr. DONOHUE. There is also a like provision in the Minerals Leasing Act.

Mr. HOFFMAN. Pardon me, Harry. There is no provision in the Mineral Leasing Act, but there is a provision in Public Law 585, known as the Multiple Mining Act, which permits mining under the United States mining law, by making mining locations, and permits leasing under the Mineral Leasing Act of 1920, as amended, there is a provision there similar to the atomic energy provision, but that provision also pertains to fissionable materials only, uranium and whatever the Atomic Energy Commission determines is a fissionable material. It does not pertain to oil and gas leasing.

Mr. HUDOBA. May I ask several more questions?

Mr. FARLEY. I wish you would.

Mr. HUDOBA. I notice in the statement that was made, reference was made to a sentence quoted from a recommendation made by the advisory committee. That sentence, as quoted, if I remember correctly, states that the committee believed the regulations were adequate if vigorously administered. But the first sentence of that recommendation, if I recall, said the committee questioned the desirability of leasing on wildlife refuges.

Mr. DONOHUE. In view of these laws passed in the 83d Congress, however, those laws in the 83d Congress do not apply to oil and gas leasing.

Mr. HUDOBA. I believe, if I remember the sentence correctly, there was a period at the end of the sentence which said the committee questions the desirability of leasing the wildlife refuges, period, and then it went on further with reference to the amendments to the atomic energy mineral leasing program, and then in addendum did endorse the regulations if they were vigorously administered. But it seems to me that the quotation reference in part does not adequately cover the recommendation that was made, and leaves a little question as to the factor behind the endorsement.

I notice further that reference was made in this statement that where there was no known geophysical basis for oil, the royalty was 12½ percent. But in the comment there were 9 producing wells on the Lacassine Refuge, and yet the 12½ percent royalty figure applies.

Is there another figure?

Mr. HOFFMAN. You mean geological rather than geophysical. The law itself divides the public lands into two categories. One is the land defined by the Geological Survey as being on the structure of a known oil or gas field, and the other is what we call wildcat, defined as not being on such a structure.

The function of defining these structures is in the Technical Bureau in the Department of Geological Survey.

The act of August 8, 1946, which amended the Leasing Act of February 25, 1920, specifically stated two things. One, that you cannot offer by competitive bidding lands for leasing which are in a structure not defined as being a producing structure; two, a flat royalty of 12½ percent can only be charged if the lease is offered not competitively.

I might add the third. It gave a preference right to the first qualified applicant who filed for a lease for lands not within a producing structure.

So, it is not a matter of the Secretary's discretion in these things. He is bound by the law. Congress makes the policy and it is spelled out in the law.

Where lands are not in a producing structure, he must recognize the first qualified applicant who has a preference right to a lease. When it is not on a producing structure, and thus issued noncompetitively, he can only charge a royalty of 12½ percent.

Mr. HUDOBA. Unless I am mistaken, the lease on the Lacassine Refuge was on an established structure, with producing wells already existing.

Mr. HOFFMAN. Well, in that refuge, certain vendors to the Government reserved the oil and gas rights. That is the north area, about 60 percent of the refuge. They gave private leases to operators under whatever terms they could get. I do not know the terms of those leases. But the southern part of the refuge, or 40 percent, which is covered by these Frankfort Oil Co. leases, are defined as not being in a producing structure. In other words, the Geological Survey says you need prospecting before you can ascertain whether it has oil or not. Not even a drop of oil may be discovered there. The fact that the discoveries were made in the north, miles away or even 1 mile away, is not proof that the lands in the south are on the same structure. In fact, that very northern area covers some 10 different structures. While I am not a geologist, and I could not give you the reason for such definition, it is based on a study of the area itself, that you need prospecting before you can define it as being on a structure of a known oil or gas field.

But the advantage is, and I think the advantage to the Government in issuing leases in the southern part of that refuge is the fact that now, by issuing it now, we have studied a plan of operations to fully protect the refuge. But in the northern area, with the oil and gas owned privately, if it comes down, and they have further drilling closer to the southern part of the refuge, we would be forced by the Attorney General's opinion to issue leases to protect the oil and gas for the United States. It may not be under as favorable conditions to the refuge as those that have been issued.

Mr. FARLEY. Just so we all understand specifically the areas involved in the leases under discussion are outside the known oil-bearing geological structures and have been so determined by Geological Survey.

I want that point made specifically clear.

So there is the requirement that they meet the conditions set up in the basic law.

Mr. HUDOBA. Being an old prospector, I know that gold is where you find it, and a lot of times it is found where you do not expect to find it. But if there is a gold mine or an oil well fairly close, I would suspect that the chance of finding it would be better.

Mr. HOFFMAN. Just a minute. Oil is a little different from gold. Oil is where you find it and gold is where you find it. But the difference is this. With our metallic minerals, like gold where it is found, you establish what is known as a mining district, based on the fact that nearby there are enough minerals to warrant a prudent man to go out and mine and search for those minerals. But in oil and gas, structures are defined by strata, formations, and various other means geologically known to the geologists. It is on that basis that they are made by the Geological Survey.

Mr. HUDOBA. I agree with you on that.

May I ask one more question?

If I understand correctly, during the interim of the stop order, there were no leases except possibly where the mineral rights were reserved.

Under the regulations as issued now, and I am not sure as to what date they were issued—I am a little confused over the use of several different days as to when the order was signed and when issued, and so forth—under the present order, is it conceivable that in those nonexempted refuges, there the Fish and Wildlife Service must now prove first, all over again, that the refuge is necessary for wildlife conservation; No. 2, having reproven that point, must they reprove acre by acre within the refuge under a lease application?

The second part of the question is where do the lease applications come, directly to the Fish and Wildlife Service, or do they come to the Secretary's office, or where is the beginning?

Mr. FARLEY. Will you answer the second question first?

Mr. HOFFMAN. You have a good many questions there. I will try to remember them all and answer them in turn.

First you said it is your understanding that since the stop order was issued in 1953, August 31, 1953, it is your understanding that no leases were issued in Fish and Wildlife refuges. Is that correct? Is that the first question?

Mr. HUDOBA. Except on areas in which the mineral rights were reserved.

Mr. HOFFMAN. I do not know what you mean. Do you mean by private interests?

Mr. HUDOBA. Yes.

Mr. HOFFMAN. That is not correct. We have issued leases since the stop order by waiving the stop order for those particular cases. There were 2 or 3 areas in Nevada and 1 area in Louisiana, 1 or 2 areas in Louisiana. But they were justified because they submitted a unit plan which was approved by the Secretary and which had provisions in it for full protection of the refuges. That is the answer to the first.

Secondly, applications—you asked where are applications filed—applications are filed with the land offices, and in the Western States we have a land office in each State. In California, we have 2 offices, and in Alaska we have 2 offices, because of the large areas there. For States east of the Mississippi, they file with the land office established here in Washington, known as the Eastern States Division, and they have a land office for the Eastern States.

The applications are not sent to Fish and Wildlife Service, except that in each instance either a copy of the application or a description of the land it embraces is sent to the Fish and Wildlife, with a request for a report as to whether they have any objection to the issuance of an oil and gas lease, or if they have no objection, whether they want to add stipulations other than those embodied in the regulation for the protection of the refuge. If they say they object, that they would materially interfere, then the manager of the land office rejects the application. If they say, "You can issue without any further stipulations other than those embodied in these regulations," then the lease is issued by that particular office.

We have 14 district land offices and 1 office here in Washington, which is also considered a district land office, but it embraces all of the States east of the Mississippi River, and the reason for that is that we do not have enough business to warrant the expense to have an office in 1 State, so we combine them all into 1 place and call it the Eastern States Office.

The third question was whether the Fish and Wildlife office has to justify acre by acre the prior right of the refuge against oil and gas leasing. I say to you, sir, they do not have to justify anything. These new regulations give the Fish and Wildlife the say as to whether or not a lease issues. If an appeal is taken, it is the lessee or the applicant for the lease, the oil and gas man must justify that he can drill without doing any damage to the fish and wildlife area.

I think that embraces all of your questions.

Mr. ERNEST F. SWIFT (National Wildlife Federation). Whom does that appeal go to?

Mr. HOFFMAN. The management makes a decision, and then under the practice he appeals directly to the Bureau of Land Management. Then from that decision he appeals to the Secretary of the Interior.

Also, under our procedure, where another Bureau is involved, that appeal is sent to that Bureau for comment.

Mr. SWIFT. So when it is an appeal, it would go to the Secretary of the Interior, then?

Mr. HOFFMAN. It would go to the Secretary of the Interior.

Mr. SWIFT. Do you mind if I make a statement here, Mr. Farley, in view of the fact that I made a public statement once?

Mr. FARLEY. Is your statement a question?

Mr. SWIFT. Not entirely.

Mr. FARLEY. You go ahead and make it, and we will take it as a question.

Mr. SWIFT. We have been talking about the mandates of Congress, in a sense, the legal factors, Attorney General opinions, and authorized policies that the Secretary of the Interior is bound by Congress to follow. But regardless of all of these legal matters, as far as I am personally concerned, and why I made a public statement, there is the basic philosophy, and that is whether it is justified and entirely within the interest of these refuges to permit drilling on the refuges. I recognize that the Department of Interior cannot legally prevent oil operations on refuge lands where mineral reservations have been held by private interests, because that was in the original bargain. But the stand that I took was on that basic philosophy, and it is my opinion that there should be some areas for wildlife, for national parks, and for areas of that kind, where the things they were set up for take absolute priority. These other factors are entirely secondary.

Following up a question that Mr. Hudoba raised regarding the report, the report stated, "We believe that the proposed regulations will provide reasonable protection for wildlife refuges if vigorously administered." But it follows with this particular verbatim transcript of that report:

"Your committee questions the desirability of any leasing program in wildlife refuges except to protect from oil drainage due to peripheral development, and in such cases we believe that the regulation should be made expressly subject to the limitations imposed by section 10.6 of the Mineral Leasing Act, section 67 of the Atomic Energy Act."

You explained, Harry, that that did not apply. Still in all, I believe that they raised an objection as to the desirability there.

I just wanted to clarify my stand because it is extremely simple. It has nothing to do with the legal factors because even though Congress may bless this, I do not consider them or anbody else my messiah on my conservation philosophies, and I think it is a poor philosophy to invade the refuges.

Mr. FARLEY. Isn't your comment, then, directed at the Congress in establishing a policy rather than at the Secretary in carrying out a policy?

Mr. SWIFT. Well, it might ultimately be.

Mr. DONOHUE. Harry, may I comment that the Department agrees that——

Mr. SWIFT. I practically told you that before, Harry, haven't I?

Mr. DONOHUE. The Department agrees, certainly, to some of what you have said, by the fact that certain areas have been classified as inviolate. Perhaps it is a question of degree, but within the legal means available, perhaps our differences are one of degree.

Mr. SWIFT. Well, I wanted to get that into the record.

Mr. FARLEY. Your question is accepted.

I hope, if you have any doubts as to the interpretation of the regulations, or the application of them, I hope you ask the questions so that we can clear this up here.

I hope they specifically answer the question of, shall we say, the propriety of backdating a lease. Mr. Donohue covered that. I do not know whether you caught the full significance of it. I hope you did. It is in the sheet there. That is something that has been on the books for 15, 20, or more years.

Mr. HOFFMAN. Since October 1946.

Mr. GUTERMUTH. We realize it is in the law, Mr. Farley. If Mr. Hoffman and you gentlemen say that it is the law, we would not question it for a minute. But I am just wondering, what is the objective of the law? What is the purpose of it?

As I understand you, you say it was issued on the 6th and you back-dated it 4 or 5 days.

Mr. HOFFMAN. The purpose of the law is an accounting measure. It is pretty hard, after a lease becomes producing, to figure accounts of rentals and royalties from the middle of the month.

Our accounting procedure is such that it facilitates the accounting balances and the accounting collections by dating the lease on the 1st of the month.

There is another reason for it. The reason that regulation, and I typed on each one of those I gave you the particular section to read, the reason for that partfcular regulation is because very often geophysical, geological, and seismographical work has been done by an oil company by permission from the agency having the jurisdiction, without leases. When they decide that the indications are favorable for spending millions, you might say, for prospecting, they hire crews, and sometimes rigs are not easily available. So, if we should lease, for instance, on February 2, under our prior ruling they would date it the 1st of the month following the issuance, which would be dated March 1. That means for 26 days, February having only 28 days, they would have to pay that crew high wages, pay rental for the rig, until March 1, because until the lease is effective, they can't go on the land to drill. So they asked us: "If we request in writing that the lease be dated the 1st of the month in which it is issued, to save us this large expenditure and the unnecessary wait to get on the land, why don't you date it the 1st of the month in which it is executed by the proper official?" We thought that was fair, and so that was put into operation.

Mr. FARLEY. Remember that the payments start from the 1st of the month. Those are back-dated also, as well as the others.

Mr. DONOHUE. May I say at this point that your questions may not be directed to the head of the table. You may direct your questions to anyone in the room. There are a number of Fish and Wildlife people as well as Bureau of Land Management people here. You may direct your question to whoever you may wish.

Mr. SISEMORE. I understand, according to your explanation a while ago, that if you do not actually have drilling into an area to establish a known structure, then you have noncompetitive bids. Is that right?

Mr. HOFFMAN. No.

Mr. SISEMORE. That is, unless you know there is oil.

Mr. HOFFMAN. That is right. The lands are intermingled. Take public lands. Section 6 may be public lands, section 7 may be privately owned, in which the oil and gas is owned by private parties, and over which the Government has no jurisdiction. If a man drills a well on section 7, which is privately owned, and makes a discovery of oil, then the geologists of the Geological Survey go down to that area, even though private land, and ascertain from their technical knowledge how far that structure would extend. It may stop there. It may extend 1 mile, 2 miles, 10 miles, or 20 miles.

Mr. SISEMORE. But unless they drill, they can't determine that; can they?

Mr. HOFFMAN. Drilling has to be done somewhere, whether on public or private lands; but then they extend the structure even though drilling was not done, and they say, "So far as our records show, and our examination of the structures concerned, we define this with the outer boundaries, and define it as being within the known structure of an oil and gas field," even though not a single rig has been on that job. But if they do that, then the issuance of leases are governed by that provision which requires competitive bidding, to give us a bonus of so much an acre. But if they say it is not within the structure, that there is not enough information from the well drilled to cover this other land as being within the structure, then by law we must issue the lease noncompetitively and give it to the first qualified applicant and charge the rental provided in the law.

Mr. SISEMORE. Then in relation to this one particular lease, they have estimated on the basis of drilling and their maps that this is not a known structure, and so far as they know there may never be any there?

Mr. HOFFMAN. That is correct.

Mr. SISEMORE. Does the Geological Survey actually go in and drill on these things to establish a structure?

Mr. HOFFMAN. No.

Mr. SISEMORE. They just estimate on the basis of drilling around it and previous geological data?

Mr. HOFFMAN. They estimate it, so far as I know, on the basis of logs of wells that have been drilled. Each well has a log, showing what they drilled, and the kind of sands. The Survey itself never makes any drilling. There is no authority to do it.

Mr. SISEMORE. I understand that the Frankfort Oil Co.——

Mr. HOFFMAN. None of these six leases went to the Frankfort Oil Co. They held options from the applicants to give them the operating rights if and when leases issued, and leases did issue, so they hold the operating rights.

Mr. SISEMORE. Who filed the lease?

Mr. HOFFMAN. McKenna. I forget the first name.

I have it.

I can give it to you if you come to my office. One was by the husband and five by the wife.

Mr. SISEMORE. How does that operate? Can you explain to us briefly?

Mr. HOFFMAN. Yes. The act of August 8, 1946, provides that anyone may obtain an option from either an applicant or a lessee for a period of 2 years, and if he exercises the option by asking for an assignment or operating rights, the lessee by that agreement is bound to turn the leases over to them for operating purposes. Very often the lessee reserves a small royalty, 1 percent, 2 percent, or 5 percent, but each agreement varies. The bargaining can be made with each other.

Mr. SISEMORE. And that does not concern Interior?

Mr. HOFFMAN. We are not concerned until they actually exercise the option. In the case of refuges, we are very much concerned, because before we issue the leases, they must submit for approval a plan of operations, which will protect the wildlife refuge, which must be approved by the Fish and Wildlife Service.

Mr. SWIFT. But it can be approved, too.

Mr. HOFFMAN. Well, the way the regulations are written, since it specifically gives the authority not in the Secretary but the Fish and Wildlife, the Secretary would have no other alternative than to uphold the Director of the Fish and Wildlife Service. You see, the old regulations merely asked for the advice of the Director of the Fish and Wildlife Service. This gives the Fish and Wildlife Service the authority to approve or disapprove such plan of operations.

Mr. GUTERMUTH. I am not familiar with the land in question on the Lacassine Refuge, and I do not know its relationship to this proven field, but since it is so close, I am just wondering. Do I understand, then, that this application is the first application that has been received on this area?

Mr. HOFFMAN. No. There have been prior applications on the area which, under the old regulations, were rejected because they did not submit a unit plan of operation, and they failed to appeal, and they closed out.

There are also 2, 3, or 4, I do not know offhand, but we have them in our files, applications in which they did appeal.

We rejected them because they did not comply with the regulations, they did not have an approved unit plan of operation. They appealed and the Secretary deferred to the rejection. So they are what we may call in law res adjudicata. They are out. They did not pursue their rights in the courts. The cases were closed. There were no prior applications pending except closed cases when these leases issued.

Mr. GUTERMUTH. That is the point I was going to inquire about.

Is the law, then, so broad that if you had had prior applications that had been rejected or denied for some reason or other, does that mean that people can always, forevermore, keep coming in and filing on that land on a noncompetitive basis, and so on?

Mr. HOFFMAN. If they comply with the law. The other people did not comply with the regulations and the law.

Mr. FARLEY. I wonder if I can clear that up.

There were a number of applications and all were denied. Some were kept alive by appealing.

At the time this came up, the ones that were alive, these were the senior applicants that were alive, and they were kept alive because there were still appeals pending. Others did not take advantage of their rights to appeal. Then their applications were no longer live applications, as I understand it.

Mr. HOFFMAN. That is right. These applications were rejected by the Bureau of Land Management on the recommendation of the Fish and Wildlife Service under the old regulations because they did not submit the unit plan of operation.

Plan of operation and unitization are two different things. The unit plan, to define it rather crudely, is where a number of lessees unite in electing a single operator to operate an area covered by two or more leases under a single operator and under the terms of that particular agreement approved by the Secretary. They share the expense and the income in proportion to the amount of acreage they have in that area. The plan of operation, on the other hand, is one which they give you in advance just how they expect to drill, where to drill, when to drill, how often they will drill wells, what the spacing will be, what measures they will take for protection of the surface, which in this case would be the refuge, what other protection they take of water rights, and all the details of their method of conducting their drilling operations.

Mr. FARLEY. I think I saw a hand there. Mr. Day?

Mr. ALBERT M. DAY (Arctic Institute of North America). I would like to raise one question, along the line that Ernie Swift mentioned, and which seems to me to be rather basic, and the thing that many conservationists are fearful about in this order. That is changing the opinions of many of what the concepts of refuges are. In the past, they have been considered as sanctuaries. It is true there have been cases of drilling on the periphery, and cases where landowners in selling originally reserved the oil rights. You have set up the category A of about a dozen refuges, although I think on none of which has drilling ever been performed, although there has been great pressure for some, particularly Okefenokee, and then this order which has been issued. This is the thing that disturbs me, appendix B, Fish and Wildlife Service lands available for leasing under a satisfactory development and operating plan, which, to me, encourages the application for leases on all of your areas B except as the Fish and Wildlife Service can set up operating conditions to protect wildlife.

In your category C, I see nothing which might indicate to some that those are available for leasing even without satisfactory development and operating plans. I am quite sure that is not the case.

The thing that is disturbing is the attitude, I am afraid, that the oil and gas interests will get to these areas that are now practically wide open for oil and gas leases. It is true that under existing laws they were before, but very few were granted.

I raise the question as to whether this is not going to be the case, as to whether this is not going to greatly encourage the desires of oil people to get into refuges where prior to this time they were discouraged from it.

Mr. FARLEY. If the regulations, the conditions under which drilling may be done, are sufficiently stringent, I can see no reason why they should be any more attractive than they have been in the past under whatever regulations exist. In fact, the opportunity to impose stringent regulations is more greatly enhanced under these regulations than they previously were.

Mr. DAY. Don't you feel that an announcement of this kind encourages the oil interests to think that these areas are available for oil drilling and discourages the Wildlife people from thinking that they could be preserved for wildlife? That is the point I fear.

Mr. FARLEY. No more so than the existing regulations which have existed for a great many years prior to this.

Mr. GUTERMUTH. In that connection, Mr. Director, I may be very naive, and, of course, I will grant that now, as then, I am not going to try to concern myself with the ramifications of these two acts. These are beyond my comprehension, as well as some of the interpretations, I might add. But the point is that with the small amount of leasing that has gone on on our wildlife refuges, I do not think that I am the exception. I think there are very few people in this country that realize that the wildlife refuges, especially the areas that were purchased with duck-stamp money and that sort of thing, were being subjected or were in constant danger of the threats of oil operations and explorations. The two activities simply do not seem to coincide at all. The idea of having a refuge, a wildlife sanctuary, and having that area overrun by oil operators and operating equipment, and that sort of thing, the things just simply do not go together.

I might say that that is the main reason why we have objected. We have not attempted, in our humble way, to say whether this present order is better or worse than previous orders. The thing that we are concerned about is the fact that these refuges are being opened, and that is the thing that I think the conservationists of this country are opposed to, particularly in a period when there does not seem to be any need for oil.

According to the Department of the Interior reports it looks like we are in the most favorable condition for oil, Mr. HOFFMAN, as we have probably ever been in this country, particularly when there has been a great effort made to block oil imports, except by the big operators who are operating both here and abroad.

The other thing that I am concerned about, and I waited until the reporter had gotten a new pad on there so that I could go into this—the other thing that I am concerned about is in this statement of Mr. DONOHUE'S, on page 2, where they quote merely this one sentence out of the recommendations of the advisory committee. I am not a member of the advisory committee. With all of the rest of the people in this room, I doubt if there are over 3 or 4 who have read the minutes and the record of this advisory committee, and so on, and who know the extent of the discussion and so on that went on. They do not know what is in this thing. Certainly the general public across this country does not know what is in this thing. But here is this statement, that it says that the advisory committee said that we believe that the proposed regulations will provide reasonable protection for wildlife refuges if vigorously enforced.

I have asked for a copy of the recommendations of the committee, and I would like to read it to this group, because I doubt if any of them have ever heard this yet.

Number 8, on page 15, says:

"Your committee questions the desirability of any leasing program in wildlife refuges, except to protect from oil drainage due to peripheral developments, and in such

cases we believe that the regulations should be made expressly subject to the limitations imposed by section 10.6 of the Mineral Leasing Act and section 67 of the Atomic Energy Act."

Then it says: "We believe that the proposed regulations will provide reasonable protection for wildlife refuges if vigorously enforced."

The point I want to make there is this, and I made this statement in a previous meeting here in Interior, I expressed my complete satisfaction and thanks to Mr. D'Ewart, the Assistant Secretary, for helping to get that strong protective language written into the Atomic Energy Act and the Minerals Leasing Act: We thought that this thing expressed the will of Congress, with regard to the national parks and monuments and wildlife refuges, and while that law, yes, does apply, perhaps, to fissionable materials, we had thought that it was the express will of Congress.

I have talked with some of the members of the committee, and I do not know how others feel about it, but some of them, at least, felt that the statement that was contained here was that while those acts may not apply, that when they said that the regulations should be made expressly subject to the limitations imposed, that they were trying to suggest, at least, that that sort of thing at least helped to tend to govern the actions of the Secretary insofar as possible. I realize, of course, like everyone else, that he has a mandate, as you say, Mr. Hoffman, to follows the directives of Congress and the previous laws that have been enacted. But at the same time, those laws and something like them have been in existence, so you tell me, for many, many years, and the fact still remains that there have been very few cases of drilling on our refuges, except where the mineral rights had not been acquired by the Federal Government.

Our grave concern is that we be given, by our great custodial agency here, all of the protection that can possibly be given within his discretion to prevent this sort of thing except in the cases of, like they said here, peripheral developments that might endanger the wildlife refuges, and so on.

Now one other thing, if I may, please. There was a statement made in the press, and since, again, nobody gets to read this, I would like to read one more statement here that appears on page 5 from the minutes on the morning session of December 1. That was the first day of the advisory committee meeting. It says here:

"The question of the legality of leasing any wildlife refuges under the new Mineral Leasing Act and the Atomic Energy Act was brought up by Dr. Gabrielson, who also questioned the propriety of allowing oil and gas leasing on refuges except where the mineral rights were not acquired or where peripheral development made it vital to protect the interests of the Federal Government."

I do not think I need to defend Dr. Gabrielson, but there were statements made in the press that he did not protest this thing, and I would like to have at least these few people in this room here read from the record that portion of the statement.

Mr. DONOHUE. Dr. Gabrielson referred to those two acts of the 83d Congress and was informed at the time that the Solicitor's Office had held that they were not applicable, as a study of the language will indicate. The committee, however, went ahead, and in its formal resolution again referred to these two acts passed in the 83d Congress. The Secretary of the Interior has no authority but to carry out the law as laid down by Congress, and, as we have said, Congress has authorized that oil and gas development should proceed.

You might recall that in regard to the Wichita, the Secretary—and I do not know whether you know or not—has been attacked, reportedly, for not carrying out the law and the mandate of Congress. But we were successful in pointing out that the Congress did not pass a law authorizing the transfer of the refuge land, and, because of that fact which we ultimately made clear even to the Army lawyers, the Secretary has been able to defend that refuge. But with regard to oil and gas leasing, the law is clear, and under the law we have issued what I think are the best possible regulations within that authorizing act of Congress.

Mr. GUTERMUTH. I would just like to say there, Commissioner Donohue, from the bottom of my heart, God bless Secretary McKay for giving us the badly needed protection in the case of the Wichita. There is no question about that. We are all very, very grateful to him for the strong stand he has taken, and we hope that position can be maintained.

So far as this, I do not propose to discuss it. I know nothing about what transpired in the advisory meeting. All I think is that the folks here, at least, should have more than that one simple statement that appears in this thing here as being the recommendation of the committee. I do not know what went on there, and I would not attempt to defend or elaborate on it.

Mr. PACKARD. There is one point in regard to this category of refuges that bothers me rather strongly. It seems to me that the effect of appendixes A, B, and C, is really to separate the refuges into classes of refuges with the implication that one class is really essential to wildlife, and the second class is more or less essential to wildlife, and the third class isn't decided, perhaps. But I am curious as to what standards have been applied or will be applied to determine whether a refuge belongs in appendix A or B.

I noted in appendix B, for example, several that I have always understood were critical to wildlife. Just to name a few, on the first page, I see in section B, the Kenai, the Cabeza Prieta game range, the Kofa game range, the Lower Klamath, and I could go down the list and pick out a lot more that I have always thought were essential to wildlife and definitely so.

Mr. FARLEY. I think you would agree that in any large group of activities there are variations in importance and criticalness. Certainly when we take a 100,000-acre project, there are areas in it that might not be essential. There are other areas that may be essential. However, Clark Salyer's shop developed these lists. Let's have them answer that.

Clark, what are your standards?

Mr. J. C. SALYER (Chief, Bureau of Refuges). Chickens always come home to roost, don't they? I think appendix A is self-explanatory: Those refuges where we have a disappearing species and you want no activity at all which may hasten their disappearance, the entire population should be free from any possible threat, they or their habitat. So in some cases the animals themselves are not so worried, but it is the habitat. Take the great game areas where we have to feed around ten or twelve thousand elks each year, and if we lose our hay crop one year, through accidental fires, or some way, we would be in a terrible fix to carry those animals through. I don't think I have to explain those.

In category B are those areas which are the everyday backbone of our refuge program in taking care of the waterfowl, principally, and some other areas which besides taking care of the waterfowl are good recreational areas. Most of them are quite large areas.

Somebody mentioned Kenai. That is close to 2 million acres. It is an exaggeration to say that all of that area is vital to the moose up there. In fact, that might appeal to you, but we are going to have to have actively some large scale burns or clearings to keep the habitat in the range of the moose. After all, a moose has to have things within his reach. The tendency is for the spruce to come in and push out his food plants. So there are many activities that have to be taken into consideration.

By taking Kenai, for example, there are areas in it where oil could be developed. I understand that is an area that is very promising and very much interesting to the Navy for national defense purposes. They are spurring activities up there to see how good the reserves are, mostly an exploratory measure, to see if there is oil there.

But take some of our big game areas. Somebody mentioned game ranges. There is one sheep area I have in mind. That is over 2 million acres, I believe. The valuable part to the sheep are the higher mountain tops, above 7,000 feet. But these high mountain ranges are scattered about in the 2 million acres.

In the desert basin there is a vast area of land that is not even good for chuckwallas, and where you have only sand and 4 or 5 kinds of cacti where you could have some oil development without destroying the basic purposes of the refuge, that is mostly characteristic of areas in classification B.

Until we got this regulation with sterner prohibitions we did not dare consider any oil development in those areas, although there has been considerable interest in many of them. It has been felt now that with these regulations, that portions of some of these areas, especially where we have oil drainage, and we have oil drainage in five areas of classification B, we could at least protect ourselves, the Government's loss, from those adjacent activities.

Mr. FARLEY. Mr. Salyer, have you, in your operations, found that under proper restrictions, drilling or pumping can take place without damage to the wildlife?

Mr. SALYER. That has been done in several instances which led us to consider this type of reservation. For example, at the Delta refuge, we have the southern half of the area under intense and sloppy development by the Texaco people. They just thumbed their noses at us, and dug canals all over the place.

On the northern half we have private owners coming in, where they had reserved the minerals for 10 years. When the 10 years elapsed without their moving in on their reservation, and during that 10-year period all of these other uses or fields were developed, we had to make an arrangement for protective drilling there, and we had the full cooperation of the company and the Secretary's office. We set up what we considered to be a model plan for that area. They have developed that area very nicely, and so far there hasn't been enough oil spilled there to fill the top of a biscuit. It has been perfect so far as pollution is concerned. We have had perfect cooperation from the companies. The companies, by and large, once they get permission to drill, they lean over backward in cooperating with you. We can't complain of the cooperation. The main rub is, are we as wildlife operators skillful enough oil operators to devise regulations to give us proper protection? I think we will have a better setup under this.

Mr. FARLEY. I would like to ask you another question.

Mr. SALYER. Could I finish on the unclassified schedule? I guess that will be called C. We originally started on this classification here for legal reasons and then they were adopted for expediting this particular code of regulations. We realized it had to be greatly revised with more to go out of B and into A, and areas to go out of C, the unclassified list, into B, but there wasn't enough time to revise it. The Secretary's office questioned the wisdom of issuing this at this time, but they were already swamped with inquiries, since the regulation

had gotten out, as to what might be considered. So then it came to the point where it seemed to be better to put out the information rather than answering hundreds of letters as to what was available. Congressional offices wanted that information, and so on down the list. It seemed to be the lesser of two evils. Category C mostly embraces enormous areas, millions of acres, and game ranges, Alaskan areas, possibly half of the refuge program, areas so big, and because they are for migratory species, for example, your fawns at certain elevations going down to lower elevations for watering, they require a large country and they range large country, and require buffer areas, and they require some large-scale areas not essential to the species concerned that could be considered for drilling, and in which there was adjacent drilling or some indications of drilling when we took over. But they are areas so big, comprising areas sometimes as big as some of the eastern States, so that when definite oil deposits had been discovered in the local areas, such as in the railroad valley, and in desert gate, there wasn't much logical prohibition for denying that operation inasmuch as these were public-domain lands. Subsequent to that, by specific law, when our 7 or 8 big-game ranges were set up in cojurisdiction with the Bureau of Land Management under the old Taylor Grazing Act, the law specifically provided that mineral, oil, and gas development should take place. Some are earlier refuges, such as those near the coast. There they said that nothing shall prohibit the oil and gas development. So we have all degrees.

In a flexible program, you cannot set any plan, I don't care how good you are, you cannot set any plan to say it will fit all of them. Each one has to be considered on its own ground. Each one of these require a separately studied and arrived at compromised oil plan, if at all.

Mr. FARLEY. Mr. Salyer, in the interest of time, I would like to ask you the same question I asked you when we were reviewing the final draft of this new order on leases.

Are you satisfied that the interests of the Fish and Wildlife Service are provided for in this order?

Mr. SALYER. You are trying to make a prophet out of me instead of a staff member. If the Secretary can back up what he has in this order, I think it will protect the wildlife interest.

Mr. FARLEY. I want to point out that this thing has not been arrived at by consultations in the Secretary's office without reference to the actual individuals responsible for the success of the refuge program. I think that is fundamental.

Mr. HUDOBA. I did not finish my questioning in view of the fact that I thought other persons present would want to explore something.

But taking a hypothetical case of an applicant for a lease on a refuge the Fish and Wildlife says that:

"Development might seriously impair or destroy the usefulness of the lands for wildlife conservation purposes," and then, "no leases will be issued unless a complete detailed and operating program for the area, which will insure full protection of the particular values for which established, is approved by the Director, Fish and Wildlife Service."

First, this indicates that a lease will be issued regardless if an operating plan is submitted, but prior to that determination on this hypothetical case, the Fish and Wildlife Service must say that the proposed development would seriously impair or destroy. If the Service reports that it would seriously impair or destroy the refuge land, then we assume from a previous statement that that is a veto power. However, the applicant for the lease may question this, and he may say that this will not seriously impair or destroy the usefulness. Then, do I understand that this goes on appeal to the Secretary for a determination?

Mr. FARLEY. That is my understanding. That is one of his rights on a determination. Of course, in the long run, the whole authority under these orders stems from the Secretary. Heretofore the questions were decided in consultation upon the advice of the Fish and Wildlife Service. Now the questions are originally determined entirely by that Service without reference to other agencies.

It is much easier to support a finding that has already been made than it is to change one. That is very fundamental.

The fact that the Secretary has approved this type of order indicates his desire to support the results of that type of order. I have no qualms about it.

Mr. HUDOBA. That is predicated on the word "serious" impairment.

Mr. FARLEY. The determination of that, of course, is left with the Fish and Wildlife Service.

Mr. DONOHUE. I might say they have already reported by listing the areas in appendix B that these are the areas in which oil and gas development might seriously impair. In other words, they have reported this, and any operator desiring a lease would have to prove to the Director of the Fish and Wildlife Service that operations could proceed under his plan without impairment. That would be a matter between the operator and the Fish and Wildlife Service.

Mr. HUDOBA. Yet there is an implied provision here that the lease will be granted regardless.

Mr. FARLEY. Not in category B. In category B there has to be an approved plan prior to a lease, if you read that carefully.

Mr. NADEL. Mr. Salyer noted the size of some of these areas in schedule B, and I hope it won't embarrass anyone to call attention to some of these areas. For instance, Pelican Island in Florida is 15 acres in size, and that is split between 2 islands. Passage Key is a 36-acre island, and Anclote, in Florida, is 197 acres, and Noxubee, in Alabama and Mississippi, is 596 acres, and so on. There are a number of these small refuges.

Mr. SALYER. Most of those, in the revised plan, are scheduled to go into appendix A.

Mr. FARLEY. May I again remind you, this list is a tentative list. It is under study for revision now, and part of that study is protected by a stop order on, shall we call them, schedule C, the schedule C areas not included in A or B. That whole area is being reviewed and it is expected that additional areas will be put in category A.

Mr. WESTWOOD. And that the Fish and Wildlife Service can do on its own authority?

Mr. FARLEY. Yes.

Mr. SWIFT. Clark, the original list that you submitted for no lease, was it greater than those that were finally determined and authorized?

Mr. SALYER. The original list? When section B is revised, it will contain more than it did when we originally submitted it.

Mr. SWIFT. I do not mean the last time, I mean when you originally submitted it.

Mr. SALYER. List B——

Mr. SWIFT. A, no lease.

Mr. SALYER. There was no original A submitted.

Mr. SWIFT. I am just talking about no lease. No A, B, or C, but just no lease.

Mr. SALYER. I would have to check that. It would be pretty close, one way or another. They have been added here and there. The Crab Orchard, we had that in the original list for leasing, and since that time four communities are using that for auxiliary water supply. Obviously, we can't jeopardize that situation, so we are changing that.

Mr. SWIFT. O. K., Clark.

Mr. CHARLES H. CALLISON (National Wildlife Federation). I would like to ask for the explanation or reason for putting certain areas in classification A and others in B.

Someone used the Elk Refuge as an example, and said should an oil well blow out there and destroy a hay field, it would be critical.

He also said in appendix B are many refuges which are the backbones of the system.

I wonder why he thinks that an oil well blowout is more likely to happen in those areas, and if it would not also prove critical, or prove critical to pollution?

Mr. SALYER. It is a matter of degree. In the elk area, the amount of habitat vital to the elk would be much greater than if we had some pollution from a well in 70,000 acres of marsh.

Mr. GUTERMUTH. The last time I was there, it looked to me like it was just a question of touch and go between the elk and the area of available range.

Mr. SALYER. It was irreplaceable. That is the category for A. We do not want to lose habitat on waterfowl, but we are in a little better shape there than with some of these game areas.

Mr. GUTERMUTH. Didn't we lose a couple of refuges, if my memory serves me right, going back a long time, didn't we lose Carlsbad or something like that? Didn't we have one that we lost?

Mr. SALYER. We lost that because of private operations on our boundary and we had no protective measures as we have now. They just overwhelmed us.

Mr. FARLEY. It should be made clear that the experience in the past, with drilling operations, has taught, because of some sad experiences, ways of handling these things, and we are fully aware of the problems involved.

We think we are now in a position to require the right kind of protection.

Mr. HARRY E. RADCLIFFE (American Nature Association). I was rather amazed just to learn now that the military, the Navy, is interested in the Kenai Peninsula, because I know that we couldn't get the least military justification for roads into that area, absolutely no defense need for it from the Military Department, when we were pleading for roads into that area.

Now that roads are in that area again, it seems we have that common thing of the military wanting a game reservation for their own private use and going in. It brings up the thing we have been pleading for in Alaska, and I wonder if it wouldn't apply here, too. When it is a question involving an area such as this, why should't we have public hearings?

Mr. FARLEY. Did I see another hand?

Mr. DAY. I would like to make one thing clear which is not clear in my mind.

You have three categories, A, B, and so on. As that tablet reads there, for almost 8 million acres, does that mean, as it says, it can be leased now but there can be no operation until there is a plan that is approved?

Mr. FARLEY. Yes. First of all, A and B have been explored so that we are pretty clear on that.

I might point out that in category B there is quite a considerable acreage represented by that land, some 824,000 acres, on which the rights have been retained by the vendors, or by other agencies, so even in B, with the control that we have, we have lack of control on a portion.

In this category there is no lease until an approved plan has come before the Fish and Wildlife Service.

In A, there is no lease, period.

In C, there is a lease, yes, without any preliminaries, but there is no operation until a plan has been approved by the Fish and Wildlife Service.

So I want to point out that there is no operation anywhere in this whole area without prior approval. I will repeat, there is no operation anywhere in oil and gas in any of the areas under control of the refuge sys-

tem without prior approval of the Fish and Wildlife Service.

The thing is that except in this vast area of 7,800,000, there are the military and reclamation service and other lands of that type in which we hold only a secondary right.

In this vast area of lands, we now have a means of controlling the issuance of operating plans. We have control, I should say, of any drilling operations on this acreage which previously we did not have control of at all.

Under the old act, which has been quoted, under the old orders that set up these refuges, a great many of them had that nothing was to interfere with prospecting and developing. That is written in the order establishing the refuges. Under that old order, the Bureau of Land Management felt that they were required to issue application leases. There was no requirement for approval by the Fish and Wildlife Service.

Under the new order, this additional acreage is put under the requirement that the Fish and Wildlife Service must approve of the operating plans after lease has been made but before a drilling operation is conducted.

So, as we have the order now, the entire area is under control, as far as operations are concerned, of the Fish and Wildlife Service.

I would like to clear one other thing. It has been quite widely suggested that now for the first time refuge lands bought with duck-stamp money are open for leasing. I would like to point out that in the areas purchased by duck-stamp money, of the 255,000 acres, the oil rights have been reserved by the vendor in some 100,000 of those acres. So even these duck-stamp lands are not under the old regulations or under the new regulations immune from oil operations, because the seller retained the oil rights in them. So to say that suddenly for the first time duck-stamp lands are open to oil operations is not a correct statement of the facts.

One other thing I would like to point out is that it is assumed that if there is a unit plan, as such, that the refuge values are automatically protected. Using these same charts as representing parcels of land, under unit plan, which is designed to conserve oil, not to conserve wildlife, under unit plan, the wells are placed and the operations are scheduled to do the maximum for the oil job. Nowhere in a unit plan prior to this time was there any requirement that the Fish and Wildlife Service approved and located and determined the times, places and methods of operations of those wells.

Under this new operation, the judge of the operation on refuge lands is the Fish and Wildlife Service and not, as it was previously, resting with the Geological Survey. So the umpire, referee, judge, or whatever you want to call him now, in all of these cases, for the first time, is the Fish and Wildlife Service, and he is not required to plead his case to some other group but to settle in the office of the Fish and Wildlife Service. So we in the Fish and Wildlife Service are convinced that we have more safeguards for wildlife under this new plan than existed before.

Going back to that unitization thing, if the Geological Survey decided that the most economical place as far as oil is concerned was to put a well here in B, the well would go there.

Under the new plan, the Fish and Wildlife Service determines whether that is a safe place as far as the fish and wildlife values are concerned.

Mr. CALLISON. May I ask a question there? This business of an oil operating plan seems to me to be a rather technical subject; that is, what you have to work, so far as the oil operator himself is concerned, which one would be most economical, which one would protect the resources that are under the jurisdiction of the Fish and Wildlife Service. I am not aware that the Fish and Wildlife Service has any oil operating experts on its staff. Are you going to avail yourself of the services and advice that might be available in other agencies of the Department of the Interior?

Mr. FARLEY. Yes, by all means; with the objective being not to produce oil but to produce wildlife.

Mr. CALLISON. I just wondered how influential those other agencies might be in making up your mind on whether or not this plan is a good one or not a good one.

Mr. FARLEY. I would not know how to answer that kind of a question. The final answer, the final determination, must rest with us on all of the available information.

Mr. DONOHUE. I would like to add one point on this unit plan and the protection it provides. It was mentioned earlier that the Carlsbad refuge had been destroyed by drainage. This new regulation, if it had been in effect at that time, might very well and very likely have protected and saved that refuge, even though the operations had been going on outside the refuge on private lands.

If it so happened, and it is possible, that the geologic formation of that particular field came into the refuge proper, a unit plan would have been required of the operator which would have to have included the lands of the Fish and Wildlife Service.

In view of that, the Fish and Wildlife Service could then have laid down certain conditions regarding development not only on its own lands but on the lands included in the unit plan outside of the refuge proper, and might well have preserved that particular area.

Mr. FARLEY. Now, as regards to the protection which these two methods give, under the old order, in spite of the objection of the Fish and Wildlife Service, back in the 1940's, eight leases were issued for oil drilling on refuges. Eight leases were issued over the opposition of Fish and Wildlife. That situation would not exist under the present order.

One other thing I would like to point out if you want to know something, is that at least 2,326,000 acres indicated here, which are military, reclamation lands, and lands of that type, the revenues, the royalties and lease money from these refuges for oil and gas do not accrue to the Fish and Wildlife Service. I do not know whether they go back to the Treasury.

Mr. HOFFMAN. Fifty-two and a half percent goes to the Reclamation Fund, and 37½ percent goes to the State in which the oil is produced, and 10 percent to the Treasury.

Mr. FARLEY. And none to Fish and Wildlife?

Mr. HOFFMAN. None to Fish and Wildlife.

Mr. FARLEY. So these areas are not revenue-producing areas so far as Fish and Wildlife is concerned.

Mr. HOFFMAN. May I add that the order I just passed around suspended the issuance of leases in those 7,840,000 acres until Fish and Wildlife can make additional studies and add some of the areas to either A or B.

Mr. GUTERMUTH. That 7,840,000 acres there, what area is that?

Mr. FARLEY. This is the area under our present control from which we believe the revenues would accrue to us, and we also believe that in these lands we have a primary interest, certainly on the surface, and probably at least 50 percent in the subsurface value. We just do not know where the classification is, and it is just an approximation.

Mr. PACKARD. I am interested in title 43 order. There is an appendix A and B, and we have referred to C. Does appendix B include C?

Mr. FARLEY. No, it just includes 6 million acres.

Mr. PACKARD. And the other 7 million are not referred to on this sheet?

Mr. FARLEY. No, they are outside of either A or B. There is no list C provided for, but they are just the areas not included in A and B.

Mr. WESTWOOD. Do these revenues accrue to the Fish and Wildlife or do they go into the Treasury?

Mr. FARLEY. In the areas where we hold fee simple title, they go to Fish and Wildlife. Part of them go to counties and so on, but we get our share.

Mr. WALLACE. If you did get some royalties, would part of the funds be spent for supervision of these operations after the operations are started? I am interested in the oyster industry, as you know, and we have had some sad experiences with oil pollution in the industry. I am wondering how far you have projected your thinking on supervision following the leasing of the areas.

Mr. FARLEY. I think as far as your oyster problem is concerned, these revenues would have to go into our own wildlife refuge projects and could not be used for other supervision. They would go into wildlife. Everything goes with the management and development of the refuges, or even the purchase of additional lands.

Mr. HUDOBA. With reference to the lease prior to an operation plan approved, I am wondering what the status of the lessee would be. That would require, I am sure, some physical entry and physical trespass, and would require manipulation and so forth on the land. Does that mean that under this program, the Fish and Wildlife Service now divides or does not have complete jurisdiction of the lands which have gone under lease?

Mr. FARLEY. Do you mean these lands in this third group?

Mr. HUDOBA. Yes.

Mr. FARLEY. We do not have complete control there. That is a joint operation.

Mr. SALYER. They would still have to have our permission to enter the land. I do not care if it is to collect butterflies or prospect for oil; they have to have the permit.

Mr. FARLEY. Where we have control, we determine the times when they can enter, and the places they can go, and all of that is within our control.

Mr. HUDOBA. Assuming the lease has been issued, does not that give them a permit of trespass?

Mr. FARLEY. The lease would provide the conditions under which they could operate, and that would include their means of access. Not only their means or methods of access, but in some cases we have required that they go in by helicopter because we are afraid of the infection of noxious weeds. All of those things can be laid down.

Mr. HOFFMAN. And the lease contains stipulations. It is quoted in the regulation itself that they must have stipulations, that the time of drilling, the entry, and all conditions are under the control of the Fish and Wildlife manager of that particular refuge.

Mr. SALYER. "Access. All plans should provide for specific lines of travel and road improvement and maintenance where necessary by the oil companies and the companies are to be restrained from any other penetration of refuge area. They should not be permitted to wander at large, nor their employees." That is from our regulations.

Mr. DONOHUE. Paragraph B–2 lays down the conditions to be expressed in the lease issued, and they include, for instance, that prospecting can only be of a type and at a time authorized and satisfactory to the Fish and Wildlife Service. Drilling operations can only proceed as approved by the Fish and Wildlife Service as to the nature, time, and manner.

Mr. FARLEY. That is existing practice in our present regulations. That is accepted as part of the operations.

Are there other questions? I am not trying to hurry this, but I recognize that some of you have stayed much longer than you

intended. I am particularly anxious that we clear up any areas of doubt as to the meaning of these things.

I hope there has been developed here the understanding that part of the problem and part of the criticism that is directed at the Department of the Interior in this perhaps should not be directed at the Department of the Interior but directed at the agency that has laid down the policy under which the Interior Department operates. I am, of course, referring to the Congress which set up a basic law, which provided for the leasing in these types of public lands, and specifically exempted other types of publicly owned lands from it.

If the refuges are ultimately put into the category of exempted lands, the approach would be much different.

Now, one final call for questions, if you have any.

Mr. GUTERMUTH. It is darn unfortunate, if the Secretary can, with all of his assistants, find ways under the law to put 3 million in this category and 6 million in this category, that we cannot get more of the 17½ million over into this category. That is the only unfortunate part of it.

Mr. FARLEY. These millions of acres are not descriptive of the problem at all. In this area of A, we have, I think, 1 area of 2 million acres. So the number of acres involved is not the answer. The importance of the specific critical areas in these vast areas are the real problems that we have to face, and the total number of acres that are themselves critical is much less than the 17 million acres that you see spread out there.

If there are no other questions, and without wanting in any way to stifle the discussion, I appreciate very much your coming. I hope that you have gained some useful insight into a very difficult problem with us and I hope you have a very, very happy New Year.

(Whereupon, at 4:30 p. m., the hearing was adjourned.)

SECRETARY OF THE INTERIOR MCKAY'S VIEWS IN THE CURRENT ARGUMENT OVER OIL AND GAS LEASING ON WILDLIFE REFUGES

Certain wildlife refuges were made inviolate for the first time in history by recently revised oil and gas leasing regulations and others were given the most complete protection for wildlife values they have ever had, Secretary of the Interior Douglas McKay said January 3 in answering charges that the new leasing code was a giveaway of the public domain.

The Secretary, answering point-by-point charges made by the Wildlife Management Institute and other critics, said regulations existing before he issued a stop order more than 2 years ago to study the situation included no provisions for keeping any of the refuges inviolate. He explained that previously leases on all refuges were discretionary where as the new regulations declare that 12 critical refuges are off limits to leasing of any kind—they are now absolutely inviolate.

"The new regulations specifically provide that areas indispensable for the protection and preservation of rare and endangered species, remnant big-game herds and irreplaceable examples of unique plants for animal ecology—such as the Red Rock Lakes, home of the Trumpeter swan—are not available for leasing at any time or under any conditions," the Secretary said.

The charge that favoritism in fees and royalties was shown in the first leases issued under the new regulations was termed absurd by the Secretary. He explained that the 12½-percent royalty and 50-cent-per-acre rental are fixed by act of Congress, the Department being bound by the statute with no alternative but to abide by the law.

The leases issued to the Frankfort Oil Co. on the Lacassine refuge in Louisiana were on a noncompetitive basis because regulations precluded competitive bidding, as had been charged, until it is defined as a known geological gas and oil structure by the Geological Survey, the Secretary said. The Lacassine area had not been so designated by the Geological Survey and therefore was not open to competitive bidding.

The Secretary also described the implication that the Government has mineral rights on all refuges as false and misleading. Actually, at least half of refuge area mineral rights are retained by previous owners. This happens in cases where refuge lands are acquired from private owners who retain the mineral rights, the Secretary said. Consequently, there has been oil and gas development on refugees over which the Government does not have full control.

Under the new regulations the control is further strengthened, the Secretary pointed out. The revised code provides that: "No prospecting or drilling operations may be conducted on lands administered for wildlife conservation without the consent and approval of the Fish and Wildlife Service as to the time, place, and nature of such operations." This was not provided under previous regulations. The new code continues: "In every instance a plan of development which includes lands administered for wildlife conservation shall not be approved without the concurrence of the Fish and Wildlife Service." The Secretary pointed out that this double safeguard not only affords all refuges fuller protection but also will lead to more refuges being designated as inviolate.

In reply to the accusations that the leases actually were dated before the new regulations became effective, the Secretary pointed out that the long-standing regulations provide for optional dating of leases on the first day of the month in which leases are issued where there is a prior written request. There was such a request in the Frankfort Oil case and the lease had to be dated December 1 despite the fact that it was executed several days after the December 2 date when the new regulations were announced.

The Secretary answered the blanket charge that all refuges are being thrown open to oil and gas prospecting and drilling by explaining that it was never the intention of Congress that all refuges should be inviolate. Congress intended that the Department of the Interior should protect these refuges for their primary purpose—the protection of wildlife—and that in many instances other land uses are compatible.

The Secretary emphasizes that all refuges will continue to be managed for their primary purpose—the protection and propagation of fish and wildlife—and that all other uses will be subsidiary.

"Refuges will remain primarily fish and wildlife habitats first, last, and always," he said.

A more detailed progress report on resource conservation under Secretary McKay's administration follows herewith.

PROGRESS REPORT ON RESOURCE CONSERVATION

(By the Secretary of the Interior Douglas McKay)

I am proud of the record of the Department of the Interior in strengthening and advancing the cause of conservation. This record reflects the administration's comprehensive policy on resource conservation and development.

The cry of "giveaway" has been raised in connection with the administration of our National Park System. Here's what the record actually shows:

National Park System: The National Park System today is larger, more adequately staffed, and more efficiently administered than it ever has been. The Department added 65,000 acres to our National Park System in 1953, the year this administration entered office. The boundaries of the Everglades National Park were extended to take in an additional 271,000 acres. Last year 40,400 acres were acquired. In the first 9 months of 1955 the Department added 29,560 acres to the park system.

Two new and historically important areas were added to the system with the establishment of Fort Vancouver National Monument in 1954 and Cumberland Gap National Historical Park in 1955. Establishment of Fort Union National Memorial in New Mexico was authorized last year and the National Park Service now is in the process of acquiring necessary lands. The West Virginia portion of the Harpers Ferry National Monument has been accepted for administration pending formal establishment of the area upon tender of the Maryland portion.

Establishment of the City of Refuge National Historical Park, in Hawaii, was authorized in legislation approved by the President in July 1955, and the Department has recommended that the Congress authorize establishment of a Virgin Islands National Park. Moreover, the Department has signified its willingness to designate Chimney Rock, Nebr., and Promontory Point, Utah, as national historic sites in non-Federal ownership.

Important progress has been made toward fulfillment of the Cape Hatteras National Seashore Recreation Area project and all but 5,000 of the 28,500 acres within the project boundaries have been acquired. Negotiations for the majority of tracts needed for the Independence National Historical Park are in their final stages.

The integrity of the National Park System has been maintained under this administration. Not only has the Department protected and extended park boundaries, but vigorous support has been given the National Park Service in resisting developments which would unjustifiably intrude upon the natural beauty of park areas. Among such proposals which the Department rejected were:

An effort to obtain authority to construct a dam at Glacier View which, if built, would flood 20,000 acres of Glacier National Park. Rejected.

Efforts to obtain permits for construction of tramways at Mt. Rainier National Park, Rocky Mountain National Park, Crater Lake National Park, and Grand Canyon National Park. Rejected.

Efforts to modify the newly extended boundaries of Olympic National Park. Rejected.

Efforts to construct a TV transmission tower in Scotts Bluff National Monument. Rejected.

Efforts to open Joshua Tree National Monument to mineral prospecting and mining, or to abolish it altogether. Rejected.

Protection of Joshua Tree National Monument was strengthened when 10,000 acres inside the monument boundaries were acquired in exchange for 10,000 acres of federally owned grazing land outside the park.

Negotiations with the Department of the Navy resulted in withdrawal of the proposal to use a considerable portion of Death Valley National Monument as an aerial gunnery range.

The Corps of Engineers decided after interagency discussions that construction of levees within Grand Teton National Park was not urgently necessary for protection against floods on the Snake River.

One of the first acts of this administration was to reverse the unfortunate 15-year cycle of neglect of our parks which was touched off by World War II and prolonged by the Korean conflict. An administration program calling for substantial increases in parks appropriations has been approved by the Congress.

In January 1953 the National Park Service was operating under a fiscal-year budget of $33,162,330.

For the current fiscal year the park budget is $45,029,300—an increase of some 40 percent.

The new budget provides for 4,650 man-years employment in the parks system, an increase of 25 percent over the man-years provided in the 1952–53 budget. One result has been to raise the park ranger force to its greatest strength in history.

Increased appropriations have enabled the National Park Service to make a good start on reducing the accumulated backlog of uncompleted and projected projects for road and trail construction and improvement of public facilities and park housing. Working cooperatively, the Park Service and concession operators have made great strides in development of a more realistic program for the modernization of privately operated facilities in the parks. For instance, in Grand Teton National Park, where travel has increased more than 500 percent over 1946, public use facilities are being developed in a program calling for an investment of more than $5 million in private capital; a building and expansion program underway at Grand Canyon National Park calls for expenditure of about $1 million by the concessioner; and similar forward-looking programs are either underway or contemplated in other areas.

Gratifying progress is being made in the task of catching up with the demands being made upon the parks today. But that is not enough. The increasing number of visitors to national park areas—21 million in 1946, about 50 million in 1955—demands action on a dynamic program which will place the Park Service in a position to cope with an expected visitor load of 80 million a decade hence.

Such a program is now being formulated by the National Park Service at the direction of the Department. Its preparation already has revitalized the Service. Called Mission 66, its objective is to fully equip the national park system to carry out its basic purposes by 1966, the 50th anniversary of the Service.

I believe sincerely that Mission 66 will prove to be the finest contribution to our national parks since the Service was established as a bureau of the Department of the Interior in 1916.

Wildlife protection: False rumors of a giveaway of wildlife refuges and a land grab of refuge areas by the military have caused sincere conservationists much undue concern. Again, let's assay such rumors in the light of hard facts on the public records.

Not one acre of wildlife refuge area under the primary jurisdiction of the Fish and Wildlife Service has been transferred to the military since I have been Secretary of the Interior.

Since January 1953 the Department of the Interior has established 8 new wildlife refuges and 3 more are in the process of being established. During that period the Department acquired 79,946 additional acres of wildlife preservation through purchase, lease, or transfer of federally owned lands.

Under this administration Federal wildlife refuges have been established for the first time in Kansas and Colorado and new lands have been added to the Federal refuge program in Louisiana, North Dakota, Kentucky, Tennessee, South Carolina, Texas, Washington, Florida, Maine, Oregon, Idaho, Michigan, and New York.

During the fiscal year ending June 30, 1955, wildlife refuges received the largest allocation ever made for acquisition, development, and maintenance. This totaled $6,614,200 and was $2 million more than the refuges had been allocated in the annual budget when this administration assumed office.

It is gratifying to be able to report further that during the fiscal year ending June 30, 1955, the Migratory Bird Conservation Commission, of which the Secretary of the Interior is chairman, approved purchase of 30,189 acres of refuge lands at a cost of some $645,000—the largest expenditure of duck stamp funds for refuge acquisition since 1945.

In administration of a national wildlife refuge program that has been carried out over a period of 52 years, it must be expected that some refuge areas would outlive their usefulness, especially where they were established to meet temporary emergencies until more efficient areas could be acquired.

In the 6 years preceding this administration, for instance, 36 wildlife refuges were abolished. The total Federal wildlife reserves were reduced by 408,527 acres.

This administration has dropped 7 refuges totaling 6,226 acres, made up of small units of low productivity, where administrative costs were not justified.

Secondary use for wildlife of the 56,954-acre Fort Keogh Refuge in Montana, administered by the Department of Agriculture, was relinquished by the Fish and Wildlife Service because of administrative duplication and limited wildlife values. Wildlife potentials of this area will continue to be maintained by the Department of Agriculture.

The Department has not and will not voluntarily surrender any refuge of proven value to wildlife as long as I am in office. Our program calls for the acquisition of additional areas to meet wildlife conservation needs. I regard wildlife refuges, as well as national parks and forests, as irreplaceable national assets whose value is clearly established.

A refuge of proven value is the Wichita Mountains National Wildlife Refuge. Currently, the Department is negotiating with the Department of the Army in an effort to maintain the refuge boundaries intact. The Department's strong opposition to any reduction in the size of the Wichita Refuge was made known in 1953 and our position has not changed.

You will recall that in the last session of Congress legislation was enacted authorizing the expansion of Fort Sill, which adjoins the Wichita refuge. The Army's plans, as outlined before congressional committees, called for the acquisition of some 20,000 acres of privately owned lands and the transfer of some 10,700 acres of the Wichita refuge.

The Fish and Wildlife Service has proposed an alternative plan under which the refuge boundaries would remain intact while the Army would be permitted to set up areas within the refuge from which projectiles could be fired to land on target areas within the military reservation.

On October 19, I wrote to Secretary of the Army Wilber M. Brucker, stating that I was unalterably opposed to the proposed transfer of land of the Wichita refuge. I pointed out that under the proposal which this Department had made the integrity of the refuge would be preserved, the wildlife would be protected, and the public could use the buffer zone during the period when the Army was not firing.

The military establishments have been cooperative in allowing large areas over which they hold primary jurisdiction to be used as wildlife refuges. We are hopeful that a mutually satisfactory solution of the problem at Wichita can be found.

In this connection, a significant agreement between the Fish and Wildlife Service and the Corps of Engineers was completed in August 1954. Under this plan, the transfer of wildlife lands to the Service and to the State conservation departments has been expedited. The Service now assists the Corps of Engineers in conducting hearings at which there is full public consideration of the importance of integrating fish and wildlife protection measures into planning for flood control and navigation developments.

The national wildlife refuges, under the programs of this administration, are contributing importantly to the Nation's recreational needs without interfering with the paramount conservation objectives for which the refugees were established. Last year over 5,200,000 persons visited the refuge areas, an increase of more than 11 percent over the 1953 record of visitors.

Greater protection is afforded existing wildlife reserves than existed when this administration took office. For instance, regulations governing oil and gas leasing in wildlife reservations were issued in 1947—6 years before this administration took office. Exploitation of these leases was underway in several refuges. Serious problems of pollution had arisen or were threatened.

Drastic action was taken to meet this inherited problem. On August 31, 1953, a stop order was issued holding up action on all new applications for oil and gas leases on wildlife refuges. That order was issued on August 31 and it is still in effect. Considerable pressure has been exerted to relax the stop order while revision of the inherited refuge oil lease regulations is under consideration. It has been, and remains, our announced determination that no new regulations will be authorized which do not afford the wildlife refuges greater protection than they had before the stop order was issued.

Public lands and forests: One of the most important conservation measures in many years—Public Law 167—was signed by President Eisenhower on July 23, 1955.

A major provision of this law gives the Department of the Interior authority to control surface resources on mining claims. This is a conservation tool for which I have worked ever since taking office.

Another major provision removed commonly occurring minerals such as sand, gravel, and cinders from the general mining laws and placed them under jurisdiction of the Materials Act of 1947.

Now, at long last, the Department has authority to end many of the abuses which had developed over the years under the old mining laws. Prior to enactment of Public Law 167, location of a mining claim conferred upon the locator rights of exclusive possession of the surface. It was possible to establish claims for low-value minerals and acquire far more valuable surface resources, such as rich timber stands, or a summer home or business site, or a water hole on grazing land. Many such claims were established in our national forests and under the law the Government was required to honor them.

The Government now has the authority, prior to issuance of a patent on a mining claim, to manage the surface resources of the claim. This includes, of course, the cutting and sale of timber, grazing of livestock and use of the surface of the claim for access to adjacent lands.

Important measures for the conservation of the open public rangelands of the West have been taken by this administration. The Department's new 20-year program for soil and moisture conservation is but one of the progressive steps that have been taken to conserve our important natural resources. Under this program, the Federal range is being reseeded and effective measures are being taken to halt heretofore unchecked erosion of the soil.

Good conservation calls for wise use without abuse of the vast expanses of public domain land beyond the boundaries of national park and wildlife refuge areas. Many citizens do not realize that the Federal Government still retains control of about 1 out of every 4 acres in the United States. As our population expands, so do public demands for use of undeveloped Federal acres. A number of laws provide that public domain lands must be transferred to private ownership when all requirements of those laws are met. This Department has the responsibility of so classifying the vacant public land that it is put to its highest use possible under the law. Often when the Department complies with the law—and I am sure that no citizen would want it to do otherwise—the cry of "giveaway" is raised in some political quarters. It is significant that not

one allegation of giveaway has been, or can be substantiated.

FACTS ON THE DEPARTMENT OF THE INTERIOR'S OIL AND GAS LEASING ON WILDLIFE REFUGES

The nature of the charges which have been made about Secretary McKay's recent order on oil and gas leasing on wildlife refuges can be quickly demonstrated by a check of the facts. These are a few facts hitherto overlooked or ignored.

Charge: Wildlife refuges are being opened for the first time to oil and gas leases.

Fact: Congress authorized oil and gas leasing on wildlife refuges 35 years ago. Twenty-three leases which are still in effect were issued in the 1949–50 period before this administration took office. On August 31, 1953, Secretary McKay issued a stop order suspending action on applications for oil and gas leases on wildlife refuges. He did this, he said, because it became clear that the regulations issued by the previous administration in 1947 failed to provide adequate protection to wildlife values of the refuges and the publicly owned oil reserves underground.

Charge: The new regulations lay the refuges wide open to exploitation.

Fact: The new regulations made certain refuges inviolate for the first time in history, the other refuges are given the most complete protection of wildlife values they ever had.

The new regulations replace the loose provisions of the old regulations with stringent requirements. Under the new regulations no lease may be issued under any circumstances on 3,198,000 acres of refuge land. This includes areas indispensable for the preservation of rare and endangered species, remnant big herds, and other special purposes.

On 6,092,445 acres the operator must submit a plan of operations which is fully approved by the career specialists of the Fish and Wildlife Service before a lease may be issued.

On the remaining acreage (7,840,940) no operations may begin until a unit plan establishing the time, place, and nature of drilling operations is approved by the Fish and Wildlife Service.

Charge: Favortism in fees and royalties was shown in the first leases issued under the new regulations.

Fact: The 12½-percent royalty and 50-cent-per-acre rental charged are both fixed by an act of Congress.

Charge: Leases should not have been issued to the Frankfort Oil Co. on the Lacassine refuge in Louisiana on a noncompetitive basis.

Fact: Regulations established before this administration took office provide for noncompetitive bidding until the area is defined by the Geological Survey as being in a known geological oil and gas structure. The Lacassine area has not been so designated by the Survey.

Charge: The new regulations leave the entire matter to the discretion of the Secretary of the Interior.

Fact: The revised code states clearly: "No prospecting or drilling operations may be conducted on lands administered for wildlife conservation without the consent and approval of the Fish and Wildlife Service as to the time, place, and nature of such operations."

Charge: Leases were issued a few days before the new regulations became effective.

Fact: The lease in the Frankfort Oil case was executed several days after the regulations became effective on December 2. However, the lease was dated December 1 because long-standing regulations under congressional statute provide for optional dating of leases on the 1st of the month in which the leases are issued when there is a prior written request. The Frankfort Oil Co. had made such a request.

Charge: Conservationists were not consulted in issuing the new regulations.

Fact: The career specialists of the Fish and Wildlife Service were consulted fully during the 2-year study of the leasing program under the stop order. Before final approval was obtained, every Fish and Wildlife Service recommendation was accepted and made a part of the regulations.

Before the regulations received secretarial approval, the language and effect of the new regulations were reported to the Secretary of the Interior's Advisory Committee on Conservation, organization of representative conservationists which has been functioning since 1948. This group expressed opposition to the use of refuge lands for oil and gas production, but concluded with this recommendation: "We believe that the proposed regulations will provide reasonable protection for wildlife refuges if vigorously administered."

In reporting this decision to Secretary McKay, Mr. Bestor Robinson, of Oakland, Calif., speaking informally on behalf of the membership of the committee, said: "We like the regulations." Mr. Robinson represents the Sierra Club and is serving a second 3-year term as chairman of the advisory committee.

ORDERS AND LAWS PERTAINING TO OIL AND GAS LEASING OF WILDLIFE REFUGE LANDS

LEASING ACT OF FEBRUARY 25, 1920
(41 STAT. 437)

An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain

Be it enacted, etc., That deposits of coal, phosphate, sodium, oil, oil shale, or gas, and lands containing such deposits owned by the United States, including those in national forests, but excluding lands acquired under the act known as the Appalachian Forest Act, approved March 1, 1911 (36 Stat., p. 961), and those in national parks, and in lands withdrawn or reserved for military or naval uses or purposes, except as hereinafter provided, shall be subject to disposition in the form and manner provided by this act to citizens of the United States, or to any association of such persons, or to any corporation organized under the laws of the United States, or of any State or Territory thereof, and in the case of coal, oil, oil shale, or gas, to municipalities.

ACT OF AUGUST 8, 1946 (60 STAT. 950)

An act to amend the Mineral Leasing Act of February 25, 1920, as amended, in order to promote the development of oil and gas on the public domain, and for other purposes

Be it enacted, etc., That section 1 of the act of February 25, 1920 (41 Stat. 437; 30 U. S. C., sec. 181 and the following), as amended be amended to read as follows:

"That deposits of coal, phosphate, sodium, potassium, oil, oil shale, or gas, and lands containing such deposits owned by the United States, including those in national forests, but excluding lands acquired under the act known as the Appalachian Forest Act, approved March 1, 1911 (36 Stat. 961), and those in incorporated cities, towns, and villages and in national parks and monuments, those acquired under other acts subsequent to February 25, 1920, and lands within the naval petroleum and oil-shale reserves, except as hereinafter provided, shall be subject to disposition in the form and manner provided by this act to citizens of the United States, or to associations of such citizens, or to any corporation organized under the laws of the United States, or of any State or Territory thereof, or in the case of coal, oil, oil shale, or gas, to municipalities. * * *

* * * * *

SEC. 3. Section 17 of the act is amended to read as follows:

"SEC. 17. All lands subject to disposition under this act which are known or believed to contain oil or gas deposits may be leased by the Secretary of the Interior. When the lands to be leased are within any known geological structure of a producing oil or gas field, they shall be leased to the highest responsible qualified bidder by competitive bidding under general regulations, in units of not exceeding 640 acres, which shall be as nearly compact in form as possible, upon the payment by the lessee of such bonus as may be accepted by the Secretary and of such royalty as may be fixed in the lease which shall be not less than 12½ percent in amount or value of the production removed or sold from the lease. When the lands to be leased are not within any known geological structure of a producing oil or gas field, the person first making application for the lease who is qualified to hold a lease under this act shall be entitled to a lease of such lands without competitive bidding. Such leases shall be conditioned upon the payment by the lessee of a royalty of 12½ percent in amount or value of the production removed or sold from the lease. Leases issued under this section shall be for a primary term of 5 years and shall continue so long thereafter as oil or gas is produced in paying quantities. * * *"

UNITED STATES
DEPARTMENT OF THE INTERIOR,
BUREAU OF LAND MANAGEMENT,
Washington, D. C., August 31, 1953

Memorandum to: Regional administrators, regions I to VII, inclusive, managers, land and land and survey offices.

From: Director, Bureau of Land Management.

Subject: Oil and Gas Offers in Fish and Wildlife Refuges.

A study is now being conducted by Assistant Secretary Lewis, and all the Bureaus involved, of a possible revision of policy and regulations in the issuance of oil and gas leases within wildlife refuges, both on the public domain and acquired lands. Pending the completion of this study and the possible revision of existing regulations, you will suspend action on all pending oil and gas lease offers and applications for lands within such refuges. Where an offer or an application embraces land partly within and partly without a wildlife refuge, you will suspend action on the portion of the offer or application within the refuge and process, in the absence of any objections, the offer or application to lease as to the land without the refuge.

Action on pending appeals from rejection of such offers or applications will be suspended until the study is completed, a policy is established and the regulations revised in accordance therewith. Likewise, applications of this nature which have been held for rejection will also be suspended pending the completion of this study.

WILLIAM ZIMMERMAN, Jr.,
Acting Director.

EXCERPT FROM TITLE 43, PUBLIC LANDS, INTERIOR

CHAPTER I—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

(Circular No. 1927)

Part 192—Oil and gas leases

SEC. 192.9 Leases for wildlife refuge lands: No noncompetitive oil and gas lease under the act will be issued for lands within a wildlife refuge (a) unless those lands are subjected to an approved cooperative or unit plan, and (b) unless the lease contains a provision which prohibits drilling or prospecting on the refuge lands except when consented to by the Secretary of the Interior upon the advice of the Fish and Wildlife Service. Subject to the same two conditions, competitive leases also may issue for refuge lands. Even if these conditions are not met, competitive leases may nevertheless issue if Fish and Wildlife Service reports that oil and gas development may be

conducted without destroying the usefulness of the lands as a sanctuary for wildlife, or, in the absence of such a report, wherever the Secretary determines that the national interest in securing the contemplated oil and gas production outweighs the importance of maintaining the refuge as a sanctuary for wildlife.

TITLE 43—PUBLIC LANDS: INTERIOR

CHAPTER I—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

[Circular No. 1945]

Part 192—Oil and gas leases

Leasing of Wildlife Refuge Lands

Section 192.9 is amended to read as follows:

"§ 192.9 Leasing of wildlife refuge lands. (a) Geological and geophysical prospecting permits may be issued by the Fish and Wildlife Service on areas subject to its jurisdiction prior to leasing under such terms and conditions as that Service may prescribe.

"(b) (1) Areas determined to be indispensable for the preservation of rare or endangered species, remnant big-game herds, and irreplaceable examples of unique animal or plant ecology are not available for leasing. Areas in this category at present are included in appendix A. Oil and gas leases may be issued for other lands administered by the Fish and Wildlife Service for wildlife conservation, except that, on those areas designated by the Fish and Wildlife Service as wilderness, recreational, water development, or marsh, with respect to which the Fish and Wildlife Service reports that oil and gas development might seriously impair or destroy the usefulness of the lands for wildlife conservation purposes, no leases will be issued unless a complete and detailed operating program for the area, which will insure full protection of the particular values for which established, is approved by the Director, Fish and Wildlife Service. All pending applications on such excepted wilderness, recreational, water development, and marsh areas will be rejected unless within 6 months the applicant files an operating program sufficient to accomplish these purposes. Areas in this category are listed in appendix B.

"(2) The following conditions shall be expressed in any lease issued under this section:

"(i) Geological and geophysical prospecting conducted on the leased premises shall be of a type and at a time satisfactory to the Fish and Wildlife Service.

"(ii) No drilling operations shall be conducted under the lease until such lease has been committed to an approved unit plan. However, the Secretary may, in his discretion, permit or require drilling if he determines that a unit plan including the leased area cannot be secured and that drilling is necessary to protect the interests of the United States.

"(a) A unit agreement which includes lands administered for wildlife conservation shall contain a provision that no drilling operations may be conducted on the unitized portion of the Government-leased lands administered for wildlife conservation without the consent and approval of the Fish and Wildlife Service as to the time, place, and nature of such operations.

"(b) In every instance, a plan of development which includes lands administered for wildlife conservation shall not be approved without the concurrence of the Fish and Wildlife Service.

"(iii) Lessees shall observe and comply with all State and Federal laws and regulations relating to wildlife and shall take such action as is necessary to assure observance and compliance with these laws and regulations by lessees, employees, and agents."

(Sec. 32, 41 Stat. 450; 30 U. S. C. 189.)

DOUGLAS MCKAY,
Secretary of the Interior.

APPENDIX A—FISH AND WILDLIFE SERVICE LANDS NOT AVAILABLE FOR LEASING

Alaska: Certain of the Aleutian Islands.
Georgia: Okefenokee.
Hawaii [1]: Certain of the Hawaiian Islands.
Maryland: Patuxent.
Montana: National Bison Range, Red Rock Lakes.
Nebraska: Fort Niobrara.
North Dakota: Sullys Hill.
Oklahoma: Wichita Mountains.
Texas: Aransas, Santa Ana.
Wyoming: National Elk.

APPENDIX B—FISH AND WILDLIFE SERVICE LANDS AVAILABLE FOR LEASING UNDER A SATISFACTORY DEVELOPMENT AND OPERATING PLAN

Alabama: Petit Bois (see also Mississippi), Wheeler.

Alaska: Chamisso, Hazen Bay, Hazy Island. Kenai: The following areas and all lands within 1 mile of Tustemena Lake, Skilak Lake, Kenai River, upper and lower Russian Lake and River, Hidden Lake, Kasilof River, and Chickaloon Flats. Pribilof Islands, St. Lazaria, Semidi.

Arizona: Cabeza Prieta Game Range, Havasu Lake (see also California), Imperial (see also California). Kofa Game Range: All rangelands in T. 1 N., Rs. 15–18 W.; T. 2 N., Rs. 16 and 17 W.; T. 1 S., Rs. 15–18 W.; T. 2 S., Rs. 15–19 W.; T. 3 S., Rs. 15, 18, and 19 W.; T. 4 S., R. 17 West ½; T. 5 S., Rs. 17 & 18 W.; T. 4 S., R. 18 W.

Arkansas: Big Lake, White River

California: Clear Lake, Colusa, Farallon, Havasu Lake (see also Arizona), Imperial (see also Arizona), lower Klamath (see also Oregon), Sacramento, Salton Sea, Sutter, Tule Lake.

Colorado: Monte Vista.

Delaware: Bombay Hook, Killcohook (see also New Jersey).

Florida: Anclote, Brevard, Cedar Keys, Chassahowitzka, Chinsegut, Great White Heron, Key West, Loxahatchee, Passage Key, Pelican Island, Pinellas, Sanibel. St. Marks: All refuge lands in Ts. 4 and 5 S., Rs. 1, 2, and 3 E., T. M., and refuge lands in the Hartsfield survey.

Georgia: Blackboard Island, Savannah (see also South Carolina), Tybee, Wolf Island.

Idaho: Camas, Deer Flat, Minidoka, Snake River.

Illinois: Chautauqua, Crab Orchard. Lands made available by the Corps of Engineers on the Mississippi River between Rock Island and Alton, Ill. (see also Iowa and Missouri). Upper Mississippi River Wild Life and Fish Refuge (see also Iowa, Minnesota, and Wisconsin).

Iowa: Lands made available by the Corps of Engineers on the Mississippi River between Rock Island and Alton, Ill (see also Illinois and Missouri. Union Slough. Upper Mississippi River Wild Life and Fish Refuge (see also Illinois, Minnesota, and Wisconsin).

Kansas: Kirwin wildlife management area.

Kentucky: Kentucky woodlands.

Louisiana: Lacassine, Shell Keys.

Maine: Widows Island.

Maryland: Blackwater, Chincoteague (see also Virginia), Glenn Martin.

Massachusetts: Great Meadows, Monomoy, Parker River.

Michigan: Huron, Michigan Islands, Seney, Shiawassee.

Minnesota: Beltrami wildlife management area, Mille Lacs, Mud Lake, Rice Lake, Tamarac, Talcot, Upper Mississippi River Wild Life and Fish Refuge (see also Illinois, Iowa, and Wisconsin).

Mississippi: Noxubee: All refuge lands in the following subdivisions: T. 17 N., R. 13 E., secs. 13, 14, 23, 24, 25, 26, and 36; T. 16 N., R. 14 E., secs. 1–4, 9–15, and 21–24; T. 17 N., R. 14 E., secs. 31–35; T. 16 N., R. 15 E., secs. 4–8 and 16–21; Petit Bois (see also Alabama).

Missouri: Mingo. Lands made available by the Corps of Engineers on the Mississippi River between Rock Island and Alton, Ill. Missouri wildlife management area. Squaw Creek, Swan Lake.

Montana: Benton Lake, Bowdoin. Medicine Lake: All refuge lands in the following subdivisions: T. 30 N., R. 55 E., all; T. 31 N., Rs. 55 and 56 E., all; T. 31 N., R. 57 E., secs. 3–7, inclusive, all; sec. 8, N½ and SW¼; sec. 9, W½NW¼; sec. 18, N½NE¼, NW¼, N½ SW¼; T. 32 N., Rs. 55, 56, 57, 58 E., all. Nine-Pipe, Pablo, Pishkun, Willow Creek.

Nebraska: Crescent Lake: All refuge lands in the following subdivisions: T. 20 N., R. 44 W., secs. 2–7, inclusive, 9, 10, 11, and 18, all; T. 21 N., Rs. 44 and 45 W., all. North Platte. Valentine: All refuge lands in the following subdivisions: T. 28 N., R. 27 W., secs. 3–8, inclusive; T. 28 N., R. 28 W., secs. 1 and 12; Ts. 29 and 30 N., Rs. 27, 28, and 29 W., all.

Nevada: Anaho Island. Desert Game Refuge: All range lands in the following subdivisions: Ts. 9–14 S., Rs. 54–62 E., all; T. 15 S., Rs. 56–62 E., all; T. 16 S., Rs. 56, 57, and 58 E., secs. 1–6, inclusive; Ts. 16 and 17 S., Rs. 50–62 E., inclusive, all; T. 18 S., Rs. 60, 61, and 62 E., all; also all lands above 6,000 feet elevation in the following area: T. 17 S., Rs. 54 and 55 E.; Ts. 18 and 19 S., Rs. 54, 55, and 56 E.; T. 20 S., Rs. 55, 56, 57, and 58 E.; T. 21 S., Rs. 56, 57, and 58 E. Sheldon National Antelope Refuge, Stillwater national wildlife management area, Stillwater National Wildlife Refuge.

New Jersey: Brigantine, Killcohook (see also Delaware).

New Mexico:

Bitter Lake: All of the lands of the refuge west of the Pecos River in the following area: T. 9 S., R. 25 E., secs. 14, 15, 21, 22, 23, 26, 27, 28, 32, 33, 34, and 35; T. 10 S. R. 25 E., secs. 3, 4, 5, 8, 9, 10, 11, 14, 15, 16, 20, 21, 22, 28, and 29.

Bosque del Apache: All refuge lands between the East Side Road and the proposed right-of-way for United States Highway No. 85.

New York: Montezuma, New York Wildlife management area, Elizabeth Tilton, Wertheim.

North Carolina: Mattamuskeet, Pea Island, Swanquarter.

North Dakota: Ardoch, Arrowwood, Chase Lake, Des Lacs, Lake Ilo, Kellys Slough, Lake Zahl, Long Lake, Lostwood, Lower Souris. All refuge lands north of the line common to townships 158 and 159 North, Slade, Stump Lake, Tewaukon, Theodore Roosevelt, Upper Souris.

Ohio: West Sister Island.

Oklahoma: Salt Plains.

Oregon: Cape Meares, Cold Springs, Lower Klamath (see also California), Malheur, McKay Creek, Oregon Islands, Three Arch Rocks, Upper Klamath.

Puerto Rico: [2] Culebra.

South Carolina: Cape Romain, Santee, Savannah (see also Georgia).

South Dakota: Bear Buttee, Belle Fourche, Lacreek, Lake Andes, Sand Lake, Waubay.

Tennessee: Lake Isom, Reelfoot, Tennessee.

Texas: Laguna Atascosa, Muleshoe.

Utah: Bear River Migratory Bird Refuge, Locomotive Springs.

Verman: Missisquoi.

Virginia: Black Bay, Chincoteague (see also Maryland), Presquile.

Washington: Columbia, Copalis, Dungeness, Flattery Rocks, Jones Island, Lenore Lake, Matia Island, Quillayute Needles, Smith Island, Turnbull, Skagit, Willapa.

Wisconsin: Gravel Island, Green Bay, Horton, Long Tail Point, Necedah, Necedah Wildlife Management Area, Upper Mississippi

UNITED STATES,
DEPARTMENT OF THE INTERIOR,
BUREAU OF LAND MANAGEMENT,
Washington, D. C., December 22, 1955.

Memorandum to: All area administrators, State supervisors, managers of land offices, and Eastern States supervisor.

From: Director.

Subject: Oil and Gas Lease Offers in Fish and Wildlife Refuges (Circular 1945).

This supplements our memorandum of December 19, 1955 on the above subject.

By memorandum of December 20, 1955, the Fish and Wildlife Service requested this Bureau to withhold action on all lease offers and applications covering Fish and Wildlife lands which are not listed in either appendix A or B set out in Circular 1945.

The memorandum of August 31, 1953, which suspended action on all offers and applications for oil and gas leases for wildlife refuge lands is hereby revoked, except as to those refuge lands which are neither listed in appendix A or in appendix B in Circular 1945. Action as to such lands should continue to be suspended until further notice.

DEPUE FALCK,
Acting Director.

ORDER OF BUSINESS

Mr. NEELY addressed the Chair.

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). Does the Senator from West Virginia have business to be transacted during the morning hour?

Mr. AIKEN. Mr. President, has the morning hour been concluded?

The PRESIDING OFFICER. Morning business has not yet been concluded.

Mr. AIKEN. Mr. President, has the President's message on agriculture been laid before the Senate?

The PRESIDING OFFICER. Not as yet.

Mr. AIKEN. May it be laid down during the morning hour? If not, may it be laid down immediately following the morning hour?

Mr. NEELY. Mr. President, I ask unanimous consent to proceed for ten minutes on a matter unrelated to the pending business.

Mr. AIKEN. Mr. President——

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

SENATOR JOHNSON OF TEXAS

Mr. NEELY. Mr. President, on the second day of last July the Senate was shocked as it would have been by a current of high voltage electricity when it received the distressing news that the distinguished majority leader, Senator JOHNSON, had been transformed in the twinkling of an eye from the image of buoyant health, perfect happiness and boundless hope into a suffering victim of a serious affliction, the ultimate consequence of which the ablest physicians could not immediately foretell. This deplorable illness saddened the Senate, solemnized its proceedings, shrouded the Capitol with gloom and awakened heartfelt regret and sympathy in every civilized country in the world. Then followed many lingering days of anxiety and restless nights of alternating hope and fear. Temporarily—

Thoughts
Of the last bitter hour came like a blight
Over our spirit, and sad images
Of stern agony * * *
Made us shudder, and grow sick at heart.

On Capitol Hill every exchange of greetings began with an entreaty for an encouraging word concerning the health of our stricken friend. Every conversation ended with a sincere hope and a silent prayer that "Richard would soon be himself again."

Through the long months of summer and the melancholy days of autumn skilled doctors, sympathizing nurses, and loving relatives tenderly and tirelessly addressed themselves to the vital undertaking of restoring to health one of the most famous of the great sons of the Lone Star State. A countless throng of devoted friends in the North, the South, the East and the West daily offered up their devout supplications to Him

Who stills the raven's
clamorous nest
And decks the lily fair in
flowery pride,

to speed Senator JOHNSON to complete recovery, and lengthen his life to the hundred twenty-year span—the priceless boon which, in the ancient days of Noah, God graciously promised to man. So far as recovery is concerned, praying, working, watching and waiting have fully accomplished their purpose, while the extreme longevity assured by Holy Writ is, like

Jocund day
Joyously tiptoeing on the highest
mountaintop.

The sunshine has chased away our shadows, joy has banished our sorrow, and smiles have vanquished our tears because our distinguished leader is once more in his official seat with a Miltonic "awe about him, as a guard angelic placed."

Senator, thank you a thousand times, for having conducted the democracy of the Senate from the lowland of minority dejection to the highland of majority elation, and for having magically and majestically established unsurpassable Democratic harmony in the Senate. To the surprise of the Nation, you have prevailed upon the highly diversified, numerous and powerful conservatives and the scanty, courageous and optimistic liberals whom you have led "with the benevolence of the kindly light" to lie down together, work together and, on rare occasions, vote together. Since the days of Hercules no greater labor than this has ever been performed.

Your outstanding achievements in this body have confirmed our belief that a great Jeffersonian Democrat will be the next President of the United States. Consequently,

Now is the winter of our discontent
Made glorious summer by this sun of York,
And all the clouds that lour'd upon our
house
In the deep bosom of the ocean buried.

Senator, my personal appreciation of what you have done and what you will do in the days to come is accurately indicated by the following lines:

When in disgrace with fortune and men's
eyes,
I all alone beweep my outcast state,
And trouble deaf heaven with my bootless
cries,
And look upon myself, and curse my fate,
Wishing me like to one more rich in hope,
Featured like him, like him with friends
possess'd,
Desiring this man's art and that man's scope,
With what I most enjoy contented least;
Yet in these thoughts myself almost despising,
Haply I think on thee, and then my state,
Like to the lark at break of day arising
From sullen earth, sings hymns at heaven's
gate;
For thy sweet love remember'd such wealth
brings
That then I scorn to change my state with
kings.

Illustrious, beloved leader, statesman and friend, we affectionately say:

Good morning, Brother Gladness,
Good morning, Brother Smile.
They told us you were coming
So we waited quite a while;
We were lonesome here without you,
And a weary while it's been;
Now, our hearts are flung wide open
Won't you please come in.

And be—

The rainbow to our storms of life,
The evening beam that smiles the clouds
away,
And tints tomorrow with prophetic ray.

Mr. JOHNSON of Texas. Mr. President, I shall not detain the Senate long.

No one realizes more than does the senior Senator from Texas how unworthy he is of the most beautiful and eloquent tribute paid him by his friend from West Virginia. This is a season of the year in Washington when we have a series of ceremonies. The Congress comes back into session. The President sends to the Congress his state of the Union message. But little did I anticipate that my friend from West Virginia would say so many good and pleasant things about me.

I greatly treasure the friendship and the confidence of the Senator from West Virginia. As I stated the other day, I worked very hard to get back here, and I am very happy to be privileged to sit again in this body.

To all the Members of the Senate I owe a deep debt of gratitude. I shall try to show them my appreciation for the hours they have spent in indulging me in my weaknesses, and I shall try always to be worthy of their confidence and trust.

Mr. DANIEL. Mr. President, I should like to express the appreciation of the junior Senator from Texas for the wonderful tribute which has been paid to my colleague, the majority leader, by the distinguished Senator from West Virginia [Mr. NEELY].

The people of the State of Texas are certainly proud and happy that LYNDON JOHNSON has been restored to health, and that he is here representing our State and the Nation and serving as majority leader in the Senate. I speak also my own personal views and my own personal appreciation and gratitude that he is able to be here at this time.

Mr. AIKEN. Mr. President, I concur in the kind things which have been said by other Senators concerning our majority leader. We have always liked the majority leader. We have always depended on him. We are extremely sorry that he was stricken ill last summer; but I think his illness brought home to us more poignantly than anything else how much we depended on him and trusted him on the floor of the Senate.

Mr. JOHNSON of Texas. Mr. President, I wish to express my gratitude to my colleague [Mr. DANIEL], and to the Senator from Vermont for the very generous comments he made about my service. I am especially proud of the cooperation I received from the Senator from Vermont and from all the Members of the Senate on his side of the aisle. I doubt that any majority leader ever had more support and more assistance and more cooperation from a minority than was my privilege to have from the Senator from Vermont and his colleagues. I shall always be grateful.

Mr. AIKEN. I doubt that any majority leader ever merited respect and support more than the Senator from Texas, and we have had some very good majority leaders, too.

PROPOSED ADMENDMENT TO THE NATURAL GAS ACT

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement and two articles which I have written on the proposed amendment to the Natural Gas Act. As the Senate has been advised, this legislation is scheduled for debate beginning next week and I wish to place in the RECORD my views regarding this issue since I am sponsor of S. 1853.

The first item is a statement which I made at the opening of the hearings by the Committee on Interstate and Foreign Commerce on May 10.

The second item is an article which I prepared for publication by the St. Louis Post Dispatch.

The third item is an article by me which is published in the January 5, 1956 issue of the Public Utilities Fortnightly.

There being no objection, the statement and articles were ordered to be printed in the RECORD, as follows:

STATEMENT ON S. 1853

Members of the committee, I am here today as the sponsor of the bill now under your consideration, S. 1853. As most of you realize, the language of this bill is identical with the language of the bill sponsored in the House by Representative HARRIS, of Arkansas, on which extensive hearings already have been held.

The terms and provisions of S. 1853 may be subject to amendment and change by this committee after the various witnesses have been heard. I do not, in any sense, represent this measure in its present form as the final word on this problem, nor do I wish to establish the impression that I am an expert on the intricacies of the natural-gas industry, because I am not.

It is not necessary to be an expert on the natural-gas industry, however, to understand and appreciate the problem involved here. The problem is much greater, and far more important, than any single industry.

Fundamentally, the basic problem is an old one: The economic exploitation of the resources-producing regions of this Nation. That is a matter to which I have given long and concentrated attention, and it is because of my interest in that subject that I have introduced this measure.

Since the western expansion of this Nation began more than a century ago, there has been a continuing problem—a problem which industrialization has compounded almost beyond correction—of the economic inequality of the South, the Southwest, and the West, in relation to the East and the North.

The economies of the States outside the East and North have been, and still are, dependent upon natural resources for their strength and prosperity. Tax revenues from the production of such resources constitute the primary support for public education, welfare programs, highway construction, and other vital functions of the State governments in these areas. The critical value of such resources to these States is indicated by the careful, farsighted, and highly successful conservation programs which the resource-producing States have instituted and maintained with vigorous public support and approval.

Despite what the States have been able to do, a serious economic inequality has persisted through the years, and exists today. In numerous instances, the resources of such States are absentee owned; the primary wealth and profit produced by such resources benefits other regions. In still more instances, the raw products of these regions are transported from the States of origin, processed in the East and North, and the finished product resold to our residents with the profit added by manufacture going to benefit other regions. This is the classic pattern of the Nation's economic development.

Of the raw commodities produced in the South and West, few are more valuable than natural gas. As both a fuel and as a raw product, natural gas represents a source of great potential wealth and benefit to these regions. The natural gas-producing States have only in recent years began to realize part of that potential.

Today we are faced with a problem, I might say a threat, the gravity of which cannot be overstated. The Supreme Court's decision in the Phillips case, giving the Federal Power Commission authority to assume wellhead controls over independent natural gas producers, threatens to deprive us of the potential promise afforded by this precious commodity.

It is my own conviction—which I realize it is needless to argue—that the Court erred in its interpretation of the Natural Gas Act. The legislative history of that act and the subsequent administrative interpretation made by the Federal Power Commission from 1938 to 1954 present no evidence, as I see it, to sustain the Court's verdict.

Whatever the facts may be in that situation, however, I think that we should focus our attention clearly on the unprecedented policy proposed now by those who demand that the Court's delegation of power to the FPC be left untouched.

Those who are asking for Federal control over the production of natural gas by independent producers are asking, first of all, that this Congress establish a policy of selective peacetime price control, asking that we reach down through the maze of the American economy and single out one commodity, one commodity alone, for arbitrary price fixing.

There is no equity in such a procedure; none at all. Our entire national experience with price controls, in peace or war, is testimony to the folly of selective controls. Such controls are, essentially, punitive; because they are punitive, they discourage productivity. In consequence, an artificial shortage breeds artificially high prices. Such is bound to be the result of wellhead controls on natural gas production.

The inequity of this situation is further emphasized when we realize that the exercise of wellhead controls by the Federal Government will not, and cannot, be of direct benefit to the ultimate consumers of natural gas. Only last year, this Congress passed the Hinshaw bill, restating and clarifying the traditional exemption from Federal jurisdiction of the rates and facilities of distributing companies. Distributing companies are the retailers of natural gas; they are governed by local municipal or State commissions which set consumer charges. Thus, those who ask that the Federal Government take control of gas prices at the wellhead ignore the fact that the Federal Government is powerless to raise or lower the prices paid for such gas by the public.

If there are beneficiaries of Federal control over natural gas production, those beneficiaries are not the families of this Nation.

No, as I see it, the proponents of Federal wellhead control are, perhaps innocently in some cases, asking for the power of the Federal Government to be used against the resource-producing States to compound the economic exploitation and discrimination so long practiced in this Nation.

Federal control over the independent producers' prices amounts, in effect, to protection for the competitive position of the pipelines and the distributing companies; the blue-chip investments of the postwar era.

Certainly it is obvious that Federal control over such producers will, because of its punitive and inequitable nature, cause many of them to sell their gas in place to the pipelines, which, as utilities, enjoy the bonanza of a protected profit.

This will mean hardship and loss to the independent producer—the smaller he is, the harder he will be hit; it will mean the same to the countless royalty owners and landowners who enjoy no commanding economic position; it will mean hardship, also, to the State governments.

If the wellheads of our natural-gas fields are to fall into the sphere of Federal jurisdiction, a serious question exists as to whether the taxing powers of the States can continue to operate in that same sphere.

Likewise, the occupation of this sphere of jurisdiction by the Federal Government casts a dark shadow on the power of the States to enforce their various conservation measures on natural gas, and, also, on oil which is most commonly produced in association with gas.

These are serious matters, involving the relations between the States and the Federal Government, involving the function of our free-enterprise system, involving the economic health of two-thirds of the Nation.

If Congress perpetuates Federal control, actively or by default, we shall set a precedent—a dangerous, unprecedented, and hazardous precedent—for the political exploitation of the resource-producing States. Here in Congress, certainly the great financial interests of the North and East can amass voting strength far superior to that held by the producing States. The precedent of selective-price controls sets a new pattern for exploitation, which, considered in light of the politics involved, becomes far more vicious, far more oppressive than anything ever before seen.

In this day, when the demands of world leadership require the maximum strength of all States and all regions, Congress should certainly act with great care to avoid rushing into a pattern for economic exploitation of any regions.

I feel strongly that the historic pattern of free competition in the field—the pattern followed since the inception of the interstate natural-gas industry—is the best protection, ultimately, for both the Nation and the consumer.

I believe it is urgently important for us to restore the original meaning to the Natural Gas Act. It may be that this bill now before you, S. 1853, goes too far in compromising the various cross-purposes of the competitive segments within the industry. I hope that the committee will not be distracted from the prime purpose by such quarrels or differences. The main purpose will be accomplished if we can, as I said, simply restore the original meaning to the Natural Gas Act.

[From the St. Louis Post-Dispatch of July 31, 1955]

FULBRIGHT SAYS UNITED STATES CONTROL OF NATURAL GAS PRICE AT WELL WOULD BOOST CONSUMER'S COST—HE REPLIES TO DOUGLAS THAT CURBS WOULD WRONGLY CLASSIFY PRODUCTION AS UTILITY AND END SEARCH FOR FUEL WHICH KEEPS IT CHEAP

(By J. W. FULBRIGHT, United States Senator from Arkansas)

WASHINGTON, July 30.—If producers in the Southwest donated a year's supply of natural gas to the families of Missouri, the typical household budget would be saved only $8.63—and there would still be a $69.38 gas bill to pay.

Exceptional? No, not at all. The same pattern is nationwide among States importing most or all natural gas used for residential purposes. Free gas, given away at the producing field, would still cost $69.66 a year to the average family in Wisconsin—a saving of $4.96 annually; $72.60 in Tennessee—a saving of $7.25 annually; and $68.23 in Illinois—a saving of $5.83. In Rhode Island, where gas is used primarily for cooking and not for heating, free gas would save the average Rhode Island consumer only $1.54 on an annual gas bill of $66.66.

Where are the added costs slipped into the consumer's monthly bill? Most natural gas users may be surprised to learn that, literally, it happens right at home—not far away in Texas or Louisiana or Arkansas. The culprit, if there is one, is not some far away, impersonal corporation—it is your local distributor of gas.

NINE HUNDRED PERCENT RISE

The 320,000 residential users of natural gas in St. Louis and St. Louis County pay nearly 900 percent more for gas than the same gas costs in the producing field. Out of $21 million St. Louis families pay each year to cook and heat with gas, $14 million is for costs added after the natural gas has been delivered into the city.

Specific prices and specific costs vary from city to city and State to State, but there is no variation in the fact that—on the national average—85.5 cents of every household dollar spent for gas goes for service, and only 11.5 cents goes for the gas itself. The field price of natural gas is the smallest component of the ultimate retail price.

These facts are highly significant and pertinent to the Congress' present effort to formulate a new policy to guide Federal Power Commission participation in the regulation of the natural gas industry. Consumers, press, and public officials must understand these facts thoroughly; otherwise there is a very real danger that Congress may be influenced by artful and tireless propagandists to take a wholly unrealistic and foolish course.

The question of Federal policy toward the Nation's basic fuels and energy resources is a fundamental question. Federalization of our fuel supply, for example, would render untenable the historic position of private competitive enterprise as our economic system. This prospect—whether remote or real—commends caution in any approach to a new and expanded use of Federal regulatory powers.

DOCUMENTED FANTASY

Unfortunately, there are persons who seemingly will not rest until they see the Federal Government go into the oil fields of the Southwest and plant a regulatory heel on every natural gas well in that area. In their zeal, these advocates have discarded even the pretense of caution with facts and reason and have fabricated a sort of documented fantasy which they themselves believe to be learned economics.

My very good friend and colleague, Senator PAUL DOUGLAS of Illinois, demonstrated in these columns several weeks ago how successfully fantasy can be employed to obscure the true perspective of the natural gas issue. The Senator elected to discard the facts as they are and to conjure up oversized statistics more suitable to his purposes.

The actual economics of the natural gas industry refute—rather than support—the position that Federal controls at the wellhead are needed to save the consumer from the producer.

As the facts show, the producer's price is the least important factor in the consumer's gas bill. If the Federal Government should assume control over that price, the maximum benefit in dollars and cents to the consumer would be negligible even if the field price were arbitrarily reduced to zero.

FALLACY OF UNITED STATES PRICE FIXING

The fatal fallacy of this position, however, is that the Federal Government has no authority to determine or control what domestic or commercial consumers pay. Local rates are fixed locally by State or municipal agencies. The consumer allows himself to be deceived when he accepts the idea that his natural gas bill is made high by men far away in Texas—or that it can be made lower by men far away in Washington. What the consumer pays is determined usually in his own community.

This fact cannot be too strongly emphasized: Even if the price of natural gas were frozen permanently at present levels, the customers in St. Louis—and elsewhere—would probably continue to pay an increasing cost for it through the years.

The customer is, in a real sense, not paying for gas so much as he is paying for service—the finest service obtainable. At the turn of a knob, natural gas is in the customer's home, ready to cook or heat, any time, day or night, every day in the year. No shoveling, no telephoning, no storage, no inconvience whatsoever is necessary with natural gas, and that is what the customer pays to enjoy.

STEEL PIPE A FACTOR

In the final analysis, the price of steel pipe or the overtime wages of local meter readers may have more to do with boosting the consumer's gas bill than the field price of natural gas itself. I am reasonably certain that Senator DOUGLAS would not criticize the steelworkers union for their recent success in negotiating for a modified guaranteed annual wage, but that wage contract—resulting in a $7.50 per ton increase in steel prices—will mean higher gas bills for many present and all future natural gas consumers.

The illogic of the Federal control argument assumes even more astonishing proportions when it is realized that—wherever it is presently sold, whatever its current selling price—natural gas represents the best fuel bargain available to consumers in that area.

As a fuel for homes, business establishments, or industry natural gas is the finest obtainable. The entire interstate market for natural gas which has opened since World War II—extending service to 9 million residential users—has been a replacement market in which natural gas has been voluntarily substituted for other fuels, principally oil and coal. Other fuels have done—and could do—the job which natural gas performs. But natural gas is cleaner, cheaper, and more efficient. Natural gas is preferred by those who want the best.

If the thesis is accepted that the fuel bills of America's families are matters of concern to the Federal Government, then by no logic can it be accepted that natural gas merits first attention. Since the end of World War II price controls, the consumer costs for coal and fuel oil have skyrocketed 100 percent—the price of natural gas in the consumers price index has advanced only 12 percent. In the same period, food has gone up 65.2 percent, clothing 36.6 percent, rents 41.1 percent, and the overall cost of living 49.7 percent.

Senator DOUGLAS—and others of his persuasion—neglect these facts, undertake no crusades to save the coal user from the producer. Obviously, somewhere along the way, some perspective has been lost on this issue. The natural gas consumer is not petitioning for relief from exorbitant prices; quite the contrary, in the State of Illinois more than 300,000 families—presently captive consumers of competitive fuels—are on waiting lists for natural gas service.

This would suggest that possibly the people understand the statistics about natural gas better than the proponents of Federal control. In his article, Senator DOUGLAS dwelled at length on the statistic that passage of pending legislation preserving the independent producer's exemption from Federal utility-type regulation would mean, according to reasonable estimates, an increase to consumers of $600 million. In support, he cited industry experts who offered estimates of how much—on a comparative basis—natural gas would be worth if it were selling for the same price as competitive fuels such as coal and oil. This figure of $600 million is an absurdity, of course, but it does constitute the best evidence of the bargain of natural gas field prices.

This sort of mathematical contortion is—as it is meant to be—enough to frighten reason out of any discussion of this issue, but such propaganda techniques are unacceptable as a basis for decisions about national policy by the public—or by Congress.

YEARS OF PROPAGANDA

Ten years of propaganda have persuaded many good people that the big figures and hypothetical statistics are, in reality, facts. It is an uninviting labor—like trying to dissuade believers in flying saucers—that there is less there than meets the eye.

The fact is that the natural gas issue is not a dollars-and-cents issue. The real issue is supply—not price, and many of the consumers' self-appointed protectors are rendering a real disservice by obscuring that basic truth.

From the beginning, the monumental error of the advocates of Federal intervention in the producing field has been the careless conclusion that because natural gas is distributed by utilities the production of gas is automatically a utility function, also, subject to utility regulation.

This is not true.

The gas utility is selling, primarily, service. On a daily average, the residential user pays the utility 18 cents for bringing gas to him and pays only 2 cents for the gas itself.

PRICES NOT DIRECTLY RELATED

The two prices are not directly related. One may rise while the other falls or remains constant. In St. Louis, for example, the field price of natural gas consumed in the city increased 4 cents per thousand cubic feet from 1949 to 1953, while the cost to consumers for typical home use rose 12.4 cents over the same period. From 1952 to 1953, the field price for St. Louis natural gas advanced 0.2 cent, the price at the city gate rose 5.2 cents, and the price to home consumers increased 9.5 cents.

Any gas utility in the United States can—and some of them do—deliver manufactured

gas, rather than natural gas, through their mains. The gas is manufactured from coal. Rising coal prices mean rising gas prices in such circumstances. No city has asked—and no Member of Congress has suggested—that the Federal Government should assume jurisdiction over coal production to fix the ultimate price of manufactured gas, yet the relationship is exactly comparable with the role natural gas occupies.

Our whole concept of utility regulation is against the argument that Federal power should be used to fix and freeze field prices of nautral gas. Utility rates—even though regulated—vary with changing economic conditions, and the pretense that a Federal freeze on gas prices would be mere utility regulation is a sham. What the proponents of Federal gas controls are asking is the introduction into our political system of a punitive, arbitrary, selective exploitation of individual commodities on a political basis.

The inapplicability of the utility concept to natural gas production is further illustrated by the recent action of the city of Memphis in announcing plans to build its own municipal electric power station. Memphis can—at this distant point—predict the costs of its undertaking and determine the level of consumer rates to be charged. This is a true utility situation.

COST OF FINDING GAS

By the same measure, hundreds of American cities want natural gas—one pipeline alone has been petitioned for service by 149 cities. The cities cannot, on their own, simply undertake to supply their own gas needs. Natural gas must be found, not made. Where it might be found, how much it might cost to find it are unpredictable. On the average, 9 wells must be drilled before 1 producing well is found. At costs from $100,000 to $1 million per well—dry holes included—the outlay would be astronomical, with no certainty of success.

Obviously, the producer cannot be treated as a utility. If, as some suggest, the Federal Government should apply the utility principle and guarantee a return on investment—including the expenses of the search for gas, dry holes, and all—the result would be a gigantic subsidy to the inefficient and unsuccessful and a penalty to the efficient producer. It is quite clear now that if Senator DOUGLAS had his way the producer would sensibly sell his high cost gas—the gas in which he had the most invested—into interstate commerce and keep the low cost gas at home in intrastate channels. This would be a particularly unnecessary burden for the interstate consumer, the folly of an unrealistic theory.

There is another element to consider. Already it has been mentioned that natural gas is not selling—and has never sold—for its relative worth on a heat content basis with competitive fuels. Gas at the well-head sells for less than half the value of coal at the mine-face and one-fifth as much as oil at the well.

OIL FINANCES GAS

This unusual economic bonanza results from the fact that, for 50 years, the discovery of natural gas has been subsidized by the search for oil. Until recent years, natural gas was considered economically worthless. Discovery was largely accidental, but through years of oil exploration a great stockpile of natural gas reserves accumulated.

The end of World War II—and the improvement of pipeline transmission facilities—opened, for the first time, access to vast new markets outside the Southwest. Consumption since that time has more than tripled in the 35 gas-importing States and some 25 million families now use it.

Today natural gas has a value which it never had before. Also there is built up a tremendous demand to find natural gas. The supplies are exhaustible; there is not enough to go around to everybody or to last forever.

The consumers' interest—the public interest—lies in finding more and more gas. What it will cost to find it no one can predict, because no search for gas has ever been financed as such. At present the petroleum industry is spending some $3,100,000,000 annually on the discovery, development, and production of oil and gas reserves combined.

If we set our Federal policy by the principle that the producer should get no more for natural gas in the future than he received in the past, then we will, necessarily, collapse the search for additional reserves. Independent gas producers are no different than Illinois farmers, St. Louis manufacturers, Wisconsin dairymen—they are not going to labor to produce a commodity which governmental policy makes uneconomic to market.

In regard to supply, no segment of the natural gas industry has a greater interest in maintaining adequate supply than the pipelines; otherwise, they could not operate. The Federal Power Commission determined some time ago that it was in the public interest to encourage the pipelines to search for natural gas, find their own reserves.

FAIR-RETURN THEORY

Senator DOUGLAS takes issue with this, holding that the pipelines should be able to charge only on the basis of a fair return on their investment—not the reasonable market price. In many instances, the costs as determined by investment figures on a public utility formula are above the reasonable market price. In other cases, of course, the reverse is true.

For example, in the El Paso Natural Gas Co. case the most recent pertinent decision—the FPC found the marketed price of the company's gas to be $4,970,000. Had Senator DOUGLAS' formula been applied, the cost to consumers would have been $5,060,000—plus return, plus Federal income tax amounting to several million more.

The system now used by the Commission—and embodied in the Harris-Fulbright bill before Congress—will benefit the public interest far more than Senator DOUGLAS' unrealistic effort to impose public utility formulas upon the Nation's commodity producers.

The point is well established that—for all the good intentions which may serve as motivation—the exponents of Federal jurisdiction over the Nation's gas producers are out of touch with reality and are working against—not for—the consumer's interest.

The public interest in natural gas lies in finding more and more supplies. If the producer is treated as a public utility, the search for gas to supply the interstate market will no longer be justified.

PENDING BILLS

Congress now has before it on the calendar of each House, legislation to establish a new, workable pattern of Federal regulation—regluation to supplement but not supplant the authority of the States and municipal governments. The bills are H. R. 6645, by Representative OREN HARRIS, of Arkansas, in the House, and S. 1853, which I introduced in the Senate.

These bills exempt the producer from utility regulation, but they do not leave the Federal Power Commission powerless—or the consumer defenseless—against unreasonable price increases. For the first time, the Commission is given real authority to control what the producer is paid by the pipeline. Interstate transporters cannot pass on to consumers more than the reasonable market price as determined by the Commission.

The consumer benefits and the producer benefits and the national economy benefits. It is a workable, effective, reasonable system which Senator DOUGLAS elected in his article to dismiss by saying that the "reasonable market price" standard was "useless" and "window dressing."

As shown in this article, Senator DOUGLAS' own scheme for something other than a reasonable price would actually cost the consumers millions of dollars more.

SELECTIVE PRICE CONTROLS

In a free competitive economy, it is a hazardous business to undertake to single out individual commodities for artificial price controls by the central Government. Once the Government begins to pick and choose, its decisions are controlled by political considerations—not by sound economics. This leads inevitably to exploitation of the less powerful by the more powerful—the wages of labor, the products of the farmers, the output of individual plants and industries all become fair game once the precedent is set.

The bugaboo of monopoly is injected into the issue extraneously. There are more than 8,000 natural gas producers competing vigorously for leases, discoveries, the privilege of producing and of finding markets in which to sell. Of the 453 separate manufacturing industries considered standard in the United States economy, 382 have a higher concentration of ownership than does natural gas production.

MONOPOLY FACTOR

We have a great body of antitrust laws in the land to protect the public against monopoly. These are applicable to the natural gas industry as much as to any other. Nowhere among those laws, however, is it suggested that the proper remedy for monopoly is governmental price fixing—which is the course some seem now to want to follow.

The public—particularly the gas consumers—would do well to begin taking a more careful and more searching look at the arguments advanced by those who want Congress to beat a hasty stampede into the experiment of virtually federalizing a basic producing industry.

Every Federal agency which has examined this natural gas question through the years has, after learning the facts, concluded that the public interest would be best served by maintaining gas producers free of utility controls.

The Federal Power Commission reached that decision first shortly after the Natural Gas Act was passed—and then—Commissioner Leland Olds, one of the present champions of Federal regulation, was among those who voted for the exemption which Congress proposes now to reestablish in the law. Today the FPC is still asking Congress to write that exemption firmly into the law.

Both House and Senate Interstate Commerce Committees, by bipartisan votes, have recommended passage of the Harris-Fulbright bills.

THE FPC GAS PRODUCER EXEMPTION IS IN THE CONSUMER'S INTEREST

(By the Honorable J. W. FULBRIGHT, United States Senator from Arkansas)

Should a Federal agency be turned loose in the Nation's oil and gas fields to control production of natural gas with a free hand to make and apply its own rules on a day-to-day basis? Or should Congress decide the area of Federal jurisdiction and write an orderly, stable national policy into the law?

The United States Senate must soon choose between these courses. Already the House of Representatives has, for the second time in 6 years, approved a bill to give the Nation a firm, reasoned, workable policy. The measure by Representative OREN HARRIS, of Arkansas, extends the pattern of the Federal Government's only successful regulatory experience in this field. My bill, a companion to the Harris bill, is pending on the Senate Calendar.

What the Senate decision will be is not foreseeable. The industry, the Federal

Power Commission, the President's Cabinet Committee on Energy Resources and Supply Policy, and many others believe a well-defined policy is essential to the public interest. Since 1949, committees of both Houses have consistently recommended passage of legislation such as that now pending each time the Natural Gas Act has been reviewed and studied. There has never been a serious effort to advance any alternative policy for congressional consideration.

There has been—and there is now—a powerful effort to prevent Congress from declaring any policy at all. Supreme Court decisions have clouded and confused the limitations on Federal authority laid down in the jurisdictional section of the Natural Gas Act. In the absence of clarifying language from Congress, the only practical limit on Federal power is the imagination of the 3-member majority of the Federal Power Commission. This is a decisive gap in the orderly processes of Government, a gap which the pending legislation seeks to close.

I

For most of its life, the natural gas issue has been styled as a classical consumer versus producer contest. It is not a valid description of the issue, but on this foundation artful propagandists have erected a wall of misunderstanding which shuts off much light from public discussions.

The purpose of the consumer versus producer alinement is obvious. However technical the regulatory question may be, it must be settled politically in the arena of politics. The men who must settle it are not technicians; they are responsive to political statistics.

If a question is to be answered in terms of 25 million consumers or 4,000 producers, 40 consuming States or 8 producing States, then there is a certain political finality about the choice. No matter how pertinent, facts about the producers' position can anticipate only a small audience. The debate is one-sided and futile before it begins.

Obviously, this styling is faulty and superficial. The remarkable consistency with which regulatory agencies, congressional committees, and Cabinet-level studies have concluded that wellhead regulation of producers is not in the public interest plainly suggests that right is not a matter of numbers. The issue is economic, not political, and it should be measured by economic factors, not political factors.

On this plane, consumers and producers are not in conflict. The producer does not control the consumer's price, and the consumer does not control the producer's price. Twice removed from each other, separated by the pipeline and distributor, consumer and producer are not in position to bargain with each other; third-party bargaining between the two, the role proposed for the FPC, has no economic basis and would be a legal absurdity.

The residential consumer's gas rate is created beyond, not at, the wellhead. Typically, 90 percent of the rate is for service, the transporting and distributing of a commodity; only 10 cents of each consumer dollar is for the commodity itself. The commodity price in the field is a fixed price, controlled by contract. The ultimate price is a variable price, subject to adjustment to allow the distributor full recovery of current costs—plus a guaranteed profit.

Control of the 1 stable price in the producer-to-consumer sequence can have only 1 purpose: to protect the variable rates of the distributor, keeping those rates palatable and competitive for a competitive market. That Federal regulation would serve the utilities' interests, rather than the public interest, was made evident when the gas distributing utilities installed a well-financed lobbying front in Washington 3 months ago for the express purpose of defeating the Fulbright bill in the Senate.

Further emphasis of this point was provided by Senator PAUL DOUGLAS in his article appearing in this publication October 13, 1955, when he wrote in support of his proregulation viewpoint:[1]

Convincing evidence was presented by representatives of distributing utilities before the congressional committees to the effect that the increased cost of natural gas was seriously hampering their efforts to expand natural gas sales, that in some areas they were being priced out of the market, and that if the upward trend in field prices continued, they would meet with financial disaster.

In context, this argument explodes the contrived consumer versus producer myth. Stated baldly, the Federal regulation of independent natural gas producers is "essential" only to the utilities, so that their competitive position may be maintained at the expense of the natural gas producer. The utilities are seeking to have the supply contracts, on which the industry has been built, abrogated by Federal power so that the producer can be forced to absorb the utilities' costs.

It should be noted that the distributing utilities' plea for Federal regulation omits any reference to lower domestic consumer rates as among their purposes. The dark threat of being priced out of the market refers to the industrial market, not the cookstove and water heater market of the housewife, and is, in effect, a bid by the utilities to have Congress perpetuate artificially and arbitrarily a competitive advantage over coal, fuel oil, and other sources of energy. In other words, the utilities want gas field prices made lower so that they may sell greater volumes at their lowest rate, rather than for the purpose of reducing their highest rates—the rates which consumer families pay for home use.

Semanticists notwithstanding, the political choice—and the real choice—is not between producer and consumer, but, rather, it is between producers and utilities, or, perhaps more precisely, between consumers and utilities.

II

The gas distributing utilities are taking an expedient position, maneuvering to obtain a short-term advantage in a tightening competitive market. Their expediency has brought the utilities into strange company. Long before the utility role was so visibly defined, however, the movement for Federal control of natural gas production had its origins among the advocates of public ownership of natural resources. From this source, there has continued to come the momentum, the doctrine, the statistical exercises, and the slogan-style maxims characteristic of the effort. It is possible, but hardly prudent, to assume that the end being sought today differs from the goal in the beginning.

Historically, certain facts are pertinent. The Natural Gas Act was passed in 1938 without fanfare, without excitement, almost without interest; it was accepted as a noncontroversial measure, approved without rollcalls. In an era of self-conscious reform, this legislation was approved with a noteworthy lack of applause, for—apparently contrary to the prevailing trend of those times—it drew careful and precise lines on the limit of Federal jurisdiction. From 1938 to 1954 this limit stood. Then, by a divided opinion, the Supreme Court obscured the line in the case of certain sales by one producer, and the FPC elected to apply universally the mandate which a majority of the Commission found in that one case.

Before that decision came, however, there had been an unrelenting campaign against the limitations on FPC jurisdiction; not an effort to remove the restraints by affirmative legislation, but, rather, a campaign to confuse the legal language and resist congressional clarification. This pattern persists unchanged to the present.

The public has never been given a straightforward picture of what Federal controls over gas production would mean or involve. Proponents of that cause have rallied support negatively, portraying imaginatively and quite loosely what producers might do if not controlled. They have, however, entirely failed to explain what they themselves would do if entrusted with the powers they seek. I have failed to find in any of this group's writings or preachments a single promise of a benefit to consumers. The whole burden of their appeal is that they will not let happen what might not happen anyway. This is pure demagoguery.

Reduced to reality, the mobilization of consumer wrath through all the mass media of communication and propaganda has been for the purpose of preventing Congress from taking an action which would draw a line on how far the Federal Government can go into the oil and gas fields. The long-maintained barrier against Federal intrusion into the realm of resource production has been breached at a weak point into the language of the Natural Gas Act; the gap is open for the forces of public ownership to filter through. This is certainly no ordinary matter which faces the Senate now.

III

For some, it is difficult to equate the dimensions of the issue with the minute size of the segment of the economy directly affected. It is well, therefore, to examine in more detail the implications of this issue.

The immediate reach of the act would seem, it is true, to be only one industry. However, for regulatory purposes, natural gas is inseparable from oil at the producing level and the two fuels supply 63.8 percent—nearly two-thirds—of the energy on which the American economy operates. When the arm of the governmental power reaches out for natural gas, it brushes against the jugular vein of our enterprise system. Control over the production of any resource is, inevitably, control over its use and its users. Such control is fundamental to a regimented economy.

We must recognize, also, that the future is built on today's precedents. The precedent which the Supreme Court and the FPC have fixed in their interpretation of the jurisdictional cause of the Natural Gas Act is that those who supply a public utility become, by that one test, public utilities in their own right.

Natural gas producers are not utilities and the Supreme Court did not insist that they were. The essence of the Phillips decision was that because a gas producer's commodity might eventually influence a distributing utility's rate the producer should be regulated on a utility basis also.

This is, I might suggest, closely akin to what some of my colleagues would regard as "guilt by association." By a sort of agile and spurious logic, the independent producer is classified as a fellow traveler of the utilities, to be treated in the same manner.

Obviously, this established legal precedent—albeit a classical example of double think—could, if universally applied, ensnare the whole range of our manufacturing and productive industries. The proponents of Federal regulation of gas producers are making a political promise to consumers of a fixed gas rate. To fulfill that promise, it would be necessary to control all components of the consumer's rate: steel, fabrication, right of way, office machines, wages and salaries, and all else that constitutes 90 cents of each dollar the consumer pays.

The promise of a fixed consumer rate is, actually, an important and significant de-

[1] Federal Regulation of Independent Natural Gas Producers Is Essential, by Hon. PAUL H. DOUGLAS, Public Utilities Fortnightly, October 13, 1955, p. 622.

parture from the established principles of utility rate regulation. Traditionally, utility rates are current rates, based on the costs of operation under current economic conditions plus a reasonable return. To freeze a utility rate for 20 years, without regard to cost or current economics, would, in an inflating economy, be confiscatory and leave no room for private ownership or operation. This is exactly what is proposed for independent gas producers.

Field prices of natural gas have never reached a level of current value. On comparative basis, gas sells in the field for substantially less than competitive fuels. Likewise, on the basis of costs of discovery and development, the gas price has not reflected actual cost. Gas has been discovered as an incident of the search for oil; it has, in effect, been subsidized by oil. The proponents of Federal regulation disregard this and submit, as one of the primary justification for such controls, the necessity for preventing gas-field prices from rising to a current value. Obviously, this is arbitrary, punitive, and confiscatory. It is not utility regulation; it is political regulation, leading inevitably to public ownership.

Carrying this recital forward, the proponents of Federal gas controls have raised the specter of a zero rate base. They propose that the producer be allowed to recover the cost of his lease, drilling costs, and fixed equipment. After that his expense would be fully amortized and there would be no base on which to fix a return—a percentage return on zero is zero. Corollary with this, the Federal Power Commission now holds that dedication of a commodity to public use supersedes and abrogates the terms of private contracts, specifically precluding the right of a seller to withdraw his commodity if the terms of his contract are breached and casting doubt on the seller's right to terminate deliveries after a contract has expired. In other words, a contract is meaningless. Once a producer commits his commodity to a public use his normal rights of ownership expire and he must continue deliveries, even if he is not being compensated on a current basis.

This is not conjecture or prophecy; this is simply the logic of the course we are already following. Independent gas producers already are caught in this web and this much of it they can see, but neither they, the FPC, Congress, nor the public can say how big the web is, for nowhere is the pattern of this regulation described by law. From what is already visible, however, no great imagination is required to visualize the application of this precedent to a greater breadth of the economy than natural gas.

Already there is an evident conflict between the Commission's position and the established jurisdiction of the States in matters of conservation and taxation. If the powers of the States cannot prevail against the Federal power, then the State commissions are reduced to subsidiary status, functioning as administrative agencies for the Federal Power Commission.

There is, likewise, an obvious conflict in the effort to control gas without controlling oil when the two are produced concurrently from a common well mouth. The FPC defines independent producers now as "natural-gas companies," within the meaning of the Natural Gas Act; that act requires FPC certification of the facilities of "natural-gas companies." Doesn't this mean producers must secure certificates of public convenience and necessity before beginning to drill or lay casing—their only "facilities"? What about the producer exploring for oil who finds gas unexpectedly? Must such oil producers hedge against the possibility by seeking certificates, too? Also, the act gives natural-gas companies the awesome right of eminent domain. If producers are natural-gas companies in the eyes of the law, do they not have the privilege of eminent domain in searching for petroleum beneath private property?

These questions are pertinent and pressing questions. The fact that there are no available answers demonstrates, convincingly, the weakness and hazard of the negative case for Federal controls over independent producers. Proponents of such controls have never presented a case for Federal regulation; they have failed even to define what Federal regulation should be or would be. Their whole case is a case against congressional determination of Federal policy. By preventing such congressional action, it is obvious they hope to achieve an extension of Federal power which this Congress—and no other Congress of recent years—would not endorse on its own merits.

These facts represent persuasive evidence of the importance of congressional clarification of the jurisdictional clause of the Natural Gas Act of 1938.

IV

The Federal policy toward natural gas production proposed by the pending legislation in Congress reiterates the traditional definition of Federal jurisdiction which prevailed from the passage of the Natural Gas Act in 1938 to the Supreme Court's Phillips case decision in 1954.[2]

Under that policy, Federal regulation is attached, properly, to the interstate segment, i. e., the pipelines, of the producer-transporter-distributor sequence. This policy gives the Federal Power Commission authority to control the rate at which natural gas is sold at the city gate, or, more specifically, to assure that the charges for transporting gas from the field to the city are reasonable.

Federal regulation applies to a service, not to a commodity; likewise, local rate regulation functions in the same manner. This is the critical area of the public interest. Service costs, unlike commodity costs, do not permit long-term control by contract. In lieu of contract, governmental policing is necessary to protect consumer interests. Where it is possible to establish fixed contract prices, through private bargaining, governmental policing is gratuitous and burdensome.

It should be kept in mind that under FPC policies, producers have been required to enter 20-year contracts, dedicating their reserves for two decades at prices arrived at on the basis of today's values. This long-term dedication is held necessary to assure consumers of adequate supply. Whatever the necessity, no other producer in the economy is required to make a comparable dedication.

Contrary to the statements of proponents of Federal control, the pipeline is in no wise at the mercy of producers. The pipeline does not, as some persons have suggested, begin building a line at random, snaking about the countryside searching for natural gas. To build a line, the pipeline company must first secure from the Federal Power Commission a certificate of convenience and necessity. This certificate is not granted until the pipeline is able to show (1) that it has a market, and (2) that it has under contract sufficient gas to supply that market's needs for 20 years. The producer must commit his gas, under contract, long before construction of the pipeline begins.

If there is a captive in the natural gas marketing process, it is the producer—not the pipeline, not the distributor, not the consumer. The distributor may use his facilities to distribute manufactured gas, and this is done. The consumer, likewise, elects to convert to natural gas. The astronomical expansion of the natural gas market since World War II has been a replacement market, in which gas has replaced coal or fuel oil or manufactured gas for home use. Gas did not capture the consumer, it freed him from less desirable fuels for which there had previously been no competition.

The bulk of complaints by pipelines and distributors today against gas field prices is a complaint against existing contracts, which they made. In other words, what they are seeking is not Federal regulation of an unregulated price but, rather, Federal relief from their own obligations. There is no evidence that the Natural Gas Act was intended to serve the interests of individual segments of the industry; on the contrary, there is abundant evidence that the use of governmental power to make or perpetuate competitive favor is contrary to the public interest.

The pending legislation is concerned, primarily, with the area of Federal jurisdiction. However, for the public protection, provisions are made to discourage pipelines from proposing contracts which would cause field prices to increase except by specific amounts at specific intervals. Pipelines would not be allowed expense rates above what the FPC determined to be the reasonable market price. The argument made by some that the FPC is incapable of determining a reasonable price is, in itself, an argument against their own position, for they are arguing in spirit for a political price, presumably less than reasonable.

The present effort to delineate Federal jurisdiction is consistent with the original purpose of the Natural Gas Act. It was not, and has never been construed by the courts to be, a price-fixing measure. There was no freeze imposed on any price. The act was made necessary by an issue of jurisdiction, not an issue of price, and that same necessity today dictates the effort to restore a clear meaning to the jurisdictional section of the act.

V

Examined dispassionately, the most striking characteristic of the effort to prevent Congress from acting in this matter is the venom of the attack upon the industry. The language of the obstructionists is the language of the soapbox, not the forums where reasonable and equitable national policy must be made.

"Exploitation of captive consumers," "unconscionable profits," "windfalls," "freedom to charge what the traffic will bear," "gouging"—all the rest sprinkled so liberally in the opposition's literature reveals, I believe, that the objective is more punitive than protective. This is fortified by the inability or unwillingness of the various spokesmen to answer when asked about the hazards of confiscation, zero rate bases, or the other problems arising from the sort of unbridled administrative law they seek.

The time has come in this debate for those opposed to the pending legislation to offer a precise picture of what national policy would be if their efforts succeed. A vote against the current bills is a vote for a form of regulation; as yet, that form has no substance.

Senator DOUGLAS, in his discourse in these pages, dismissed the issue of whether the Nation should embark upon regulation of commodity production by saying "The natural-gas industry is an industry affected with the public interest, and regulation has been and should continue to be applied."

It is not natural gas, but the services connected with its interstate transportation and distribution which are affected with the public interest and to which regulation has been and should be applied. Distributing utilities are entities in themselves, organized and built to provide a service; they may, in most instances, use either natural or manufactured gas. To say that such enterprises are in the natural gas industry is as absurd as to say that Dixon and Yates are in the coal business because they use coal to operate steam generation plans.

[2] *Phillips Petroleum Co.* v. *Wisconsin* (1954) (347 U. S. 672, 3 PUR3d 129).

We are dealing with a segment of a divisible industry. Production is a segment; so, also, are natural gasoline, carbon black, helium, butane, propane, and countless other businesses part of this same industry. Production is a part of an industry, as much as appliance dealers or plumbers. The sweeping generalization is a treacherous basis for the making of Federal policy.

The demand for Federal regulation clearly does not come from consumers. Those representing themselves as consumer spokesmen came mainly from municipal governments and State commissions charged with the regulation of distributing utilities; the case they made was a case for the utilities' interest, not for the public interest.

Through all this controversy, there have been no petitions from consumers for Federal relief from high gas prices. There is no showing that the imaginary captive consumers are being gouged; on the contrary, they are saving money, enjoying the cheapest fuel available. One pipeline alone has petitions from 140 cities for gas service; more than 300,000 persons in Illinois are on waiting lists for natural gas. The public is not persuaded that they will suffer from accepting such service.

The valiants out to "save" the consumer have built their own dragon. They can offer no evidence of an existing need for relief. In place of that, they conjecture what might happen if gas prices increased, and even this vision relates to the producer—not the consumer. We are told that a 5-cent increase in value of gas would give the industry a $10 billion windfall. The gas reserves, to which this figure is applied, will not be drawn from the ground through existing wells; billions must be spent to find and produce that gas. The proposition that gas be produced without rising costs—that exploration will continue unabated in 1975 at 1945 profits—falls flat before reasonable men.

There is a final absurdity in the situation Congress now faces. At the urging of the distributing utilities and the State and municipal commissions which regulate them, Congress in 1954 amended the jurisdictional section of the Natural Gas Act to draw the line of FPC authority at the city gate. Thus, the consumer's gas bill is beyond the reach of Federal authority. There can be no correlation between what the producers receive and the consumers pay; if field prices are depressed by Federal power, there is no related Federal power to transfer the reductions to a home owner's gas bill. The political promise that a vote against pending legislation is a vote to save consumers money is demagogic.

The Hinshaw bill, preserving the traditional FPC lack of jurisdiction over utilities, was approved nearly 2 years ago on the same set of principles as apply to producers. The arguments the utilities advanced for its passage apply equally to the producers' case now. By their strange reversal, the utilities and their supporters are in the position of asking Congress to put a ceiling on producers' prices to support a floor under the utilities' profits. In other words, Congress is asked to eliminate competition in the field to protect the monopolies in the cities. This is, surely, the ultimate of folly.

VI

In the final analysis, the consumer's interest and the national interest attach to supply, not the price, of natural gas. The resource is exhaustible; there is a maximum amount to be found. It has great worth not only as a fuel but as a raw material from which several thousand items can be manufactured.

The consumer and the producer alike have a common interest in finding and producing the maximum potential of our reserves. As gas becomes more scarce, exploration becomes more costly. An arbitrary economic formula making no allowance for this fact will, in itself, limit the recovery of the reserves prematurely to the detriment of all concerned.

The result would be, inevitably, to make natural gas more costly to the consumer. This is the folly of Federal regulation; it cannot fulfill the political promise by which it is justified.

There is a further shortsightedness in Federal regulation. The immediate purpose of such regulation, as it has been proposed, is to protect the utility customer, using natural gas as domestic fuel. In this approach, Federal regulation would be blind to the other uses of natural gas; the full weight of Federal influence would be directed toward rushing natural gas from wellhead to cookstove. This would deprive a vast geographic region of the United States, now on the frontier of important growth and development, of the use of its natural fuel to feed an expanding economy. The growth of the Southwest would suffer and the Nation would suffer because of it.

The choice is between a policy made by Congress or a policy made by a Commission. The bills before Congress now represent the conclusions of our congressional committees as to the policy Congress should establish. What course the FPC might follow in future years is not known—even to the members of that agency.

I believe that in this realm of Federal policy relating to the basic energy supply of the Nation the public interest and the national interest require Congress to specify the area of Federal powers to close the gap which now exists in the orderly processes of representative government.

The PRESIDING OFFICER (Mr. SYMINGTON in the chair). Is there further morning business? If not, morning business is closed.

THE ILLICIT NARCOTICS TRAFFIC

Mr. DANIEL. Mr. President, by Senate Resolution 67, adopted March 18, 1955, the Senate authorized the first nationwide investigation of the illicit narcotics traffic, including foreign sources, narcotic smuggling operations, drug addiction, treatment of drug addicts, and related matters.

The aim of the inquiry was to find "ways and means of improving the Federal Criminal Code and other laws and enforcement procedures dealing with the possession, sale, and transportation of narcotics, marihuana, and similar drugs."

The task was assigned by the chairman of the Senate Judiciary Committee, Mr. KILGORE, to the Subcommittee on Improvements in the Federal Criminal Code, of which the junior Senator from Texas has had the honor to serve as chairman. Other members of the subcommittee are the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Idaho [Mr. WELKER], the Senator from Mississippi [Mr. EASTLAND], and the Senator from Maryland [Mr. BUTLER].

Mr. JOHNSON of Texas. Mr. President, will the junior Senator from Texas yield?

Mr. DANIEL. I yield to my colleague.

Mr. JOHNSON of Texas. I should like to suggest the absence of a quorum, with the understanding that my colleague will not lose the floor. The morning hour has been longer than usual; and I ask unanimous consent that the junior Senator from Texas may yield to me for the purpose of suggesting the absence of a quorum so that others may hear this important report.

Mr. DANIEL. Mr. President, I yield for that purpose, and I thank the senior Senator from Texas.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Texas may proceed.

Mr. DANIEL. Mr. President, since its initial organization meeting on May 27, 1955, the subcommittee has conducted 37 days of open hearings in Washington, Philadelphia, New York, Austin, Fort Worth, Dallas, Los Angeles, San Francisco, Chicago, Detroit, and Cleveland. Special hearings, lasting 3 full days, were held in New York devoted exclusively to the causes, treatment, and rehabilitation of drug addicts. In addition, the subcommittee examined the Mexican border situation in hearings held in San Antonio and Houston.

The subcommittee has heard 345 witnesses, including Federal, State, and local officials, and many addicts, smugglers, and other narcotic violators, for a total of 8,667 pages of testimony.

In addition, evidence and innumerable practical recommendations have been obtained through a series of questionnaires mailed to 52 attorneys general of the States and possessions; 94 United States attorneys; 1,120 county sheriffs; and 1,336 chiefs of police in cities and towns over 10,000 population.

Our subcommittee has completed its work, and is drafting its report and specific legislation which will be recommended before January 31. In the meantime, on account of the urgency and seriousness of this problem, the subcommittee, with approval of the chairman of the full committee, feels that the Members of the Senate should have a preliminary report of our findings.

We were surprised and shocked at the extent and far-reaching effect of the illicit drug traffic in the United States, and have concluded that narcotic addiction and dope traffic constitute one of the most serious problems facing the Nation. The purpose of these remarks, in the nature of a preliminary report, is to call the matter to the attention of the Senate at the very beginning of the session, in order that it may receive early and careful consideration in the legislative program which lies ahead.

PRELIMINARY FINDINGS

The subcommittee has made the following preliminary findings:

First. The United States has more narcotic addicts, both in total numbers and populationwise, than any other country of the Western World.

While there are far less drug addicts in the Nation today than there were before the Harrison Narcotics Act was passed and before the Federal Bureau of Narcotics was created in 1930, the figure

of at least 60,000 addicts today is far more than the number reported by any other Western nation. In fact, if the reports of other nations to the United Nations Commission on Narcotics are correct, our country has more drug addicts than all of the other Western nations combined.

Since January 1, 1953, the Federal Bureau of Narcotics, through voluntary reports from law-enforcement officials, has compiled the names and addresses of over 30,000 addicts, and new names are being reported at the rate of over 1,000 per month. Thirteen percent of the addicts are less than 21 years of age.

Second. In spite of the fact that Federal officials have done all within their power under present handicaps and with limited personnel, the illicit drug traffic has trebled in the United States since World War II.

Addicts were in the ratio of 1 to 10,000 persons at the end of World War II. At the present time, the incidence is about 1 to every 3,000 persons, with an average of 2,000 persons arrested in the United States each month on narcotics charges. The traffic now costs over $500 million per year, to say nothing of the human lives shortened or destroyed and the many crimes which result from the traffic.

Third. Drug addiction is responsible for approximately 50 percent of all crimes committed in the larger metropolitan areas and 25 percent of all reported crimes in the Nation.

Federal, State, and local enforcement officers testified that 50 percent or more of all crimes committed in the larger cities is attributable to narcotic addiction and the illicit drug traffic. Approximately 90 percent—actually 89.9 percent—of the illicit drug traffic is concentrated in 43 of the Nation's most populous cities, and these same cities account for 46 percent of the Nation's crime.

In addition to direct narcotic law violations, drug addicts are responsible for a large majority of the burglaries, thefts, prostitution, and other offenses committed to support their drug habits, which cost them from $10 to $100 a day.

Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks, an article entitled "Two-Hundred Dollars-a-Day Shoplifting for Dope Charged to Three," published in the Washington Post and Times Herald of Sunday, January 8, 1956.

The PRESIDING OFFICER (Mr. ALLOTT in the chair). Without objection, it is so ordered.

(See exhibit A.)

Mr. DANIEL. Mr. President, this is simply an up-to-date article on the subject. We heard, all over the country, testimony that shoplifting, burglary, and such crimes were being committed by drug addicts in order to support their habits.

Addicts also have been associated with crimes of violence, such as murder, armed robbery, safecracking and rape.

The subcommittee is convinced that crime in the United States would be substantially reduced if drug addicts were taken off the streets and placed in appropriate institutions for treatment or detention.

Fourth. Drug addiction is contagious. Addicts spread the habit with cancerous rapidity to their families and associates.

The Nation's foremost medical authorities on drug addiction agree that it is comparable to a contagious disease and that it should be dealt with as such. This view was confirmed by more than 90 percent of the addicts appearing before the subcommittee who began using drugs because of friends and associates.

Less than 20 percent of the known addicts are now confined. It is inevitable that this contagious problem will increase from year to year unless other known addicts are removed from society for treatment and, in the event that treatment fails, placed in a quarantine type of confinement or isolation.

Fifth. Red China, Turkey, Lebanon, and Mexico are the primary sources of heroin reaching the United States, and international controls are inadequate.

While the total requirements of the entire world for opium for medicinal and scientific purposes are set at 500 tons annually, official sources estimate the total world production to be 12,000 tons a year. The 1953 protocol, prepared by the Commission on Narcotic Drugs of the United Nations for the purpose of "limiting and regulating the cultivation of the poppy plant, the production of, international and wholesale trade in, and the use of opium," was immediately ratified by the United States; yet only 14 other nations have ratified the protocol. This is 10 short of the 25 nations required to make it effective. Among those nations lagging in ratification are, significantly, the larger producers of opium: namely Turkey, Iran, and Mexico. Together with Lebanon and Red China, these countries are the primary sources of heroin which reaches the United States.

Sixth. Recent seizures of heroin and cocaine in record quantities point up the international smuggling operations with the United States as a target.

In May of 1955, cocaine valued on the illicit market at $2 million was seized by narcotic agents in New York. During October and November 1955, two seizures of heroin were made in New York by agents of the Bureau of Narcotics with a street value of more than $8,500,000. The cocaine seizure was the largest ever made in the history of the United States. and the most recent seizure of heroin November 3, 1955, was the largest single seizure of heroin ever made in the United States. These seizures show the magnitude of the international traffic aimed at this country and the necessity for increased penalties for smugglers and other traffickers to combat this growing menace.

Seventh. Subversion through drug addiction is an established aim of Communist China. Since World War II, Red China has pushed exportation of heroin to servicemen and civilians of the United States and other free nations of the world.

Sworn testimony before this subcommittee, and the Internal Security Subcommittee, setting forth names, dates, secret codes, methods of smuggling, and drug seizures chemically analyzed, proves beyond any doubt that Red China is producing and exporting opium and heroin as an established policy of its governing officials. This is further confirmed by reports of the United Nations Commission on Narcotic Drugs.

The United States is one of the principal targets of this vicious illicit traffic in drugs as the Peiping regime seeks, first, to obtain dollars to purchase strategic materials and to pay foreign operatives; and second, to demoralize susceptible individuals in our military services and in the general population.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. DANIEL. I should like to complete my summary; then I will yield to the Senator from Tennessee. However, does the Senator have a question he wishes to ask on this particular point?

Mr. KEFAUVER. Yes; I do. I wish to ask the Senator from Texas if it is not true, as has been reported, and as the testimony shows to be the case, that the heroin factory in Red China is reputed to be the largest in the world?

Mr. DANIEL. It has been reported to our committee that Red China has the largest facilities in the world for the manufacture of heroin.

Eighth. Smuggling of narcotics across the Mexican border is facilitated by the failure of the United States and Mexico to wage a mutual all-out fight against the drug traffic.

(a) Ninety percent of the overland smuggling of heroin and marihuana is across the Mexican border into Texas, California, and Arizona.

Federal, State, and local officials reported that the majority of the illicit drug sales along the Mexican border is conducted by well-known Mexican operators in violation of Mexican laws. Their headquarters are just across the international boundary, principally at Nuevo Laredo, Juarez, and Tia Juana. Most of the actual smuggling is carried on by Mexican professionals, and by American drug peddlers and addicts. The enforcement officers unanimously agree that the smuggling operations are not conducted by Mexican laborers and braceros, commonly referred to as wetbacks.

The magnitude of the enforcement problem along the Mexican border is evidenced not only by the fact that heroin, marihuana, and other illicit narcotics are readily available just across the border in Mexico, but also by the fact that the international border which must be policed is 1,500 miles long. Almost 20 million pedestrians and more than 15 million cars, averaging 3 passengers each, cross annually, thus precluding the use of search as the sole weapon to prevent smuggling.

(b) Only one United States official, devoting part-time to narcotics, is stationed in Mexico, and no Mexican official is stationed in the United States to cooperate in solving the mutual problem.

(c) Known American drug addicts are permitted to cross the Mexican border in large numbers each day.

American drug addicts flock across the Mexican border in substantial numbers each day for injections of heroin at

well-known "shooting galleries" and for smuggling operations. Suprisingly, no law prohibits such crossings by addicts, even though they may admit their addiction to customs officers on duty. At best, customs officials can submit the known addicts to thorough searches on their return trips, but many of these addicts hide heroin in their natural body cavities and escape detection. Many of these addicts are also big-time peddlers, and their smuggling is not limited to a quantity for personal use. This was emphasized in the sworn testimony of one female addict who told the subcommittee that she hid $1,000 worth of heroin in her vagina and smuggled it across the border at Nuevo Laredo each week for nearly a year. She and her husband were both addicts and dope peddlers in Houston, Tex. They sold more than $50,000 worth of heroin in Houston in that one year.

In addition to civilian addicts, servicemen stationed at military installations along the border have also frequented Mexican cities and towns for marihuana and heroin. Juveniles also cross with ease.

(d) Mexico will not extradite fugitives, including bond jumpers and others who are evading criminal indictments for narcotic violations.

Ninth. Criminal laws and procedures are insufficient to insure the apprehension and punishment of narcotic offenders.

(a) Judicial interpretations of constitutional search and seizure safeguards have resulted in major narcotic traffickers escaping trial.

(b) Although the telephone is the major instrument of contact between top narcotics traffickers, Federal narcotics agents are not permitted to intercept telephone communications, and such evidence is not admissible in trials of individuals accused of narcotics violations.

Because of the covert nature of the narcotic traffic, wherein the big supplier avoids all possible direct contact with the ultimate buyer and with the petty pusher or peddler, distribution is usually effected through a conspiratorial network in which the telephone is the means of communication. Nevertheless, agents of the Bureau of Narcotics are not permitted to intercept, under any circumstances, telephone communications that might provide evidence which would lead to the arrest and conviction of major narcotic violators. Moreover, neither is evidence obtained by wiretapping by State and local enforcement officials admissible in Federal cases. As a consequence, the Government of the United States is unwittingly giving narcotics violators, especially the larger racketeers and wholesalers, a great advantage over Federal law-enforcement officers in their effort to stamp out the illicit narcotics traffic.

(c) Granting of low bail bonds to narcotic traffickers and delay in trials result in intensified narcotic traffic.

CONVEYANCE OF CERTAIN LAND IN NECEDAH, WIS., TO THE VILLAGE OF NECEDAH

The PRESIDING OFFICER (Mr. ALLOTT in the chair). Will the Senator from Texas suspend?

The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H. R. 2889), an act to provide for the conveyance of certain land in Necedah, Wis., to the village of Necedah.

THE NARCOTICS TRAFFIC

The PRESIDING OFFICER. The Senator from Texas.

Mr. DANIEL. Mr. President, Federal narcotics agents are hampered in their investigations in that they do not possess, statutory authority to carry firearms, execute and serve search and arrest warrants, serve subpenas, and make arrests without warrants for narcotic law violators which occur in their presence.

Tenth. Penalties for narcotic violations are neither commensurate with the seriousness of the crime nor sufficient to remove the profits.

(a) The maximum penalties under present laws of 5 years for the first offense, 10 years for the second and 20 years for the third are too low.

The Nation's illicit narcotics traffic grosses more than a half billion dollars per year. Heroin purchased abroad today for $3,000 will bring $300,000 when finally cut, packaged, and sold in the United States. We have evidence that, with the prospect of such enormous profits, Federal penalties are not sufficiently severe to deter unscrupulous persons from engaging in the traffic. Significantly, we have found that whenever and wherever the penalties are more severe and strictly enforced, the incidence of both addiction and narcotics offenses has decreased proportionately. Federal penalties for narcotics violations generally are lower than the penalties of the various States.

(b) Penalties for narcotics smuggling are unrealistic in view of the loss of lives and high profits which result.

Mr. McNAMARA. Mr. President, will the Senator yield?

Mr. DANIEL. I yield to the Senator from Michigan.

Mr. McNAMARA. I had the honor and pleasure of sitting with the Senator from Texas in the hearings held in Detroit. I wish to compliment him on the fine job he did in the investigation there, and I am sure throughout the country. Enforcement officials in our community were greatly impressed by the fair and judicious manner in which the committee conducted its hearings. I believe the Senator from Texas was in Detroit at about the time Thanksgiving Day was celebrated. As I recall he missed that holiday at his home.

Mr. DANIEL. I spent Thanksgiving Day in the city of the Senator from Michigan.

Mr. McNAMARA. I was sure the Senator did. I should like to ask the Senator a couple of questions.

What is the situation concerning juveniles? Has the Senator learned that a large percentage of juveniles receive narcotics?

Mr. DANIEL. The nationwide situation with reference to juveniles is encouraging. The number of juvenile addicts seems to be growing less in most areas of the country, except in New York City, Los Angeles, California, and perhaps in one city in Texas. In New York and Los Angeles there is an increase in juvenile addiction, but nationwide, so far as juvenile narcotic addiction is concerned, good progress is being made by parents, schools, and officials. However, the addiction is still too high, because 13 percent of the addicts are under 12 years of age.

Mr. McNAMARA. Does the Senator from Texas feel that the provisions of his bill will reach the peddlers who sell to juveniles?

Mr. DANIEL. Yes. I shall come to that in a moment when I report our general recommendations.

Mr. McNAMARA. I understood the Senator to say that the largest seizure of heroin in history was made in recent months. Do the recommendations reach the smuggler?

Mr. DANIEL. Yes.

Mr. BUTLER. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield to the Senator from Maryland, a member of the committee, and one who assisted in developing its findings and recommendations.

Mr. BUTLER. I had the privilege, as the Senator from Texas has stated, of serving with him on the subcommittee investigating the narcotics traffic. I attended the hearings held in Washington, New York, Austin, and San Antonio. I have never seen such devotion to duty as the Senator from Texas displayed. He held long hearings starting at 10 o'clock in the morning, and continuing until 6 or 7 o'clock at night. Then the Senator from Texas interviewed witnesses summoned for the next day long hours into the night, and then started again early in the morning. I have never seen a man who was fairer in the conduct of congressional hearings than was the Senator from Texas. I have never seen a man more thorough. My colleagues can depend upon it that when the general recommendations are before the Senate and the people of the United States, they will represent the best that can be done in this very important field.

Mr. DANIEL. I thank the distinguished Senator from Maryland. I must say to him that without his excellent assistance the committee could never have completed its work. Certainly it would have been impossible to complete it within the time set by the Senate. It is not necessary to ask for an extension beyond the January 31 deadline. I sincerely appreciate the work which the Senator from Maryland did on the committee.

GENERAL RECOMMENDATIONS

Mr. President, having in mind the findings I have enumerated, our subcommit-

tee is drafting specific legislation which will embody the following general recommendations:

INTERNATIONAL CONTROLS

First. That the Senate adopt a joint resolution urging all nations to ratify at the earliest possible time the 1953 Protocol which would limit the cultivation of the poppy plant, the production of, international and wholesale trade in, and the use of opium to the medical and scientific needs of the world. Further, that the United Nations be urged to expedite the final drafting of the proposed single convention which would modernize, codify, and replace existing conventions and protocols on narcotics.

Second. That the Senate adopt a joint resolution urging all nations which have not previously outlawed heroin—Albania, Bahrein, Belgium, France, Hungary, Italy, and Paraguay—to do so at the earliest possible time.

Third. That the Senate adopt a joint resolution urging the United Nations Laboratory, which tests samples of the opium seized in the illicit narcotics traffic to report the results of those tests, not only to the determined country of origin and to the country in which the drugs were seized, but also to the Commission on Narcotic Drugs of the United Nations.

Fourth. That the Senate adopt a joint resolution urging that the Division of Narcotic Drugs of the United Nations, recently moved to Geneva, Switzerland, be relocated at the United Nations Headquarters in New York, where the full force of wide public opinion can be brought to bear in the fight against the illicit narcotic traffic.

Fifth. That high level conferences be initiated between officials of the United States and Mexico for the purpose of agreeing to a treaty of cooperation and exchange of personnel for a mutual fight against the drug traffic across our common border, including provisions for extradition of narcotic violators and fugitives.

This recommendation is most important. I was grieved to know that our two countries, which have practiced the good neighbor policy, are not working together more closely in the effort to suppress the nefarious drug traffic. It is over the Mexican border that the illicit traffic flows most freely. We do not have such trouble on the Canadian border. Ninety percent of the heroin and 95 percent of the marijuana which comes into my State, and which goes from my State into other States, comes from Mexico. All witnesses agreed that it is not the braceros or the so-called wetbacks who are responsible for this traffic in drugs, but it is the professional smugglers. When the hoof-and-mouth disease existed in Mexico, our country sent financial aid and personnel to Mexico to save the lives of their cattle and to prevent spread of the disease to our own livestock. We should be ashamed that our countries have not worked together to oppose this traffic and thus save the lives of many human beings in this country.

Sixth. The next recommendation is that increased personnel be assigned to work with narcotic agents of other countries in a cooperative effort to stop at the source illicit dope shipments intended for the United States.

INCREASED PENALTIES

Seventh. That minimum and maximum penalties be increased for all violations of the narcotics laws, with greatly increased penalties for sales to juveniles.

I come now to the subject covered in the question asked by the Senator from Michigan [Mr. McNAMARA]. Our next recommendation is as follows:

Eighth. That heroin, the most deadly of all narcotic drugs, which is used by 80 percent of all drug addicts in the United States, should be completely outlawed. Federal laws should deal with heroin offenses not only as tax law violations but as criminal acts injurious to the peace, health, and welfare of the Nation.

In effect, heroin is outlawed at the present time, but not completely. The laws deal only with tax violations.

Ninth. That smuggling of heroin into this country and sales of heroin should be punishable by penalties ranging from a minimum of 5 years in the penitentiary to a maximum of death, when the death penalty is recommended by a jury.

Heroin smugglers and peddlers are selling murder, robbery, and rape, and should be dealt with accordingly. Their offense is human destruction as surely as that of the murderer. In truth and in fact, it is "murder on the installment plan," leading not only to the final loss of one life, but to the loss of the lives of others who acquire this contagious infection through association with the original victim.

The death penalty recommendation in this case would be a maximum, not a mandatory sentence. It would be available for extreme cases, such as that of the man who started 40 high-school students on the use of heroin, in San Antonio, Texas. Sheriff Owen Kilday there testified that San Antonio would be paying for the next 50 years for the actions of that narcotics peddler.

A possible death sentence as a maximum penalty would put greater fear in all persons who otherwise might think of smuggling this drug into our country or selling it to our children.

Mr. President, some of our judges do not look upon this crime as being in the same category as that of the crime committed by murderers. I have had one of the most distinguished judges in the Nation say to me, "Do not be an extremist in regard to this matter." But when I showed him how much the sale of heroin leads to the destruction of life, just as much as does the shooting of a person, and when I told him that I would rather have a man shoot my boy with a bullet from a gun, than "shoot" him with a needle of heroin, I think the judge was convinced that the sale of heroin should be put into the category it deserves. If we do not prescribe some minimum sentences, I am afraid that some other judges in the country will not realize the seriousness of this dope traffic.

For instance, only last month, in Boston there was a Federal judge who rejected the Government's plea for stiff sentences when 3 or 4 of the country's worst dope peddlers were before him. Let me read what the judge said from the bench, according to an editorial in the Boston-American of January 3, 1956. Mr. President, I ask unanimous consent that the entire editorial be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit B.)

Mr. DANIEL. I read from the editorial:

Turning down a Government plea for stiff sentences, Judge Wyzanski said:

"While I in no sense look upon this as a trivial offense, it is to me exactly like a bootlegging case, except it happens to be in drugs instead of in liquor, and I have no more moral view with respect to drugs than with respect to liquor.

"I am required to follow an act of Congress, and that act of Congress I intend to follow; but I don't think you need suppose I have a particular animus with respect to the topic."

The editorial then states:

He then sent three of the defendants to the penitentiary for the minimum prison term of 2 years provided by the act of Congress to which he referred. The fourth, the ringleader, he sent away for 3 years.

All of the defendants were guilty of crimes for which they could have been sentenced to long terms in prison.

The Government had asked a sentence of 10 years in one case, 5 in another, 3 in the other two, pointing out that the dope evil diminishes when heavy sentences are imposed.

Mr. President, let me point out that the men involved in that case were not new to the traffic; they were not first offenders. One was on bail on appeal from a sentence imposed in the State court for conspiracy in a narcotics case. He had a long record of arrests, and was an associate of Harvey "Mad Dog" Bistany and bank robber Teddy Green, now an inmate of Alcatraz. Another was an exconvict who had served State prison sentences for burglary, safebreaking, and other crimes, including carnal abuse of a child.

I have referred to this editorial and to the action of that distinguished jurist, simply to show why the Congress, which has gone into this matter, especially as it relates to the dangers of the heroin traffic, needs to prescribe higher sentences.

Mr. BENDER. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield.

Mr. BENDER. It was my privilege to sit with the distinguished Senator from Texas when his committee was in Cleveland, and to hear the testimony of the witnesses. I distinctly recall that witness after witness who appeared before his committee testified that it was necessary for them to steal, not a little money, but hundreds of dollars a day, in order to keep themselves supplied with this dope.

I say that the Senator from Texas in his committee has performed a great service, because on a State level we cannot cope with this problem. We need the legislation the Senator from Texas

recommends. I trust that Congress will act quickly on his suggestions and those of his committee.

Mr. DANIEL. I thank the Senator from Ohio.

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield to me?

Mr. DANIEL. I yield to the Senator from Montana.

Mr. MANSFIELD. Did I correctly understand the Senator from Texas to say that a Federal judge in Boston, in imposing a sentence in a narcotics case, said, according to an editorial in the Boston American, that so far as he was concerned, the dope traffic was no worse than bootlegging?

Mr. DANIEL. That is correct.

Mr. MANSFIELD. Was he a Federal judge?

Mr. DANIEL. He was. Judge Charles E. Wyzanski, according to the Boston American of January 3, 1956, said:

It is to me exactly like a bootlegging case, except it happens to be in drugs instead of in liquor.

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield further?

Mr. DANIEL. I yield.

Mr. MANSFIELD. Is it true that all the defendants in the case of that narcotics charge had criminal records; and that some, if not all of them, had previous records in dope-addiction cases?

Mr. DANIEL. That is true.

Mr. BUTLER. Mr. President, will the Senator from Texas yield to me?

Mr. DANIEL. I yield to the Senator from Maryland.

Mr. BUTLER. Is it not true that the committee had ample testimony, throughout the United States, that persons who become addicted, spread their addiction and engage in crime or do almost anything else in order to obtain money with which to purchase additional heroin?

Mr. DANIEL. That is correct. They are responsible for more than one-fourth of all crimes committed in the United States.

I say to the Senator from Maryland that I never realized what drug addiction in the United States meant until the committee held its hearings. Now I can understand why all persons should lock their homes and their cars. Now I can understand who does the shoplifting and the stealing, to support a half-billion-dollar narcotics traffic in this country.

Mr. BUTLER. Would the Senator from Texas not say there is a great deal of difference between unlawful sale of a narcotic drug and the unlawful sale of liquor?

Mr. DANIEL. There is no doubt about it. How any judge could look upon the two as the same, I cannot understand.

Mr. BUTLER. Will the Senator from Texas yield for a further question, Mr. President?

Mr. DANIEL. Yes.

Mr. BUTLER. Is it the intention of the Senator from Texas to make recommendations, a little later, in connection with the treatment of drug addicts and the possible incarceration of drug addicts?

Mr. DANIEL. Yes. This preliminary report will cover only our law-enforcement recommendations. Before January 31, we shall complete our recommendations, including the treatment, rehabilitation, and detention of addicts. We shall also have recommendations to improve the narcotics laws in the District of Columbia, which are now very ineffective.

Mr. BUTLER. Mr. President, I do not desire to impose upon the Senator's courtesy or to take too much of his time; but I believe it would be very useful, not only to the Congress of the United States, but also in regard to the education of our people generally, if the Senator from Texas would recite briefly one of the occurrences during the last day of our hearing in New York. I am referring particularly to three young persons who appeared before our committee, one of whom was a mother with a baby less than a year old. Without divulging the names, if the Senator from Texas would recite the circumstances in that case, I believe it would be helpful.

Mr. DANIEL. The Senator from Maryland will remember that an assistant Federal marshal had to hold the baby while that mother, 21 years of age, and her husband, age 24, and her brother of 17, came before us; all three appeared before us together. The husband started using heroin when he was 24. He spread the use of the drug to his wife, who was 21. She, in turn, spread the use of it to her brother, age 17. So we see how contagious drug addiction is. We see how it ran through that family, which was only one example of similar situations we found all over the country.

Mr. BUTLER. Is it not true that in order to obtain money with which to purchase heroin, so as to satisfy their appetite for it, they put that girl out on the streets of New York, to engage in prostitution?

Mr. DANIEL. Yes; she had led a life of prostitution to buy heroin. And our committee has been informed by police authorities since we had that hearing in New York, and since she stopped engaging in prostitution temporarily, after the baby was born, that she has gone back to prostitution to sustain the drug habits of herself and members of her family. As the Senator from Maryland knows, we found that situation to exist not only in New York, but all over the country.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. KEFAUVER. I should like to ask the Senator a question while he is discussing the proposal for increased penalties.

Prior to 1952, the law with respect to narcotics dealers and peddlers allowed a Federal judge to suspend sentence, or to place violators on probation as many times as he might desire to do so. At that time Mr. Anslinger told us that the lack of enforcement, or the soft penalties in many judicial districts, had a great deal to do with the sizable amount of narcotics being sold and peddled in the United States.

During that year Representative Boggs and members of the then Senate Crime Investigating Committee recommended that sentences be stiffened so as to provide that after the first offense there should be a mandatory sentence of 2 years, which would double with each succeeding offense. I believe that is the law today.

After that time we had testimony by Mr. Anslinger and others to the effect that the stiffer sentences did help to keep down the traffic. Was that the finding of the committee?

Mr. DANIEL. Yes. We found that the traffic had been reduced wherever stiffer penalties were put into effect. Of course, the longer minimum sentences under the Boggs Act helped to a certain extent, but in too many instances we found minimum sentences being meted out to top narcotics racketeers when they deserved much longer sentences.

Mr. KEFAUVER. I agree with the Senator that, in view of our experience, there should be a further increase in penalties. However, I think it might be well if the law were to stipulate that the provision with respect to multiple violations refers also to convictions in State courts, as well as convictions in Federal courts. That is not now the law.

Mr. DANIEL. I agree with the Senator.

Mr. KEFAUVER. While we were trying to have the law amended, which we finally succeeded in doing, we were met with the argument, on behalf of certain distinguished lawyers—and no doubt the Senator has encountered the same argument—that the American Bar Association and certain members of the judiciary are definitely of the opinion that sentences ought to be left as elastic as possible; that judges should not be tied down by a requirement for minimum and maximum sentences; and that the decision as to what sentence is to be dealt out should be left to their discretion.

While that may be true generally, yet because of the heinous aspect of narcotics sales, the fact that peddlers go to judicial districts where they get off the lightest, and the fact that some judges may not fully appreciate the devastating effects caused by the sale of narcotics, particularly to children, I believe that this is an exceptional case. If we are to drive out narcotics violators, it would be much better if there were stiff mandatory sentences. I know that when the distinguished Senator meets that argument from the American Bar Association and from certain judges, he will arrive at the same conclusion. I hope that the position of the judges and the American Bar Association will not prevail. I hope the Senator will succeed in obtaining further amendments to increase the penalties under the Harrison narcotics law.

Mr. DANIEL. I thank the Senator. I certainly agree that we must have higher maximum and minimum penalties for this particular offense if we are ever to wipe out the narcotics traffic. There are too many judges who do not have the benefit of the knowledge which Congress has accumulated with respect to the

seriousness of this particular offense. Now, to our next recommendation:

Tenth. That offenses involving the smuggling of illicit narcotic drugs should be punishable under the narcotic laws rather than the general smuggling statutes, in order that the higher narcotic law penalties might apply, and in order that the cases might be counted among previous narcotic convictions.

ENFORCEMENT PROCEDURES

Eleventh. We recommend that a chapter be added to the Federal Criminal Code providing for:

(a) More liberal search and seizure provisions in narcotics cases. When Federal agents see the violation occur or have probable cause to believe that it is occurring, and in cases of consent searches, the agents should be permitted to make arrests without search warrants, and the Government should be granted right of appeal from Federal court decisions suppressing evidence thus obtained.

(b) Interception and admissibility of telephone communications in narcotics cases, with due safeguards, including the requirement of a sealed court order permitting such action. If there was ever an offense in which wiretapping was justified, it seems to me that it is justified in narcotics cases, provided the enforcement officers first go to a judge and obtain his permission, under sealed orders.

The big-time traffickers in illicit narcotics are seldom caught and convicted, because they avoid all direct contact with the peddlers and ultimate buyers. Their operations are almost wholly limited to the telephone. Federal agents are not permitted to intercept their communications or to use such evidence in court. As a consequence, the United States Government is unwittingly giving narcotics violators, especially the larger racketeers and wholesalers, a great advantage over the Federal law enforcement officers in their efforts to stamp out the illicit narcotics traffic.

As one witness said to us, with narcotics peddlers having the full use of all modern scientific inventions, including the telephone, and narcotics agents being unable to intercept their messages, the situation is like that in which an enforcement officer in a buggy is trying to chase a criminal who is driving a Cadillac.

(c) Stricter provisions for granting bond in narcotic cases and speedier trials. All over the country the subcommittee heard evidence that narcotic violators intensify their sales after arrest and while out on bond. One witness became the biggest marihuana wholesaler in New York while out on bond during the two years between conviction and the disposal of his appeal.

(d) Statutory authority for Federal narcotics agents to carry firearms, execute and serve search and arrest warrants, serve subpenas, and make arrests without warrants for narcotics law violations occurring or observed in their presence.

(e) Mandatory reports from all Federal officers and agencies to the Bureau of Narcotics of all narcotic addicts and violators who come to their attention, with pictures and fingerprints, in order that the Bureau may expand and complete its present record system and serve as a clearinghouse for information concerning such persons; further providing that this information shall be available for law enforcement purposes to State and local officials of all those States which require their officers and agencies to report such addicts and violators to the Federal Bureau of Narcotics.

It is vitally important that the names, addresses, pictures, fingerprints and records of all known narcotic addicts and violators be assembled in one central agency. A splendid effort is being made in this direction through a voluntary system of reports set up by Commissioner Harry J. Anslinger in cooperation with State and local officials, but the bureau has no authority to require these reports, and has not been given the authority, funds, or personnel necessary to expand and complete this vital record system.

Twelfth. We recommend that narcotic addicts, illegal users of marihuana and narcotic drugs, and convicted narcotic violators—other than aliens—be prevented from leaving the continental limits of the United States except under special procedures approved by the Secretary of State and the Bureau of Narcotics.

INCREASED PERSONNEL AND OPERATING FUNDS

Thirteenth. We recommend an appropriation for at least 50 additional agents for the Federal Bureau of Narcotics should be provided at the earliest possible time, with ultimate addition of another 50 agents to bring the total to not less than 350 agents.

The Federal Bureau of Narcotics, under the able direction of Commissioner Harry J. Anslinger, has done a splendid job in holding the narcotics traffic to its present level, considering its limited personnel and operating funds. The Bureau is one of the few Federal agencies whose personnel and funds have not been increased to meet the growing needs of our times.

Over a 25-year period a force of approximately 227 agents, with an average annual expenditure of less than $2 million, has enforced the narcotic laws of this country. This is entirely inadequate today, as evidenced by the fact that New York City alone has more full-time narcotic agents than the United States Government. Constant limitation of operating funds has seriously curtailed the activities of these agents in undercover investigations. The present force of 250 agents is 25 agents short of the number authorized by the Congress at the present time because of the inadequacy of its budget and appropriations, and at least 50 additional agents should be provided at the earliest possible moment.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. BUTLER. I have in mind a comparison that might well help our distinguished jurist in Massachusetts. It will be recalled that the people of the United States overwhelmingly voted to repeal the Volstead Act and the prohibition amendment and thus to permit the legal sale of alcoholic beverages. I do not believe it would be possible to find any person, aside from the addict or the peddler of narcotics, who would vote to give narcotics to our people.

Mr. DANIEL. Yes; that comparison is well made. The editorial which I asked permission to have printed in the RECORD at the conclusion of my remarks makes that particular point very clear.

OTHER RECOMMENDATIONS

During the next few weeks the subcommittee will make other findings and recommendations concerning treatment and rehabilitation of narcotic addicts, barbiturates, amphetamines, and special laws applying to the District of Columbia.

CONCLUSION

Mr. President, in concluding this preliminary report, it should be stated that our Federal officials and agencies have done the best that they could to combat the narcotics traffic with the laws, procedures, personnel, and funds at their disposal. In spite of their efforts, they have been handicapped to such an extent that narcotic addiction and the illicit dope traffic continue to increase in many parts of the Nation and present a most shocking and serious problem.

It is to be hoped that the facts produced by our subcommittee, together with the evidence adduced by a House Ways and Means Subcommittee, under the chairmanship of Representative HALE BOGGS, of Louisiana, will result in the enactment of legislation and provide appropriations necessary to remove the illicit narcotics cancer from our society. If the Congress fails to act, it must accept a great part of the responsibility for the continuation and possible increase of the problem in the future.

Mr. President, I wish to thank my colleagues on the subcommittee and the members of our staff for their excellent work and cooperation.

I refer especially to Mr. C. Aubrey Gasque, who is general counsel of our subcommittee, and to Mr. Lee Spear, chief investigator of the subcommittee, whom we were fortunate enough to obtain from the Bureau of Narcotics, where he has served with distinction for 18 years.

Especially do I thank the Senator from West Virginia [Mr. KILGORE], chairman of the Senate Judiciary Committee, for his cooperation and assistance to our subcommittee throughout its arduous task.

The conduct of this investigation has been the most tiring and trying experience of my 15 years of public service. This was due in some degree to the wanton, criminal, and sometimes threatening attitudes of some of the racketeers, smugglers, and murderers who appeared before our subcommittee, but even more to the heartaches caused by the dozens of drug addicts who confessed the crime and destruction which had blackened and destroyed their minds and bodies.

If the Congress acts, partially as a result of our investigation, this experience will have been the most satisfying of my public service—though tiring and

trying—because it will be a great service to humanity. If the illicit drug traffic of our country can be cut to the irreducible minimum, we will have saved many of our citizens of today and tomorrow from the worst type of moral and human destruction.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. MONRONEY. I should like to take this opportunity to express my appreciation for the splendid report the distinguished junior Senator from Texas has just made on the narcotics evil. I know of the tremendous amount of work he did on this and many other subjects at the time he was conducting the day and night searching inquiry which he and his other committee members and the staff did on this subject.

Certainly, Mr. President, having this report prepared and ready in such a clear and concise manner, together with the recommendations of the committee, at the opening of the second session of the 84th Congress, will enable Congress to find ways of attempting to eliminate much of the narcotics traffic which is destroying so many of our young people and adults. We are grateful to the distinguished junior Senator from Texas for his service.

Mr. DANIEL. I thank the Senator from Oklahoma.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. LANGER. I notice that the Senator said nothing in his report about the marihuana weed. I wonder whether the omission was an inadvertent one, or whether the present statute on the subject is sufficient.

Mr. DANIEL. The present statute prohibits the smuggling of marihuana into this country. The statute does permit the growing of the marihuana plant for the purpose of making hemp, but not for any other purpose. We recommend increased penalties for violations of these laws.

Mr. LANGER. What is the punishment for violating the laws relative to the growing of marihuana?

Mr. DANIEL. The committee recommends that the penalties for violating the marihuana laws be raised considerably. I would be willing to include marihuana sales, along with heroin, as being punishable with the death penalty. Certainly I believe that the use of the flowering tops or leaf, which contain the narcotic element of the plant, should be outlawed in our country, just the same as heroin.

Mr. LANGER. I wonder whether the Senator would go so far as to make an additional recommendation providing a penalty for growing the weed. In other words, as I understand, the plant is sometimes grown in 5- or 6-acre plots, and it is very easy for a high-school boy or girl to get hold of it and thus form the habit.

Therefore I wonder whether there would be any objection on the part of the Senator from Texas to investigate the matter further in an effort to determine whether that narcotic should also be outlawed.

Mr. DANIEL. We have investigated the matter thoroughly. We believe it would be impossible completely to outlaw the growing of marihuana in this country, inasmuch as the objection to outlawing it completely comes from those who grow the plant under Government permit for commercial use. Several processors in this country use the stem of the plant, not the leaf or flower seed, for manufacture of rope. Of course, no one today may legally grow marihuana except under Government permit, and the statute on that point should be strengthened. When we submit specific proposed legislation on the subject we shall cover that point.

Mr. LANGER. I believe the Senator from Texas will agree with me that Congress has never done its full duty in dealing with the narcotics traffic.

Mr. DANIEL. I agree with the Senator. It was a shocking surprise to me and to the other members of the committee to learn that our laws are not adequate to meet the narcotics menace in our society.

Mr. LANGER. The Senator from Texas knows that when I was chairman of the Committee on the Judiciary for 2 years, at the time the Senator became a member of the committee, I discovered that Congress had not studied the narcotics laws recently or sufficiently. I thought that Congress had made the penalties too small. The Senator will remember that I asked for the appointment of a subcommittee and that I made a motion that the Senator obtain a sufficient appropriation for his subcommittee.

Mr. DANIEL. The Senator is correct.

Mr. LANGER. May I inquire how much of that appropriation has been used?

Mr. DANIEL. The Senate authorized $50,000, and the subcommittee has expended more than $25,000 of that appropriation. When all of our bills are paid, we shall turn back about $15,000 of the appropriated money.

Mr. LANGER. From the discussion I have had with the Senator from Texas, I feel that the amount for use in the next fiscal year ought to be much greater than the amount previously appropriated. Would the Senator agree with me or disagree with me on that point?

Mr. DANIEL. I do not believe that more money is needed. I believe that our standing Subcommittee on Improvements in the Federal Criminal Code, which is the subcommittee that conducted the investigation, could keep abreast of the narcotic traffic and any laws which might be enacted under our regular budget and without any special appropriation. I believe an appropriation of $30,000 for our subcommittee's normal work would be quite sufficient.

Frankly, I believe that sometimes the larger the staff the less work is accomplished. We conducted our investigation with only two full-time professional employees, a general counsel and a chief investigator, and two secretaries. We recently had to employ another lawyer, on a temporary basis, to help us draft our legislation, and he is working with us now. Frankly, as chairman of the subcommittee, I would rather have the Subcommittee on Improvements in the Federal Criminal Code receive an appropriation along the line I have suggested and work with a small staff. This enables the committee to work with the staff directly. I believe it is very important in investigations of this kind for the members of the subcommittee to be able to work directly with the staff. Therefore I would not be inclined to agree that we would need more money, although I appreciate the Senator's willingness to entrust us with additional funds.

Mr. LANGER. I am sure the Senator is familiar with the article which appeared in a recent issue of Collier's magazine, in which it was stated that some California authorities have said it was impossible to enforce the anti-narcotic statutes in the State of California and to prevent narcotics coming in from Mexico. I presume the Senator has read that article.

Mr. DANIEL. Yes.

Mr. LANGER. In the article it was stated that no matter how many people were hired, they could not prevent heroin and marihuana from coming into the United States. Does the Senator believe that is a fact?

Mr. DANIEL. No; I do not agree with that statement, because during World War II the narcotics traffic in this country did a nosedive. We were watching everything so closely during World War II that the narcotics traffic went down to the lowest point it ever reached in our history. I believe that whenever we have the personnel to watch it and stop it at its source, the traffic can be stopped. If that cannot be done, we are just wasting time trying to legislate.

Mr. LANGER. I believe that the amount appropriated is entirely inadequate, and I should like to see a sufficient appropriation. It does not mean that the committee has to use it all, but it does mean that if circumstances should arise which would cause the committee to need more money to acquire additional help, such as additional lawyers and investigators, the money would be available, instead of having to come back to the Senate for more funds. Merely because an appropriation is made, does not mean it has to be spent. Indeed, the Senator from Texas has just stated that he is turning back some of the money authorized at the last session.

Mr. DANIEL. I know the Senator's views and I appreciate them very much, but the narcotics investigation is completed. I do not want the Senate to think that we want to continue this investigation further, because I am afraid it would delay the legislation which is required. We have gone far enough to enable us to submit recommendations. Bills are already pending, including one introduced by the distinguished Senator from Maine [Mr. PAYNE] last year, which was sent from Finance to our committee after the investigation started. I would not mind seeing our standing committee have sufficient money to sustain its operations in connection with all kinds of legislation, but I would not want the

Senator from North Dakota or any other Senator to feel that we are not now ready to recommend legislation, because I am convinced that we are ready to go.

Mr. LANGER. As a member of the KEFAUVER committee dealing with juvenile delinquency, I may say that we ran into the narcotics problem time and time again, as I think the Senator from Tennessee will verify. Whether we were in Chicago or on the west coast or in New York City, we constantly ran into that problem. I cannot see how a complete and full investigation, such as should be made, can be made for the sum of $30,000. Certainly lawyers must be paid $12,000 or $14,000 a year, and I still feel that the committee should be adequately financed. The subcommittee of which the Senator from Texas is chairman is one of the most important subcommittees of the entire Judiciary Committee.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. LANGER. In a moment.

I hope the Senator from Tennessee will give the Senator from Texas some instances which developed in our investigation. For instance, at El Paso, Tex., where there is a large area, approximately 2,000 acres of land, which is claimed by both Mexico and the United States, we found a large number of persons who were bringing heroin and marihuana into the United States. In our hearing there, the mayor of El Paso and the mayor of Juarez, across the border, both testified that they did not know what to do about the 2,000 acres of land. A young Catholic priest testified about the great damage that was being done by the bringing of heroin and marihuana into the country.

I hope the Senator from Texas will read some of the testimony given before the KEFAUVER committee.

Mr. DANIEL. I have done that and we have included that in our consideration. I may say to the Senator that one of the reasons we have been able to complete our work with a small expenditure is that not only did we interview 345 witnesses, but we sent out questionnaires to all the attorneys general of the States, and possessions, to 94 United States attorneys, more than 1,100 county sheriffs, 1,336 chiefs of police, and a large number of other officials, and received replies from most of them. Most important, we had the results of the KEFAUVER committee which held hearings in El Paso, and of the District of Columbia Committee with reference to Washington, D. C., and we made that evidence a part of our record. So the work done previously by other committees is partially responsible for our being able to do this job in record time and with the small amount of funds available.

Mr. BUTLER. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield.

Mr. BUTLER. I have already told the Senator from Texas what a remarkable job he has done, and I would say to the Senator from North Dakota that it has been done so inexpensively because of the untiring work and devotion displayed by the Senator from Texas. I worked with him in Washington, New York, and four cities in Texas, and he worked every day I was with him from 12 to 14 hours a day. I have never seen a man devote himself to a problem so completely and do such a wonderful and efficient job as did the Senator from Texas.

Mr. LANGER. Mr. President, I wish to say to my distinguished friend from Maryland that I have served on committees with the Senator from Maryland and I have seen him work from 12 to 14 hours a day, as has the Senator from Tennessee [Mr. KEFAUVER]. Nevertheless, I would rather see additional funds authorized.

Members of committees have to stay at good hotels; they have to hire competent men, able assistants. When we consider $30,000 for the whole year to investigate a very important problem such as is this one, I think the amount is entirely inadequate. I, for one, wish the Senator from Texas to know that if I have the opportunity, I shall vote for a much larger appropriation than $30,000, knowing full well that the committee will not use it unless it is necessary.

Mr. DANIEL. I thank the Senator from North Dakota.

Mr. ELLENDER. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield.

Mr. ELLENDER. Mr. President, I wish to join my good friend from Maryland [Mr. BUTLER] in the compliments he has just paid my good friend from Texas [Mr. DANIEL]. I tried to reduce the amount of appropriations, and I am glad to note that the distinguished Senator from Texas has not only returned to the Treasury $15,000, but, as I understand, the committee has completed its work and the Senator is to be highly complimented for it. I know he has done a good job. I feel confident that the money has been very well spent.

Mr. DANIEL. I thank the Senator from Louisiana. But is the Senator from Louisiana under the impression that he tried to reduce this appropriation?

Mr. ELLENDER. I had that in mind.

Mr. DANIEL. This is one which the Senator did not try to cut.

Mr. ELLENDER. I was speaking generally.

Mr. DANIEL. The Senator overlooked this one, and we are going to return some money to the Treasury.

Mr. O'MAHONEY. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield.

Mr. O'MAHONEY. Mr. President, I asked the Senator to yield, first, in order that I might express my regret that I was not in the Chamber when he began making his report on his investigation. That was due to circumstances beyond my control. I wanted to be present during his entire presentation.

I want, however, having been a member of the subcommittee of which the junior Senator from Texas [Mr. DANIEL] has been the chairman, to make it a matter of record, that, in my long experience as a Member of the Senate, I have never seen a committee handled more efficiently, more expeditiously, and more wisely than this subcommittee has been handled by the junior Senator from Texas.

He gathered his staff about him, after consultation with the other members of the subcommittee. The staff was a staff of rare efficiency. They cooperated with the committee at all times and were very efficient in following leads and producing testimony.

I agree with all that has been said about the need for appropriations to enable the committee to function as well as possible and to secure all the facts which are needed, particularly upon a subject of this kind, which is of such great importance to the youth of the land. I feel, however, that those who read the report of the subcommittee will immediately come to the conclusion that there are legislative steps that can be taken almost at once which will do very much to put an end to the traffic in narcotics, particularly heroin, or which will at least make a substantial reduction in such traffic.

I have no doubt that the junior Senator from Texas has mentioned the fact that there are high-bracket racketeers who are not themselves users of heroin or any other narcotics, but who still, because they find it a very profitable enterprise, are not above using addicts to distribute the narcotics, and to distribute them even among children attending schools in various areas of the Nation.

I am certain the Senator from Texas has reported that the committee found that the international bridges into Mexico are being traversed by known addicts, who go from the United States into Mexico for the purpose of buying narcotics and who then smuggle them back into the United States. In my judgment—and I think the Senator from Texas will agree—known addicts could easily be prevented from indulging in this traffic if the proper legislation existed to staff the Narcotics Bureau with the personnel it needs to do the work.

But more important than that, it is my judgment that Congress should not hesitate to legislate to provide the death penalty for the unspeakable racketeers, who not being themselves victims of any narcotic drug are nevertheless still willing to sow the seeds of this habit, which is so destructive to the character, the morals, and the health of those who become the victims of its use.

I wish to make it of record in the congressional report of this debate that the junior Senator from Texas has done a magnificent job in conducting and in carrying on this investigation. He has assumed a responsibility and has discharged it with great success. I shall be very happy to continue to support him in the committee with respect to proposed legislation which I feel should be introduced, in addition to what has already been introduced. Perhaps the bills which have been introduced should be amended to take advantage of the facts which have been developed by the subcommittee. There is no excuse for Congress not taking sufficient time to give legislative authority to the Narcotics Bureau to stamp out this terrible and vicious traffic.

I cannot take my seat without adding just this word: I am certain the junior Senator from Texas will agree that the subcommittee has received cooperation

from all the State officials of the various States into which we have gone. Is that not correct?

Mr. DANIEL. The Senator is correct.

Mr. O'MAHONEY. The States are doing their best to stamp out the narcotics traffic, but this is a national problem because the principal source of these drugs is beyond the borders of the United States.

Mr. DANIEL. That is correct. I thank the Senator from Wyoming, not only for his kind remarks concerning the chairman of the subcommittee, but also for the excellent way in which he has assisted, as a member of the subcommittee, in adducing the facts and in bringing forth the preliminary report which we have made today. The chairman of the subcommittee has leaned heavily upon the junior Senator from Wyoming, and certainly appreciates his excellent service.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. JOHNSON of Texas. I wish to associate myself with the very fine statement made by the able Senator from Wyoming [Mr. O'MAHONEY] regarding the work of the subcommittee headed by my colleague, the Senator from Texas [Mr. DANIEL]. I have observed the work of the subcommittee ever since it was created. I have followed it as closely as I could, under the circumstances.

I have been very proud of the work of the chairman of the subcommittee, the members of the subcommittee, and the staff. I know of no better field for study than the one which has occupied their attention.

I think all Members of the Senate, on both sides of the aisle, can follow the able junior Senator from Texas in the constructive program he has outlined, and perhaps before this session shall be concluded we will have come to grips with this very serious problem which has done so much damage to the Nation.

Mr. DANIEL. I thank my distinguished colleague from Texas.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. DANIEL. I yield.

Mr. KEFAUVER. I should like to ask the Senator a question before making a brief observation.

Throughout the Nation today there is a great and continuing interest, federally, statewide, and locally, in the effort to eradicate organized criminal elements. I think there has been some improvement, and that some of the big gangs are no longer existent. The nationwide wire service is not operating.

It seemed to me, when we were making a study of the matter, that illegal gambling and the trade in narcotics were the two activities which were the backbone of the organized criminal empire in the United States, and that whatever was done to break up the narcotics trade would also break up organized crime generally. Is that the conclusion of the able junior Senator from Texas and his subcommittee?

Mr. DANIEL. I would certainly agree with that statement. I commend the distinguished senior Senator from Tennessee for all the work he has done in the past against organized crime, and for the evidence which his committee gathered, even years ago, that we were able to use.

Mr. KEFAUVER. I may say, further, that it has been my great pleasure to have been associated with the junior Senator from Texas for a long time in his general effort to better law enforcement and to rid his State and the Nation of the criminal element, especially the group which has been dealing in narcotics.

I remember with a great deal of interest that back in 1950 the junior Senator from Texas, who was then the attorney general of Texas, called the first statewide meeting of all district and county prosecutors in his State to talk over methods of better handling their cases and of investigating and ferreting out the criminal element in his State.

That conference which the distinguished Senator, as attorney general of Texas, called, and the association which he formed were two of the outstanding local efforts in law enforcement that we found in the entire United States.

As chairman of the Committee To Investigate Crime, I wish to congratulate the chairman and the other members of the subcommittee. I do not know of any committee which I have observed and followed which has done its work better and more conscientiously, or which has more quickly come forth with legislative recommendations, than has the subcommittee headed by the distinguished junior Senator from Texas.

For my part, I certainly would be glad to join with my distinguished colleague, the distinguished senior Senator from North Dakota [Mr. LANGER], who in all these matters has been a bulwark of support to all of us who have dealt in these related fields, in voting for more funds, if the junior Senator from Texas wants more funds, to carry on this important work. The Senator from Texas will soon make legislative recommendations. I think it is the duty of Senators who are members of the various committees which will consider such bills to expedite their consideration. I feel certain they will receive early consideration by Congress.

It is a job well done. I compliment and commend the distinguished chairman and the members of his subcommittee.

Mr. DANIEL. I appreciate the kind words of the distinguished Senator from Tennessee.

Mr. PAYNE. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield to the Senator from Maine.

Mr. PAYNE. It is my desire to join my fellow colleagues in expressing very high commendation of the distinguished junior Senator from Texas, who has served as chairman of the special subcommittee dealing with the subject of the narcotics problem in this country. It has been stated that he has been a very hard worker in connection with the activities of that subcommittee, but having known PRICE DANIEL for a number of years, having had a chance to observe him, as has been stated by other Senators, when he served as attorney general of Texas, and also having had the pleasure of serving with him in the Senate for the past 3 years, it is no more than what one would expect of one who has devoted himself so wholeheartedly to public service as has the junior Senator from Texas.

I know it will be pleasing to the Members who cosponsored the proposed legislation introduced by me last January, in connection with certain problems relative to the narcotics situation, to learn of the specific recommendations which have been made by the distinguished Senator from Texas, together with the members of the subcommittee, which recommendations have been pointed out so clearly to the Senate of the United States.

It is certainly my hope that when legislation is drafted by the subcommittee and brought finally to the floor for consideration, not too much delay will be experienced in getting at the very heart of some of the recommendations with reference to stiffer penalties and greater authority which should be given to the narcotics agents of the Bureau, so that they can do even a better job than they have been able to do up to the present moment in trying to stamp out the nefarious narcotics traffic which is plaguing the country today.

Again I wish to pay highest commendation to a very distinguished Senator, the chairman of the subcommittee, for the outstanding work he has carried on in behalf of the Senate.

Mr. DANIEL. I sincerely thank for his kind remarks the Senator from Maine, and for having been among those who first interested me in this matter by the introduction of his bill early last year.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. DANIEL. I yield to the Senator from Wisconsin.

Mr. WILEY. I am very happy to join Senators who have paid compliments to the junior Senator from Texas [Mr. DANIEL] for his fine work. I am glad he chose to carry on the work started some years ago. Probably the worst thing in the world is a bad idea; the next worse thing is drugs. I am glad to have an opportunity to compliment him for his fine work.

Mr. MANSFIELD. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield, Mr. President. After that I shall yield the floor.

Mr. MANSFIELD. I wish to join my colleagues in commending the distinguished junior Senator from Texas for the fine work which he has done in investigating the narcotics problem as it affects our own people. I think he is to be commended, not so much for spending so little money, not so much for getting the job done before the time for his committee's work expired, but for the effective manner in which he has brought to our attention recommendations which should be enacted if the insidious problem of narcotics misuse is to be solved.

I should like to ask the distinguished Senator from Texas a few questions.

Can the Senator tell the Senate how many members comprise the personnel of the Federal Bureau of Narcotics?

Mr. DANIEL. Of the entire Federal Bureau of Narcotics?

Mr. MANSFIELD. Yes.

Mr. DANIEL. About 252. That is fewer than the narcotic agents employed by the city of New York.

Mr. MANSFIELD. The Senator was anticipating my next question. How many agents are on the narcotics squad of the city of New York?

Mr. DANIEL. About 300.

Mr. MANSFIELD. How many does the city of Los Angeles use?

Mr. DANIEL. Los Angeles has more than 100, but I do not remember the exact number.

Mr. MANSFIELD. How many narcotics agents does the Government have overseas?

Mr. DANIEL. The Narcotics Bureau has five narcotics agents overseas. There is 1 part-time man in Mexico and 3 customs agents in the Far East. That makes a total of eight.

Mr. MANSFIELD. The Senator has stated that the sources from which heroin is derived are Lebanon, Turkey, Red China, and Mexico. Is that correct?

Mr. DANIEL. Those are the main sources.

Mr. MANSFIELD., Yet this Government has only a total of 5 agents overseas to try to tap these sources?

Mr. DANIEL. There is a total of eight who are doing either full-time or part-time work in that field.

Mr. MANSFIELD. And the Federal Government has a considerably lesser number in its entire Federal Bureau to deal with the problem than has the city of New York alone.

Mr. DANIEL. That is correct.

Mr. MANSFIELD. I hope the Senator in his recommendations will see to it that the moderate advance which he proposes for increasing personnel will be extended somewhat, so Mr. Anslinger's Bureau, which has such a terrific responsibility, will be enabled better to perform its duties, which will inure to the benefit of all. I thank him again for having served his country so well.

Mr. DANIEL. I thank the Senator from Montana. I especially appreciate the valuable information which he supplied to the committee as a result of his trip to the Far East.

Mr. GORE. Mr. President, will the Senator from Texas yield?

Mr. DANIEL. I yield to the junior Senator from Tennessee.

Mr. GORE. I know the Senator from Texas does not want to prolong the debate, but I wish to compliment him for his speech. I am impressed by his fine record and by his recommendations, and am ready to stand shoulder to shoulder with him at the wheel.

Mr. DANIEL. I thank the junior Senator from Tennessee for his compliments.

Mr. President, I yield the floor.

[From the Washington Post and Times Herald of January 8, 1956]

EXHIBIT A

TWO-HUNDRED-DOLLARS-A-DAY SHOPLIFTING FOR DOPE CHARGED TO THREE—SUSPECT ARRESTED IN WRECKED POST OFFICE

Three men who told Prince Georges County police they used proceeds of a $200-a-day shoplifting operation to buy narcotics were jailed yesterday on larceny charges.

One of the men, William Blakey, 25, listed at 247 14th Street SE., was booked on an additional charge of possessing narcotics paraphernalia.

The other two were identified as Herbert C. Dickerson, 24, of 1233 Morse Street NE., and Anderson Jones, 25, of 2542 13th Street NW.

All three men were jailed in lieu of $500 bond each, Prince Georges County police said, and an additional bond of $2,000 was set for Blakey on the narcotics charge.

The trio was rounded up after Bladensburg police Pvt. Frank E. Thombs spotted the men getting into their car with a portable record player taken from a nearby Drug Fair at 4920 Annapolis Road about 5:30 p. m. Friday.

Thombs gave chase and the fleeing suspects sideswiped one automobile and crashed head on into a second. They then dashed into a wooded area in the 4300 block of Edmonston Road.

Prince Georges Pvt. Yorke Flynn Jr., arrested Dickerson near the crash scene after about 15 policemen searched the area for an hour. Blakey was arrested when he walked into the Hyattsville police station about 3 a. m. and reported his car stolen.

Jones was picked up by the District narcotics squad yesterday and turned over to Prince Georges police. Detective Sgt. Emmett F. Gray said he found several needles and a capsule of narcotics in Blakey's car.

Gray reported that all three men told police they took $12 in cash from washing machines in Chillum, Md., area apartments on Friday. Gray added that the men told police their daily "take" from shoplifting and washing machine coin box thefts amounted to about $200 a day.

Gray said Dickerson told him he had been using narcotics since 1946 and had a $25-a-day habit. Hearings for all three suspects were set for 9:30 a. m. Monday in Hyattsville Police Court.

A man found lying unconscious and bleeding on the table of a Georgetown branch post office, amid a shambles of upturned ink bottles, scattered letters and packages, was charged with housebreaking yesterday.

Held at District jail was James A. Warren, 28, who told police he lived at 2324 G Street NW.

Police reported that Warren was found about 5 a. m. in the branch post office at 1215 31st Street NW., by Philip C. Randall, of 737 Rock Creek Church Road, NW.

Randall called police after he noticed the front door glass had been smashed, looked in and saw Warren stretched out on a table with the branch office in complete disorder, police said.

Warren, who came out fighting when he was awakened, was taken to District General Hospital and treated for superficial cuts about the body, police reported.

Police said Warren denied ever being in the postoffice branch and couldn't say where he had been for the previous 24 hours.

Three empty 5-gallon milk cans found inside the post office apparently had been thrown through the glass door, police said. They added that several spots of blood were found inside along with broken fluorescent lighting, pens broken in two, mail racks tipped over.

Nothing was reported missing after a checkup, police said. A municipal court hearing on the housebreaking charge was set for Thursday.

EXHIBIT B

[From the Boston American of January 3, 1956]

JUDGE WYZANSKI'S VIEWS ON DRUGS

United States Judge Charles E. Wyzanski recently expressed and demonstrated his philosophy with respect to drugs and drug peddlers.

It seems to us to be a strange one and, emanating from the bench, perhaps a dangerous one. At least it deserves examination.

At a session of his court in Boston, four members of the underworld stood before him for sentence. They were confessed dealers in heroin, and were described by the United States attorney as bigtime operators representing the most important arrests made by the Bureau of Narcotics here in 10 years.

Turning down a Government plea for stiff sentences, Judge Wyzanski said:

"While I in no sense look upon this as a trivial offense, it is to me exactly like a bootlegging case, except it happens to be in drugs instead of in liquor, and I have no more moral view with respect to drugs than with respect to liquor.

"I am required to follow an act of Congress, and that act of Congress I intend to follow; but I don't think you need suppose I have a particular animus with respect to the topic."

He then sent 3 of the defendants to the penitentiary for the minimum prison term of 2 years provided by the act of Congress to which he referred. The fourth, the ringleader, he sent away for 3 years.

All of the defendants were guilty of crimes for which they could have been sentenced to long terms in prison.

The Government had asked a sentence of 10 years in 1 case, 5 in another, 3 in the other 2, pointing out that the dope evil diminishes when heavy sentences are imposed.

These beneficiaries of Judge Wyzanski's attitude were no neophytes in crime. One was on bail on appeal from a sentence imposed in the State court for conspiracy in a drug case. He had a long record of arrests and was an associate of Harvey "Mad Dog" Bistany and bank robber Teddy Green, now an inmate of Alcatraz.

Another was an ex-convict who had served State prison sentences for burglary, safebreaking, and other crimes including carnal abuse of a child.

Another had convictions for larceny, beating up a cop, conspiracy, and other crimes.

The fourth also had a record of arrests on various charges, including a pending case of assault with intent to kill.

Their arrest was described to the court as the most important of 27 made by Federal agents after a 14-month investigation costing thousands of dollars. Less important defendants had earlier received much longer sentences at a session of court presided over by another judge.

Engaged in a traffic which is the source of the deepest possible human degradation, this quartet, it seems to us, got off far too lightly.

A philosophy which places heroin and liquor—dope peddling and bootlegging—in the same category does not reflect the attitude the American people have expressed through acts of Congress and the legislatures of the States.

The manufacture, sale, and use of liquor is legal in all except two States, and Federal taxes collected on it are one source of the Government income from which Judge Wyzanski's salary is paid.

The importation and manufacture of heroin were outlawed by Congress in 1922. As the cause of devastating human misery, it has since been banned by every nation in the world but five.

Congress established a minimum jail sentence of 2 years for a first offense of dealing in heroin. Under title 26, section 5691 of the United States Code, Congress set a maximum sentence of 2 years for 1 offense of bootlegging.

Congress, at least, demonstrated a particular animus on the topic of heroin.

Judge Wyzanski's expressed concept of the respective problems embraces a dangerous

philosophy if it leads drug peddlers to increase their activities in expectation of minimum sentences in the courts in the event they are caught.

It will give no aid to the morale of those who are working hard, long, and often dangerously to wipe out the evil of drug traffic and the horror of drug addiction.

THE ADMINISTRATION'S AGRICULTURAL PROGRAM — MESSAGE FROM THE PRESIDENT (H. DOC. NO. 285)

The PRESIDING OFFICER (Mr. McNAMARA in the chair) laid before the Senate the following message from the President of the United States, which was read, and referred to the Committee on Agriculture and Forestry.

(For President's message, see House proceedings of today.)

THE PRESIDENT'S MESSAGE ON AGRICULTURE

Mr. ELLENDER. Mr. President, so far as I can see, the recommendations in the President's agricultural message as a whole differ from most of the proposals made to the Committee on Agriculture and Forestry only in their order of importance. The message contains nothing new. I am glad to note that the administration has come to a realization of the fact that our farmers as a whole are in bad shape. If the hearings which were held last fall by the Senate Agriculture Committee did nothing more than point up the problems facing our agriculture, they were not held in vain.

The President has placed much emphasis on the soil bank proposal. Evidently he would make participation in the soil bank voluntary.

Unless the incentives in both the acreage and conservation reserves are large enough, I doubt that enough farmers will agree to withdraw from production sufficient acres to appreciably diminish our surpluses, as outlined by the President.

I believe the soil bank would be more effective if price-support benefits were conditioned upon the compliance of farmers with its acreage-reserve features.

The President has also recommended a dollar limit on price supports. This has been proposed many times; and, so far, no adequate formula has been devised. It strikes me that instead of placing a limitation on the gross amount paid to any one farmer or farming unit, payments should be made on a graduated basis, with price-support levels decreasing as production increases.

Discretionary price supports for rice are also included among the President's recommendations. It is my hope that a two-price system for rice can be tried. The rice industry wants a two-price plan; and if it is workable, it would be preferable to a discretionary support program.

I agree with President Eisenhower that production of quality commodities should be encouraged. However, I would favor offering greater incentives in order to achieve this goal. Instead, price supports on readily salable commodities should be "flexed" upward from 90 percent of parity. On the other hand, in order to discourage production of poor-quality products, support levels should be "flexed" downward from 90 percent of parity to, say, a minimum of 50 percent.

Mr. MUNDT. Mr. President, the President's farm message to Congress presents bold, positive, and constructive new changes in our overall farm program. It gives bright hopes for a better future for our American farmers.

The soil-bank proposal should receive unanimous support of the Congress. The two doors leading into the soil-bank program will permit us to move forward to an era of substantially improved net income for our farmers and a restoration of the improved price relationships existing when the laws of supply and demand are not impeded by unmanageable stores of agricultural surpluses.

The two approaches to the soil-bank program provide, first, a comparatively brief program of sharply reduced surpluses of stipulated basic crops by providing financial incentives for our farmers to voluntarily reduce the planting of allotted acres; and, second, the comparatively longer program of improving land use for storing moisture and soil fertility to meet the ultimate needs of our rapidly growing population for any emergency calling for expanded production.

For any farm program to operate effectively, we must attack vigorously and successfully the problem of unmanageable surpluses.

The suggestion for storing fertility right in the soil to be released when needed, and reimbursing cooperating farmers by utilizing existing surpluses to prevent production of new surpluses is based on commonsense and sound public policy. It will also serve to extend the benefits of the Government program to other crops and to livestock producers.

The double-barrel approach to the soil-bank program contains the following constructive features:

First. It will help balance agricultural production with effective market demand and correspondingly higher prices for American farmers. Overall production will be decreased for several years.

Second. Fertility and subsoil moisture would be stored in the ground. The emphasis on conservation protects the great basic resource of this country—namely, our precious topsoil.

Third. The program expands the benefits of a Government farm program to producers of nonbasic crops and of livestock.

Fourth. It will facilitate a sharp reduction in the Government's inventory of certain surplus commodities.

Fifth. It provides—without additional costs to the farmers—rich benefits in the form of crop insurance, since payments received by cooperating farmers will be made to them in seasons of short crops and droughts as well as seasons of bountiful harvest.

The fact that this program is a voluntary one should be kept in mind. Each producer will have an opportunity to decide for himself how he can best fit his farming operations into the program. Undoubtedly, not all farmers will decide to sign up. It is important, therefore, that Congress include enough incentives and that there be wise administration in order to attain a high degree of participation. In the words "wise administration" I would protect the rights of tenants. The landlord-tenant relationships are varied in the many parts of this great country. Handling this can best be achieved by neighbors operating through farmer selected committees who understand the local situations. Likewise, these local groups can best meet the problem of providing equitable payments for the retirement of acreage. Productivity and value of soil varies farm by farm and area by area. We must be sure that the payments to cooperatives are equitable between farms and between areas. I am confident that this program can be administered in a practicable and equitable manner and that it will utilize to the practicable maximum the existing local committee system.

Payments will represent a fair annual return on the value of the acreage under the conservation reserve contract. The value of the land can be appraised on the basis of standards which would include its value and the production of crops customarily grown and these annual payments should be at a level so that sufficient acreage is signed up voluntarily to accomplish the objectives of the program.

The President's special message presents a comprehensive approach to the farm problem. It definitely is not a piecemeal farm program. It proposes to attack the major problems directly, using specific solutions to meet specific problems. Combined with the important information and counsel received by our Senate Agricultural Committee during the extensive hearings held this summer and secured at the grassroots level, the President's message should provide a practical vehicle for evolving a new farm program which will bring a brighter day and more profitable tomorrow for our farmers, our ranchers, and the general public. I am hopeful that an honest bipartisan consideration of the acute and actual needs of our farm population will produce a continuing farm program which will bring to America's farmers that equitable portion of the national income to which they are entitled and which they richly deserve. Prompt affirmative action is required.

Mr. AIKEN. Mr. President, the President's argricultural message marks a determined approach to the problems of American farms.

Plagued by surpluses accumulated under a wartime program carried on too long, it has become necessary to reduce that surplus to manageable reserves through vigorous and, to a certain extent, untried measures.

The reduction of surpluses, however, is only one result of the measures which President Eisenhower proposes.

The immediate effect of bringing supplies more into line with requirements should be to narrow the wide gap now existing between farmer and consumer

prices, to raise prices of many commodities, and to generally improve farm income.

Of even greater long-range importance, however, is the effect on the future productivity of the Nation's agriculture.

Our population is increasing rapidly. Every 5 years the increase is equivalent to the present total population of the State of New York.

The time is not far distant when our farmers will have to produce far more than the bountiful crops of today in order to feed and clothe our own people,

Therefore, it is singularly appropriate that the price-depressing surpluses of today be made to work to the fullest extent to insure a bountiful production for tomorrow.

The President strongly recommends the establishment of a soil bank. The term "soil bank" will not have the same connotation to all people. To some, it may mean reforesting denuded acres; to others, it may apply to the conservation of water; to others, it could mean increasing facilities for recreation or wildlife purposes, and to those in the Great Plains area it can mean shelter belts and the reseeding of millions of acres which never should have been plowed, thus lessening the danger of dust storms and increasing the grazing facilities of the future.

It is entirely possible that the temporary problem posed by our price-depressing surpluses may trigger the greatest conservation program of all time.

Take the proposals of President Eisenhower in his message today, add the Watershed Act and the Water Facilities Act of 1954, add still further the incentives for conservation offered in the Tax Act of 1954 and you have the most extensive program of all time for the improvement and protection of our natural resources.

Of virtually equal importance with the President's proposals to turn our short-term liabilities into long-term assets is his insistence that immediate and effective attention be paid to the plight of over a million farm families now living under conditions which should have been corrected long ago.

It is my understanding that with the very limited means available many of these low-income farm families have been given greater hope for the future during the past few months.

We cannot assume that a farm family is "no good" just because it lives under conditions approaching destitution.

I well remember the days before the county agent and the Extension Service when many of our prosperous farmers of today were living under just about the same standards as those people with whom the President is now so much concerned.

Congress has a duty to give the President better tools with which to help low-income farm families without delay.

The third proposal of extreme importance lies in the President's recommendation to increase our research programs one-third.

Although an increase in farm prices from present levels is highly important, it is also important that we do not price farm commodities out of the market or impose unwarranted hardships upon the consuming public.

Whenever possible, we must reduce the costs of farm production and marketing.

The Tax Act of 1954 granted to farmers substantial tax benefits which they had not previously been privileged to enjoy. In fact, these new tax benefits have the effect of making net farm income look much worse than it really is or would have looked under criteria prevailing previous to 1954.

The President now proposes to relieve the farmer of the Federal tax on gasoline used on the farm. I understand this may amount to $60 million a year. This amount may seem small in the overall program, but it is, nevertheless, a welcome contribution. Repeal of this tax will remove an injustice which the farmer has borne for years.

The greatest influence toward lower costs and higher net income for farmers is undoubtedly found in the research programs for which the President asks a great expansion.

The technical advancements of just the last few years have been little short of miraculous.

Paradoxically, it has been inability of many farmers to keep up with technical developments designed for their benefit that has put them in a rather critical squeeze.

It is my understanding that considerable research is planned in the field of distribution aimed at reducing the spread between farm and consumer prices. It is important that this be done.

We must remember, however, that historically the spread widens with an increase in surplus and narrows as supplies are brought closer in line with the overall demand.

In addition to the soil bank conservation program, the rural development program, and the research program, the President has made other recommendations with which many can agree.

The increased school milk program, the farm credit recommendations and the proposal to step up the search for foreign markets should all make valuable contributions to a more virile and prosperous agriculture.

The President's statement that the degree of success is highly dependent upon the wholehearted participation by farmers themselves is as true as any statement can be.

There is one more comment I wish to make at this time.

The President's recommendations, if agreed to by the Congress, cannot help but return to the farmer a more equitable share of the Nation's unprecedented prosperity.

They are certain to make a mighty contribution to the long range conservation programs of our country.

It is important, however, since some of these recommendations apply to the present crop year, that legislation be enacted without delay.

Therefore, I join with the chairman of the Senate Agriculture and Forestry Committee in hoping that we may have a satisfactory bill on the President's desk by February 15, or at least an early date.

If we can do this, we will have done a good job.

Mr. HICKENLOOPER. Mr. President, following the outstanding message on the agricultural situation, submitted to us today by the President of the United States, I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, the statement which I send to the desk.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HICKENLOOPER

The message of President Eisenhower on the agricultural situation and the remedies is comprehensive, constructive and hopeful. It shows a complete grasp of the fundamentals and a bold program and determination to solve the problems involved with speed and dispatch.

His program, in short, proposes a workable plan for reduction of surpluses, for the vigorous promotion of conservation, for the protection of the family-type farm, the stabilization of the farm economy with an equitable portion of the national income going to the farmer, and above all it emphasizes the maintenance of the freedom and self-determination of the farmer.

The program will require the expenditure of a substantial amount of money by the Government at the outset, but with the voluntary and vigorous cooperation of the farmers themselves, it will greatly increase their purchasing power and income and contribute immeasurably to the farmers' prosperity and that of the Nation.

The many details of the program will be immediately taken under consideration by the Agriculture Committees, and I believe that the President's program, in general, will receive overwhelming support.

The President's program will, if put into effect, provide immediate income for farmers while the long-range parts of it are swinging into operation, and I am certain that farmers will study the proposals with great interest and I believe with general approval.

VISIT TO THE SENATE BY TOMMY WOODWARD

Mr. CASE of South Dakota obtained the floor.

Mr. BEALL. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. BEALL. Mr. President, we have a very distinguished constituent of mine from Maryland in the gallery. His name is Tommy Woodward.

Tommy Woodward, will you stand up?

[The visitor rose and was greeted with applause.]

Mr. BEALL. Mr. President, Tommy presently is a patient in one of Maryland's orthopedic hospitals. He is 5 years old. He is recovering from infantile paralysis. I know from my own experience what a fine job he is about to do. I am a director for the Maryland Society for Crippled Children and Adults, and I was on the polio board of my own county. This month Tommy will travel all over the United States, visiting every State in the Union and demonstrating the excellent results now being obtained in rehabilitating victims of polio. We recognize that Tommy, who is only 5 years old, has quite a job

ahead of him, and I know we all wish him well. [Applause.]

Mr. CASE of South Dakota. Mr. President, it was certainly a pleasure to yield to the Senator from Maryland for such a greeting as that. We are pleased to have this fine boy here.

Mr. JOHNSON of Texas. Mr. President, will the Senator from South Dakota yield briefly to me?

Mr. CASE of South Dakota. I yield.

LEGISLATIVE PROGRAM—ORDER FOR ADJOURNMENT TO THURSDAY NEXT

Mr. JOHNSON of Texas. Mr. President, for the information of the Senate, I should like to announce that it is not the plan of the leadership to call up any proposed legislation today. Because of the weather, it is hoped that we may adjourn at an early hour, so that the Members of the Senate and the members of the staff and other employees may be able to return to their homes.

Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until Thursday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I desire to announce that on Thursday next, I expect to ask consent that the Senate proceed to consider Calendar No. 1210, House bill 2889, transferring four-fifths of an acre of Federal land to Necedah, Wis.; Calendar No. 1296, House bill 6857, transferring four-tenths of an acre of Federal land to the city of Milwaukee, Wis.; Calendar No. 1175, Senate bill 2286, authorizing the shipment of private passenger vehicles in commercial vessels for military and civilian defense personnel traveling overseas on permanent orders; Calendar No. 361, Senate bill 51, amending Public Law 280, 83d Congress, to provide that State jurisdiction over certain matters arising on Indian reservations shall apply only with the consent of the Indian tribes affected; Calendar No. 1184, Senate Joint Resolution 97, increasing the authorized ceilings for United States contributions to the Food and Agriculture Organization and International Labor Organization of the United Nations; and, in addition, Senate Concurrent Resolution 59, to request the President to designate a Junior Achievement Week; and House Concurrent Resolution 199, to commemorate the 200th anniversary of the birth of Benjamin Franklin—both of which were reported today from the Judiciary Committee.

I do not know that we shall proceed to consider those measures in the order listed, but I hope we shall be able to consider them and to act on all of them on Thursday. If we are able to do so, we may be able to have the Senate adjourn over to Monday. If not, we shall probably have a Friday session.

It is not the intention of the leadership to call up the gas bill this week; but early next week, probably on Monday, I do plan to move that the Senate proceed to the consideration of the gas bill.

ADMINISTRATION'S AGRICULTURAL PROGRAM

Mr. CASE of South Dakota. Mr. President, President Eisenhower's special message on agriculture presents one of the boldest and most realistic farm programs ever to come to Congress from the White House. Some phases will require study, and details will have to be spelled out; but on many points the specific steps recommended will mean direct and visible benefits to the farm homes of America. Let me enumerate some of them.

First, I mention the President's point No. 9; namely, the recommendation to relieve the farmer of the Federal tax on purchases of gasoline used on the farm, for farm purposes. The 2-cents-a-gallon Federal tax on farm gasoline is a direct and visible burden in the current cost-price squeeze, and is an unjust burden if the proceeds are to be spent primarily on interstate highways. This is an injustice which I have cited many times during the hearings of the Committee on Public Works, in connection with its consideration of highway legislation.

Mr. President, a practical and simple way to handle the matter is provided in Senate bill 1360, which I introduced in the Senate on March 8, 1955. In keeping with the President's specific and positive recommendation on this point, I now urge that the Senate Committee on Finance incorporate the provisions of my bill, S. 1360, in the first piece of revenue legislation it considers at this session.

I ask unanimous consent that the text of Senate bill 1360 be printed at this point in the RECORD.

There being no objection, the bill (S. 1360) to amend the Internal Revenue Code of 1954 so as to provide for refunds to farmers of the amounts of tax paid on gasoline used by them in farming operations was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That (a) subchapter B of chapter 65 of the Internal Revenue Code of 1954 (relating to special rules applicable to abatements, credits, and refunds) is hereby amended by renumbering section 6420 as section 6421 and by inserting after section 6419 a new section as follows:

"SEC. 6420. Gasoline.

"(a) Use in farming: Upon the use, after the date of the enactment of this section, of gasoline in farm tractors or farm machinery or for other agricultural purposes by any person engaged in farming, the Secretary or his delegate shall pay to such person the amount of any tax paid under section 4081 with respect to such gasoline.

"(b) Cooperation with the States: Payments under subsection (a) shall be made pursuant to such rules and regulations as the Secretary or his delegate may prescribe. The Secretary or his delegate is authorized to enter into an agreement with any State which has a law authorizing payments or refunds, under conditions similar to those specified by subsection (a), of the amount of tax on gasoline imposed by such State whereby the Secretary or his delegate and the State may cooperate and exchange information with respect to payments under subsection (a) and payments or refunds under the State law."

(b) The table of sections for subchapter B of chapter 65 of the Internal Revenue Code of 1954 is hereby amended by striking out "SEC. 6420. Cross references.", and inserting in lieu thereof the following:

"SEC. 6420. Gasoline.

"SEC. 6421. Cross references."

SEC. 2. (a) Subpart A of part III of subchapter A of chapter 32 of the Internal Revenue Code of 1954 (relating to the manufacturers' excise tax on gasoline) is hereby amended by adding at the end thereof a new section as follows:

"SEC. 4084. Cross reference.

"For payment to farmers of the amount of tax imposed under section 4081 on gasoline used in farming, see section 6420."

(b) The table of sections for such subpart is hereby amended by adding at the end thereof the following:

"SEC. 4084. Cross reference."

Mr. CASE of South Dakota. Mr. President, next, among the direct benefits for farm income, I would cite the President's proposal to modify the 1949 law which required that sealed grain be sold at not less than 105 percent of the support price, plus carrying charges. Last fall nothing made the livestock feeders of my State angrier than the operation of that 1949 law. There are many cattle feeders in a part of the State which had a short corn crop last year. It made them very unhappy to know that they were unable to buy corn which was sealed in a nearby bin, unless it was shipped to Minneapolis, and then sold with freight charges both going there and returning. That was featherbedding if there ever was such a thing. The President properly recommends that the corn be salable at the bin site for the support price, and simple carrying charges. The old law required a price of 105 percent, plus carrying charges.

Next, I commend the President's proposal for a real tree-planting program for the conservation reserve. In my comments on any soil-bank or idle-acres plan, I have been pointing out that there must be a positive and practical use for the land if it is not to be diverted into production that is competitive with other farm products. Trees are not a surplus crop. As a nation, we can well afford to encourage the production of trees in all parts of the country. Acres planted to trees under a long-term rental contract will not be plowed up or grazed next year or the next.

I have been working on a bill along this line, and I expect to introduce it shortly. It will implement this part of the President's recommendations.

Next, I should like to commend the President's specific recommendation for the elimination of acres planted to durum wheat from the general quota or allotment for wheat. Durum wheat is in a special class. There is no overproduction of it; in fact, there is a shortage of it.

Mr. President, on January 5, 1956, I introduced Senate bill 2764, to amend the wheat-marketing-quota provisions of the Agricultural Adjustment Act of 1938, as amended. The text of the bill is the same as the text of the bill which was passed last year by Congress.

I have today joined with other Senators in a group introduction of a similar bill. I respectfully commend the bill to the attention of the Committee on Agriculture and Forestry. I now ask that

the text of Senate bill 2764 be printed at this point in the RECORD.

There being no objection, the bill (S. 2764) to amend the wheat-marketing-quota provisions of the Agricultural Adjustment Act of 1938, as amended, was ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That subsection (e) of section 334 of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1334 (e)), is amended, beginning with the 1956 crop of wheat, to read as follows:

"(e) Notwithstanding any other provision of this act, the Secretary shall increase the farm marketing quotas and acreage allotments for the 1956 crop of wheat for farms located in counties in the States of Minnesota, Montana, North Dakota, and South Dakota designated by the Secretary as counties capable of producing class II durum wheat and which have produced such wheat for commercial food products during 1 or more of the 10 years 1946 through 1955: *Provided*, That the increase in the wheat acreage allotment for any farm shall not exceed the difference between the acreage of cropland on the farm suitable for the production of wheat and the wheat acreage allotment, if any, determined without regard to this subsection, and the increase in allotment shall be conditioned upon the production thereon of class II durum wheat. The increase in wheat acreage allotments authorized by this subsection shall be in addition to the national, State, and county wheat acreage allotments, and the acreage of class II durum wheat thereon shall not be considered in establishing future State, county, and farm acreage allotments."

Mr. CASE of South Dakota. All four of the things which I have mentioned up to this point offer direct, tangible benefits to the income of the family farm. There are others, but I shall not go into them at this time. I do wish, however, to mention a few of the outstanding recommendations which look to longer-range or indirect benefits.

Of these indirect, but none the less real benefits, I mention first the more aggressive marketing of surplus agricultural products. The sale of surplus commodities for foreign currencies, which I proposed first in connection with the Korean situation at the time General Van Fleet reported to Congress in 1953, has grown into big business. Even so, more can be done in this field by persistent and consistent efforts.

I am glad to note that the President says the Secretary of Agriculture is appointing an Agricultural Surplus Disposal Administrator. His duties are to relate all activities of the Department with utilization of Commodity Credit Corporation stocks and our current abundant production. Note the following from the President's message:

Expanded opportunities will be sought to barter agricultural products, which deteriorate and are costly to store, for increased quantities of nonperishable strategic materials.

Mr. President, there has been a revolution in the White House. Think of the President's using the word "barter" approvingly in a message to Congress. I can recall when the State Department would have sent a stuffy and unyielding protest in response to any congressional proposal of barter for any form or object of international trade. At any rate, it makes commonsense, when one of our prospective customers does not have cash, but does have something we need and is willing to exchange it for something we have on hand which is expensive to keep.

Second, among the longer range proposals, I wish to commend what President Eisenhower has said on the subject of research. No dollar the Government expends pays more permanent benefits than the dollars spent on intelligent research. In a five-point program which I offered for agriculture while speaking in South Dakota last fall, I included an expanded research program on a cooperative basis with the land grant colleges of each State. In that way, it seemed to me, we would have the self-interest of each State at work to develop new uses and new markets for the particular agricultural specialties of that State.

Third, I mention the President's proposals for dollar limitations on price supports. For several years we have placed a dollar limitation on the amount which could be paid to any farmer in a given season for soil conservation practices. What justification is there for expending huge sums of money for large corporation farm production of commodities which add to surpluses?

Some people have suggested complicated percentage plans. Aside from the complexities of such proposals, it has seemed to me that we are on surer constitutional grounds if the limitation is expressed in a flat dollar limitation rather than in the form of graduated percentages.

Finally, in this initial comment by me on the President's special farm message, I wish to commend his interest in the Great Plains. This area comprises 135 million acres—30 percent of the land area of the country and 40 percent of the cropland.

There are 10 States in the so-called Great Plains region. These States produce 60 percent of the wheat and 35 percent of the cattle grown in the country. The President says that shortly he will transmit to Congress a report with recommendations for providing a more stable agriculture in this important region.

That message on the Great Plains will be awaited with special interest by those of us who come from States in the area where soil and water conservation and good land management practices are of both national and individual concern.

Mr. President, governments through all the pages of history have faced problems connected with the production and distribution of food. Whether it be the Bible, with its report of 7 years of plenty and 7 years of famine, or the history of England, with its corn laws, the problem is not new in government.

Only the other day, the American-News published at Aberdeen, S. Dak., in its Thirty Years Ago column published the following item:

United States Senator Peter Norbeck expressed the belief that Congress would take steps during the current session to provide Government aid to farmers in disposing of their surplus.

That was January 5, 1926, 30 years ago.

Mr. President, the first Congress of which I was a Member, had a special session for the House of Representatives in the fall of 1937 to work out the legislation which became known as the Agricultural Adjustment Act of 1938, which has had several revisions and amendments in the intervening years.

So, this Congress is not dealing with something new in the way of problems; but it does have something new in the strong, positive tone of this message from the President. I hope that the Congress may meet the challenge and agree upon practical forms and language to carry out the objectives and aims for which the President has given an urgent green light.

SOVIET POTENTIAL ABILITY TO PROVIDE FOREIGN AID

Mr. KNOWLAND. Mr. President, I ask unanimous consent to have printed in the body of the RECORD at this point as a part of my remarks an article entitled "Can Moscow Deliver?" published in the June 11 edition of the National Review.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CAN MOSCOW DELIVER?

In the current phase of the cold war cycle, the main Soviet diplomatic gambit is to provoke the United States into extraordinary measures by offers of Russian trade and military and economic assistance. This "ploy" seems to be working well in the Near East, where we are offering our help on the Aswan and Jordan projects in return for an easing of Israeli-Arab tension and such other concessions as we can negotiate.

The awkward aspect of these projects is that it is unlikely that they can be carried out on an expedited basis without inflation. Certainly the Aswan project, on the 10-year completion basis of Egyptians want, cannot fail to produce inflation. This would suit the Kremlin very well—it has never forgotten Preobrazhenski's characterization of inflation as "the machine gun that attacked the bourgeois regime in the rear." The role of inflation in the capture of China is still fresh in their minds, not to mention North Vietnam. India lies ahead—the apple of the Soviet eye.

The new Indian 5-year plan aims at an annual rate of capital formation of about $2.7 billion of which some $300 million would be in foreign aid. A rate of domestic capital formation of $2.4 billion a year, especially when concentrated in the heavy industry sector rather than in agriculture and light industry, may be more than twice the level of which India is capable.

The Indian 5-year plan is based on the Soviet model and was announced just before the arrival of Bulganin and Khrushchev, presumably on the assumption that this sincere flattery would be pleasing to the eminent visitors. No doubt it was. India is a poor country with a national product of no more than $20 billion, hardly greater than that of Italy. It plans an investment program that will endanger its present relative stability. The Russians will applaud.

They have also offered to help. Sometime since, they promised to build a steel mill and in recent discussions in New Delhi they made additional promises. The spectacle of high Soviet officials carrying on economic discussions in underdeveloped countries has now become a commonplace. In Rangoon, Cairo, New Delhi, and Kabul the Soviets are making promises. Promises and

the arms trade are the principal Russian currency in this phase of the cold war.

In the United States these Russian offers have created an extraordinary flurry of activity in the press. One popular argument is that if we don't get into a "bold new program" right away the Russians will get there before us. The Kremlin, it is argued, will not pass up the chance to help an underdeveloped nation rise in the economic world. The United States must act, therefore, and act quickly. We must frame an aid program of double the current level or the Kremlin will seize the opportunity and move in ahead of us. One hundred billion—$5 billion a year for 20 years—in foreign economic aid has been suggested by Mr. Jacob Javits.

MR. DULLES LENDS HIS CACHET

The "bold new program" rests largely on the assumption that the U. S. S. R. is, in fact, now capable of providing foreign aid and trade in a massive amount, and, by reason of its rapidly expanding output, will be able to sustain increasing levels throughout the Soviet bloc and the neutral area.

The proponents of massive increases in the United States foreign aid program assume that the gross national product of the U. S. S. R. is now running at an annual rate of $135 billion. This estimate has the merit of being officially approved by all United States Government agencies. It is also fully supported by Soviet statistics which, indeed, often make even more extraordinary claims.

Secretary Dulles, in his American Legion speech of October 10, 1955, put his cachet on the estimate by saying the United States product, now at nearly $400 billion, is "three times that of the Soviet Union with its much larger population." Mr. Dulles is not a statistician, and we cannot, accordingly, regard this as his considered judgment. The estimate in the speech was made by statisticians. On reflection, Mr. Dulles might consider a revision of his estimate. Some of the materials upon which such a revision might proceed will be recited here.

At the outset, the implications of this estimate need examination. If Russian GNP is currently $135 billion, it has grown at a rate of about 8 percent annually over the last 25 years. This means that the Russians have been able to increase their national output from a level of about $20 billion (a generous estimate) in 1930 to nearly seven times that level in 1955. The increase has continued each year—through the collectivization period, through the war conversion period of 1937–40, throughout the war and into the postwar decade.

In 1985, if the rate officially assumed to prevail through war and terror over the last 25 years continues, the U. S. S. R. will be producing at an annual rate of $1,000 billion, or more than 2½ times the present United States level. Each year Russia will enjoy a rate of increase in national product equal or nearly equal to the unprecedented rate of growth in United States product over the past year.

One of the principal difficulties in accepting the GNP estimate of $135 billion for the U. S. S. R. is that there have been long periods during the last 25 years when even the Russians admit that there was little growth in economic output. It was not until 1948 that the prewar (1940) levels of production were reached, a period of 8 years during which no economic growth occurred and in which tremendous losses were sustained.

In the 3-year period 1937–40, a close inquiry suggests that there was no net increase in industrial output in the U. S. S. R. The ruble value of industrial output rose almost 50 percent during the period, but this rise was due almost wholly to inflation, primarily in the machinery industry. It was a period of wholesale conversion to war production when wage increases were used to direct labor into war industries. The ruble value of machinery output rose by some 30 billion rubles while wage outlays in that sector rose by 32 billion rubles. The increases in wage outlay were then skimmed off by the turnover tax, the annual yield of which rose 30 billion rubles, enough to cancel out the wage increase made in the machinery sector.

On this view, it would appear that for the entire period 1937–48 there was little or no growth in total Soviet output. If this is true, and Soviet statistics suggest that it is, then an increase from a GNP of $20 billion to $135 billion would have had to take place over a period of only 14 years. At this point even the credulity of United States Governmen statisticians might well be strained.

Nevertheless, official acceptance of the $135 billion estimate continues, perhaps indicating a stubborn belief among United States Government statisticians that Russian methods of economic management are conspicuously more effective than those prevailing in the West, and unlike our own, are able to secure an invariant annual increase in product regardless of war, terror, massive conversion, and famine.

However, we must regard as unsettled the question whether the current United States official estimate of Soviet national product rests simply on a credulous belief in the validity of Russian statistics or an awesome regard for the efficiency of Russian economic policy. We also have to dismiss the notion that the estimate is designed to frighten Congress and the American people, if only for the reason that it has been the fashion for many years to credit the Soviet Union with fantastic increases in national product.

There has been little change in the nature of official estimates of Soviet economic achievements for two decades. Despite the enormous growth in the Government statistical establishment and the proliferation of intelligence agencies devoted to gathering Russian economic information,[1] the estimates of Russian economic power remain in conventional channels. Russian data are regarded with awe, and United States official estimates faithfully reflect the extraordinary claims that are implicit in Soviet economic statistics.

If United States official estimates of Russian GNP are credible only to Government statisticians and the Russian experts of the United States intelligence agencies, what shall the rest of us believe? To what authority can we turn for a finding on the critical question of how strong Russia is? If none of us has any real knowledge about the Russian economic machine other than bits and pieces, how are we to obtain an estimate that will be believable to reasonable people? And how are we to make an estimate of the efficiency of investment in the Russian bloc?

NO GAIN IN AGRICULTURE

Let us turn first to Soviet agriculture. We know more about that because changes in output occur more slowly. It is an activity that engages about 55 percent of the working population. It is a field in which enormous investment in plant and equipment has been made. The agricultural machine tractor stations and the maintenance and repair stations employ nearly 2 million people. Many agricultural operations, according to Soviet propaganda, have been almost wholly mechanized.

And yet, it would appear that in 1954 Soviet agriculture produced little if any more than it did in 1925, despite a rural population that is 10 million or more larger. Thus Soviet agriculture would appear to be a case of Graham Hutton's first law of thermouneconomics, or Alice's law, in which the more capital is invested, the less is produced. British Coal Board operations are the distinguished example of this law in the West (coal output in this socialized industry is an inverse function of capital investment).

While reliable statistics for Soviet agriculture are not available, it is probable that for 1954 the value of the entire vegetable product of the U. S. S. R. was well below $5 billion, and total agricultural output was not significantly greater than $6 billion. This would place the output of Soviet agriculture at roughly 60 percent of the United States level. In practical terms, 2 million efficient United States farm families are producing considerably more than a Soviet agricultural population 15 times greater.

In agriculture, at least, Soviet policies cannot be said to have been notably successful. After 25 years or more of revolutionary change in farm organization, the investment of billions in machinery and equipment, the allocation of hundreds of thousands of trained scientists, technicians, and engineers for the purpose of establishing scientific methods of cultivation, and a 10 percent growth in the agricultural population, Russian agriculture is still not producing as effectively as it did in the period before collectivization.

The new and vaunted Khruschev corn program that envisages the opening of some 75 million acres of new land would appear to be a special case of Alice's law. Farmers and farm equipment and hundreds of thousands of urban "volunteers," bureaucrats, and labor troops are being moved to the semiarid lands of Central Asia where corn is going to be raised with as little as 9 inches of annual rainfall. This program will be a statistical success, but there is some doubt among agricultural experts whether much corn will be grown in the new areas. It would also seem that the transfer of farmers and farm equipment from other regions might result in losses in agricultural output in those areas.

If Russian output of food and fiber is little if any greater than in 1925, the Russian people can hardly be eating or dressing as well as they did in 1925. This inference is clinched by population increases, meanwhile, of about 40 percent, or more than 60 million. The continuing, though modest, Soviet imports of rice, wheat, and cotton would also suggest that consumption levels have fallen dangerously and may not even have returned to the low, immediate prewar standards.

Among the agricultural population it is generally agreed that circumstances are worse than in 1925—consumption is well below $100 per capita. The peasant diet, on a per capita basis at current prices, probably does not exceed a value of $60 a year, and reaches that average only because consumption by party members and officials is relatively high.

[1] The growth and proliferation of United States intelligence agencies may be an exception to Parkinson's law (first enunciated in the Economist of November 19, 1955) which predicates an annual rate of growth in the Civil Service establishment of 5.17 to 6.56 percent. This newly formulated scientific law contains two factors: Factor I, the Law on the Multiplication of Subordinates, and Factor II, the Law on the Multiplication of Work. It is a law that derives from the commonplace observation that work expands so as to fill the time available for its completion. This scientific discovery, as the distinguished authority on the law observes, is "inapplicable except in theory to the politics of the day. It is not the business of the botanist to eradicate the weeds. Enough for him if he can tell us just how fast they grow." However, in the interest of scientific advance, we have thought it appropriate to note that the intelligence agencies of the United States Government may very well be an exception to Parkinson's law in that the average annual growth rate over a decade may be much greater than the scientifically determined maximum of 6.56 percent.

Among the 10 to 15 million slave laborers consumption is surely as low as it is among the peasant population. It is accordingly reasonable to assume an average per capita consumption for 140 to 145 million Russians at or below $100 a year and a total consumption for this part of the population of about $14.5 billion.

Consumption among the urban population is, of course, higher. It may rise to as much as 3 or 3½ times the average level prevailing among the peasantry, in considerable part because of the greater cost of transport and distribution of food to urban areas. For the 65 or 70 million Soviet citizens properly counted as urban, total consumption may, therefore, rise to a total of $20 to $25 billion.

On these estimates, total personal consumption in the U. S. S. R. may be as much as $35 to $40 billion or somewhat lower than consumption outlay in the United States at the depth of the depression. Such a comparison, however, is distorting because in the United States in 1933 only slightly more than a quarter of total personal consumption expenditure went for food while in the U. S. S. R. a disproportionately high share of personal expenditure—perhaps 60 per cent—is for food while a very small part of expenditure is for rent, household operations, and other factors.

WRETCHED HOUSING

On the whole, personal consumption in the U. S. S. R. can be more or less directly inferred from the state of agriculture and the condition of housing, transport, and distribution—crowding and queueing are, of course, universal in the U. S. S. R. The composition of the diet is clearly implied as well as the consumption of fiber in the form of clothing and soft goods. These inferences are confirmed by daily observation of consumption standards in the Soviet Union.

The average family of four or five, with at least two wage earners, living in one room, sharing household facilities with several other families and condemned to a monotonous diet primarily composed of bread and potatoes, is not an exception but the rule. These are the data that are known; they should form the basis of any estimate of the national product of the U. S. S. R.

It may be, after detailed consideration of Soviet consumption patterns, that the value of food in the personal consumption component of national product would approach the suggested upper limit of $25 billion. However, given the necessary composition of the diet, the fact that processing and distribution are at a very crude level and the rule that two wage earners are needed in every family if minimum consumption standards are to be met, it is unlikely that consumption approaches the limit suggested.

United States consumer outlay for food in 1941 was $18 billion, and it is doubtful whether the Soviet people will approach that standard in this generation. The suggested estimate shows a range, on a per capita basis for the entire Soviet population, of $90 to $115, which would appear to be a very liberal accounting.

This picture of Soviet consumption is in sharp contrast to the picture that is suggested by the United States official estimates of Soviet product. According to official estimates, personal consumption in the U. S. S. R. approaches $70 billion, an amount that is higher than total personal consumption in the United States in 1937. Through these rose-colored estimates of Soviet wealth, the well-being of the average Soviet citizen cannot be doubted—he is 75 percent as well fed, well housed, and well clothed and served as the average United States citizen in 1937.

None of the harsh realities that are continually being observed and reported from the U. S. S. R. emerges from the rosy statistical picture that a personal consumption estimate of $70 billion indicates. Instead, the United States Government statistics suggest a Soviet nation whose population spends $5 billion on automobiles, $3.5 billion on recreation, $8 billion on housing, $9 billion on household operations, and $9 billion on clothing. Without rose-colored glasses, one has to strain to see this picture.

The estimate for personal consumption that is suggested as more appropriate to the conditions known to prevail is a range of $35 to $40 billion. And this may be much too high. Personal consumption may more nearly approach $30 billion. Such a figure at least has the merit of conforming to what is known of the plight of the Soviet citizen.

AN EMBARRASSING REMAINDER

In the United States official estimates, personal consumption is presumably a residual that is arrived at after deducting estimated Government expenditure and investment from the estimate of national product that is arrived at by compounding 1930 Soviet product at an annual rate of 8 percent over a period of 25 years. Or at least this is the easiest way of arriving at the established official figure for Soviet GNP.

In practice, it may be that statistical grubbing in Soviet publications accounts for the current United States official estimates. But however it is arrived at, an embarrassing remainder in the form of a consumption residual is left behind. It is the picture of a rich and contented Russian population, luxuriating in levels approaching American private expenditure that prevailed in 1937.

In part, this official conclusion as to consumption cannot be avoided because it is necessary to assume that personal consumption must represent more than 50 percent of gross national product. It does, however, create something of a dilemma for the statisticians. Out of the remainder of national product available for other purposes, it is necessary to find the funds that are needed to sustain the rate of growth that has become so much an article of the United States Government statisticians' faith.

At least 10 percent of national product is needed simply to keep the present plant operating. And it may well be more because of the dismal state of repair into which Soviet plant and equipment have been allowed to fall. In the past, as Welles Hangen reported in a dispatch to the New York Times of October 18, 1955, deterioration and obsolescence have been disregarded by Soviet statisticians, who are accustomed to calculate output on the basis of the most modern installations. These liabilities cannot now be deferred, and an increasing amount of national product will be required just to keep things going.

In addition, United States official statisticians have to allocate at least 25 percent of their estimate of Soviet product to capital formation if the assumed rate of 8 percent growth is to be maintained as official dogma. The dilemma that arises is, with personal consumption at 55 percent of GNP, repair and maintenance requirements at from 10 to 15 percent, and investment at a minimum of 25 percent, how to find a remainder that is large enough adequately to represent government outlay, especially military expenditure.

The dilemma, however, must have been resolved because we have Mr. Dulles' statement to show that the romantic view of Soviet statistics has triumphed. Russian economic product will continue to rise officially, as it always has in the past, at a uniform rate, and the future well-being of the Soviet population is statistically assured. In 1985 GNP will be $1,000 billion and personal consumption will amount to $550 billion, or higher than current United States levels.

One of the difficulties with this aspect of the official estimates is that the present leadership in the U. S. S. R. is concentrating on expansion of heavy industry and, with the exception of a few months during the Malenkov-Beria regime, has tried to do so for 25 years, during which consumption levels for the urban population have increased slightly, if at all, and standards of consumption among the Russian peasantry have fallen.

This brief review of the personal-consumption factor in estimates of Soviet national product, when taken in conjunction with what is known about the standards of consumption that prevail in the Soviet Union, should suggest that $40 billion is a generous estimate for personal consumption and that, in all probability, gross national product is not higher than $75 billion and may be nearer $60 billion.

If this is a reasonable estimate of Russian GNP, then it would appear that Soviet economic product, at a maximum, is more nearly 18 to 20 percent of United States product than the 33 percent quoted by Mr. Dulles. In fact, Russian product may be no more than 14 or 15 percent of the United States level, or roughly the United States level at the end of World War I.

CAN GROWTH BE MAINTAINED?

On this accounting, Soviet economic growth has proceeded at an average rate of more than 4 percent over the last 25 years which, to give the devil his due, is a not inconsiderable achievement. This means that the Kremlin has directed at least 15 percent of GNP into investment, and, after consideration of war losses and the accelerated rate of capital consumption during the war, it may be that in many years more than 20 percent has been directed into investment. To accomplish this and at the same time to maintain a military establishment that now requires an annual outlay of at least $10 to $15 billion suggests that an extraordinary effort has been made.

Whether this rate of growth can be maintained is another question. As we have seen, the grave agricultural crisis has required the diversion of tremendous resources into agriculture. And it is not enough merely to invest in agriculture in the U. S. S. R.: as we have noted, this is a sector in which the first law of thermo-uneconomics applies—the more capital the less product. It has become necessary not only to invest capital resources in agriculture, but the Kremlin will also at this point have to provide some consumer goods for the peasant population. This will mean an additional diversion of resources from use in the expansion of heavy industry. The prospect, accordingly, is that agriculture will draw off an increasing share of national product both in the form of capital and consumption goods if it is to continue to feed the rapidly increasing Soviet population.

In the cities a similar difficulty is developing, particularly in housing. Occupancy levels have reached a maximum density of 1 family to 1 room. Undermaintenance of housing during the war and postwar years has resulted in grave deterioration. Extensive repairs are essential and current maintenance costs higher. In future, it is likely that construction will pace urban growth because the urban population can only increase as fast as new housing becomes available. Economic growth, therefore, is contingent on a considerable increase in housing construction outlay.

Industry is faced with a similar problem. Undermaintenance, during the war and postwar years, and obsolescence have now reached a point at which action can no longer be deferred. Official Soviet publications report that this problem has now become so severe that, over the life of an average piece of equipment, expenditures for maintenance and repair amount to from 5 to 6 times the original capital cost. The depreciation chickens have come home to roost.

The simple fact is that the Russians are overdrawn on all economic accounts. They

are in deficit in food, housing, manpower, and fuel. It is more than likely that they can no longer bear the levels of military outlay needed to maintain their great military establishment on a modern basis. They have cut military expenditure; they have transferred troops back into agriculture; and they have scrounged around the world for higher trade levels which, after they are agreed on, are not met.

This is the background of the Geneva spirit. They have beggared themselves by mismanagement. They possess military might, but the rapidly increasing cost of new and more complex weapons is gradually becoming an intolerable burden. They are deeply troubled internally. They have reached a temporary limit of growth. Shortages in every economic sector are critical. They must have a respite, particularly from the terrible burden of new, complex, costly armaments.

This depressing picture of the Soviet economy as a whole should not be allowed to cloud recognition of their brilliant scientific achievements. They have produced great scientists and their scientists will presumably continue to make advances along the entire technological front. The exact extent of their achievements in the atomic field, in weapon development, and in the design of production equipment is hard to estimate, but is in any case considerable and probably equal to our own.

Yet these facts should not be taken to mean that the Soviet economy is capable of quantity production of the new equipment. This requires a capacity that the U. S. S. R. is far from attaining. Their resources are limited and, given the continuing wasteful use of resources, it is unlikely that they are capable of major production advances except in limited sectors. They are, after all, a relatively poor nation economically, and far from being able to provide important economic assistance to other nations. They are, rather, in desperate need themselves.

Yet despite the economic picture that lies behind the Geneva smile, official United States Government estimates continue to portray the U. S. S. R. as a rapidly expanding economy of a third the power of the United States. It is an economy, on United States Government assumptions, that is currently producing at a rate of $135 billion a year and expanding at a rate of at least 7 percent. It is this assumption that has created doubt here at home. It is feared that the U. S. S. R. will provide technical and capital assistance in massive amounts to the underdeveloped countries. It is time to escape this statistical incubus. Arms they can provide, but the Russians are quite painfully poor in an economic sense.

The moral to this story would seem to be that physical measurements should not be made through a magnifying glass. The examination of statistics under a microscope, particularly Soviet statistics, can lead to remarkable delusions—such as the United States official delusion that Soviet GNP is $135 billion. Through bureaucratic magnification the Soviet bear may look like a full-grown economic grizzly, but looked at calmly, steadily, and whole it is only a hungry and vicious cub. The Kremlin cannot carry through a foreign-aid program of serious proportions.

Mr. KNOWLAND. The article deals with the material and data which have been supplied from time to time regarding the ability of the Soviet economic potential to deal with the subject of aid to some of the other countries of the world, and the recent indications that the Russians are prepared to enter upon a new policy, as a result of the trips recently taken by Bulganin and Khrushchev through certain nations.

I believe that the article is of such significance that all Members of the Senate would like the opportunity at least to examine it. It is thought provoking, and I think should be the subject of further study by committees of the Senate which will be dealing with this important question.

THE PRESIDENT'S SPECIAL FARM MESSAGE

Mr. HUMPHREY. Mr. President, I understand that the President's message on agriculture has been read in the other House and has not been read in the Senate, because it has been made available to us individually. As a result of radio broadcasts and articles in the press, and of having in our own hands a copy of the President's message, we are familiar with the general outlines and the detailed points of the farm program which has been laid before the Congress by the administration. I wish to make a few comments with reference to it.

First of all, it is refreshing to note that after 3 years the administration favors the family farm, and deplores the growth of what it appropriately terms corporate agriculture. I notice that both at the beginning of the message and at the conclusion there is emphasis upon agriculture, not entirely as a business, but as a way of life. The President concludes his message by saying:

> Historically agricultural policy in this country has sought to foster family-sized owner-operated farms. This has been a sound and wise policy—not only in the development of an efficient agriculture which has become the envy of the world, but also in fostering a sturdy, resourceful, self-reliant citizenry.

This is exactly the view which has been held by many of us consistently, and not merely in the second week of January 1956. The philosophy of the family farm, and its importance to the social and economic structure of our country, has been so important to many of us that we have taken exception to some of the views expressed by spokesmen of the Department of Agriculture relating to our farms particularly the smaller farms.

For example, about two weeks ago considerable comment was made about agriculture being a business, as such, and that efficiency should be the controlling factor. Comments were even made to the effect that too many people lived on farms in this country. The exact quotations relating to those statements are readily ascertainable. They were made by some Assistant Secretaries of Agriculture and other prominent officers of the Department of Agriculture.

Those of us who have been concerned about the agricultural price decline have felt that through the reduction of farm income and the decline of farm prices the whole structure of family farm operations was seriously threatened.

We have pointed out many times that a large number of young men and women who are entering farming as a way of life and as an occupation were being economically liquidated by the decline in agricultural income. We have been saying it consistently over a 3-year period, and even longer.

Nevertheless, the record will indicate that every time some of us have made our position clear on that point or have stated our convictions, the Secretary of Agriculture said that although some minor adjustments had to be made, the worst was behind us, and that the making of broad adjustments was definitely behind us.

The other day I presented a compilation of the number of times the Secretary of Agriculture had reassured the farmers of America that the broad adjustments were behind us and that agriculture would now stabilize itself. Every time such a statement was made prices dropped further, parity ratios went down, and the situation in agriculture became more perilous, instead of stabilized.

However, I wish to join the President today in reasserting our belief in the importance of the individual family farm and the owner-operated agricultural system. That is the philosophy which should control the thinking on all agricultural policy. It should emphasize not only economic values, but also positive social values in agricultural production and in farm living.

I am certainly glad to note an about-face in the President's message on the soil-bank proposal. That is most reassuring to me. I say that because I have in my hand a copy of a letter which was sent to the Committee on Agriculture and Forestry on September 30, 1955. It relates to the soil-bank proposal, and it was written after a bill authorizing the establishment of such a soil bank was introduced on March 10, 1955.

First, I ask unanimous consent to have the press release relating to the introduction of the bill to establish a national soil-acreage reserve, or soil-bank program, printed in the RECORD at this point.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

NATIONAL CONSERVATION ACREAGE RESERVE

Senator HUBERT H. HUMPHREY, Democrat, of Minnesota, today proposed establishment of a national conservation acreage reserve program to make sure that farm soil and water resources not required to fulfill the Nation's domestic and export needs for food and fiber are conserved and handled in a manner that will improve their fertility and keep them in readiness to meet unforeseen emergencies as well as long-range normal future needs for increased farm production.

Senator HUMPHREY introduced a conservation acreage reserve bill in the Senate, providing for payment of conservation reserve awards to participating farmers.

"Just as we wisely maintain adequate safety reserves of food and fiber above the ground to make sure our consumers are protected in case of natural disasters or suddenly expanded consumption needs, we should also wisely take the added precaution of maintaining safety reserves of productive ability below the surface of our soil through sound conservation farming," Senator HUMPHREY explained.

"Most of us, I am sure, agree that such would be the wisest use of acres diverted from normal use during any year by reason of the operation of acreage allotments and marketing quotas. What this bill proposes is a realistic way of seeking to achieve this objective."

Under the bill, the Secretary of Agriculture would be required annually to estimate the acreage required to produce the food and fiber needed to fulfill domestic demand, safety reserves, export needs, and needs for augmented exports to combat famine and promote America's foreign policy throughout the world.

The difference between the estimated acreage needs and the total acreage in production the preceding year, plus the amount of acreage kept out of production by acreage allotments and marketing quotas, would be designated as the national conservation acreage reserve. The reserve would be further broken down into State, county, and individual farm allocations on the basis of relationship ratios between the preceding year's acreage in production and the estimated productive acreage needed.

Individual farmers would be given an opportunity to sign voluntary contracts with the Department of Agriculture to maintain their own farm's conservation reserve in accordance with conservation practices established by the Department, to qualify for the conservation awards. The awards are to be based upon the prevailing local landlord's share of returns from such acreage if it is not kept out of production, not to exceed $2,000 annually for any one farm. Under the terms of the bill, farmers would be required to participate in the conservation reserve program to be eligible for any price supports.

Mr. HUMPHREY. Mr. President, I should like the RECORD to show that the press release is dated March 10, 1955, and that the bill is S. 1396.

I pointed out a moment ago that a letter was written by the Department of Agriculture under date of September 30, 1955. It was signed by Mr. True D. Morse, Acting Secretary, and reads as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D. C., September 30, 1955.

Hon. ALLEN J. ELLENDER,
Chairman, Agriculture and Forestry Committee, United States Senate.

DEAR SENATOR ELLENDER: This is in reply to that part of your letter of March 11, 1955, requesting a report on S. 1396. This Department recommends against the enactment of this bill.

S. 1396 provides for the establishment of a Conservation Acreage Reserve by the Secretary of Agriculture by November 15 of each year for the succeeding crop year. This national reserve would then be allocated to States, counties, and farms on the basis of a formula contained in the bill. Voluntary agreements would then be entered into with farmers which would offer cash payments to them for devoting the Conservation Acreage Reserve allocated each farm to conservation purposes. No production from the reserve acreage could be utilized directly or indirectly for commercial purposes. Provision is also made for payments of up to 50 percent of the cost of the conservation or improvement of the acreage in the reserve.

While this Department feels that this bill would encourage some additional needed conservation, its main purpose appears to be to obtain adjustments in agricultural production. We do not believe that it would be an effective means of obtaining adjustments. Although the bill provides a formula for determining State and county conservation acreage reserves, the percentage adjustment of commercial acreage would be the same for all farms. This would not recognize the differences in the degree of adjustments required for individual farms and areas for either crops under acreage allotments or other nonallotment commercial crops.

The bill requires as a condition for payment that the land in the Conservation Acreage Reserve not be utilized for the production of any commodity (including livestock and livestock products) for market. A program that is primarily dependent on this principle would probably be very difficult to disassociate with the idea of paying farmers for nonproduction.

The complex manner in which payments are to be computed would result in difficult administration and high cost of administration. Because of the methods of determining payments it is difficult to anticipate the funds that would be required. It is probable however, that several hundred million dollars would be needed for the award payments only. This amount is exclusive of funds required for cost-sharing conservation payments and administrative expense. It is doubtful that such high expenditures to reward farmers for no production of agricultural commodities would be acceptable to many groups.

The Department fully recognizes the need for effective use of the acres taken out of production of the basic crops as a result of the allotment programs and has developed a broad program to influence the use of acres diverted from allotment crops. The objectives of this broad program are to move production toward balance with markets, avoid the continued accumulation of excessive supplies of commodities under price-support programs, encourage wider use of soil-conserving practices on diverted acres; and make available to farmers all research and marketing information which would assist them in determining what shifts to make and how to readjust their production to achieve maximum economy of operation.

To effectuate this program the Department has provided additional incentives through the Agricultural Conservation Program to encourage farmers to conserve and protect land diverted from allotment crops; instituted an extensive educational program for the purpose of advising farmers with respect to making the wisest possible use of diverted acres; and utilized the Department's discretionary authority in connection with price support programs to bring about a better use of feed grains and to encourage a sound livestock industry geared to our expanding economy.

A committee composed of representatives of the different agencies in the Department were asked to study the proposed legislation and report the probable effects of the bill. A copy of this report is enclosed.

The Bureau of the Budget advises that there is no objection to the submission of this report.

Sincerely yours,

TRUE D. MORSE,
Acting Secretary.

I call particular attention to the fact that the letter written by the Senator from Louisiana [Mr. ELLENDER], as chairman of the Committee on Agriculture and Forestry, asking the Department of Agriculture for its views on the proposed legislation introduced on March 10, was dated March 11, and that the efficiency of the Department of Agriculture made possible an answer to the letter by September 30, 1955. I have in mind the long distance between the office of the Department of Agriculture and the United States Senate. The reply could have been carried on the back of a snail and received by the Senate by the Fourth of July. However, the letter did finally arrive on September 30, 1955.

The letter refers to the same proposal which the administration now embraces in the acreage conservation reserve soil bank program. The purpose of the soil-conservation acreage reserve, or soil bank program, was to remove excess land from production. It was to be accomplished by paying farmers for nonproduction. It was understood that it would be costly.

Mr. President, I hope that Members of the Senate will note that on September 30, 1955, the conservation acreage reserve soil bank proposal was turned down because it would reward farmers for nonproduction and that it would be very costly. After this turndown of September 30 the Senate Committee on Agriculture and Forestry held a number of hearings throughout the United States, and in every one of those hearings witness after witness testified in behalf of the soil bank proposal. The American Farm Bureau Federation, the National Farmers Union, and the Grange supported the conservation acreage reserve soil program. In fact, I can honestly say that my proposal, advanced on March 10, was in conformity with and followed the suggestions and outlines of proposals which had been mentioned and discussed by the American Farm Bureau, to mention one organization.

I wish the RECORD to be crystal clear that while we are delighted that at long last the administration is willing to embrace this proposal, one full crop year went by the board awaiting the time when the administration would answer its mail and make up its mind. Surely, Mr. President, it did not take the Department of Agriculture from March to the last day of September to answer a communication from the chairman of the Senate committee and to determine what its position would be upon such an important and comprehensive program of production adjustment and soil conservation as is embodied in the conservation acreage reserve proposal.

Mr. President, I am pleased to see that the administration is now willing to change its mind and accept incentives instead of penalties as the best means of obtaining production adjustment. The theory of the administration in the 83d Congress and in the 1st session of the 84th Congress was that the way to get farmers to cut production and to bring production into balance with supply was to penalize them by the withdrawal of soil conservation payments, to penalize them with lower prices, to penalize them with severe acreage allotments, with no income adjustment. It has been found that that does not work. The whole administration farm program for all practical purposes has been repudiated, first, by the House of Representatives, and now by its own spokesmen, and it will soon be completely rewritten by the Senate of the United States.

The theory that we can bring production into balance with supply by paying farmers less has been proved once and for all to be fallacious. The theory that we can have the farmers take severe acreage production controls and pay them less per pound or per bushel and thereby get production into balance with supply is nothing but political stupidity, and it has now been so recognized.

I am delighted that at long last, despite the tragic lowering of farm income, despite the fact that the farmers' mortgage indebtedness has increased since

1952 from $5 billion to almost $10 billion on December 31, 1955, and despite the fact that farm parity has dropped from 94 in January 1953 to approximately 81 in December 1955. Despite all this, Mr. President, I am delighted that at long last the administration recognizes the error of its ways and at least in part is willing to repent for some of its tragic mistakes.

We are hopeful that these suggestions of the President will be incorporated into legislation such as the soil bank and such as the use of incentives to get the farmers to work with the Government.

One of the real weaknesses of the present farm program has been that it is driving farmers away from Government programs and has resulted in nonparticipation. It has resulted in fewer and fewer farmers complying with the production goals and the agricultural policy of the Government of the United States.

So, as I have said in a statement which is in the press gallery, we have waited 3 long years for such an awakening. There has been pending before Congress, without any support from the present administration, legislation which I am proud to be able to stand on the floor of the Senate today and say that I have been supporting and sponsoring myself. For example, the President, in his message, came out for what he calls a limitation on price supports.

Mr. President, I am particularly pleased about that; and at this point in the RECORD I should like to have printed my press release of May 17, 1955, wherein I recommended a limitation on price supports for family-size farms, a cutoff, so that there would not be large crop loans going to large commercial farm operators, but crop loans, which are the basis of a price-support program, would go to the family-size farms, such as a farm with no more gross income than $25,000 a year, and possibly a net income of around $7,000 a year.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

SENATOR HUMPHREY INTRODUCES NEW PRICE-SUPPORT BILL WITH FAMILY-FARM LIMITATIONS

Senator HUBERT H. HUMPHREY, of Minnesota, introduced a new price-support bill in the Senate today, providing for restoring 90 percent of parity but limiting eligibility for such support to basic family-farm production.

Senator HUMPHREY's bill introduces a new 2-price concept into the support program, with a complete cutoff of support benefits for production exceeding $50,000 in gross value from any one farm.

Under terms of his bill, farmers would be granted not less than 90 percent of parity price supports on products from any one farm up to a gross value of $25,000.

For additional farm production with a gross value up to $50,000, farmers would be eligible for price supports of not less than 75 percent. For production above the $50,000 gross value limitation, no support would be provided at all.

Senator HUMPHREY said the new proposal was aimed at removing some of the criticisms and objections to existing and past programs, and channeling the price-support benefits where they are needed most—to the farmer's basic living costs. He declared that $25,000 gross value of production meant around $7,000 net income on typical Midwest farms, and "most of our family farms do not exceed that amount of production.

"Nothing in the bill limits the initiative of individual farmers or larger commercial operators, however, because whatever the size of his operation a farmer would be entitled to 90-percent support on the first basic $25,000 value of his production, 75 percent on the next $25,000 worth of production, and still be free to sell on the open market without support any production beyond $50,000 in value," he explained.

"I believe it achieves a better balance between economic and social objectives of farm legislation by offering some semblance of protection toward fair prices for the basic production required to meet living expenses of a family farmer, yet removing support incentives for the big corporation farm operator to increase production beyond the point for which there is effective demand in the open market," Senator HUMPHREY said.

His price-support bill would extend support to cover such perishables as hogs, eggs, farm chickens, broilers, turkeys, beef cattle, whole milk and butterfat, but authorizes use of production payments as an alternative means of support for such commodities to avoid purchase and storage. Under terms of the bill, any such payments would be limited to $2,500 in any one year for the products of any one farm.

The bill calls for supporting soybeans, cottonseed, flaxseed, dry edible beans, and rye at the same levels as the basic commodities, and fixes the support level for grain sorghums, barley, and oats on the basis of their comparative feeding value to corn.

Mr. HUMPHREY. Mr. President, so that we may have a complete understanding, the bill to which I have reference is S. 1991, introduced on May 17, 1955.

I have noticed in recent weeks that there has been some talk about the importance of a cutoff point for agricultural price supports. We welcome the belated, the tardy, and, I am sure, the reluctant support of the administration for this sensible economic policy and farm program.

Mr. President, just 1 or 2 other comments.

Everything in the farm message is already under consideration in the Senate Committee on Agriculture and Forestry. I wish to assure the President of the United States, his Secretary of Agriculture, and the American people that we shall go much further in approving a comprehensive, workable, farm program and one which is much more effective than the one we have at the present time. This farm message does gloss over the fact that surpluses have increased rather than decreased under the lower support policies of this administration. Every time I hear the spokesmen of the administration talking about the burdensome surpluses, the unmanageable agricultural surpluses, I would remind them that they are talking about their own mess. They are talking about their own mismanagement, their own inefficiency, their own failure, their own concerted effort to weaken the great agricultural policies of this land, because surpluses have literally doubled under the price-depressing farm program of the Eisenhower administration. The representatives of the administration in the executive branch should look at the RECORD and see what we have been saying on the floor of the Senate month after month, which can be verified by the facts.

The representatives of the administration from the President on down have talked about the great surpluses of wheat, of cotton, and of other commodities, and as they talked about them they designed policies which have augmented and increased those surpluses rather than reduced them.

Furthermore, Mr. President, I think the President of the United States should recognize that a surplus of feed grains at cheap prices has a depressing effect upon the livestock market. Mr. President, that is what the junior Senator from Minnesota said and what other Senators said in this Chamber 3 years ago, that if feed grain prices went down, and if feed grain production went up, in accordance with the acreage element under the other programs—under the basic commodity programs—there would be an increase in livestock production, especially in hog production, and a subsequent decline in hog prices and other livestock prices. One does not have to be a wizard to figure those things out. All that is necessary is to have plain, ordinary horse sense. If one does not have horse sense, then he might simply use plain sense.

Unless the question has been studied a little, unless one has looked into or has worked in the agricultural area a little while, unless one has viewed the basic problems of agriculture, one cannot understand the relationship between the price of corn and the price of hogs, or the price of corn and the other feed grains.

I charge that this administration has deliberately put out of balance feed grains, on one price schedule, as compared to corn and wheat on another. In so doing, it has distorted the whole feed grain market, thus resulting in burdensome surpluses, which in turn result in increased production of animals, followed by reduced prices and reduced income.

It is very interesting to note that every time there is to be a major election in the United States, the administration seems to have new ideas about what to do for agriculture. But between elections the administration seems to suffer a kind of mental sterility.

This is a political year of awakening by the Republican leadership to the plight of agriculture. But I am of the opinion that this deathbed repentance will not get them into the political heaven they are hoping to find. The farmers have learned the hard way, Mr. President, that to have a Republican administration in charge of a farm program leads to an economic decline for agriculture.

One could be dead or asleep for 20 years in this country and never have read a headine, and at the end of 20 years, if he had an awakening, he would see the New York stock market at an alltime high, and the Iowa hog market at an alltime low, and would know which party was in power. He would know that the Republican leadership was in the saddle, because, strange as it may seem, the only market which seems to have a favorable response and special at-

tention under Republican leadership is the New York stock market, rather than the central United States grain market, the hog market, the livestock market, or the markets relating to food and fiber.

I shall make only 1 or 2 other observations on the President's farm message; then I shall yield the floor.

I was sorry to see that little or nothing had been recommended in the form of a new constructive policy on surplus disposal under Public Law 480, except to create a new job; namely, to establish an agricultural surplus disposal administrator. We have a Secretary of Agriculture. He has more assistant secretaries than any other Secretary of Agriculture has ever had. We do not need to have a new job created in the Department of Agriculture. All we need is that those who are there get to work and do what they are supposed to do. We need a little better coordination between the State Department and the Department of Agriculture on the disposal of surplus commodities overseas. Bill after bill is in the legislative hopper to utilize those surpluses for our own needs at home.

I want to see a report from the Department of Agriculture as to what the Department intends to do about a food-stamp plan to make available to our needy people in the United States the abundant supplies of perishable commodities, such as dairy and meat products, under a food-stamp plan. A food-stamp plan is administratively practicable. Already throughout the United States there are county welfare boards in every county. The United States Government has surplus supplies which are packaged. There are needy people. There are thousands—yes, millions—of persons receiving old-age assistance, but having far too modest a budget with which to supply them with a good diet.

Proposed legislation for a food-stamp plan has been pending in Congress, but it has been repeatedly objected to by the executive branch of the Government. I am proud to say that the senior Senator from Vermont [Mr. AIKEN] and I are the cosponsors, together with other Senators, of a food stamp plan. The senior Senator from Oklahoma [Mr. KERR] is the sponsor of a bill to provide for food certificates, a similar plan, of which I am a cosponsor.

I should like to have some administration support for these plans. I should like to get their expression of interest, at least, in the managed, planned disposal of perishable food commodities into the bodies of American citizens. The administration ought to be able to perfect such a proposal, and the cost of it would not be substantially more than the present storage cost of the perishable commodities and their purchase.

The junior Senator from New Mexico [Mr. ANDERSON] recently introduced a resolution which, if adopted, would direct the Secretary of Agriculture to provide a complete disposal plan for surplus commodities within the next 5 years, commodity by commodity, and year by year, so that we would know where we were going.

Another weakness in the President's agriculture message is the failure to deal effectively with commodities. I call to the attention of my colleagues commodities such as corn, wheat, cotton, rice, peanuts, sugar, and livestock. I would refresh their memories for a moment on the item of livestock. The President has made no specific recommendations on livestock except to admit now, as he says, that the establishment of the soil bank "will reduce the undue stimulus to livestock production, and consequent low livestock prices, induced by feed-grain production on diverted acres," much of the acreage already diverted from the production of wheat and cotton.

Restrictions against grazing on the soil bank acres will safeguard the interests of farmers.

When I introduced my soil-bank bill more than a year ago, at least a year ago, specific protection was provided so that there would be no overgrazing. One of the reasons why the Department of Agriculture objected to the Humphrey bill was that it was too restrictive. The President has made what was a liability only a few months ago into a glorious asset in January 1956.

We said on the floor of the Senate, time after time, as we were attempting to write into the agricultural bill of 2 years ago, a feed-value equivalent between corn and wheat and food grains, mandatory price supports for feed grains based upon a feed-value ratio with corn and wheat. We said that if that were not done, there would be a surplus production of feed grains. We said, in the legislation 2 years ago, that if some provision were not made to use diverted acres or to keep them out of production completely, there would be a great increase in feed grains, and that the result would be a tremendous stimulant to livestock production, which in turn would result in depressed prices.

Did we get any help from the Department of Agriculture or from the President? We did not. Our amendments were beaten down by the pressure of the administration, by the advice of the Department of Agriculture to Members of this body and of the other House.

I am delighted now that in 1956 the President recognizes that what we were saying then was true; that we were trying then, as he now is trying, to help the situation before it got out of hand. In the meantime, millions of dollars of assets have been liquidated on American farms.

I respectfully suggest that the commodity programs, as listed in the President's message, are little or nothing which are new. There is one, possibly, that might be said to be new, and that is the one with respect to cotton, where the special provision of law designates middling seven-eighth inch cotton as the standard grade for parity calculations and price support. The President recommends that the standard be 1 inch. That is not exactly what I would call an imaginative, bold program; but, at least, it is positive and it is constructive.

I assure the White House and the Secretary of Agriculture that insofar as the recommendations which have been made in this message are of a constructive nature, they will have our help and support. The agricultural problem today is not merely a Democratic or Republican problem; it is a national problem. When a farmer loses his farm, when he loses his income, it makes no difference what his politics are. He is in trouble, and he is not going to get a larger loan from his local banker because when he goes into the bank he can show that he is a card-carrying Democrat or a card-carrying Republican. He is going to be judged by the credit agencies of the country, private and public, on the basis of his collateral and his performance record with respect to solvency. Regretfully, that record of solvency is in trouble, and it is going to be in greater trouble, because the program which is before us represents too little and too late.

It would have been too little even if it had been recommended 3 years ago, but it would not have been too late. Now it is both too little and too late.

We are going to need better credit facilities for agriculture. We are going to need intermediate credit, 4 and 5 year credit, at low rates of interest. We are going to need a better price-support protection system for agriculture. And we are going to need immediate agricultural aid rather than long-term planning.

The President of the United States was conspicuously silent about price-support levels. I had hoped the President of the United States, after he went as far as he did in this message toward the repudiation of his own department, would go the whole way and get back to his promise of 1952, when he seemed to have a wonderful and strange insight into the economics of agriculture and when he spoke in favor of 90 percent of parity for basic crops.

He has come quite a way in this message toward that original position, but he needs a little help; and in the spirit of bipartisanship, I should like to get a bill to his desk which he can compare with his speech of 3 years ago. I want to assure the President we will not ask for anything in the forthcoming agricultural bill that he did not recommend or ask for in 1952. We are going to be very helpful to him. We are going to try to help him fulfill those commitments and promises.

We are delighted we have been able to help him with the soil-bank proposal. We had previously recommended the soil bank and the cutoffs. After we bypassed the President's own department and got to the President, after the American newspapers carried the soil-bank proposal day after day after day, after we hopped, skipped, and jumped over the Secretary and got to the White House, we got the President to adopt the soil bank.

I wish to assure President Eisenhower that if he wants advice on a price-support program, he listen to HUMPHREY. I do not mean George Humphrey, because I doubt that he would be in favor of it. I mean HUBERT HUMPHREY. I suggest the President listen to the advice of HUBERT HUMPHREY on agriculture, rather than the advice of George Humphrey, or even Ezra Benson.

It was suggested in Congress last May that there be cutoffs on agricultural price supports as a means of supporting the agricultural economy and helping family

farm operations survive and continue to be an important part of our economy. The Department of Agriculture has never expressed anything but opposition to this general point of view until recent weeks.

Interestingly enough, the first time I heard that the Department of Agriculture, or the Secretary of Agriculture, was interested in this proposal of mine was in the Wall Street Journal—of all the places to read about agricultural price supports. One would think that such information would be found in Wallace's Farmer or the Iowa Farmer, or some other respectable farm publication. I do not mean that the Wall Street Journal is not one of the finest publications in America, but it is generally interested in different kinds of stock than the livestock of the Midwest. But that is where HUBERT HUMPHREY found out about the apparent interest of the administration in a sensible, practical proposal of reasonable price support protection for our American agriculture at a cutoff point. I am so happy that at last the proposal was published in a paper which represents the administration, the Wall Street Journal. I am deeply indebted to the writers of the Wall Street Journal for writing about the proposal and finally getting it to the White House so it could be carefully studied and observed.

Within the next 2 or 3 weeks, we hope to have a proposed farm program, and it will be before the Senate for its general consideration. I know it will receive great support, because the American farmer is in dire trouble and in need of quick price supports on the part of our Government.

MONTHLY DISCLOSURES ON GAS BILLS TO CONSUMERS IN THE DISTRICT OF COLUMBIA

Mr. MONRONEY. Mr. President, I introduce on behalf of myself, the Senator from Arkansas [Mr. FULBRIGHT], the Senator from New Mexico [Mr. ANDERSON], and the Senator from Texas [Mr. DANIEL], a bill affecting the District of Columbia, to require disclosure on monthly gas bills of the domestic gas consumers of the District of Columbia the average rate paid by such consumers, the portion of that rate received by producers, pipelines, and the distributing company, respectively.

I send the bill to the desk for appropriate reference.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2890) to require disclosure on monthly gas bills of domestic gas consumers in the District of Columbia of the average rate paid by such consumers and the portion of that rate received by producers, pipelines, and the distributing company, respectively, introduced by Mr. MONRONEY (for himself and other Senators), was received, read twice by its title, and referred to the Committee on the District of Columbia.

Mr. FULBRIGHT. Mr. President, will the Senator from Oklahoma yield to me, so that I may suggest the absence of a quorum?

Mr. MONRONEY. I yield to the Senator from Arkansas, who is a cosponsor of the bill.

Mr. FULBRIGHT. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum shall be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MONRONEY. Mr. President, the bill I have introduced, on behalf of the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Texas [Mr. DANIEL], the Senator from New Mexico [Mr. ANDERSON] and myself, would require the franchised gas company for the District of Columbia—and it is a simple District of Columbia bill, for in this case the company concerned is the Washington Gas Light Co.—to print clearly on the face of each consumer's gas bill a breakdown showing plainly the spread or increased charge for the use of natural gas, over and above the amount paid to the producer of the supply of raw gas in the field, through to the city gate where the gas is turned over to the Washington Gas Light Co. It would require the clear printing on the face of the bill of the city delivery cost.

I felt compelled to introduce the bill when, the other day, after considerable discussion in the public press, I began to study my gas bill of last month, and found that I owed the Washington Gas Light Co., for the gas used to heat my house for that month, $41.93. As is true of other consumers of natural gas, I became concerned about my bill, and began to wonder how much I was paying for the natural gas used to heat my house, and to whom I was paying the money.

So I turned to the reverse side of the bill, and read what was printed there. In the past, I had casually examined such bills, as regards their composition and makeup. I had done that over the period of approximately 9 years during which I have been using natural gas to heat my house. It has always been somewhat confusing to me, since—for some strange reason—the bills are expressed in therms, a term with which I was not familiar, although I come from the gas-producing country, and although I worked for many years as a newspaper reporter, investigating and challenging the large spread or difference between the cost of producing natural gas and the amount charged by the utilities for city delivery of natural gas.

I thought that perhaps as a result of the education I had received as a newspaper man and the education I had received in studying and listening to the several weeks of hearings on the natural gas bill, I could find the mysterious key to the Washington Gas Light Co.'s bills, so as to show me how the bills were arrived at or figured.

So I turned to the reverse side of the bill, and there I found the following:

SCHEDULE A—GENERAL SERVICE

Available to any customer for gas service for any purpose.

First, 4.8 therms or less per month, $1 net.

I suppose that means per therm.

Next—

Next, 10.2 therms per month, per therm, $0.156.

Presumably that means 15.6 cents.

I read further:

Next, 15 therms per month, per therm, $0.14.

Next, 570 therms per month, per therm, $0.118.

Next, 5,400 therms per month, per therm, $0.095.

Over 6,000 therms per month, per therm $0.085.

Minimum bill per meter per month, $1.

(Except group metered multiple dwelling projects of 4 units or more.)

Purchased gas adjustment:

This is in fine print:

Charges for gas service, at the rates shown above are subject to an increase or decrease to reflect changes in the wholesale price paid by the company for natural gas, the current adjustment is an increase of $0.0036 per therm.

I would say that would be thirty-six one-hundredths of a cent per therm. I read further:

It comprises an increase of $0.0046 for a current wholesale increase, minus $0.0010 for a retroactive wholesale decrease.

Then in larger type:

Net and gross rate: Net rates apply when monthly bills are paid within 20 days from date of rendition (see last net payment date on face of bill). If payment is made after the 20-day period gross rates shall apply.

Special terms and conditions of service: The application of above rate is subject to the general service provisions of the company as they may be in effect from time to time, and as approved by the Public Utilities Commission of the District of Columbia.

Seasonal off peak rate schedule and other details will be furnished upon request.

Mr. President, the last thing I need is more detail regarding how my gas bill is computed and how many steps go into the computation.

I find this in large type:

To determine number of therms used.

And then in smaller type:

Multiply hundreds of cubic feet used by 1.03.

Down at the bottom I find "W–11–55." I do not know what that means.

It would seem to me that in billing me on the basis of therms, and by means of 6 or 8 different rate steps, plus or minus amounts in terms of hundredths of a cent, with the net and the gross rate and the multiplication of the hundreds of cubic feet per therm, the whole process was a little bit confusing. I hate to be confounded. It seemed to me that after my experience with natural gas, someway, somehow, I could find the key, but not by means of the way the therms were stated on the bill. So I began to study the bill. Actually, Mr. President, I believe I really outsmarted the certified public accountant or the Philadelphia lawyer who placed all those figures on the back of that Washington Gas Light Co. bill; for, lo and behold, although the bill does not show the rate, nevertheless, the bill shows the number of cubic feet used. It shows that in hundreds of cubic feet, a term not familiar to those coming from

the gas-producing section of the country, because there we measure all natural gas by means of M c. f.—in other words, 1,000 cubic feet. However, the bill is stated in terms of hundreds of cubic feet—just to make the bill a little difficult to understand. However, I am fairly smart at the use of decimals, so I determined that the figure 319, as stated on the bill, must mean 31,900 cubic feet of natural gas. So, to find out how much my rate per thousand cubic feet of natural gas was, and to reduce the bill to the ordinary customer to the common denominator used for measuring and charging for natural gas, I divided my bill of $41.93 by 32. In order to round out the number and make the calculation easier, I disregarded the additional 100 cubic feet. In that way, I found that I was paying $1.31 per thousand cubic feet for the natural gas. That is an interesting figure, because I believe it shows rather conclusively the rate charged me. I use natural gas for heating my house, and that results in a rather substantial consumption of natural gas.

So I began to figure out exactly to whom I was paying what and for what. I was rather interested in learning how much the producer received for the natural gas in the field, because, after all, that is the raw commodity which I burn in my burner. The rest of the charge, above the amount paid to the producer, is, it seems to me, more or less overhead. Of course, it does cost money, and requires pipelines and other things, to transport the natural gas from the mouth of the well to my burner tip.

I happened to remember the hearings, so again I looked them up, to learn how the rate charged me was reached. Thus it was that I found that on the average, for the 12-month period closest to the end of 1955, the producer at the well, who has the gathering line which picks up the natural gas, this natural resource, is paid the magnificent sum of 12½ cents, out of the $1.31 which I pay for each 1,000 cubic feet of gas delivered to my burner tip.

Mr. President, let us bear in mind that as for the producer who receives the 12½ cents per thousand cubic feet of natural gas, for each thousand cubic feet of natural gas he puts into the pipeline, he has 1,000 cubic feet of gas less to sell; he is exhausting that natural resource; and, so far as I know, no natural gas will come into his well to replace that thousand cubic feet which has been taken out. That will not occur by means of any kind of geology. Once the gas is produced from the well, and once the million or trillion cubic feet of gas, or whatever amount is contained in his well, has been used, it is gone. In other words, every time he produces 1,000 cubic feet from his well, he has exhausted his natural resource to the extent of that 1,000 cubic feet. He receives 12½ cents. It then goes into what is called the long line, or the interstate pipeline. I find that the cost of the producer's share, 12½ cents, plus the 28½ cents charge for the transportation by the long interstate pipeline, delivers the gas for which I pay $1.31 a thousand in my burner, to the city gate at the city limits of the District of Columbia—I think in this case it is Rockville, Md.—for distribution into the system of the Washington Gas Light Co. at a cost of 41 cents. The long pipeline gathers the gas from the Appalachian Mountains, from West Virginia, and the nearby gas fields, and reaches out a thousand miles or more to the great gas fields of the Southwest and brings gas from all this vast territory to the city gates of Washington and delivers the gas at that point at a cost of 41 cents. That includes the producer's share of 12½ cents, representing the cost of everything from the discovery and drilling of the well to the gathering of the gas, and the exhaustion of the natural resource. All that goes into the figure of 41 cents. So the delivery price to the Washington Gas Light Co., at our doorstep, practically speaking, is 41 cents.

I was interested in trying to find out the cost of city delivery. It does not require a very smart man to figure out that if my rate is $1.31, and the gas is purchased at the city gate for 41 cents, I am paying 90 cents to take a thousand feet of gas from the city gate for city delivery in Washington at my burner.

These charts were made by the Library of Congress, and they are supposed to be in proportion. I think they properly show the relationship of the spread in the three stages in the distribution of natural gas to the consumer's burner.

It struck me that inasmuch as there was such a disparity in the spread as between the cost of furnishing the raw supply and the delivery charge of gas which the Washington Gas Light Co. buys for 41 cents, including the producer's price, it might be a good idea to consider the introduction of a bill so that no one would need to wonder about how much he was paying for gas, and what was the share of each agency concerned in its delivery. Then the consumer would not need to wonder how much was paid for the raw material. So I conferred with some of my colleagues, including the distinguished junior Senator from Arkansas [Mr. FULBRIGHT], the Senator from Texas [Mr. DANIEL], and the Senator from New Mexico [Mr. ANDERSON]. We are all from gas-producing States. I think we understand the production of gas.

I think we also understand that, while we furnish the gas which the long lines bring to the consumers, while we deliver to the long lines the convenient, superior fuel for transmission to some 30 million consumers in the East who never knew this convenience before, we are concerned with the exhaustion of our natural resources. If they are to be exhausted, I think we have the right to tell consumers exactly what we are receiving for the exhaustion of our natural resources, and how much of the consumers' dollar goes to carry our gas through the pipelines over the long distance from Texas to the city gate of Washington, and how much is charged for delivery over the short distance within the city limits of the District of Columbia.

Bear in mind, the transmission of gas does not result in much wear and tear on pipelines. There is very little friction involved in the flow of millions of cubic feet of gas through the long lines and even through the lines of the obsolete and largely written off equipment of the Washington Gas Light Co., which was built for the distribution of artificial gas. I believe that company was first chartered in the year 1845. Yet the wear and tear and the friction of the gas in the Washington pipelines represents a cost of 90 cents to me. I use a good deal of gas.

However, we wished to arrive at a standard, because we do not wish to bill everybody on the basis of MIKE MONRONEY'S average gas bill.

I did a little further research. We decided that we should use the average price paid to the producer for the last calendar year for which figures were readily obtainable. We did not want to put the gas company to any unnecessary trouble or add to its overhead, so we used the average price paid to the producer during the last calendar year for which figures were readily obtainable.

With respect to the cost at the city gate, we used the price paid for the last calendar year for which figures were readily obtainable. Then we used, as a basis of comparison, the average consumer, the average household, because that is the important thing. In this way we can show clearly, on the basis of the bill, in terms of thousand cubic feet of gas, which is the standard measurement, exactly what the spread is for the city delivery cost of such gas.

In the research I found that those who use gas for cooking but not for heating are paying a city delivery cost, from the city gate to the burner tip, of $1.10, or nearly 10 times the cost of the raw gas.

Those who use gas for heating, if they use it in considerable amounts, are paying an average rate, for cooking and heating, of 84 cents a thousand for the city delivery cost—not the total cost at the burner tip, but the spread represented by the city delivery cost. I am talking about the spread in the city delivery cost, in one instance, of $1.10, and in another instance 84 cents.

It may be of interest to Senators to note the stack of pennies represented on the chart before me, which illustrates how the rate is made up.

The producer's price is 12½ cents for the exhaustion of the natural resource. That is shown in green. The 28½-cent charge represents the cost of bringing the gas from the gas fields of Oklahoma, Texas, Arkansas, and the Appalachian Mountains to the city gate of Washington. These costs enter into the customer's rate. In the case of the rate for cooking only, the overhead cost of bringing the gas from the city gate to the burner tip is represented by a stack of pennies, as shown on the chart, reaching to $1.10, for the rate spread. For both heating and cooking, on the average, there is a spread of 84 cents.

Why should it cost so much more to distribute natural gas from the city gate in Washington than it costs to distribute it elsewhere? The spread from the city gate to the burner tip is 125 or 150 percent more than the entire cost of the

gas in Oklahoma at the well of the producer, plus the cost of transmission through the interstate pipeline into the city distributing system.

Some of those who are so eager to point the finger of blame at the producer and to allege that he is mulcting the public out of hundreds of millions of dollars might say that we are quoting figures from the gas-producing territory, and that perhaps we are a little partial toward keeping down the cost of gas.

Why should it cost so much more in the city of Washington, the Nation's Capital, for city delivery than it costs in other communities? The average spread is 90 cents. Here there is a spread of $1.10 for cooking, and a spread of 84 cents for heating. Why should it cost so much more to distribute gas in Washington than it does in other cities?

In Columbus, Ohio, the capital of the State of Ohio, instead of $1.10, the cost for city delivery is 35 cents. In Pittsburgh, Pa., the cost is only 43.4 cents a thousand for city delivery. In Louisville, Ky., the cost is only 35.2 for city delivery. In Kansas City, Mo., the cost of city delivery is only 27.7 cents.

It seems to me that the vast, rich, fat distributing utilities, some 30 of them, which have now organized to protect the consumer, may be organizing to protect themselves, and using the consumer as a front to cover up unconscionable profits which are being made from obsolete artificial gas pipelines, which probably have been largely depreciated over a period of years, but with respect to which the depreciation benefits are not handed on to the consumer. Senators, dear friends of mine, I know, are conscientiously concerned with the plight of the consumers. They are not a party to this lobby and perhaps would be displeased to find themselves with the group defending these high rates for city delivery.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MONRONEY. I am happy to yield to the Senator from Arkansas, one of the authors of the bill for truth in billing.

Mr. FULBRIGHT. I am very happy to join the Senator from Oklahoma in sponsoring this bill.

The more I consider the statement of the Senator, the more firmly convinced I am that the bill before us is a very good bill, and that the inquiry to which the Senator from Oklahoma refers is a proper inquiry.

I wonder whether the Senator can give us any idea as to why gas should be so much more expensive in Washington than in Columbus, Ohio, or Kansas City.

Is there any intimation in the research which the Senator has conducted that would give a reason as to why an excessive cost should exist in Washington?

Mr. MONRONEY. I have tried to find the answer, I will say to the distinguished junior Senator from Arkansas, ever since I became aware of the multiplied spread in the case of the city of Washington. I know it cannot be due to the fact that the pipelines in the city of Washington had to be laid in solid rock, or that the holes for the pipelines had to be blasted out of solid granite. I do not know of any great rock layer in the city of Washington through which it was necessary to tunnel in order to lay the gas pipelines.

Therefore I am very much mystified by the whole matter. Most of the mains in the District of Columbia have been laid for many years. I am certain that the Washington Gas Light Co. has not been so absent-minded as to have failed to take advantage of any depreciation which the accounting laws and income tax laws allow them to take advantage of. Depreciation must have been taken on the lines.

I wonder how much of the depreciation has been written off to the benefit of the stockholders of the Washington Gas Light Co., and how much of it has been written off to the benefit of the consumers.

Perhaps one of the reasons for the organization of the powerful utility lobby can be found in the answer to that question. It is certainly a powerful utility lobby. It has been button-holing Senators on the Hill and writing letters to them, demanding that they help defeat the Fulbright bill. I should like to know of any reason that would account for a $1.10 city delivery cost for gas used for cooking purposes and a cost of approximately 84 cents for gas used for heating purposes.

Mr. FULBRIGHT. Mr. President, will the Senator yield further?

Mr. MONRONEY. I am happy to yield.

Mr. FULBRIGHT. Are the rates subject to regulation by the Public Utilities Commission?

Mr. MONRONEY. The rates are supposed to be regulated by the Public Utilities Commission, I will say to the distinguished junior Senator from Arkansas. However, I wonder whether anyone in the Public Utilities Commission has done any more than casually accept the financial statements of the Washington Gas Light Co., particularly with respect to the stock structure. I am interested in knowing whether the Public Utilities Commission has used the physical investment as a basis for rate fixing purposes, or whether it is allowing the Washington Gas Light Co. to earn income on the basis of the stock issue, and I wonder what else has been added through the accumulation of surplus and other items.

In other words, to arrive at an efficient rate making base—and I will say to the distinguished junior Senator from Arkansas that I worked on that subject for many years as a reporter on the old Oklahoma News, of the Scripps-Howard newspaper chain—it is necessary to take the physical investment in dollars, not the stock issue—and there is added to the capital value of the plant, the pipes, nuts and bolts, and valves. All that is added to the amount invested. Those figures are totaled. All the amounts for the extensions made each year are added to the capital structure. Then depreciation is written off each year on that portion of the plant which is used in the distribution of the natural gas.

In that way it is possible to arrive at a good base. I am wondering whether anyone recently or in the past several years, since the Washington Gas Light Co. converted its product to natural gas, inquired into the reason for the great spread in the delivery rate of the Washington Gas Light Co., which has been permitted to go on unchecked.

Mr. FULBRIGHT. Mr. President, will the Senator yield further?

Mr. MONRONEY. I yield.

Mr. FULBRIGHT. Does the Senator from Oklahoma know whether the cost of the advertising by the Washington Gas Light Co. is a deductible expense?

Mr. MONRONEY. It is certainly a deductible expense, as an operating expense.

Mr. FULBRIGHT. Does the Senator believe that is a correct procedure? In other words, why should the company advertise with full page advertisement, when it is confronted with no competition?

Mr. MONRONEY. That is customary.

Mr. FULBRIGHT. It is customary?

Mr. MONRONEY. It is customary in almost all utilities.

Mr. FULBRIGHT. Could it be one reason why this particular rate is higher than any other rate the Senator has mentioned, and that the spread in Washington, D. C., is greater than in Columbus or Kansas City, or in any other city?

Mr. MONRONEY. I would not wish to say that. I am inclined to believe there is no one, including the Public Utilities Commission, who can quite understand the gobbledegook we have been reading on the company's bills. Perhaps some day, after everyone in Washington gets through figuring out the status of the cosmos and understands all about satellites, we may find out how much it costs for each thousand cubic feet of gas to keep a little old lady warm. When we get down to that point we will find, I believe, that someone is getting very rich at the expense of the public.

Mr. FULBRIGHT. Does the Senator not believe that the committee should request representatives of the Public Utilities Commission to appear before it, to ask them how they calculate a therm, and how they arrive at the rate?

Mr. MONRONEY. I do not expect too much from them. However, I do expect a great deal from the public.

If the public has the information as to how much the average cost to the consumer is, what the cost for city delivery is, what proportion of it the long line gets, and how much the producer gets—instead of getting all the intentional confusion which is being aroused by the powerful utility lobby, in trying to pillory the producer for a 2- or 3-cent increase in the rate—the public will learn where the pack is, and will learn that the pack is in the city delivery rate.

I believe the distinguished junior Senator from Arkansas will agree with me on that point.

Mr. FULBRIGHT. I do.

Mr. DANIEL. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. DANIEL. As a former newspaper reporter, I am sure the Senator from Oklahoma will agree that the cost of the advertising is not very much when compared to the immense spread which the utility companies are charging over and

above what is paid to producers. As a matter of fact, does the Senator not agree that advertising is a good thing?

Mr. MONRONEY. It certainly is a good thing. If we did not have advertising in the newspapers, the newspapers would not be able to devote as much space to the printing of what Senators have to say.

Mr. DANIEL. However, it is a small part of the expense.

Mr. MONRONEY. That is correct.

Mr. DANIEL. Advertising is a good way to bring to the public information it should have. Therefore, would it not be a good thing for the public to know the truth about how little the producer gets for his gas, as compared with what is received by the monopoly which is distributing the gas in Washington?

Mr. MONRONEY. I think it is very important to show that fact. It is important to ask why that should be so. It is important to find out also why the Washington Gas Light Co., which had been delivering artificial gas until 1946, is charging 12 cents more per thousand cubic feet to deliver natural gas, which costs them much less than they paid for artificial gas.

Mr. DANIEL. The truth of the matter is that the big money that is coming out of the consumer's pockets is the profit collected by the distributors, the group of giant utilities now fighting the Fulbright-Harris bill. Is that not correct?

Mr. MONRONEY. That is correct. I am glad the distinguished Senator mentioned that fact. It would be interesting to know whether natural gas has hurt the Washington Gas Light Co., as their statements would lead us to believe, inasmuch as the company has been raising its rates since 1950. The gas producer since 1950 has had an increase of 1.7 cents per thousand cubic feet since 1950. The rate of the Washington Gas Light Co. since 1950, for gas used both for cooking only and for cooking and heating has been increased by 12 cents per thousand cubic feet.

It is interesting to note that the Washington Gas Light Co. is supposed to be a regulated utility. The producer's price to the company has been increased by 1.7 cents since 1950, and in that same period the Washington Gas Light Co. has increased its rate by 12 cents for gas used both for cooking only and for cooking and heating. The rate paid to the interstate pipeline has been raised by 10.1 cents per thousand cubic feet since 1950.

Mr. DANIEL. That is not the rate to the producer, of course.

Mr. MONRONEY. No; the producer has received an increase of 1.7 cents. I refer to the interstate pipeline. The interstate pipeline's rate has been increased by 10.1 cents, and the Washington Gas Light Co. has increased its rate by 12 cents. In other words, an increase of less than 2 cents to the producer has occasioned a 10-cent increase to the pipeline and a 12-cent increase to the average gas user in Washington, D. C.

Let me say that it is very significant to me that those who are arguing that the way to lower gas prices is by more and more regulation, and who specifically favor the invasion and overturning of the free-enterprise principle in the search for, the exploration of, and the development of gas fields, would make the gas producer into a public utility to be regulated by the Federal Power Commission. It is very significant to me that the rate to this free-enterprise segment is increased by only 1.7 cents, while the rate to the long interstate pipeline is increased by 10.1 cents by the Federal Power Commission. With reference to the Washington Gas Light Co., which is right here on our doorstep, the Public Utility Commission has increased its rate to 12 cents to the average user.

Nothing has been said about how well some of the utilities have been doing, in all the crocodile tears which have been shed by the powerful utility lobby. Some of them were not doing very well when natural gas came to their rescue. Dividends were very small. Their income before taxes and conversion expenses in 1945, the last year for the distribution of artificial gas, was $2,524,000. In 1954, after 10 years of this "vicious natural gas strangulation by producers," they had $9,068,000 income before taxes.

Mr. DANIEL. That is what I asked the Senator a moment ago. Much of that 90 cents is going into the pocketbooks of the stockholders of the utility companies?

Mr. MONRONEY. The reason I used income before taxes was to show that if they had not been so grasping, trying to squeeze the last penny out of the gas consumers, they could have reduced their rates and the Federal income tax alone would have taken care of the reduction. But they were so eager to pile up dividends that they charged the consumer higher rates, paying income taxes of $3,680,000.

I am in favor of people paying income taxes, but when a regulated utility is keeping its rates out of all proportion to what they should be, I think that someone in the Public Utilities Commission should get a sharp pencil and find out if a few cents could not be taken off the overburdened consumer.

The utility cannot claim that natural gas costs more than artificial gas. It cannot plead that it is not selling as much natural gas, because it was selling roughly 114 million therms. A therm is approximately the equivalent of a hundred cubic feet of gas. It is rather difficult to figure. In 1954 the utility was selling approximately three times that quantity of gas. So with more than a three-times increase in profit before taxation, with more than a three-times increase in gas revenue, the spread for city delivery keeps going up.

Mr. FULBRIGHT. Mr. President, will the Senator from Oklahoma yield?

Mr. MONRONEY. I yield.

Mr. FULBRIGHT. With reference to the figure of 41 cents which has been mentioned——

Mr. MONRONEY. It is now 39 cents. It has gone down another 2 cents.

Mr. FULBRIGHT. That is still four times, percentagewise.

Mr. MONRONEY. Bear in mind that the farmer can plant another crop, but drawing a thousand cubic feet of gas out of the ground is an exhausting process and depletes the resources.

Mr. FULBRIGHT. Can the Senator think of any other raw material for which the producer receives such a small percentage of the consumer's dollar? Can the Senator think of any analogous case?

Mr. MONRONEY. I cannot at the moment. Perhaps the Senator from Texas can.

Mr. DANIEL. Having sat through the hearings, I will say that I agree with the Senator. The evidence before the committee shows that there is no other product sold on the market in which the owner and producer of the resource receives so small a percentage of the consumer's dollar.

Mr. MONRONEY. I thank the distinguished Senator from Texas.

Mr. FULBRIGHT. Mr. President, will the Senator from Oklahoma yield further?

Mr. MONRONEY. I yield.

Mr. FULBRIGHT. I am further confused about the therm. Is not a therm approximately the equivalent of 100 cubic feet of gas?

Mr. MONRONEY. The Senator from Arkansas is correct. It is normal nomenclature in the gas business.

I think it is interesting to note that the catastrophe which apparently struck the Washington Gas Light Co. and forced it to triple its profits before taxes was so terrible that they have been writing off property loss and expenses resulting from conversion.

In the year 1946, after they were allowed to secure 3 or 4 times as many gas consumers, they were able to write off, according to Moody's Public Utility Manual, $331,000 for property loss and expenses resulting from conversion.

In the year 1947 they wrote off $337,000; in 1948, $611,000; in 1949, $591,000; in 1950, $505,000; in 1951, $473,000; in 1952, $699,000; in 1953, $702,000; in 1954, $406,000.

It appears to me, roughly, that the average for the 9 years, at about a half million dollars a year, would equal about $4,500,000 in write-downs for property losses.

I am not familiar yet, but I expect to be soon—and I intend to speak of this at a later date—with exactly how much property loss the Washington Gas Light Co. took when it removed those unsightly, smelly holders of artificial gas from the Virginia Avenue site, which is now to be developed into a multi-million-dollar property. I am going to be interested in learning whether the gas consumer received any of the benefit of the write-up, if there was a write-up, from the disposal of one of the most valuable properties existing within the District of Columbia today. I intend to ascertain what the rate base is, and how it is affected by the write-down of $4½ million of their property when those gas holders were removed. Is it worth more or worth less than when it was operating as an obsolete, artificial gas facility of the gas company? It seems to me that someone concerned in this matter is trying to be intentionally confusing.

I announced the other day that the junior Senator from Arkansas [Mr. FULBRIGHT] and I, together with other Senators, intended to introduce a bill to furnish, merely as public information, all the essential factors with respect to what makes up a consumer's gas bill, so as to keep the public informed. Voltaire once said, "Give light, and the people will find their own way." We are proposing to give light on the Washington Gas Light Co., and I venture to say that the people will find a way to have the unconscionable city delivery charge reduced, so that it will be more in line with the charge in other cities or in comparable places.

For that reason, I can hardly agree that the statement by Mr. Oscar Berry, and the other officials of the Washington Gas Light Co., is correct, when he continues to quote rates, not in the sense of an increase in the various gas rates to the pipelines and to the producers, but about rates in percentages.

Suppose gas was sold for 1 cent by a producer, and was then increased to 2 cents. That would be a 100-percent increase, but the price of gas would be raised by only 1 cent. But Mr. Berry continues to deal in confusing figures. It must be a part of the scheme of the utility lobby to cry crocodile tears in behalf of the consumers while they themselves obtain one of the highest gas distribution rates in the United States.

It is not enough to have 1 utility company try to put a harness on or impose Federal regulation on exploratory development, such as in gas or oil, but there have been organized 30 of the largest companies, and many of them are those charging the highest, most unconscionable rates.

Why is it that in Baltimore, Philadelphia, New York City, Connecticut, and in the State of the distinguished senior Senator from Massachusetts [Mr. SALTONSTALL] such terrifically high gas rates are charged for city delivery? Does it cost more to have gas flow through the lines in Philadelphia or Boston than it does in Columbus, Ohio, or Kansas City, Mo.? I cannot understand how the local public regulatory bodies, which appeared before us at our hearings and cried in behalf of the poor consumers, have been sitting so idly by, failing to apply the yardstick of the cost of distribution elsewhere, and learning, perhaps, that the guilty fingerprints on the gun, if you please, which is holding up the consumers for high gas rates are their own fingerprints in permitting such high charges to go unchecked and unregulated.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. FULBRIGHT. Did I understand the Senator from Oklahoma to say that those companies have formed a lobby to try to influence the Senate against the passage of the natural gas bill?

Mr. MONRONEY. Oh, yes, indeed. Has the Senator not seen the printed booklets?

Mr. FULBRIGHT. No; they have not sent me one. Who belongs to the lobby?

Mr. MONRONEY. There are 30 of these utility companies. I believe it is called the Council of Local Gas Companies. I do not know the exact name, but to date 30 of the largest ones have joined, and, incidentally, they include those with the highest spread.

Mr. FULBRIGHT. I thought it was many years ago that utility holding companies were prohibited from using their funds to influence legislation. Is that not a violation of the Utility Holding Company Act?

Mr. MONRONEY. I am not so familiar as I should be with that phase of the matter. I am not a lawyer. However, I think it would be interesting for the Senate to make certain about that, because a number of holding companies which own properties are embraced in this lobby operation. I am sorry I do not have their booklet before me. I do not think the name is Utilities Anonymous. I think we could probably learn which utilities they are, and it would be interesting to see what portion of the rates they are protecting.

Mr. FULBRIGHT. I have not seen one of their booklets. I should like to have one. I think they may not, of course, technically be violating the law. But in the days of the Insull enterprise in Chicago, of which the Senator from Oklahoma is undoubtedly well aware, I think it was or became illegal for holding companies to use their funds for the influencing of legislation. That law grew out of a scandal in Missouri, involving the Union Electric Co., which had created large slush funds for the bribing of legislators in the Missouri Legislature.

But if a lobby has now been created to influence the Senate, it seems to me such a lobby is skating on very thin ice, so far as using their funds is concerned, because I assume they will try to deduct those funds as operating expenses also.

Mr. MONRONEY. I feel certain they would not intentionally violate the utility holding company law, because they have employed a former colleague of ours from Missouri to represent them. I understand that former Senator Kem is now in the employment of those 30 utilities, and I believe he would advise them against any transgression of the Utility Holding Company Act.

Frankly, I believe the utilities have a right to their say. I am proud to have them have their say, because we intend to have our say.

I intend, if it is possible to obtain it, to have a breakdown of the figures, so that it can be shown exactly what portion of each of the three brackets in the cost of the gas goes to protect the rate in the city delivery of gas in the District of Columbia.

Let the utility companies have their say. I hope there may be Senators on the floor who will take the side of those fat 30 utilities; who will explain exactly why it is necessary for them to have this high spread; and why it is so much higher in some areas than it is in such places as I have named. In Columbus, Ohio, for example, the figure is 35 cents, as against $1.10 in Washington, D. C.

Incidentally, I think Baltimore has a spread of $1.13. I think the Baltimore utility has joined as a member of the self-protective society of 30 utilities. In Baltimore there is a spread of $1.13 as against 27.7 cents in Kansas City, and a city delivery in Columbus, Ohio, of 35 cents.

Mr. DANIEL. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. DANIEL. I join with the Senator from Oklahoma in saying that I, too, am glad that these big utility companies have come out into the open and have joined in the fight against the Fulbright-Harris bill, because they have been behind the fight against the bill ever since it was introduced last year.

It was some of the big utilities which during the hearings last year stirred up all the consumer protest. We knew that in our committee hearings, but I am afraid the public did not know about it. So I am glad today that the public can see who is behind all the false propaganda about the consumers being hurt by the producers,

We now have out in the open, some of the giant utility companies which have been waging the fight all along in the name of the consumers. It seems to me it should be evident, through the proposed legislation we are offering today, and through the discussion which will take place on the floor before long, that the big monopolies are on the side against the Fulbright-Harris bill, and that they are on that side for a selfish purpose, in order to continue increasing the millions of dollars they can take away from the consumers of this country, and at the same time try to blame the high costs on the producers, who receive less than 10 percent of the consumer's dollar.

Mr. MONRONEY. They are doing it in the answer of Mr. Oscar Berry, attorney for the Washington Gas Light Co. He has blamed increases to the consumer on the producer. It is the same old line. It is the utility line that has been played and replayed and replayed. Anybody who dares to challenge the big, fat utilities line is supposed to be a tool of the gas producers.

There are 8,000 gas producers. There are 30 million people who consume gas. It is very easy to tell 30 million people, "We are protecting you," and that 8,000 free, competitive enterprisers and explorers for natural gas are out to increase their bill by $800,000,000.

Where did they get that figure? It was dreamed up, but it came from the 30 fat utilities which have organized.

Mr. DANIEL. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield to the Senator from Texas.

Mr. DANIEL. Recently someone referred to that as the $800 million lie. I am sure the Senator from Oklahoma will agree it is an $800 million lie so far as the facts are concerned?

Mr. MONRONEY. Since 1950 the producer has received an increase of 1.7 cents in his rate to the city of Washington.

I do not want to mislead Senators. The 12.5 cents is above the national average, which is about 10 cents or a little below that. I think it is between 9 and 10 cents. The Washington utility buys Appalachian gas, and because it is near the big eastern market, it demands a

higher rate. Before the Washington Gas Light Co. converted completely to natural gas and started shedding big tears, the Washington Gas Light Co. was paying 16 cents a thousand for Appalachian gas. It did not get its price down until it went to the Southwest for its gas.

Mr. DANIEL. In other words, the majority of the gas which comes from Arkansas, Oklahoma, and Texas, is actually below that 12½ cent price?

Mr. MONRONEY. I presume it is averaged with the higher 16-cent Appalachian gas to arrive at the 12-cent figure. So we are getting all the information from Mr. Oscar Berry that the exorbitant charge to the consumers is the fault of the producer or the interstate pipeline.

I should like to urge that the bill which has been introduced by me and the Senators who have associated themselves with me be given early and prompt consideration by the District of Columbia Committee. In fact, I have spoken to the Senator from Oregon [Mr. MORSE], our distinguished friend and colleague. While the Senator from Oregon may be against the passage of the Harris-Fulbright bill—and I suspect he is—I have confidence that the Senator from Oregon wants the public to know the facts. I feel that he would be more than eager to consider an early hearing on the bill before the District of Columbia Committee.

I should like to invite these 30 big utilities—because they surely cannot be against the public's being informed—to join with us in urging that truth in billing is necessary. If they have nothing to hide, I should like to see them join with us, not only to secure passage of the bill for the District of Columbia, but perhaps petition us—and I am sure we would be glad to listen to their petition—to expand this proposal to cover the 48 States.

I should like to challenge them today—this well-heeled organization of 30 big utilities—if they have not anything to hide, to ask either myself, the Senator from Arkansas [Mr. FULBRIGHT], or any of the Senators who might represent the States from which those utilities operate, to speak to us. We will be glad to consider expanding public information to the 48 States.

We are having our attorneys look into the matter. We are proceeding slowly, but it seems to me it is highly important that the public should know. We must have the truth in billing.

Mr. President, before closing, I ask unanimous consent to have printed in the RECORD as a part of my remarks certain tables which I have prepared. One table shows the prices paid by the Washington Gas Light Co. to interstate pipe lines from 1946 to 1954, both in therms and in thousands cubic feet.

The table also shows the prices received by the producers in the field per thousand cubic feet, where it is available, from 1946 to 1954. Unfortunately, we have not been able to get a firm figure on the cost of the artificial gas, and the figures from 1946 to 1948 are not available; but the remainder of that period is covered by the table.

I also ask unanimous consent to have included as part of my remarks a table showing the prices paid to the Washington Gas Light Co. by the average household consumer from 1946 until 1954, showing the cost per therm and the cost per thousand cubic feet.

The table also shows the average consumer's price, with heating, on the basis of per therm and per 1,000 cubic feet.

The PRESIDING OFFICER. Is there objection to the unanimous consent request of the Senator from Oklahoma?

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

	Prices paid to pipelines by Washington Gas Light Co.		Prices received by producers per thousand cubic feet
	Per therm	Per thousand cubic feet	
	Cents	*Cents*	*Cents*
1946	3.03	30.3	(1)
1947	2.91	29.1	(1)
1948	2.90	29.0	(1)
1949	2.86	28.6	8.5
1950	2.98	29.8	10.8
1951	3.06	30.6	7.7
1952	3.82	38.2	8.5
1953	3.88	38.8	11.0
1954	3.99	39.9	12.5

[1] Not available

Prices paid to pipelines: Increase since 1946, 9.6 cents. Increase since 1950, 10.1 cents.

Prices received by producers: 6-year average, 9.6 cents. 6-year increase 2.6 cents. Increase since 1950, 1.7 cents.

Prices paid to Washington Gas Light Co. by average household consumer

	Without heating		With heating	
	Per therm	Per thousand cubic feet	Per therm	Per thousand cubic feet
	Cents	*Cents*	*Cents*	*Cents*
1946	14.0	1.40	11.3	1.13
1947	13.9	1.39	11.2	1.12

Increase without heating since 1946, 11 cents.
Increase with heating since 1946, 12 cents.
Increase without heating since 1950, 12 cents.
Increase with heating since 1950, 12 cents.

Mr. MONRONEY. Mr. President, at a future date, I hope to have more information regarding the physical value of the plant of the Washington Gas Light Co. Perhaps my colleagues may have a little information on the 30 associated gas companies which have organized and are financing the lobby in the fight against the Harris-Fulbright gas bill.

Mr. President, I yield the floor.

PROHIBITION OF USE BY CERTAIN BUSINESSES OF THE INITIALS "U. S."

Mr. DANIEL. Mr. President, I send to the desk a bill for introduction and appropriate reference. This bill would amend the Criminal Code to enlarge the prohibition against false advertising by banking or investment companies. It would prohibit the use of the initials "U. S." in the firm or business name of such companies, and the use of pictures of the Capitol or other public buildings in the advertising when it would be reasonably calculated to convey the impression that the company had some connection with or insurance by the United States Government.

In addition, the penalty for violation would be increased from a possible $1,000 fine and not more than 1 year in jail to a possible $10,000 fine and not less than 1 year imprisonment.

Recently, a company operating in Texas, the U. S. Trust & Guaranty Co., of Waco, Tex., was found to be insolvent. This company, in addition to using "U. S." in its firm name, also advertised on its stationery and on television, with pictures of the United States Capitol in the background, the slogan "You can put your trust in the U. S. Trust."

Many persons in Texas invested their life savings in the U. S. Trust & Guaranty Co., at what was advertised to be very desirable interest rates. These investments, in many instances, were made upon the erroneous conclusion, induced by the type of advertising used by the company, that the deposits would be insured or guaranteed by the United States Government.

At present, section 709 of title 18 of the United States Code prohibits use of the words "national," "Federal," "United States," "reserve," and "deposit insurance" in the firm or business name, but the initials "U. S." have not been prohibited, nor has the use of pictures of public buildings. The purpose of the bill is to prevent banking, investment, or other companies of a fiduciary nature, from misleading the public into depositing money on the basis that the deposits are with a company either insured by or connected with the United States Government.

I want to make absolutely certain that the citizens of Texas and the Nation are not again subjected to such misleading representations, and that should this same situation exist in other parts of the country, it will be stopped before other innocent victims are injured severely. The people who are misled by circumstances such as these are the small investors who need protection, since they are not in a position to investigate all the facts for themselves. We have an obligation to prevent the use of the confidence which the people have in the financial security of our Government in a manner reasonably calculated to convey the impression that the United States Government is protecting their private investment when that is not the case.

I have underlined the proposed additions to the present law in a copy of the bill now being sent to the desk. I ask unanimous consent that a copy of the text of the bill, with the proposed changes in the present law underlined, be included at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred, and, without objection, the marked copy of the bill will be printed in the RECORD.

The bill (S. 2891) to amend section 709 of title 18 of the United States Code so as to prohibit the use by certain businesses of the initials "U. S." in the business or firm name or pictures of the

Capitol Building and other public buildings of the United States in their advertising, and to increase the penalties for violation of such section, introduced by Mr. DANIEL, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the first paragraph of section 709 of title 18 of the United States Code is amended to read as follows:

"Whoever as a person, corporation, partnership, business trust, association, or other business entity, engaged in the banking, loan, building and loan, brokerage, factorage, insurance, indemnity, savings, or trust business, except as permitted by the laws of the United States, (1) uses the words "national," "Federal," "United States," "reserve," "deposit insurance," or the letters "U. S.," as a part of the business or firm name of such person, corporation, partnership, business trust, association, or other business entity; or (2) uses in any advertisement a picture of the Capitol Building or any other public building of the United States in a manner reasonably calculated to convey the false impression that such person or entity is a Government agency or is connected with any Government agency, or that such business, or the deposits, liabilities, obligations, certificates, or shares thereof, are insured or guaranteed by the United States or any instrumentality thereof; or".

SEC. 2. Section 709 of title 18 of the United States Code is amended (a) by striking out "$1,000" wherever it appears in such section and inserting in lieu thereof "$10,000," and (b) by striking out the words "for not more than 1 year" and inserting in lieu thereof the words "for not less than 1 year."

ADJOURNMENT TO THURSDAY

Mr. FULBRIGHT. Mr. President, pursuant to the order previously entered, I move that the Senate stand in adjournment.

The motion was agreed to; and (at 5 o'clock and 10 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, until Thursday, January 12, 1956, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 9, 1956:

DIPLOMATIC AND FOREIGN SERVICE

The following-named persons, who were appointed during the last recess of the Senate, to the offices indicated:

Robert W. Minor, of Ohio, to be an Interstate Commerce Commissioner for the remainder of the term expiring December 31, 1958, vice J. Haden Alldredge, retired.

NATIONAL LABOR RELATIONS BOARD

Stephen Sibley Bean, of Maryland, to be a member of the National Labor Relations Board for the term expiring August 27, 1960.

NATIONAL MEDIATION BOARD

Francis A. O'Neill, Jr., of New York, to be a member of the National Mediation Board for the term expiring February 1, 1959. (Reappointment.)

DEPARTMENT OF JUSTICE

Charles K. Rice, of New Jersey, to be an Assistant Attorney General, vice H. Brian Holland, resigned.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Lowell Thelwell Coggeshall, of Illinois, to be Special Assistant on Health and Medical Affairs to the Secretary of Health, Education, and Welfare, vice Chester Scott Keefer, resigned.

FEDERAL RESERVE SYSTEM

William McChesney Martin, Jr., of New York, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1956. (Reappointment.)

CIVIL AERONAUTICS BOARD

G. Joseph Minetti, of New York, to be a member of the Civil Aeronautics Board for a term of 6 years expiring December 31, 1961.

SUBVERSIVE ACTIVITIES CONTROL BOARD

R. Lockwood Jones, of Oklahoma, to be a member of the Subversive Activities Control Board for the remainder of the term expiring August 9, 1960, vice David J. Coddaire, resigned.

UNITED STATES TARIFF COMMISSION

James Weldon Jones, of Texas, to be a member of the United States Tariff Commission for the remainder of the term expiring June 16, 1961.

William E. Dowling, of Michigan, to be a member of the United States Tariff Commission for the remainder of the term expiring June 16, 1957, vice James Weldon Jones.

UNITED STATES MARSHAL

James Warren McCarty, of Texas, to be United States marshal for the southern district of Texas, for a term of 4 years, vice Emmett Mitchell Smith, resigned.

COAST AND GEODETIC SURVEY

In lieu of the nominations received by the Senate on July 28, 1955, the following for permanent appointment to the recommended grades in the Coast and Geodetic Survey, effective on the dates indicated, subject to qualifications provided by law:

To be commissioned captain

Ector B. Latham, effective July 1, 1955.
John Bowie, effective July 1, 1955.
William F. Malnate, effective August 1, 1955.

To be commissioned lieutenant

Arthur R. Benton, Jr., effective June 25, 1955.
Eugene A. Taylor, effective June 25, 1955.
William D. Barbee, effective June 25, 1955.
Herbert R. Lippold, effective June 26, 1955.
Roger F. Lanier, effective June 26, 1955.
John B. Watkins, Jr., effective July 17, 1955.
Jack E. Guth, effective August 3, 1955.
Bruce E. Greene, effective August 29, 1955.
Robert E. Williams, effective September 7, 1955.

To be commissioned lieutenant (junior grade)

Kenneth A. MacDonald, effective June 22, 1955.
Winfred V. Warner, effective June 22, 1955.
Edwin K. McCaffrey, effective June 22, 1955.
Clifford W. Tupper, effective June 22, 1955.
Richard H. Boulder, effective June 22, 1955.
Howard A. Garcia, effective June 22, 1955.
John J. Dermody, effective June 22, 1955.
Clinton D. Upham, effective June 22, 1955.
George W. Thompson, effective June 22, 1955.
Floyd J. Tucker, Jr., effective June 22, 1955.
Dale E. Westbrook, effective June 22, 1955.

To be commissioned ensign

Vincent J. Franze, Jr., effective August 8, 1955.

IN THE ARMY

The following-named officers under the provisions of section 504 of the Officer Personnel Act of 1947 to be assigned to positions of importance and responsibility designated by the President under subsection (b) of section 504, in rank as follows:

To be general

HOUSE OF REPRESENTATIVES

MONDAY, JANUARY 9, 1956

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Eternal God, our Father, by Thy grace we have entered upon a new week affording us many opportunities to share in the glorious task of preserving and perpetuating our freedoms.

Grant that the heart and hands of our Nation, which have always been brave and strong in times of war, may be even more courageous and stronger in building a temple of peace whose foundation can never be destroyed.

In all our adventures and endeavors may we not look for the trophies and tributes which our fellow men may bestow upon us, but inspire us to prove worthy of someday receiving the crown of righteousness and the diadem of Thy praise.

May the great patriotic motive, which shall animate the plans and purposes of the Members of Congress, be that of serving their generation according to Thy holy will.

In Christ's name we offer our prayer. Amen.

The Journal of the proceedings of Thursday, January 5, 1956, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Tribbe, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had adopted the following resolutions:

Senate Resolution 157

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. VERA BUCHANAN, late a Representative from the State of Pennsylvania.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That, as a further mark of respect to the memory of the deceased Representative, the Senate do now adjourn.

Senate Resolution 158

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. JOHN D. DINGELL, late a Representative from the State of Michigan.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That, as a further mark of respect to the memory of the deceased Representative, the Senate do now adjourn.

The message also announced that the Vice President has appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 56–4.

The message also announced that the Vice President appointed the Senator from Alabama, Mr. HILL, the Senator from Oregon, Mr. MORSE, and the Senator from Michigan, Mr. POTTER, members on the part of the Senate of the Board of Visitors to the United States Military Academy for the year 1956.

AGRICULTURAL PROGRAM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 285)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Agriculture and ordered to be printed:

To the Congress of the United States:

In this session no problem before the Congress demands more urgent attention than the paradox facing our farm families. Although agriculture is our basic industry, they find their prices and incomes depressed amid the Nation's greatest prosperity. For 5 years, their economy has declined. Unless corrected, these economic reversals are a direct threat to the well-being of all our people.

But more than prices and incomes are involved. In America, agriculture is more than an industry; it is a way of life. Throughout our history, the family farm has given strength and vitality to our entire social order. We must keep it healthy and vigorous.

Efforts toward this goal have been unremitting. Many new foundations of permanent value to all farm families have been laid in the past 3 years. Two years ago a new farm law was enacted, designed to gear agricultural production incentives to potential markets, thereby giving promise to our farm people of a stable and dependable future once the wartime inheritance of surpluses is removed from the farm economy. Loan programs have been substantially improved, enabling many more farmers to acquire family-sized farms and to improve their farms and homes. The benefits of social-security protection have been extended to farm families. The return of the Farm Credit Administration to farmer control; expansion of soil conservation assistance and rural electrification and telephone programs; increased funds for research and extension work; initiation of new programs to aid low-income farm families; adoption of tax provisions of benefit to farm people; increased storage facilities; upstream soil conservation programs; greatly expanded disposal activities for surplus farm products; strengthening our Department of Agriculture representation overseas in the interest of expanded markets—these and other advances have permanently reinforced the foundations of all agriculture.

Yet, beneficial though these advances are, persistent and critical farm problems require prompt congressional action in this session.

Remedies for these problems demand a clear understanding of their principal causes. These are:

First, production and market distortions, the result of wartime production incentives too long continued;

Second, current record livestock production and near-record crop harvests piled on top of previously accumulated carryovers;

Third, rising costs and high capital requirements.

In short, we have an oversupply of commodities which drives down prices as mounting costs force up from below. Thus is generated a severe price-cost squeeze from which our farm people, with the help of Government, must be relieved.

We must free the farm economy from distortions rooted in wartime needs and thus enable our people in agriculture to achieve prosperity; in so doing they will help carry the Nation's prosperity to still greater heights. The administration and the Congress must move together to achieve this goal.

The requirements are clear. New means are needed to reduce surpluses and to widen markets. Costs must be cut and production must be better balanced with prospective needs.

THE MAIN PROBLEM: THE SURPLUS

Of the many difficulties that aggravate the farm problem, mountainous surpluses overshadow everything else. Today's surpluses consist of commodities produced in a volume imperatively needed in wartime but unmarketable in peacetime at the same prices and in the same quantity.

The plain fact is that wartime production incentives were too long continued.

During the past 3 years, there has been no lack of effort to get rid of surplus stocks. Disposal efforts have been diligent and vigorous. Vast quantities have been moved—much of them given away. In the past 3 years we have found outlets for commodities in a value of more than $4 billion—far more than in any comparable period in recent history.

But these disposal efforts have not been able to keep pace with the problem. For each bushel-equivalent sold, 1½ have replaced it in the stockpiles. Farmers, the intended beneficiaries of the support program, today find themselves in ever-growing danger from the mounting accumulations. Were it not for the Government's bulging stocks, farmers would be getting far more for their products today.

Other consequences of past farm programs have been no less damaging. Both at home and abroad, markets have been lost. Foreign farm production has been increased. American exports have declined. Foreign products have been attracted to our shores.

Steadily this chain of events has lengthened. Our farmers have had to submit to drastic acreage controls that hamper efficient farm management. Even these controls have been self-defeating, because acres diverted from price-supported crops have been planted to other crops. These crops have been thrown into surplus and their prices have declined. Today, almost without regard to the livestock or crop he produces, nearly every farmer is adversely affected by our surpluses. The whole process, for instance, has contributed to the present plight of hog producers.

When 3 years ago this administration assumed its responsibility in agriculture, work was begun immediately on what became the Agricultural Act of 1954. That act was developed and passed with bipartisan support, as all our agricultural legislation should be.

The 1954 law brought realism into the use of the essential tool of price supports. It applied the principle of price flexibility to help keep commodity supplies in balance with markets. That principle is sound and essential to a well-rounded farm program. For two reasons, the 1954 law has not yet been able to make its potential contribution to solving our farm troubles. First, the law began to take hold only with the harvests of 1955; it has not yet had the opportunity to be effective. Second, the operation of the new law is smothered under surpluses amassed by the old program.

The attack on the surplus must go forward in full recognition of the fact that farm products are not actually marketed when delivered to and held by the Government. A Government warehouse is not a market. Even the most storable commodities cannot be added forever to Government granaries, nor can they be indefinitely held. Ultimately the stockpiles must be used.

It is unthinkable to destroy food. Instead, we must move these stocks into domestic consumption or dispose of them abroad. Neither route under present conditions offers the results often expected. Surpluses moved domestically almost always compete directly with crops farmers are trying to sell. Moved abroad in quantities large enough to remedy present difficulties, they would shatter world prices and trade, injure our friends, and undermine domestic prices as well.

To be sure, outlets for some of the surplus exist both at home and abroad. But experience has amply proved that neither the home nor foreign market can, under present conditions, readily absorb the tremendous stocks now depressing our agriculture.

Clearly new action is imperative. We must stop encouraging the production of surpluses. We must stop shifting acres from one crop to another, when such shifts result in new surpluses. Nor can crop problems be converted into millstones weighing down upon the producers of livestock.

Remedies are needed now, and it is up to the administration and the Congress to provide them swiftly. As we seek to go forward, we must not go back to old programs that have failed utterly to protect farm families.

I recommend, therefore, the following nine-point program. I urge the Congress to pass this program with maximum speed, for delay can only aggravate and multiply the difficulties already sorely harassing millions of our rural people.

1. THE SOIL BANK

Our most pressing need today is to work off our surpluses so that our basic program of 1954 can succeed in gearing production to prospective markets at fair prices. A three-pronged attack is needed.

First, future production of crops in greatest surplus must be adjusted both to the accumulated stocks and to the potential markets.

Second, producers of other crops and of livestock must be relieved of excessive production from acreage diverted from surplus crops.

Third, lands poorly suited to tillage, now producing unneeded crops and subject to excessive wind and water erosion, must be retired from cultivation.

These essential adjustments can all be hastened through a soil-bank program. I recommend a soil bank of two parts.

The first is designed to meet the immediate need to reduce the crops in greatest oversupply. It may be called the acreage-reserve program.

The second part is a long-range attack to achieve better land use and protect farmers and ranchers from the effects of production on acres already diverted. It may be called the conservation-reserve program.

A. THE ACREAGE RESERVE PROGRAM

I recommend that the Congress consider a voluntary additional reduction in the acreage of certain crops which today are in serious surplus—wheat, cotton, corn, and rice.

In considering the application of this program to each of these crops, the Congress will wish to accord special attention to their distinctive problems—notably in the case of corn—as set forth later in this message.

I do not propose this program as a device to empty Government warehouses so they may be filled again. There is, therefore, a basic corollary to the acreage-reserve program: In future years we must avoid, as a plague, farm programs that would encourage the building-up of new price-depressing surpluses.

What I here propose is essentially a deferred-production plan. As a necessary part of the voluntary acreage reduction, it is essential to protect the farmer's income. It would be grossly unfair to require farmers to bear the full burdens of this readjustment. Just as other readjustments from war were shouldered in considerable part by the Nation as a whole, so should this.

In the case of wheat and cotton, for example, I look to a voluntary reduction equivalent to possibly one-fifth of the acreage otherwise permitted by allotments—perhaps 12 million acres of wheat and 3 million of cotton. It should be practical to include wheat already seeded if it is incorporated with the soil, as green manure, or by other accepted practices. This would make it possible for more farmers to enter the program immediately and thereby start at once to work down the surplus.

Administrative discretion is needed to assure that the rates of reduction in different areas are related to the supply and demand conditions for different grades and classes. The farmer's cooperation in this temporary program must not impair his historic acreage allotments. Rights of tenant farmers must be protected. I should expect the reduction in wheat and cotton plantings to continue for some 3 or 4 years, during which time these huge crop carryovers should decline to normal levels.

In return for their voluntary participation in the acreage reserve program cooperating farmers will be allocated certificates for commodities whose value will be based on the normal yields of the acres withheld in this reserve. I recommend that these certificates be made available to cooperating farmers through their county agricultural stabilization committees at normal harvesttime for each crop. The certificates will be negotiable so farmers can convert them to cash. They will be redeemable by the Commodity Credit Corporation in cash, or in kind at specified rates.

I further recommend that the legislation provide that each participating farmer contract to refrain from cropping or grazing any land he puts in the acreage reserve.

By so reducing crop production, commodities now in Government ownership can be used to supply market needs up to a proportionate amount. Thus the bulging Commodity Credit Corporation stocks can be correspondingly worked down without depressing current market prices.

The program will operate in this way: A farmer, with an allotment of 100 acres of wheat, for example, may choose to plant only 80 acres and put the remaining 20 in the acreage reserve. His acreage allotment will not be affected. He will agree not to graze or harvest any crop from the 20 acres put into the reserve.

In return for this cooperation in the temporary acreage reduction program, he will receive a cashable certificate. The certificate will be equal to a percentage of the value of the crop he would have normally harvested from the 20 acres. This percentage will be set at an incentive level sufficiently high to assure success of the program.

This deferred production plan uses the surplus to reduce the surplus.

It will be financed with commodities already owned and paid for by the Government. Time and shrinkage, storage, and other costs are eroding away the present value of these stocks. Consequently, the real net cost to the Government—taking these and other facts into consideration—will be substantially less than the apparent cost in payments made on certificates.

I emphasize that this program is specifically intended to provide an income to farmers while the essential adjustment in stocks is being accomplished.

There are many virtues in the plan.

It will help remove the crushing burden of surpluses, the essential precondition for the successful operation of a sound farm program.

It will reduce the massive and unproductive storage costs on Government holdings—costs that are running about a million dollars a day.

It will provide an element of insurance since farmers are assured income from the reserve acres even in a year of crop failure.

It will ease apprehension among our friends abroad over our surplus-disposal program.

It will harmonize agricultural production with peacetime markets.

B. THE CONSERVATION RESERVE

The second part of the soil bank—the conservation reserve program—affects both today's surpluses and tomorrow's needs of our growing population.

Under the pressures of war and the production incentives continued in postwar years, large areas have come into cultivation which wise land use and sound conservation would have reserved to forage and trees.

In greater or lesser degree this problem exists throughout the Nation. Continued cropping of these lands results, on the one hand, in wastage of soil and water resources, and on the other, in production of commodities now in surplus.

Today the Nation does not need these acres in harvested crops.

We cannot accurately predict our country's food needs in the years ahead, except that they will steadily increase. We do know, however, that the sound course both for today and tomorrow is wisely to safeguard our precious heritage of food-producing resources so we may hand on an enriched legacy to future generations. The conservation reserve program will contribute materially to that end.

Further, production from the acres today diverted from surplus crops is now seriously affecting other segments of our agriculture. The acreage of feed grains, notably oats, barley and grain sorghums, has been increased. The end product of this diversion has been greatly enlarged supplies of and lower prices for hogs, cattle, and dairy and poultry products. Producers of fruit, vegetables, and other crops have been adversely affected. The proposed conservation reserve can also make a major contribution to solving this problem of diverted acres.

I propose that farmers be asked to contract voluntarily with the Government to shift into forage, trees, and water storage cultivated lands most needing conservation measures. Any farmer would be eligible to participate in this program regardless of the crop he produces or the area where his farm is located. I would hope that some 25 million acres would be brought into the conservation reserve.

Forest lands under good management are a constant and a renewable resource. One-third of our forest area is in farm woodlands. From this source can come a large share of the lumber, pulpwood, and other forest products to meet the growing needs of our expanding economy. The conservation reserve can mean productive and protective tree cover for less productive lands now used for cultivated crops.

The Government itself must encourage this transfer in order to achieve the advantages to the general welfare that will follow from improved resource use. I propose, therefore, that the Government pay a fair share of the costs of establishing the conservation use, up to a specified per acre maximum that will vary by regions. The Government's share will be sufficiently high to encourage broad participation and thus assure the success of the program. Further, as the farmer reorganizes his farm along these soil-conserving lines, I recommend that the Government provide certain annual payments for a period of years related to the length of time needed to establish the new use of the land. The Congress will need to develop the basis and procedures for determining the amount of the payments. Here, as in the acreage-reserve program, I would not let the farmer's cooperation impair his historic acreage allotments.

The farmer, in turn, will agree that the acres put into this conservation reserve will be in addition to any land that he may put into the acreage reserve, and will represent a reduction in cropland cultivated. He will agree to carry out sound soil and water conservation on these acres, and to refrain from returning them to crop production, and from grazing them for a specified period.

I urge the Congress to approve this program with the least possible delay so that a significant part of the desired

25 million acres can come into the program in 1956.

My estimate is that if the Congress acts in time, some 350 million dollars will be invested in the conservation reserve during the calendar year 1956, and a total of about a billion dollars over the next 3 years. Sums expended under this program will be in addition to the 250 million dollars provided for the agricultural-conservation program for the coming fiscal year.

In return the conservation-reverse program will bring these large rewards:

It will result in improved use of soil and water resources for the benefit of this and future generations.

It will increase our supply of much-needed farm-grown forest products.

It will help hold rain and snow where they fall and make possible more ponds and reservoirs on the farm.

It will reduce the undue stimulus to livestock production, and consequent low livestock prices, induced by feed-grain production on diverted acres.

It will similarly provide protection for producers of the many small-acreage crops whose markets are threatened by even a few diverted acres.

In combination with the acreage-reserve program for crops in surplus, the conservation-reserve program will help during the next several years to reduce the total volume of farm production and improve the balance among different farm commodities, both of which are important to a general improvement in farm prices.

2. SURPLUS DISPOSAL

Production adjustments effected by the soil bank are needed to halt current additions to surpluses, and to reduce stocks on hand. But additional relief must be obtained from the price-depressing influence of these huge carryovers. In Public Law 480 the Congress has provided basic legislation for this purpose. The problem still exists, but not for lack of vigorous efforts to deal with it.

Surplus disposals have permitted substantial reductions in Commodity Credit Corporation stocks of butter, dried milk, cottonseed oil and meal, flaxseed and linseed oil, and seeds. Surplus disposals by the Commodity Credit Corporation have risen from just over half a billion dollars in fiscal 1953 to more than 1.4 billion dollars in fiscal 1954, and to more than 2.1 billion dollars in fiscal 1955.

In the last fiscal year sales of Government-owned price-supported commodities into the domestic market reached 403 million dollars. These were made with due care for the adverse effect they might have on prices received by farmers for current sales. Domestic donations to supply food for needy persons totaled an additional 196 million dollars. Overseas disposals, through barter and donations for constructive purposes, totaled 1.1 billion dollars. In spite of these vigorous efforts, the Commodity Credit Corporation investment in price-supported commodities increased by about 1 billion dollars during the fiscal year.

Because the problem continues to be so serious and stubborn, the Secretary of Agriculture is appointing an Agricultural Surplus Disposal Administrator who will report directly to the Secretary. The duties of the Administrator will relate to all activities of the Department associated with the utilization of Commodity Credit Corporation stocks and of our current abundant production.

Expanded opportunities will be sought to barter agricultural products, which deteriorate and are costly to store, for increased quantities of nonperishable strategic materials. Additional legislation may be needed in this field.

The bulk of price-supported commodities held by the Government cannot now by law be sold into the domestic market except at prices equal to at least 105 percent of the support price plus carrying charges. This restriction has worked to the disadvantage of both farmers and the Government by blocking sales that would clearly have been advantageous to both. I recommend legislation to permit, under proper safeguards, sales at not less than support levels plus carrying charges.

Present provisions of surplus disposal legislation permit export dispositions of Government stocks to friendly nations only. Opportunities clearly to our interest may develop in the future to sell to countries excluded by this legislation. To enable us to realize on such opportunities I recommend repeal of section 304 of Public Law 480.

3. STRENGTHENING COMMODITY PROGRAMS

Our frontal attack on the problems of surpluses, diverted acres, unbalanced production and unwise land use is carried in major part by the soil bank through the acreage reserve and the conservation reserve programs.

These proposals are wholly in keeping with the fundamental principles of sound farm policy set forth in my special agricultural message of 2 years ago. In keeping with these principles the administration:

(a) Whenever possible will continue to ease or eliminate controls over farmers; and

(b) For commodities on which price supports are discretionary, will continue to support these prices at the highest levels possible without accumulating new price-depressing surpluses.

In keeping with this latter principle, I am advised by the Secretary of Agriculture that, as a direct result of operation of various parts of our present farm program, the supply and demand conditions for soybeans and flaxseed are now such as to warrant an increase in the price support levels for these crops in 1956. The higher support levels will be announced shortly.

In respect to other commodity programs I submit the following specific suggestions.

A. CORN

In recent years many farmers have chosen not to observe acreage allotments on corn. Considerably less than half of the 1955 crop was raised within acreage allotment limitations and thus eligible for price support. It is apparent that price supports alone, even at levels closely approaching the legal maximum, are an insufficient inducement for participation in a corn acreage allotment program.

I recommend therefore that the Congress give serious consideration to adapting the acreage reserve program to corn. One grave difficulty must be overcome. Unlike wheat and cotton, most of the corn crop is fed on the farms where it is produced. For this reason, marketing quotas such as are used on wheat and cotton are not feasible.

Thus, broad and effective participation by corn producers in an average allotment program is imperative for the acreage reserve program to achieve its objective of reducing the corn surplus. With broad and effective participation, in both programs, the acreage reserve program for corn would (a) reduce the carryover stocks which currently depress the market, (b) make possible a higher level of price support than would otherwise prevail for the 1956 crop, and (c) reduce the incentive to farmers to produce excessive supplies of hogs and fed cattle.

If the Congress should choose not to authorize the acreage reserve program for corn, the Congress may wish to consider an alternative; to eliminate acreage allotments for corn and put price supports for corn on a discretionary basis comparable with the other feed grains. With no acreage allotments and with discretionary supports, all corn producers would be eligible for price supports at a level substantially above the market price which prevailed during the 1955 harvest.

B. WHEAT

The problems of wheat are difficult and complex. The proposed soil bank, with its acreage reserve program, will make a major contribution toward their solution. This program is particularly well-suited to wheat since this crop is grown in large acreage and is now burdened under an accumulated carryover in excess of a full year's needs. The conservation reserve program and the Great Plains program, described later, will also help. Other changes are necessary also, both for current adjustments and for long-term balance between production and consumption.

(a) Legislation already has passed the Senate and is pending in the House of Representatives which would exempt from marketing quotas those producers who use for feed, food, or seed on their own farms all the wheat they raise. Because of the failure to pass this legislation last year, the Department of Agriculture has been compelled by law to hale before the courts farmers whose only offense was to raise and feed wheat outside their quotas. Again the administration urges prompt enactment of this legislation. Correction of this problem should be delayed no longer.

(b) Historically a significant proportion of the annual wheat crop has been used for livestock feed. The quantity fed in pre-World War II years ranged from 100 to 150 million bushels a year, about twice the quantity fed in more recent years. This reduced consumption has aggravated the surplus burden.

I recommend that the Congress give consideration to authorizing the annual sale for feeding purposes, at the discretion of the Secretary of Agriculture, of limited quantities of Commodity Credit

Corporation wheat of less desirable milling quality. The authorized sale price should reflect the feeding value of the wheat, precautions being exercised as to the effect of such sales on prices on other feed grains. There are opportunities to use more wheat for feed in feed-deficit areas distant from the Corn Belt.

(c) I recommend legislation to expand the noncommercial wheat area beyond the 12 States now so designated. This action would eliminate acreage and marketing controls for many farmers who characteristically feed on their own farms most of the wheat they raise, and who contribute little to commercial supplies or surplus stocks.

(d) I recommend extension for 1 year of legislation which exempts durum wheat from acreage and marketing controls. This type of wheat is in short supply and production should not be restricted.

We are participating in negotiations for possible renewal of the International Wheat Agreement, which will terminate July 1, 1956, unless it is renewed.

C. COTTON

As in the case of wheat, the acreage reserve program is especially well-suited to cotton. This crop as well is burdened by an accumulated carryover in excess of a full year's requirements. Other legislative changes for cotton, in addition to the soil bank program, that require consideration are these:

(a) For all crops except cotton, price-support legislation requires that parity prices shall be computed on the basis of the average grade and quality of the crop. For cotton a special provision of law designates middling 7/8-inch cotton as the standard grade for parity calculations and price support. Currently less than 5 percent of cotton production is of this grade or lower.

I urge an amendment to provide for cotton, as for other crops, that the average grade and quality of the crop be utilized for parity-price computations. This recommendation is, in general terms, in keeping with the intent of legislation already pending before the Senate.

(b) The shortcomings of acreage allotments as a means of controlling production on cotton are evident. In 1955, on an acreage allotment calculated to yield 10 million bales of cotton, nearly 15 million were harvested. Rapidly advancing technology is resulting in production far outrunning expectations based on acreage alone. This is especially true when prices are supported at wartime production incentive levels.

When production controls must be applied as a result of supply and market conditions, it is imperative to have controls that are effective. As surpluses are reduced through the proposed acreage reserve program of the soil bank and through other means, new accumulations of surplus must definitely be avoided.

For these reasons the Congress should consider replacing acreage allotments on cotton with quantity allotments beginning with the crop of 1957. The Congress could well consider similar action for other crops under marketing quotas.

D. RICE

Under the law, accumulated supplies of rice have required a 40-percent reduction in acreage for 1956 compared with 1954, and a decline in the support level to 75 percent of parity.

Rice production in this country is the most efficient in the world. However, our rice is rapidly being priced out of world markets and is being diverted into Government warehouses and even into the feed markets.

There are two alternative courses of action to which the Congress should give consideration:

1. Inclusion of rice in the acreage reserve program. This will require continuation of production controls and marketing quotas.

2. Elimination of existing production and marketing controls on rice. Prices could then be supported on a discretionary basis at levels which would permit rice producers to improve their competitive market position.

If the Congress considers the latter course to serve the long-term best interest of rice producers, it may wish to consider use of the acreage reserve program to make the transition.

E. PEANUTS

The peanut price-stabilization program has experienced serious difficulties stemming in part from a fixed national minimum peanut acreage. With improving technology this minimum acreage will normally produce more peanuts than the market will absorb at the support price. Consequently, I recommend elimination of provisions for the minimum national acreage allotment.

F. SUGAR

The legislation to renew the Sugar Act of 1948, as amended, should promptly be completed. The Congress is aware of the need to give producers, as well as foreign suppliers and the entire sugar industry, as much advance notice as possible in planning their operations.

G. SPECIAL SCHOOL MILK PROGRAM

The special school milk program provided for in the Agricultural Act of 1954 has met with gratifying success. Approximately 9 million children had the health benefits of this program last year, including children in some 7,000 schools in which milk was not previously served. Consumption was increased by over 450 million half pints of milk. This is a good example of constructive use of a surplus product to meet a present need. We thus contribute to better health habits and at the same time promote an enlarged market for the future. Several thousand additional schools are participating in the program in the current school year.

I have been advised that, in some States, milk program funds are nearing depletion. We must see to it that the program is carried forward intact through this fiscal year.

I recommend that the program be extended for 2 years beyond June 30, 1956, with authorization to use Commodity Credit Corporation funds increased from 50 million dollars a year to 75 million dollars.

H. LIVESTOCK

For livestock producers, many parts of the program I have already discussed have special significance.

Establishment of the soil bank will alleviate the undue stimulus to livestock production and the resulting downward pressure on livestock prices which arise from using for feed-grain production much of the acreage already diverted from wheat and cotton. Restrictions against grazing the soil bank acres will safeguard the interests of beef producers and dairymen.

Periodically livestock markets become glutted and prices disrupted. In such periods, where assistance will be constructive, timely and vigorous Government purchase and diversion programs are essential to bolster prices and help producers adjust to market demands. Such programs have been undertaken by this administration. The pork purchase program now in progress will shortly be stepped up to supply new and expanded outlets now being developed. Sales promotion and the development of better merchandising methods cooperatively with the livestock trade are part of this effort to meet the impact of heavy marketing.

Special programs of an emergency nature will be provided to help livestock producers as needed. For example, emergency credit and low-cost feed in the event of drought will be available whenever disaster strikes.

Increased research on nutrition, disease control, better breeding, more profitable use of byproducts and improved marketing will help lower production costs and facilitate the smooth flow of livestock products into consumption.

4. DOLLAR LIMIT ON PRICE SUPPORTS

The average size of farms in American agriculture, as measured by capital or by acres, has rapidly increased. To the degree that this trend is associated with the development of more economic and more efficient farm units it is in the interest of farm families and of the Nation. To the degree, however, that it has resulted in the removal of risk for large farm businesses by reason of price supports, it is much less wholesome and constitutes a threat to the traditional family farm.

Under the price-support machinery as it has been functioning, price-support loans of tremendous size have occasionally occurred. It is not sound Government policy to underwrite at public expense such formidable competition with family operated farms, which are the bulwark of our agriculture.

I ask the Congress to consider placing a dollar limit on the size of price-support loans to any one individual or farming unit. The limit should be sufficiently high to give full protection to efficiently operated family farms.

5. RURAL DEVELOPMENT PROGRAM

In my message of January 11, 1954, I pointed out that the chief beneficiaries of our farm programs have been the 2 million larger, more productive farm units. Production on nearly 3 million other farms is so limited that the families thereon benefit only in small de-

gree from the types of programs that heretofore have dominated our activities.

On April 26, 1955, I transmitted to the Congress recommendations of the Secretary of Agriculture for attacking the problems of low-income farm families. The Congress has met only in part these recommendations for legislation and appropriations. Despite the resultant handicaps, the interest in this program has been so great that pilot work is already under way in well over 30 counties widely spread throughout the United States. There is activity now in more than one-half of the States.

Four Departments of the Federal Government—Commerce, Labor, Health, Education, and Welfare, and Agriculture—are actively at work on this program with State and local leadership to aid low-income farm families.

Not only the welfare of these families but also of the people as a whole require that this program go forward. Once again, therefore, I urge the Congress to enact the full program recommended in my message of April 26, 1955.

6. THE GREAT PLAINS PROGRAM

Between the prairies of the Central West and the Rocky Mountains is a vast area embracing all or part of 10 States, in which erratic climate, wind and water erosion, and special problems of land use constitute a continuing hazard. For more than a year intensive new studies of conditions and problems peculiar to this Great Plains region have been in progress. The work has been carried on cooperatively between the leadership of the 10 States involved, the Department of Agriculture and the Great Plains Council, which includes technical people from the States of the region. This study will help to define the respective responsibilities of individuals and local, State, and Federal agencies.

The proposed soil bank, with its acreage-reserve program to reduce promptly production of crops in surplus and with its conservation reserve program to take less productive lands out of crops, will meet in part some of the conditions especially serious in the Great Plains. Other desirable modifications of existing legislation include:

1. Provision for longtime cost-sharing commitments under the agricultural conservation program; and

2. Relaxation of planting requirements to maintain base acreage for wheat allotments.

Shortly I will transmit to the Congress a report containing certain recommendations for providing a more stable agriculture in this important region.

7. RESEARCH

Scientific research has been the means of fundamentally important developments both in agriculture and industry. It has resulted in improved quality, new and better techniques, new products, new markets, new high levels of material well-being for our people, and new horizons for our future. Most individual farmers are not in a position to carry on scientific investigations. Government has special responsibility in this area—and particularly is this the case since the benefits of research related to agriculture are widely shared by all the people.

Not only can research provide for the material needs of future generations, but it also can contribute in many ways to the fuller utilization of our present abundance.

We must look for new uses of agricultural products that can contribute to human welfare, such as livestock by-products for medicinal purposes or such as coarse fibers for construction materials already have contributed.

We must find new markets, as we have for tallow in industry or as have followed upon the development of frozen and powdered juice concentrates.

We must find new crops offering such new opportunities and benefits as are exemplified by soybeans and sorghums.

We must further improve our marketing mechanism, as already has been done through refrigeration and new processing techniques, so that the benefits of our abundance may be still more widely distributed. Marketing margins have continued to increase, even while farm prices have been declining. Thus the farmer's share of the retail food dollar has shrunk appreciably. Retail prices have changed little, thereby impeding desired increases in consumption. We must find ways to lower costs of food distribution. Research is an effective way to help attain that important goal. The Secretary of Agriculture is actively engaged in an expanded inquiry directed toward reducing the costs of distribution.

Our basic scientific knowledge from which all practical applications of science are made is vitally important and must be expanded. This knowledge is essential also to continue the attack on the ravages of plant and animal pests and diseases. We cannot use or reap benefits from what we do not know. A major frontier of agriculture lies in our laboratories and experimental fields.

In the budget message, I will request the maximum increase in agricultural research funds that can be effectively used next year with the technical manpower and facilities available. This will be an increase of one-fourth, to a total of $103 million.

8. CREDIT

In making the transition from war to peace, and similarly in making the investment adjustments associated with a dynamic agriculture, farmers are experiencing increased need for credit. This is especially true for young men, particularly veterans, who have started farming in recent years.

Private financial institutions, individuals, and Government agencies are furnishing credit for agriculture. Administrative, budgetary, and legislative changes now being developed in Government all point toward assuring adequate and sympathetic coverage of agricultural credit requirements, which cannot be met by private financial institutions.

Loans made by the Farmers' Home Administration have increased gradually during the past 4 years from $212 million to well over $300 million, and can increase further as the new provisions for insured loans become more widely used.

The Farm Credit Administration has been reorganized to give farmers a greater voice in its operation. Further legislation will be proposed to combine the Production Credit Corporations and the Federal intermediate credit banks. Federal land-bank loans made by the Farm Credit Administration have increased from $237 million 4 years ago to more than $400 million last year.

The administration is determined to see to it that an adequate supply of credit remains readily available to our farmers at all times.

9. GASOLINE TAX

One of the farmer's operating costs is the Federal tax on gasoline. About one-half of the gasoline bought by farmers is used on the farm. I recommend that legislation be passed to relieve the farmer of the Federal tax on purchases of gasoline so used.

Historically agricultural policy in this country has sought to foster family-sized owner-operated farms. This has been a sound and wise policy—not only in the development of an efficient agriculture which has become the envy of the world, but also in fostering a sturdy, resourceful, self-reliant citizenry.

Farm organization and farming operations are undergoing profound change as science and technology rapidly alter the structure of agriculture. Great care must be exercised that these changes do not result in huge corporation farms on the one hand or in unrewarding subsistence units on the other. The time-proven commercial family farm must continue as the basic social and economic unit of agriculture. Accordingly farm policy must encourage such farms, sufficiently large and productive to provide satisfactions in farm living equal to those enjoyed by other Americans.

Insofar as the problems of agriculture can best be solved by Government action, Government should accept the responsibility.

The proper role of Government, however, is that of partner with the farmer—never his master. By every possible means we must develop and promote that partnership—to the end that agriculture may continue to be a sound, enduring foundation for our economy and that farm living may be a profitable and satisfying experience.

Assisted by experienced farm people both in and out of Government, I have been earnestly studying this problem for many months. I believe that the 9-point program, set forth in this message, building on our present program, meets the urgent needs of our farmers today and does so in a way consistent with our basic traditions. It offers no nostrums or panaceas. Our farm folk expect better of us than to deal in that kind of specious practice.

Farmers expect programs that are forward looking, economically sound and fair.

This program offers a workable approach to reducing the surpluses, bringing production and markets into balance at fair prices, and so raising the income and advancing the security of our farm families.

Should this program be enacted, its degree of success will be dependent upon the degree of farmer participation and upon a common determination to work together in ridding ourselves of burdensome surpluses. With such a spirit, this program will speed the transition to a stable, prosperous and free peacetime agriculture with a bright future.

Again I urge upon the Congress the need for swift legislative action on these recommendations, in the interest of our farm people, in the interest of every American citizen.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 9, 1956.*

INTERFERENCE IN ADMINISTRATION OF CRIMINAL LAWS IN GEORGIA

Mr. LANHAM. Mr. Speakder, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANHAM. Mr. Speaker, on Thursday last, I and several of my colleagues made on the floor of the House the strongest possible protest to the action of the FBI in presuming to interfere in and thwart the administration of the criminal laws of the State of Georgia. The question at issue turned upon the question of whether or not Negroes were systematically excluded from the jury panels. I gave what information I had at the time about the situation in this respect in Cobb County. I did not, however, at that time have in my possession an editorial which appeared in the Marietta (Cobb County) Daily Journal on Sunday, January 1, 1956. This editorial is well reasoned and makes it perfectly clear that there was no earthly excuse for the interference by the Federal Bureau of Investigation and the United States Department of Justice with the administration of the criminal laws of the State of Georgia.

Consequently, I am including this statement herewith:

NEGROES SERVE ON OUR JURIES

Through an unfortunate series of coincidences, Cobb County seems to have become a temporary whipping boy for the Republican administration.

The Negro vote in several Northern key States can mean the difference between victory and defeat in a presidential election. The GOP is currently wooing that vote by kowtowing to the wishes of the NAACP as regards the Negro question.

Today, our Cobb jury system is under investigation by the United States Department of Justice. This probe originated in Washington as a result of the United States Supreme Court's decision in the Amos Reece rape case. We feel that the investigation has political overtones that smell to high heaven.

Undoubtedly there are counties in the South that still cling to the outmoded practice of excluding Negro citizens from jury service. Cobb County is not one of them.

For several years Negroes have served on Cobb County petit and grand juries. This newspaper has noted this fact with pictures of the Negro jurors and stories about their service.

We took justifiable pride in the knowledge that these Negroes became jurors through the efforts of local citizens and officials. No outsiders or Department of Justice agents ordered us to put Negroes on jury duty.

If one could examine our jury lists and distinguish the Negroes from the white (which is impossible unless you know the individuals by name), one would likely find a larger percentage of Negro jurors in comparison to Negro taxpayers than one might expect.

Cobb County has made great strides within the past few years to share the burden of jury service with our Negro citizens. This action was taken spontaneously, on the local level, without outside pressure or interference.

It is particularly galling, in the light of all this, to have Republican politicians cast a shadow on our administration of justice merely for political gain.

A column by the Alsop brothers which appeared in the Washington Post and Times Herald on Monday, January 9, 1956, throws light on the methods used by Mr. Brownell, the Attorney General, when it suits his political purposes, without regard for the persons or institutions slandered by his careless and unfounded charges and investigations.

I am including this article as part of this statement:

MATTER OF FACT

(By Joseph and Stewart Alsop)

DISGRACE ABOUNDING

The Japanese internment camp in Hong Kong was a fairly disagreeable place, in which public spirit was less common than the spirit of "devil take the hindmost." A small minority did the work of the community. The rest played the black market, or made a hobby of envy, or simply lost faith and abandoned hope.

In these circumstances, the small, determined, bearverlike man, who was to be seen busily trotting about on every work detail, was a not inconspicuous figure. He appeared to be, as indeed he was, dedicated to the public service. He was one of the real workers among the three hundred-odd Americans who were locked up in Stanley Camp along with more than 3,000 Britishers—the human refuse of a collapsed colonial society.

At gatherings of that dreary little camp's discussion group (which met in a patch of scrub under the shelter of the low pines to elude Japanese eyes) this brisk little man spoke up for a rather simple new deal view of the world. But he also showed far more sympathy for the problems of Generalissimo Chiang Kai-shek than the British colonial officials. And it was understandable, since he was an expert on the staff of the Generalissimo's Chinese Stabilization Board, on loan from the United States Treasury.

Such was William Henry Taylor when one of these reporters first encountered him in the grim winter of 1942. In Stanley Camp we had had our Communist agents—little, black-a-vised Izzie Epstein of the Sorge ring and his tall, blonde English mistress, who might have been very beautiful if she had ever washed. But they had escaped very early and with great bravery, one had to admit.

But poor Taylor stayed with the work detail until the Americans were exchanged. So when Taylor reentered the reporter's life some years ago, telephoning to ask for a letter to a loyalty board, it was easy to comply with his request. The reporter wrote that as far as he knew Mr. Taylor, the proceeding against him was a disgrace, not to Taylor, but to the Government of the United States.

It had been Taylor's bad luck to work in Harry Dexter White's department of the Treasury. For this reason he had been denounced by Elizabeth Bentley as a Communist agent. Originally, in answer to a question about the persons who passed Treasury documents to her, Miss Bentley declared that sometimes "it was William Taylor."

Later, she revised, or at least diluted, her testimony to read that she had merely heard from Nathan Gregory Silvermaster that Taylor was a member of the Communist underground in the United States Government.

Because of Miss Bentley, Taylor was first visited by the FBI in 1947. Thereafter he was called before four successive grand juries. He made three appearances before congressional committees (twice McCarthy and once McCarran). In the end, in 1953, his case was taken up by the international organization's loyalty board.

He went before this rather special board because, in 1946, he had left the Treasury for a job with the International Monetary Fund. Two successive Secretaries of the Treasury, John Snyder and George M. Humphrey, urged the director of the fund, Ivar Rooth, to fire Taylor without further quibbling. But Dr. Rooth had an old-fashioned Scandinavian sense of fairness. He awaited the board's verdict.

Having begun hearings in the autumn of 1953, and having closed the case in December of that year, the Loyalty Board rather oddly waited until the spring of 1955 to hand down its first verdict. The Board then advised Dr. Rooth that Taylor had been an active Communist spy. But in order to convince Dr. Rooth the Board had to be much more specific about the charges against Taylor than the regulations had allowed when Taylor was on trial.

The Board Chairman, Henry S. Waldman, of Elizabeth, N. J., admitted as much to one of these reporters. Waldman explained that the first verdict against Taylor had revealed to Taylor's courageous lawyer, Byron Scott, what might be needed to prove Taylor's innocence. Taylor immediately applied for a rehearing. His request was granted. And now, only a little more than half a year after the first terrible verdict that he was an active and conscientious Communist spy, the same international organization's Loyalty Board has held that there "is no reasonable doubt" as to the loyalty of William Henry Taylor.

The courage and fairness of the Loyalty Board, in thus admitting its own hideous error, cannot be overpraised, but what about the testimony of Miss Bentley, who started the whole business? What about the Government preparation of the case against Taylor, which was a mass of smears and poison-pen letters, by the Loyalty Board's own final verdict?

And what about Attorney General Herbert Brownell, Jr., who had the responsibility for the preparation of the Government case?

Brownell publicly renounced Taylor as a spy on the basis, apparently, of the cheap, trumped-up stuff that the Loyalty Board has now decisively thrown out of court. What has he to say now? These are questions that have to be answered if American justice means anything at all.

PRESIDENT'S AGRICULTURAL MESSAGE

Mr. ABERNETHY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ABERNETHY. Mr. Speaker, we have just heard read 14 pages, legal size

and single spaced, of a message from the President of the United States. It is quite different from the type of message we have received in the months and years gone by, regarding agriculture.

This 14-page message, Mr. Speaker, represents an admission on the part of the administration that its farm policies for the past 3 years have been an utter failure. It makes one other admission, that the administration is going all out to buy the American farmer in an election year.

The thing which has moved Benson into action is not the disastrous situation confronting farmers. Politics forced him to move.

This is a big election year. It was politically expedient for him to move and so he has moved. If he had his choosing he would stick with what we have and no more.

He and the President and their followers have been insisting for months and months that there was nothing wrong with agriculture. Time and again they have claimed that things were leveling off and that we were moving in the right direction. It was only after farm income reached depression levels under their leadership, plus an early approaching election day, that they have moved to act. They are trying to buy farmers off on an election year. But they will find out that the farmers cannot be bought.

So, of course, everyone, including the farmers, will view with suspicion their purposes and also their recommendations.

Farmers and all of us well remember their promises made 4 years ago. They talked about 100 percent of parity at the market place and a free agriculture. Under them things would be different. Indeed they were—and how. Their promises were promptly broken and rebroken again and again. In fact they were never thereafter considered. Controls are still with us and Benson has not until this good day, even in the present recommendations, sought the repeal of one single element of the controls on cotton, wheat, and some other basic crops.

No immediate relief can come from this program. It is too little and too late to be of help in 1956. Agriculture's immediate problem is surpluses. Immediate relief can come only from immediate disposition of the surpluses. Benson and the administration have ample authority to get rid of them but they refuse to act.

THE LATE MARTIN P. DURKIN

Mr. MURRAY of Illinois. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MURRAY of Illinois. Mr. Speaker, Martin P. Durkin, a distinguished public servant and one of the Nation's most outstanding labor leaders, died on November 13, 1955. His passing is an irreplaceable loss to the people, to the labor movement which he represented, and to his many friends.

Martin P. Durkin, for many years a resident of my district in Chicago's southwest side, was born in the back-of-the-yards district of Chicago on March 18, 1894, the son of Irish immigrants. From this neighborly district have come some of our greatest political leaders, our best industrial leaders, our most notable labor leaders. Martin P. Durkin occupies a lofty place among their ranks. His father was an ardent trade unionist who, during his early employment labored 12 hours a day, 7 days a week, for the meager earnings of $2 a day. Martin Durkin attended grammar school at Visitation parochial school. Being the eldest of eight children, he was required to go to work after the eighth grade to help support his family. He became an apprentice steamfitter in 1917. While working at his trade, he attended night school to further his education.

He served in World War I, and, subsequent to his service in the Army, resumed work in his chosen trade and became increasingly active in union affairs. In 1921, he became assistant business manager of the Steamfitters Protective Union of Chicago, Local Union No. 597. During his tenure as assistant business manager of this local union, he increased his participation in civic affairs, serving upon many Chicago local municipal boards and commissions. He was elected vice president of the Chicago Building Trades Council in 1927.

In 1933, during the depths of the depression, Gov. Henry Horner appointed Martin Durkin director of labor of the State of Illinois. It was as a result of his efforts as director of labor of the State of Illinois that that department became a model of State departments of labor throughout the United States.

To Martin Durkin belongs a great deal of the credit for passage in Illinois of a minimum-wage law for women and children, an 8-hour law for women, a law establishing the public employment service and providing for unemployment insurance. He assisted in securing improvements to the State workmen's compensation law.

The late Governor of Illinois stated that Martin Durkin's appointment was the best he ever made. Mr. Durkin continued to serve as director of labor under Governor Stelle and Governor Green. Probably the best recognition of his stewardship as director of labor is typified by a story that is told in and about Chicago. As the story is related, Gov. Dwight Green a Republican, requested State labor officials to name three candidates whom they felt might be appropriate to succeed Martin Durkin, a Democrat. The officials of the State labor organizations replied with these names: First, Martin P. Durkin; second, Martin P. Durkin; and, third, Martin P. Durkin.

Subsequent to his tenure as director of labor, Martin Durkin was elected general secretary-treasurer and later president of the United Association of Journeymen and Apprentices of the Plumbing and Pipefitting Industry.

In addition to his union duties, during World War II, Martin Durkin was designated American Federation of Labor member of the National War Labor Board.

In 1953, Mr. Durkin accepted a request of President Eisenhower to become Secretary of Labor. His appointment as Secretary of Labor was considered by many who did not know him as a surprise because he had been noted throughout his life as an outspoken Democrat and had favored the President's opponent, Adlai E. Stevenson, in the prior election.

To those who knew Martin Durkin, his appointment as Secretary of Labor was the best Cabinet appointment the President has made. Martin Durkin's career as Secretary of Labor, though shortlived, was characterized and ended upon a question of principle to which he had adhered throughout his life. He explained his resignation simply as: "Adherence to an agreement was a matter of principle with me and I could not disregard my principles at this late date in my life."

A statement of the sterling qualities and characteristics of Martin P. Durkin is beyond the capacity of this speaker. However, it was eloquently and most beautifully portrayed in the sermon at the funeral of Martin P. Durkin by the Very Rev. Msgr. George G. Higgins at the Church of the Little Flower in the district which I represent in Chicago, held on November 18, 1955.

With the permission of this House, I would like to quote this sermon:

SERMON AT THE FUNERAL OF MARTIN P. DURKIN BY VERY REV. MSGR. GEORGE G. HIGGINS, CHURCH OF THE LITTLE FLOWER, CHICAGO, ILL., NOVEMBER 18, 1955

"My son, do thy works in meekness, and thou shalt be beloved above the glory of men.

"The greater thou art, humble thyself the more in all things and thou shalt find grace before God.

"For great is the power of God alone, and He is honored by the humble." (Ecclesiasticus, III 19–21.)

Meekness is a word which is seldom used nowadays as a compliment except in the Lives of the Saints and in the literature of devotional or ascetical theology. The word has been drained of all its manly strength and vigor until today it is widely regarded as a synonym for weakness rather than 1 of the 7 Beatitudes to which our Lord Himself attached an infallible guarantee. "Blessed are the meek," He told us in His beautiful Sermon on the Mount, "for they shall possess the earth." I dare say that most of us find this difficult to understand. Blessed are the merciful—yes. Blessed are the clean of heart—yes. By the mercy of God, even the lecher in his heart of hearts and in his faltering moments of repentance knows this to be true. Blessed are they who hunger and thirst after justice. This, again, we can understand, to some extent at least, on the basis of our own experience.

But meekness is something else again. Somehow or other, meekness, as the word is commonly used in the vernacular, seems to suggest a certain lack of character. It brings to mind a Milquetoast, a likable weakling who is easily pushed around, or, an unlikable hypocrite like Dickens' Uriah Heep, who bows and scrapes to curry favor with his superiors whom, of course, he secretly despises.

We seldom, if ever, associate the quality of meekness with a man who has attained eminent success in the competitive rough-and-tumble world of business or labor or politics. These men are publicly esteemed as men of character and strong convictions who will brook no opposition when they are convinced that what they are doing is good for the cause. We hardly ever hear them characteried or described as being meek; for this would imply to many people that they were also weak—and a weak leader, of course, is almost a contradiction in terms.

Our good friend Martin Durkin was a notable exception to this rule. He was one of the strongest characters I have ever known, a man of extraordinary physical as well as moral courage, a man with an iron will and unusual tenacity of purpose, a man of dogged perseverance and persistence. And yet almost every major article that was written about Mr. Durkin during his brief term of public office in Washington paid him the richly deserved compliment of saying that he was preeminently a man who, in the words of Ecclesiastes, did his work in meekness. One of his biographers put it very well, indeed, when he said: "If I were pressed to say what I have learned from Martin Durkin, it would be that I think I understand a little more completely what the word 'meek' means, as used in the Bible. It doesn't mean groveling in your relations with others, or thinking yourself unworthy in comparison with them; perhaps it just means not thinking about yourself at all." Another biographer referred to Mr. Durkin as a man of great patience and profound calm. Still another said that he had never raised his voice in 30 years, to which he added, "except, of course, in prayer."

"Except, of course, in prayer." This little footnote was more than an incidental postscript or a casual afterthought. Constant prayer was the very center of Mr. Durkin's exemplary life, the secret of his sterling Christian character. It was the source of his many virtues—his meekness, his courage, his dogged devotion to duty, his never-failing courtesy, his extraordinary patience and his ability to "suffer fools gladly," his uncompromising sense of justice, his profound respect for women, his tender love of children, and, above all, his unassuming personal charity, the extent of which even his family and his closest friends can only roughly estimate.

Frequently during the past 15 years I had the privilege of spending a few hours with Mr. Durkin and his devoted family in the company of other priests. Some of those priests are here this morning for his final obsequies. They will bear me out when I say that we invariably came away from those little family gatherings saying to ourselves in all sincerity and with deep humility that there was a man who could put us all to shame when it came to personal prayer and the worship of Almighty God. He was truly an inspiration to all of us, and I like to think that by the grace of God we are better priests—more prayerful priests—for having been privileged to know him.

Many times in recent weeks during his lingering illness in Georgetown Hospital in Washington we have heard his lay associates say the same thing about the influence of his example upon their own lives. They were thinking of the fact that they never knew him to miss daily Mass and Communion even on the busiest day of the most hectic union convention. They were thinking of his frequent spiritual retreats. They were thinking, too, of the fact that they had never heard him say a word, either publicly or privately, which would have been embarrassing even to the most innocent child or offensive to the most refined and sensitive woman. Some of those who knew him longer than the rest of us were probably thinking that his patience and his meekness, his profound calm and self-possession were the result of intensive self-discipline, the result of constant prayer and mortification—for, unless I am badly mistaken, his natural temperament was rather brusque and fiery. He had the strong face of a man who had had to struggle, with the help of God's grace, to learn the manly art of self-control. He learned it very well indeed.

Under ordinary circumstances it would be contrary to Catholic practice and tradition to eulogize the deceased in such effusive terms, but I think you will agree with me that these are not ordinary circumstances. Mr. Durkin was an extraordinary man, and deserves to be honored as such for the consolation of his family, to which he was so tenderly devoted, but, even more important, for the inspiration of his associates in the labor movement, which he loved more than anything else in the world with the exception of his God, his family, his country and his church. Maybe there is a better way of stating that. Perhaps it would be more accurate to say that he loved the labor movement so much and served it so well for the better part of his life precisely because he regarded it as a necessary bulwark of the family and the flag and because he knew it to be the normal means of putting into practice in his working life the principles of justice and charity which were handed down to him by the church to which he was so passionately devoted.

It would be presumptuous on my part and completely superfluous to go into detail about Mr. Durkin's long and distinguished career in the American labor movement. The record speaks for itself and is known to everybody in this church. Suffice it to say that he brought to his work in the labor movement, in addition to a deep sense of justice, which, of course, is fundamental, a spirit of personal charity, which is equally important but for most of us, I should think, much more difficult to acquire and to put into practice. One of his biographers tells us, for example, that during the depression years in Chicago unemployed members of his local union would show up at his home every evening, silent, worried, depressed men. Mr. Durkin gave them more than encouragement. Out of his personal income he gave them food and the other necessities of life to tide them over the crisis. This was characteristic of the man.

The story of his personal charity during his 15 years in Washington is an inspiring legend. One of the reporters tells the story very simply:

"Years ago, Mr. Durkin decided, without saying much about it, always to keep some poor family under his wing. But it occurred to him merely to write a check, giving up only the cash and a moment out of his day, was an act without significance, so he buys food for his protege family in person. Once a week he turns up at a Washington market and walks among the counters, thoughtfully assembling a basket of groceries. When his current poor family includes small children, he confers with his wife or daughters-in-law about what sort of baby food to buy. Collecting groceries for folks who need them is a pleasant occupation for Durkin, but collecting thanks is not. So when he has made up his bundle of groceries, he usually sends it over by one of his sons or a messenger. When one family graduates to solvency, through recovery from illness or a new job, he looks about for another family, sometimes asking a priest to scout one for him."

As well as I knew Mr. Durkin over a period of 15 years I have never heard him mention this weekly act of private charity, and I never would have known about it if the reporters hadn't ferreted out the story and publicized it so widely at the time of his appointment to the President's Cabinet.

I mention Mr. Durkin's personal charity to point a moral for his associates in the labor movement and for all of us who are connected in any way with movements of social reform. Pope Pius XII reminds us in one of his recent statements that "The greatest temptation in an age that calls itself social—an age in which, besides the church, the State, the municipalities, and other public bodies are devoting themselves to so many social problems—is that when the poor man knocks on their door, people, including the faithful, may simply refer him to an agency, a social center or to some organization, in the belief that their personal obligation has already been fully satisfied by their contributions in taxes or in voluntary offerings to those institutions.

"Undoubtedly," the Holy Father continues, "the poor man will receive your help in this latter way. But often he counts also on you yourself, at least on a word of kindness and comfort from you. Your charity ought to resemble God's, who came in person to bring His help. This is the meaning of the message of Bethlehem."

The moral is obvious. Our charity "ought to resemble God's, who came in person to bring His help." This, it seems to me, is one of the lessons, one of the many lessons, we can learn from the example of our distinguished friend, Mr. Durkin, and one which is very timely. The personal approach, which has always characterized the greatest of our labor leaders—a Gompers, a Murray, a Green—is more important than ever before as we approach the long-awaited merger of the American Federation of Labor and the Congress of Industrial Organizations. Labor unity can be and, in our opinion, will be good for the country and good for the cause of labor. On the other hand, honesty compels us to suggest that a unified labor movement could also be a detriment to the cause of labor if, because of its very size, its very bigness, it were to sacrifice the personal charity and personal concern, for the particular and peculiar needs and problems of individual men and women ought to go hand in hand with better organizational techniques and better legislation, which, of course, are also indispensable.

There is a further lesson to be learned from Mr. Durkin's granite-like integrity. He was a man of his word. He said what he meant and meant what he said. As a general rule, he said it very calmly and very gently, but when he had said it, you knew that he could not be persuaded or induced or frightened into going back on his word by any amount of pressure or flattery or cajolery even from his closest friends. There was a quality of fearlessness and quiet strength about the man which even the toughest gangsters must have learned to respect in the early days in Chicago when they were trying to capture his local union. At that time, as one of his friends has pointed out, he didn't get the least bit exicited; he merely prayed a little harder.

We are back again to prayer—the key to Mr. Durkin's sterling Christian character and the explanation of his remarkable self-possession which revealed itself externally in a very warm and very friendly smile even when things were not to his liking. As one of the Catholic weeklies pointed out at the time of his resignation from the Cabinet, the remarkable self-possession of Mr. Durkin, always the calmest person in the political storms that raged around him, was the result of his application of religious principles to his whole life. This attitude, it was rightly suggested was epitomized to his response to the question of a reporter at the time of his resignation as to why he seemed so happy. "I'm always happy," Mr. Durkin quietly replied. Those who knew of his strong religious faith, the article concluded, will already understand the reason for his enigmatic contentment and happiness even amidst the most difficult circumstances.

This, of course, was an exaggeration. Mr. Durkin wasn't always happy, and thanks to his extraordinary deep religious faith, he knew that he was never meant to be perfectly happy in this vale of tears. Even as a little child, he learned from his God-fearing parents, who incidentally must have been the very salt of the earth, that God made him to know Him, to love Him, and to serve Him with all his heart and soul in this life and to be happy with Him forever in the next. It was this sense of realism, grounded in supernatural faith in God and supernatural hope in a life of perfect happiness to come, which made it possible for Mr. Durkin to face up so calmly and with such manly courage to the inevitable fate which he must have known awaited him after his second operation. I am sure that I speak for all of you as well as for myself when I say that I hope and pray that you and I will be as well prepared for our own death as he was for his.

It was this same sense of realism which enabled Mr. Durkin to keep a sense of humor and to see things in perspective in the midst of his tireless efforts on behalf of social justice. It was this which made it possible for him to keep his feet on the ground. Pope Pius XII tells us in a recent allocution that men are obliged, as Christians, to take an active interest in social reform and social reconstruction. "However," he hastens to add, "man whom God created and redeemed cannot keep his feet on the ground without keeping his eyes raised toward God, toward the real end of human life, namely, union with God in heaven, where alone all order and all justice will definitely be achieved.

"Therefore," His Holiness concludes, "those men, who in thought or in action, give themselves completely to this world, or who even deny the existence of the heavenly home have no solid foundation even in this world, even though externally they may seem to have one or may themselves boast of their alleged realism."

Mr. Durkin was able to keep his feet on the ground because he always kept his eyes raised toward God, toward the real end of human life, namely, "union with God in Heaven, where alone all order and all justice will definitely be achieved." May his passing remind us that we, too, must give an accounting of our stewardship in the not too distant future, and may his example of unselfish and religiously motivated service to the cause of humanity be an inspiration to those of us who are left behind to carry on the work of social justice.

If Mr. Durkin could have read the manuscript of this sermon before it was delivered, he would have asked us to eliminate everything which we have said up to this point and to confine ourselves exclusively to an earnest appeal for your continued prayers for the repose of his immortal soul. He was very conscious of his faults and imperfections. His frequent recourse to the sacrament of penance was eloquent proof of the sincerity of his deep feeling of unworthiness and his lively sense of absolute dependence upon the infinite mercy of Almighty God. In his name, therefore, we ask you in conclusion to remember him constantly in your masses and prayers so that he may be summoned as soon as possible to the reward which God Himself has promised to those who do their works in meekness.

"My son, do thy works in meekness, and thou shalt be beloved above the glory of men. The greater thou art, humble thyself the more in all things and thou shall find grace before God. For great is the power of God alone, and He is honored by the humble."

It is not for us to judge either the living or the dead, but surely we can say with full propriety that God was honored by this humble man and that we, his friends and associates, were privileged beyond our just deserts to have known him personally and to have benefited from the example of his thoroughly Christian life. May his soul and the souls of all the faithful departed through the mercy of God rest in peace. Amen.

Martin P. Durkin is survived by his wife, Anne H. MacNicholas Durkin, and his three sons, Martin B., William J., and John F. Durkin, to all of whom I extend my deepest sympathy.

I conclude my remarks with the prayer that the principles which guided Martin Durkin's life may now guide ours in legislating for the welfare of the people whom we represent.

TRAFFIC AND HIGHWAY SAFETY

Mr. FRIEDEL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. FRIEDEL. Mr. Speaker, on Tuesday, January 3, I introduced House Resolution 349, which provides for the appointment of a select committee of five members to conduct a study and investigation of traffic and highway safety. This committee is to recommend suitable legislation to achieve the desired objective.

About 6 weeks ago, a Baltimore inventor, Mr. Charles Adler, Jr., sent a telegram to the President proposing the creation of a new Cabinet post of Secretary of Traffic. It is because of my great concern about this urgent matter that I am introducing this measure. In drafting it, I was careful to provide that the rights of the States should not be infringed.

The alarming and appalling accident rate and death toll, with the consequent economic losses, constitute daily and constant proof of the need of Federal legislation. The solution of the problem may lie in the creation of an agency, rather than in the creation of a Cabinet or sub-Cabinet post, but under the circumstances immediate action must be taken.

Headlines all over the Nation tell a tale of road slaughter over the Christmas holidays. These headlines are a gruesome confirmation of the worst fears expressed by me 6 weeks ago.

Last year alone, there were nearly 10 million traffic accidents in our country. Every 25 seconds someone was injured; over 36,000 people were killed, over 1,250,000 were disabled beyond the day of the accident. Last year, traffic accidents alone cost over $4.4 billion; the losses in wages came to a towering $1.2 billion; the medical expenses hit $100 million. The economic loss is truly staggering. Economic loss, however great, is secondary to loss of life and limb. A human life lost can never be replaced. Surgery and medicine, with all of their miracles and wonders, cannot make whole again the maimed and the crippled. The protection and the safety of human beings should be our first concern.

The stark tragedy wrought each day by the automobile is a national shame. The motor vehicle is an integral part in the life of each and every American family. It is a vehicle for commerce and it is a vehicle for pleasure. It takes citizens to and from their daily tasks. Our Nation is truly a nation on wheels. The automobile is a vacation vehicle for many millions of Americans. It can be, and it ought to be, a boon. The tragedies that are occurring on our streets and highways every day of our lives are not necessary. I am convinced that the genius of America, concentrated on this problem under unified direction, can eliminate the death and hazard from our highways.

At the present time, traffic safety is the responsibility of many unrelated agencies at local, State, and National levels. Each agency, department, or bureau has a more or less limited interest or responsibility for some particular phase of traffic safety. And we know that there are many official and even nonofficial agencies which prepare statistics, marshal public opinion and develop programs of education for traffic safety. All of this is illustrative of the saying that, "That which is the business of everybody is the business of nobody." In other words, there must be some central coordinating agency with authority which can utilize and bring together the work and efforts of all of the fine, splendid officials—and volunteer agencies—now working in the field of traffic safety. I could cite a parallel instance in government. Each State—and many local governments—have pure food and drug sections. However, it was not until the Federal Pure Food and Drug Act, with its administrative and enforcement Agency, that protection of the citizen against impure and toxic foods, drugs, and substances was assured. Today, the Pure Food and Drug Agency of the Federal Government works closely with the State and local agencies for the protection and well-being of all our citizens.

Establishment of a Federal agency to cope with the problem of traffic safety need not, and will not, displace or interfere with States rights and local governments in their diverse efforts to cope with the problem. It will assure to them, however, cooperation, coordination, and sanction, where necessary, at Federal level, to accomplish that result which we all devoutly desire—minimum loss of life on the streets and highways of our Nation. It is obvious that all of our good wishes and intentions in establishment of the many and unrelated agencies in the field of traffic safety have been unable to cut down the slaughter of our citizens which is taking place daily on our streets and highways.

I do not believe that we can wait any longer. The President of the United States displayed his concern on this subject when he proclaimed an annual Safe-Driving Day. By his action he left no doubt but that there is a Federal concern and a role that the Federal Government ought to play in attempting to check the daily massacre of our citizens by motor vehicles plying our streets and highways. I do not believe that we can any longer afford to engage in wishful thinking and pious hopes. Affirmative action setting up an agency with authority and the power of

sanction is the only answer to this menace on the highways.

Therefore, I respectfully urge your support of House Resolution 349.

RECOMMENDATIONS OF THE SECOND HOOVER COMMISSION

Mrs. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mrs. CHURCH. Mr. Speaker, I am today introducing 12 bills which embody further suggestions for the implementation of certain recommendations of the second Hoover Commission.

The House may remember that on last July 13, at the time that I introduced the first 50 bills suggested for such fulfillment of the recommendations of the second Hoover Commission, I stated that I was glad to take this action because of the continuous and signal interest of constituents of the 13th District of Illinois in both Hoover Commissions and, also, in their findings; and, because, as a former member of the Committee on Government Operations, all proposals and actions on executive and legislative reorganizations have consistently held my signal interest.

I would like to repeat today, however, what I then stated; that my introduction of these bills does not necessarily mean in every case, complete agreement either with the proposal or with the suggested implementation. In some instances, I, personally, may possibly find good reason for objection. These proposals, however, and the supporting legislation, merit the prompt and serious consideration of the Congress. I am accordingly introducing the measures—and shall continue to do so as others are prepared—in order that the proposed legislation may be placed before the appropriate committees for study and, in particular, be brought to the attention of every House Member.

PROPOSED FEDERAL ESTATE TAX INSURANCE

Mr. YOUNGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. YOUNGER. Mr. Speaker, I am today introducing a bill relating to life insurance taken out to cover estimated liability for the Federal estate tax.

The purpose of this bill is to permit an individual to anticipate his Federal estate tax by taking out a life insurance policy payable to the United States, the proceeds of which will not be considered as a part of the corpus of the estate.

An individual can indirectly accomplish this purpose under the present law by taking out a policy on the life of his child, with an agreement with the beneficiary of the policy that the proceeds of the policy will be used to pay the estate tax. This bill if enacted would permit the taxpayer to do directly what he is now permitted to do indirectly.

Many estates are tied up in family owned corporations or businesses, and upon the death of the head of the family, the heirs are frequently at a loss to raise the necessary amount to pay the Federal estate tax unless they sell an interest in the family business or encumber the business with what might be a crippling debt.

The enactment of this legislation, in my opinion, will not deprive the Federal Government of any tax, but on the other hand will stimulate a lot of life insurance business from which the underwriters and companies will pay increased taxes into the Government.

INAUGURATION OF PRESIDENT TUBMAN

Mrs. FRANCES P. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. FRANCES P. BOLTON. Mr. Speaker, Liberia has been celebrating the third inauguration of William V. S. Tubman as President. The confidence expressed in him at the last election makes possible the continuation of an administration which appears to have more sincere desire to raise the standard of living of the Liberian people and greater capacity to do so than did earlier administrations. President Tubman has exceedingly difficult problems crying for solutions, problems which are far more complex than can be solved overnight. He will need to feel here in the United States we are sympathetic and understanding.

The people of Liberia are to be congratulated in the decision they made to make possible another tour of duty for their President.

The United States sent over a very fine group to represent this country at these celebrations. This fact alone will be of real assistance to Liberia, for they look to us in more ways than most Americans know, not the least of which is the approval of their efforts. It is with pleasure that I list the members of the United States delegation to the inauguration of President Tubman of Liberia:

The Honorable Richard L. Jones, United States Ambassador to Liberia, as personal representative of President Eisenhower and with the rank of Special Ambassador.

The Honorable Robert W. Upton, former United States Senator, as personal representative of President Eisenhower and with the rank of Special Ambassador.

Lt. Gen. Leon W. Johnson, commander, United States Continental Air Command, as special representative of the Secretary of Defense and Armed Forces of the United States.

Mrs. Jessie L. Vann, publisher of the Pittsburgh Courier.

Mr. Asa Timothy Spaulding, vice president of the North Carolina Mutual Life Insurance Co.

Mr. Garfield I. Kass, Washington realtor.

Advisers to the delegation were:

Mrs. Thomas W. Simons, counselor of the United States Embassy in Liberia.

Brig. Gen. Harold H. Twitchell.

THE RULES OF THE GAME

Mr. HILL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, in every type of contest, friendly or otherwise, that we Americans engage in, there is a basic set of rules or procedures that govern the conditions under which the contest is run. Sometimes they are written—often they are established by custom, but they always exist. To challenge the rules under which the game is played is usually resorted to by the losing side to cover up or alibi for their loss.

I was amazed to read in the RECORD of last Thursday where one of my colleagues who serves on the Committee on Agriculture took violent exception to the Republican members of the committee meeting informally with Secretary Benson prior to the submission of the state of the Union message to Congress. We Republicans are accused of all sorts of dire political shenanigans.

Apparently the rules of the game are being challenged. I have been in this Congress more than 15 years, and I cannot count the number of times that my Democratic friends have met with Cabinet officers in similar circumstances without inviting the opposition.

It might be interesting to note that several of us had asked the Secretary for an audience. He countered with the suggestion that all of us get together to discuss mutual problems. We took advantage of his offer and that accounts for the breakfast.

I would suggest that had the gentleman, and those on his side of the aisle, made a similar request he, too, would have had a free breakfast with the Secretary. In fact, I have an idea that the gentleman and his Democratic colleagues on the committee will be invited to meet with the Secretary whether they initiate the move or not. Of course, I doubt if the gentleman will attend such a gathering since he so violently disapproves of partisan gatherings. That is his privilege.

But let us not forget that similar meetings have been held many, many times in the past by both parties and we Republicans will continue to meet with Cabinet officers any time we have problems to discuss with them.

THE SOIL BANK PROPOSAL

Mr. HARVEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HARVEY. Mr. Speaker, the President's message was an excellent

one and dealt with the problems of agriculture positively and constructively. It is apparent that any approach to their solution must be aggressive. The soil bank proposal will, if enacted, provide a strong treatment for the burdensome surpluses. These surpluses must be removed by direct action before our farmers can enjoy prosperity. In a later statement, I will discuss some of the details of the President's message.

SHORTAGE OF NEWSPRINT SUPPLY

Mr. SPRINGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SPRINGER. Mr. Speaker, tomorrow morning there will be a meeting of the Subcommittee on Commerce and Finance of the entire Committee on Interstate and Foreign Commerce to hear the representative of the Department of Commerce and others on the newsprint-supply situation in the United States. I am sure that almost every Member of this body is acquainted with the critical situation in the suppy of newsprint.

I know that this subcommitee, through its chairman, Mr. KLEIN, will delve thoroughly into this situation in order to understand why many companies are not fulfilling their contracts with the newspapers of this country while these same companies are allowing their newsprint to appear on-the-spot market at prices almost 40 percent more than the prices contained in contracts with newspapers. Some of the large companies supplying almost 75 percent of the newsprint of this country have indicated that they will not make up for their failures to comply wtih their contracts in 1955. In addition, they have notified most of their customers that they intend to cut back 7½ percent on their contract for 1956. All of this has been taking place while their same paper is appearing on what I would term "the gray market" at tremendously increased prices.

In normal times the spot-market price would be somewhat below the contract prices between the newsprint company and the newspaper. Today in the Middle West the ordinary contract price between the newsprint company and the newspaper is around $130 to $140. In spite of this the spot-market operator is sending out letters like the folowing:

> Gentlemen, we are looking ahead for 1956 as newsprint is getting very scarce and prices are going up. We suggest, in the event you should require additional tonnage for the year, we want to offer our services to you in purchasing your requirements.
>
> We would like you to let us know ahead of time the sizes you use, so that we can scout around this market to get you newsprint at a low price, instead of paying very exorbitant prices on short notice when you need it.
>
> We promise you that at all times we will deliver to you the finest quality of newsprint, in the proper size that you use, as we did in the past.
>
> Please advise us immediately if you are interested for immediate or future delivery and we will quote you our lowest price.
>
> P. S.—Canadian or American.
>
> Immediate shipment 2 carloads, between January 2 and 10.
>
> Sizes: 15-, 15½-, 16-, 30-, 31-, and 32-inch Canadian.
>
> Wire immediately if interested.

You will note that in this letter he does quote his prices. However, newspapers in the Middle West who have contacted these kind of operators find that the going price today is about $210. There is a rumor now in the Chicago-Detroit area that the gray-market price is to be increased to $220.

I think it is apparent to any reasonable observer that when legitimate newspapers cannot get newsprint at contract prices and when apparently gray-market paper is available in almost any quantities for 40 percent more in price, something is seriously wrong in the newsprint industry.

Letters similar to the one I have indicated above are being sent out in great numbers by the spot-market or gray-market operators, indicating that paper in almost any amount can be bought providing the newspaper is willing to pay the gray-market price. From figures I have at this time from the American Newspaper Publishers Association, the four large newsprint companies last year made excellent dividends. In addition these companies within the past few months have increased prices $10 per ton.

It would appear to me at this time that there is concerted effort at price-fixing in the newsprint field. I am hoping that a determination of this question will be made in these hearings beginning tomorrow. If there is violation of the law either by the newsprint companies or the spot merchants, this matter should be referred to the Attorney General's office for whatever action the evidence justifies.

LOW-INTEREST CREDIT FOR FARMERS AND LIVESTOCK PRODUCERS

Mr. FERNANDEZ. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. FERNANDEZ. Mr. Speaker, I am disappointed that the President did not recommend long-term, low-interest credit for farmers and livestock producers, which is sorely needed. We had legislation to that effect introduced last year but it was not acted upon, because of opposition on the part of the Department of Agriculture, notwithstanding that they admitted emergency conditions in at least two States, my own State of New Mexico, and Florida. They indicated to us at the time that they might recommend passing such legislation at this session if conditions were not alleviated. They have not been alleviated. On the contrary the emergency need has spread beyond New Mexico and Florida.

I hope the Committee on Agriculture will take up for further consideration the legislation we introduced last year.

PRICE SUPPORT CEILING

Mr. POFF. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. POFF. Mr. Speaker, the big farm operator has grown fat on the farm price-support program at the expense of the little farmer. The big farmer sells his crops to the Government, either by direct sales or be defaulting on price-support loans. The little farmer consumes his crop on the farm and often has to buy additional feed and seed from the big farmer at subsidy-inflated prices.

The big farmer's abuse of the program has been shockingly expensive. In 1954, the Delta & Pine Land Co., of Scott, Miss., which operates a 38,000-acre farm, received a price-support loan on cotton totaling $1,292,472.25. Another cotton farmer received $814,801, and still another $624,754. The Campbell Farming Corp., of Hardin, Mont., received a wheat loan in the sum of $430,691 on 209,000 bushels of wheat. Thirty-seven individual farm operators received loans in excess of $200,000 each on 1954 crops of wheat, cotton, and rice, and another 16 farmers received in excess of $100,000 each. These are the farmers who have piled up $7 billion worth of price-depressing surplus commodities in Government warehouses at a storage cost of a million dollars a day. They have been the beneficiaries and the little farmers the victims.

In an effort to protect the little farmer and the taxpayer from such abuses, I have today introduced a bill placing a support money ceiling of $25,000 on each basic crop raised by a farm operator, whether that operator be an individual, partnership, or corporation.

This bill would tend to discourage the overproduction of unneeded crops, bring the supply more nearly in balance with demand and help to stabilize the price in the market place. The annual savings realized could be used in basic agricultural research, soil and water conservation, development of new commodity uses and expansion of domestic and foreign markets for the benefit of all farmers, big and little alike.

PEANUTS

Mr. BONNER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BONNER. Mr. Speaker, I presume that the message on agriculture was prepared for the President by the Department of Agriculture. If the entire message is as inconsistent as that portion dealing with peanuts, then no one can depend on the message.

Only last year the Department of Agriculture, at the behest of the confectioners and candymakers, appeared before the Tariff Commission and asked

that the tariff on peanuts be temporarily lifted, stating that there were not enough peanuts under the program produced in America to supply the market. Here in this message the President recommends eliminating the provision of minimum national acreage. Where is consistency in this particular case? I would like for someone to tell me.

THE PRESIDENT'S FARM MESSAGE

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, we have waited patiently for the message we have just received from the President and I am certain that all of us are interested in the message which has just been presented.

As chairman of the House Committee on Agriculture, I would like to say that it is my purpose now to call a meeting of our committee for 10 o'clock tomorrow morning for the purpose of considering every part and parcel of the President's message pertaining to agriculture.

I want to conclude by saying that during the entire time I have served on that committee, and I have served on the committee for more than 20 years, it has been my purpose to keep partisan politics out of our deliberations; and that has been true with reference to all chairmen under whom I have served from Marvin Jones up to the present time. I am certain our committee will give careful consideration to this message and I hope it may be considered without regard to partisan politics.

Mr. MATTHEWS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. MATTHEWS. Mr. Speaker, along with other Members of the House I listened with a great deal of interest to the President's message on agriculture. It seems to me that one of the most important problems in my district at the present time is without a specific solution, and that is, How can the farmer get his full share of the consumer's dollar?

As you know, the Secretary of Agriculture has announced that the farmer this month will get 39 cents out of each consumer's dollar spent for agricultural commodities. I listen at times with a great deal of pleasure to one of my colleagues on the other side who talks about the prosperous farmer with a ham under each arm. I want to say to you here this afternoon that is about the only place the farmers in the Eighth Congressional District of Florida can put the wonderful hams they produce, because they are getting less than production cost.

I hope that during our consideration of this problem we can come out with some system fair to the consumer, fair to the taxpayer, and fair to the American farmer who does not receive a livable share of the consumer's dollar spent for agricultural commodities.

Mr. FEIGHAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FEIGHAN. Mr. Speaker, I note in the message from the President which has just been read another example of appeasing the Communist conspiracy and an expression of lack of confidence in the ability of free nations to exist and prosper in an arrangement which excludes the participation of Communist and Communist-dominated nations. Congress gave long and thoughtful consideration to the state of world affairs which now exist when it enacted into Public Law 480, 83d Congress, the section 304. I am amazed that at this time when the security, liberty, and freedom of the American people are in greater danger than ever before in our history that the President's message leads from fear and lack of confidence in our ability to use our surplus agricultural commodities in the cause of peace and freedom.

Mr. Speaker, it was my opportunity to spend 7 weeks in southeast Asia and north Asia on an official inspection trip recently concluded. During that trip I saw innumerable opportunities where our surplus agricultural commodities could be used to strengthen the cause of freedom and individual liberty in those newly independent nations of Asia.

I can assure Members of this House that vast amounts of our surplus food could be used in that part of the world without in any way interfering with the normal commercial channels and trade. I must also say that I felt warmed by the wisdom of Congress in providing wide authority for the administration to use up to $1 billion of our surplus commodities over a 3-year period in programs calculated to advance the cause of peace and freedom.

There is scarce a Member of this House who is not acutely aware of the vital struggle now taking place throughout all of Asia between those who stand for decency and human dignity and those who support the Russian drive for world domain. All of us realize the grave possibility that world war III could result from the political struggle now taking place throughout all of Asia. We must use every one of our assets together with imagination and courage if we are to save the day in Asia for human freedom and at the same time prevent world war III.

What we need more than anything else is imagination and old-fashioned American ingenuity in order to put our surplus agricultural commodities to work in the cause of a just and lasting peace. Up to the present, the administration has been timid, hesitating, and unimaginative in applying the obvious benefits of Public Law 480, 83d Congress, section 304. In fairness, I must say that in some instances, notably in Vietnam, the Crown Colony of Hong Kong, and in Korea, where the administration has used initiative and imagination in the use of our surplus agricultural commodities, results have been most gratifying. But looking at the world as a whole and knowing that one-half of the people of the world still go to bed hungry, it should be obvious to all that the administration should immediately engage in a wide-scale program using our surplus foods as weapons for peace.

On March 22, last year, President Eisenhower, in an address before the Advertising Council at its meeting in Washington, showed a real grasp of the world crisis when he called for a program which would develop a trading bloc made up of all the free nations of the world. The President then advocated—and I quote—"a legitimate economic union of the free world in order that it may cleave to these great spiritual truths, which in turn make it a unity in opposing communism." This plan envisions the utilization of the resources of the free world to strengthen all those countries who are fighting to keep their national independence and freedom. He also pointed out the economic pressures the Russian Communist bloc was exerting upon certain countries and the need of still other countries for foreign trade as a means of existence. There are a considerable number of countries of the world who cannot produce enough food to meet the requirements of their people and who therefore must acquire a favorable foreign trade balance in order to meet their food deficit. I commend the proposal made by President Eisenhower on that occasion because it was clear to me that this was one method by which we would finally put to work our surplus agricultural commodities which unfortunately some people have been regarding as a liability rather than an asset unprecedented in all of history. From this latest message of the President, it appears that the President has made a complete flip-flop on the position which he took on March 22, 1955, in his speech before the Advertising Council of Washington.

This latest recommendation of the President arouses the suspicion that the "fast buck" boys are busier than ever in putting across their program with the present administration. There are interests at work in this country who see in trade with the Russian Communists and their widespread empire, a harvest of lush profits. These same interests completely disregard the security interests of the people of the United States and in no way are concerned with the need to strengthen the cause of human freedom in those areas of the world where today it is fighting for its very existence. These same interests are not concerned to prevent world war III because their only interest is milking lush profits from the misery of the human race.

I strongly urge that Congress take a good look at what lies behind the recommendation of the President with respect to Public Law 480, 83d Congress, section 304. I also urge the President of the United States to renew his efforts to find people possessed of the initiative, the imagination, and the leadership qualities necessary to bring about the full benefits Congress intended when it passed Public Law 480, 83d Congress.

THE PRESIDENT'S MESSAGE ON AGRICULTURE

Mr. FLYNT. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. FLYNT. Mr. Speaker, I have just listened to the reading of the President's message to the Congress on agriculture. In it he lists his nine-point program for alleviating the ills which threaten the economy of the agricultural portion of the American population.

The absence of a proposal for a rigid price-support law based on 90 percent of parity did not surprise me. We remember full well that during the presidential campaign of 1952 the Republican presidential candidate said, "I think farm prices ought to be based on 100 percent of parity." But during the nearly 3 years he has served as President of the United States he has successfully sought to prevent the enactment of a price support law based on 90 percent of parity.

I do not for one moment contend that a rigid price support law based on 90 percent of parity is either a panacea or a cure-all which will immediately solve the farm problem. I do believe, however, that if we are to have a farm price support law that it must be based on rigid terms and that the support prices of agricultural commodities covered by it shall not drop below 90 percent of parity.

Mr. Speaker, it is well known that farming is a hazardous occupation, economically speaking, and that year in and year out, a 10 percent marginal profit is better than most farmers receive. This is especially true of the small family-size farmer in whom I am primarily and vitally interested.

The President is correct in his statement that the present agricultural surpluses present the main problem confronting the American farmer at this time. If the present Secretary of Agriculture had approached this matter from a realistic viewpoint during the past 3 years these surpluses would not have reached the staggering proportions which they have assumed. During the past 3 years the Department of Agriculture has done little or nothing to further the causes of research for new uses for basic commodities, especially cotton, and has permitted an annual increase in the stockpiles of the basic agricultural commodities.

The President's approach to the soil bank and acreage reserve program are both unrealistic. They would work directly in favor of the already huge corporate type farmers and it would be one step more toward the complete liquidation of the American family size farm. In the Fourth District of Georgia there are good farmers, conscientious and hard working, who formerly operated what we call 1- and 2-horse farms with from 20 to 40 acres of cotton who are now reduced to 3 and 4 acres. What earthly good would it do such a farmer to put 1 acre in a soil bank?

The present administration of the Department of Agriculture has reduced the cotton acreage in Georgia for 1956 more than 47,000 acres over what it was in 1955. At the same time they have increased the cotton acreage for California and Arizona—combined—by 13,426 acres. The net result of this will be that the irrigated and moisture-controlled farms in the fertile irrigated valleys of these two fine Western States will produce more cotton than would have been produced on the 47,597 acres of upland cotton farms in Georgia. Instead of helping reduce the surplus, this will do much to increase the already staggering size of the cotton surplus.

The President's proposal to raise the present designation of middling seven-eighths-inch cotton as the standard grade for parity calculations and price support will have the immediate effect in next year's crop of reducing both the gross and net income to the cotton growers of America.

The President's recommendation for elimination of the provision for the minimum national acreage allotment for peanuts is in direct contradiction to the administration's proposal in 1955 to admit into this country duty free millions of pounds of peanuts because of an alleged shortage of peanuts in this country.

The President's recommendation for legislation to relieve the farmer of the Federal tax on gasoline used in tractors and other nonhighway vehicles is a sound proposal. It is already the law in the State which I have the honor to represent. I have favored this proposal not only since I have been in Congress but prior to coming to Congress. I cannot help but wonder if there is any connection between this proposal and the fact that 1956 is a Presidential election year.

Mr. Speaker, in the President's agricultural message it is evident that the voice is the voice of Jacob, but the hand is the hand of Esau. The present Republican administration and the Department of Agriculture under Secretary Benson have had 3 years in which to help the American farmer. It is quite evident that the nearness of the 1956 elections has increased the desire of the administration to help the American farmer. I do not believe that the American farmer and his votes in the 1956 elections can be bought by empty promises in election year which are diametrically opposed to the record of the present Republican administration from January 1953 until now.

THE SMALL TOBACCO FARMER

Mr. BURNSIDE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BURNSIDE. Mr. Speaker, the small tobacco farmers were not even mentioned by the administration in its farm message. We have in West Virginia about 4,360 small tobacco farmers with an average of about six-tenths of an acre for their cash crop. We have many, many thousands of small tobacco farmers all over these United States that are sadly in need of help.

There are the burley tobacco farmers with small acreage just existing in the narrow valleys between the mountains suffering on account of lack of clothes in these cold winter months, suffering from lack of medical attention and proper housing, yet the administration does not even mention them.

It is a sad commentary that in these great United States they do not even mention these people.

THE DIXON-YATES CONTRACT

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, the gentleman from Illinois [Mr. PRICE] and I have this day dropped into the hopper a joint resolution asking that the Congress authorize the appointment of special counsel to guard the taxpayers' interest in the Dixon-Yates contract cancellation case.

It will be remembered that last year we led, against great odds, the fight for termination of this contract. But eventually the administration came around to our point of view and held that it was a contract that was not in the best interest of the United States. The Dixon-Yates corporate interests have requested several million dollars in special damages.

In view of the fact that the Attorney General and the counsel for the Atomic Energy Commission have both rendered opinions at various times attesting to the validity of this contract, we feel they are disqualified to proceed in this suit for the taxpayers. We therefore believe that special counsel should be appointed to do this job and we have dropped into the hopper this joint resolution.

THE COMMITTEE ON AGRICULTURE

Mr. ARENDS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, I want to commend the gentleman from North Carolina [Mr. COOLEY] for the statement he made on the floor of the House this morning to the effect that as chairman of the House Committee on Agriculture, it is his purpose to treat the agricultural problem when before his committee for consideration in a manner in which it should be treated as an economic question and not as a political proposition.

As one who represents a great agricultural district, I am at a complete loss to know how anyone can try to legislate for a Republican farmer on one side of the road as against a Democratic farmer on

the other side of the road, or vice versa. It simply cannot be done; and I, for one, would never attempt it. My responsibility, as the Representative of a splendid agricultural district is to legislate in the best interests of agriculture as a whole. This is an economic problem confronting us, not a political question. As the President pointed out in his state of the Union message, there is too much at stake to have this become "the field for political warfare."

Mr. Speaker, I exceedingly regret that a few minutes ago the gentleman from Mississippi [Mr. ABERNETHY] saw fit to refer to the President's message on agriculture in the manner he did. He characterized it as a Republican vote-buying proposal. Let me say to him that the farmers of my district are not for sale, nor do I believe they are anywhere. I think, therefore, he should reconsider the statement he has made.

AGRICULTURE

Mr. CHRISTOPHER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CHRISTOPHER. Mr. Speaker, along with a lot of the other Members of the House, I have listened very attentively to the reading of the President's message on agriculture. He did exactly what I expected him to do. It brings us a lot of window dressing with a lot of frosting to decorate the cake, but it left the keystone completely out of the arch.

That keystone is firm and adequate price supports, without which any farm program is bound to collapse, leaving the individual farmer where he has been for the last 3 years, namely, at the mercy of the buyer.

ADJOURNMENT UNTIL THURSDAY

Mr. COOPER. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Thursday next.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

THE FARM SITUATION IN MISSOURI

The SPEAKER. Under previous order of the House, the gentleman from Missouri [Mr. JONES] is recognized for 1 hour.

Mr. JONES of Missouri. Mr. Speaker, I would like to preface my remarks here this afternoon with a reminder that the 1st session of the 84th Congress adjourned sine die at 11:36 p. m. on August 2, 1955.

This speech would have been made on August 3, 1955, had Congress been in session. However, I would like to remind my colleagues that this is the first opportunity that I have had to make the remarks which are in the nature of a reply or comment on the remarks of my colleague, the gentleman from St. Louis County, Mo., which appear on page 12985 of the RECORD of August 2, 1955, the day that the 1st session of the 84th Congress adjourned.

Actually, these remarks could and probably would have been made on the closing day of the session, August 2, 1955, had I been apprised of the context of the remarks by my colleague, which appeared in the RECORD of that day, but which, of course, I did not hear although I was on the floor of the House. I also will direct my remarks to certain statements which appeared in a letter under date of August 2, 1955, addressed to the Honorable Ezra Taft Benson, Secretary of Agriculture, and signed by my colleague from Missouri, which letter, as he stated, was widely publicized and also appeared in the CONGRESSIONAL RECORD of August 3, 1955.

I think it should be understood, Mr. Speaker, that the remarks inserted by my colleague and which appeared to have been made on the floor of the House actually were an extension of remarks "at this point in the RECORD," and there was no opportunity for me to answer those remarks which both directly and indirectly referred to remarks which I had made here on the floor of the House when my colleague was present.

To refresh your memory, let us refer to page 12985 of the CONGRESSIONAL RECORD of August 2, 1955, the closing day of the 1st session of the 84th Congress, when House Resolution 333 was under consideration. Now this particular resolution would make in order the consideration of H. R. 7718, which was a bill to authorize the Capital Transit Co. to surrender its franchise. I was on the floor during the consideration of that resolution, and, to refresh your memory, I think you will recall that the gentleman from Virginia, the distinguished chairman of the Rules Committee, was rather anxious to have the resolution considered in a minimum of time in order that we could get down to a discussion of the bill dealing with the Capital Transit Co. An emergency was in effect at that time, as you will recall. Now during the consideration of the resolution on the rule, the gentleman from Illinois was allotting time, and on page 12985 we read:

> Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Missouri [Mr. CURTIS].

The RECORD also states at that point:

> (Mr. CURTIS asked and was given permission to extend his remarks at this point in the RECORD.)

Now, I want to make this point clear, Mr. Speaker. While my colleague the gentleman from Missouri [Mr. CURTIS] did get permission to extend his remarks at this point in the RECORD, he did not ask permission to speak out of order. There was nothing said at that time and I was on the floor of the House when those proceedings took place, and I know that the RECORD is correct when it states that he was merely "given permission to extend his remarks at this point in the RECORD," and it was presumed both by myself and, I believe, by other Members or the House who were here on the floor when we were discussing the Capital Transit Co., that my colleague intended and he certainly left the impression that he wanted to insert his remarks which pertained to the Capital Transit Co. legislation. Instead, Mr. Speaker, when the RECORD appeared on the day following the adjournment of Congress, I was amazed to learn that there had been inserted a highly controversial, political speech in the RECORD, dealing with the conduct of the Department of Agriculture, specifically with the ASC program in Missouri.

Now, Mr. Speaker, I want to take this time to call your attention to my colleague's own statement of what he has referred to as a device, which in his own words he says, "leaves open to question by fairminded people the sincerity and accuracy of their charges." Mr. Speaker, I should mention that I have notified my colleague from Missouri that I would direct my remarks at certain statements which he caused to have inserted in the RECORD on August 2, 1955.

Now, Mr. Speaker, I am not at this time and place questioning the sincerity of my colleague in using this device and his employment of this technique, although I am questioning and will at this first opportunity that I have had challenge the accuracy of the statements which he caused to have inserted in the RECORD on August 2, 1955—at which time he did not indicate that he would speak out of order—and would discuss a subject entirely foreign to the resolution under consideration.

Neither, Mr. Speaker, would I suggest that the gentleman from Missouri did not realize that he was acting in a manner which he had on that very day condemned.

I have said that my colleague from Missouri, has brought upon himself this self-indictment, which appears in a letter written on the very day that he caused to have inserted in the RECORD the remarks which were unavailable for reply or comment until the following day when the 1st session of the 84th Congress had been adjourned.

In the letter referred to, under date of August 2, 1955, addressed to the Honorable Ezra Taft Benson and signed by my colleague, which letter was given wide publicity, including its reproduction in the CONGRESSIONAL RECORD, my colleague sets forth what I presume to be his code of ethics. Incidentally, this letter appeared in the RECORD, not as an extension of remarks of my colleague, but was inserted by a Member of the other body, presumably because my colleague was anxious not to violate the rules of the House by openly criticizing a Member of the other body.

I will now read from the third paragraph of that letter, omitting the names of two Members of the other body, and here I quote from the letter addressed to Secretary Benson and signed by my colleague:

> Now, almost from the time that the Eisenhower administration took office they have been making general charges of political manipulation of the farm program in Missouri. Congressman PAUL JONES also has been making general charges in the beginning on the floor of the House, but I am happy to state not on the floor of the House since I challenged him to either back up his charges with details or desist.

Is not that a laugh, Mr. Speaker? The membership of this House knows, and I believe my colleague knows that I have never made a statement of the floor of this House that I could not back up, and as far as my good friend from Missouri, the self-appointed spokesman for the Republican Party in Missouri, causing me to cease and desist from such remarks, I can only say that he has added coals to the fire which while it has been burning evenly and steadily is now ready to burst into a big hot flame which I promise you will not only smoke them out in the open, but which will cause more than one to seek to get away from the heat of burning truth.

But before we get on with a reply to some of the political propaganda which my colleague had inserted in the RECORD, but which, of course, was never made on the floor of this House, let me proceed with a recitation of the Curtis code of ethics.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield at that point for a comment on what he has stated?

Mr. JONES of Missouri. I yield for a minute.

Mr. CURTIS of Missouri. I simply wanted to point out that in my comments I started out by saying that on July 29 there were some 10 pages of the CONGRESSIONAL RECORD filled by Members of the other body alleging that there were political manipulations in the farm program in Missouri.

The RECORD will also show, and I think the gentleman will recall, that the Speaker had ruled, I believe it was on Thursday, that in the last few days there would be nothing other than extensions of remarks allowed in the RECORD, that we would not be permitted special orders, or given special time on the floor. I can assure the gentleman that if the circumstances had been otherwise, I would have been on the floor and I would have notified the gentleman about it, because I do feel that is the correct procedure. I think, to that extent, the gentleman's remarks have pertinency.

I think without those explanations, the gentleman's criticism of what was done would be justified. But with those explanations, and in view of the 10 pages in the CONGRESSIONAL RECORD attacking the Missouri farm program, made in the other body, there was no other way to answer that before the hearings which were held by a subcommittee of the other body, in Missouri, this last fall, were had. That was the reason.

I simply wanted to get that point across. I want to ask the gentleman if he does not recall that toward the end of the session the Speaker ruled that there would be no special orders allowed, no 1-minute speeches, but only extensions in the RECORD.

Mr. JONES of Missouri. I decline to yield further. I will yield to the gentleman at the conclusion of my remarks.

Mr. CURTIS of Missouri. Will the gentleman answer the question?

Mr. JONES of Missouri. I decline to yield further, but I will answer that as I continue with this speech. I am glad to see the gentleman admits he has made a mistake.

Mr. CURTIS of Missouri. I did not.

Mr. JONES of Missouri. I refuse to yield further at this point.

Mr. CURTIS of Missouri. A point of order, Mr. Speaker. He said I admitted I made a mistake.

The SPEAKER pro tempore (Mr. EDMONDSON). The gentleman will state his point of order.

Mr. CURTIS of Missouri. The point of order is that the gentleman has misstated what I said. I did not admit any mistake at all. I simply said there was an explanation for the thing. I made no mistake. I would do the same thing again.

The SPEAKER pro tempore. The gentleman will proceed in order.

Mr. JONES of Missouri. Continuing with the reading of my colleague's letter to the Secretary, and I am reading only his words, it states:

> Most of the charges made have been ex parte in political speeches and in releases to the newspapers.

Now get this next statement, if you will, Mr. Speaker, when my colleague writes:

> Seldom have the charges been made on the floor of the House or Senate where they were subject to rebuttal.

Now, Mr. Speaker, I interpret this to mean that my colleague considers this a reprehensible practice when one makes statements which cannot be answered in rebuttal.

He writes further:

> The statements appearing in the CONGRESSIONAL RECORD of July 29, 1955, were essentially insertions in the RECORD and not matters openly expressed on the floor of the Senate.

But here is the crowning statement, and I hope that my colleague will be listening carefully as I read this statement from his letter to the Secretary:

> It is a well-recognized device and all too frequently used by Senators and Congressmen to insert material in the RECORD as if—

And I repeat "as if"—

> it had been presented orally on the floor.

Now here comes the part that I like to refer to as the Curtis code of ethics, in which my colleague outlines what he considers "proper technique":

> The only proper technique to use when attacking a program, or a policy, or a man, or a group of men, is to notify ahead of time those you know take a contrary position to yours, that you intend to take the floor at such and such a time, and discuss the matter. I—

And remember this is my colleague writing—

> have many times used this technique in launching an attack on something I thought was wrong or improper. The failure of any Senator or Congressman to employ this technique leaves open to question by fairminded people the sincerity and accuracy of their charges.

Now, I am certain that my colleague considers that he is a fairminded person, and I feel just as certain that it will be enlightening, as well as entertaining to hear him justify his action of August 2, 1955, on the last day of the session when he followed the same practice he has condemned in his letter. Naturally I will be glad to yield to my colleague from Missouri, for any reply he may care to make, at the conclusion of my remarks directed specifically at the charges made in his written remarks which were inserted in the RECORD on August 2, 1955, and which were unavailable to me until after Congress had adjourned, depriving me of the opportunity, until now, of making the reply that would have been made on August 2, 1955, had there been any notice given that my colleague was speaking out of order when he had these remarks inserted in the RECORD.

Yes, I have been critical of the operation of the ASC program in Missouri. I have cited cases, both on and off this floor, in letters and telegram, and in personal conversation with Secretary Benson, his Under Secretary, True Morse, and to other officials in the Department of Agriculture that a politically dictated and politically operated program was being imposed on the farmers in Missouri.

I have in the past made specific charges in my criticism of the politically dominated operation of the ASC program in Missouri. I have said in the past and I repeat now that the policies enunciated by the Department of Agriculture here in Washington are not being carried out in Missouri in the selection and appointment of county office managers. Despite any denials to the contrary, there is every evidence that in many counties competent, qualified, and experienced men who have been recommended and hired by county committees have been disapproved for employment by the State committee solely because they were Democrats and the county committees forced under pressure, including threats of suspension, to hire other persons of less experience whose competence has been challenged, and who have not possessed the so-called minimum requirements.

In Missouri, and out of fairness to those officials of the Department of Agriculture here in Washington who are trying to do a good job, I want to say that there appears to be the most flagrant violation of the regulations in my State where the program has been not only dominated by the chairman of the Republican State committee, but he has actually been vested with the authority of hiring and firing those employees whom the Department of Agriculture contends are selected by the county ASC committees.

Mr. Speaker, a public hearing conducted by a committee of Congress was held in Jefferson City, Mo., on November 14 and 15, when scores of witnesses were heard, and during which more than 200,000 words of testimony, mostly under oath, were taken.

This testimony is, I am certain, available to Secretary Benson. I am of the opinion that after he reads this sworn testimony he should be convinced that the policies which he contends are followed by his Department are not being carried out in Missouri where the chairman of the State ASC committee

appears to be a puppet in the hands of the chairman of the Republican State committee.

The Secretary of Agriculture may be amazed to find out that in certain counties where the office manager has been discharged by the county committee that the discharged office manager is still being paid from public funds, which in itself appears to be a violation of the law, apparently condoned by the State committee as well as by Secretary Benson, despite the clearness of his own regulations which state that the county committee does have the authority to discharge a county office manager.

Mr. Speaker, the sworn testimony at the hearing in Jefferson City, on November 14 and 15, shows that in Calloway County a county committee was suspended solely on the ground that it would not employ an office manager selected by the State committee which refused to approve any of several qualified men selected by the county committee, all of whom met the standards and qualifications set forth in the regulations.

It appears, Mr. Speaker, that I have been correct in the charges that I have made since the reorganization of the farm program, which charges have been reiterated from time to time, that in Missouri, at least, one of the unwritten regulations is that before any person can be approved as an office manager he must be approved by the Republican State committee.

Perhaps, Mr. Speaker, my resentment to this procedure is unduly influenced by a personal experience in my home county of Dunklin, which is one of the leading Democratic counties in Missouri. We have never had any partisan politics in the operation of the farm program in Dunklin County. Under the long Democratic administration the farmers elected their own farm committees with no thought as to politics and both Democrats and Republicans served efficiently and harmoniously. For many years a good Republican friend of mine served as a member of the county committee; later as chief clerk of the committee and at the present time as the office manager. In each of these positions he has done an excellent job. Had there been any desire to operate the program on a political basis, this man could never have been elected, but as I say there was no politics in the operation of the farm program in Dunklin County under the last Democratic administration and that is why I am so concerned now when it is so apparent that all over Missouri this administration has permitted a vicious ruthless Republican political organization to take charge of what has always been a farmer-operated program, and to ride roughshod over our farmers in Missouri.

Mr. Speaker, I am sure my colleagues from other States will be amazed when I tell you that in Missouri, during the administration of the farm program during the last 3 years, a total of 55 members of county committees, duly elected by the farmers in their counties have been suspended or discharged by the Missouri ASC State committee, dominated and controlled by the chairman of the Republican State committee in Missouri. Mr. Speaker, those 55 duly elected committeemen who have been suspended or discharged in Missouri represent more than 25 percent of all of the county committee members who have been suspended or discharged throughout the entire 48 States. Can you wonder that we in Missouri feel that the program has not been operated in the best interest of the farmer, and why we of the Missouri delegation have protested over the high-handed manner in which partisan politics has been allowed to dictate the operation of this program?

Mr. Speaker, I am interested in the farm program, and I have worked hard trying to bring about changes which will be most helpful to the farmers of my district, the State of Missouri and the entire Nation.

It is unfortunate, of course, that some of our colleagues, particularly those who come from metropolitan areas, who have one or no rural agricultural counties in their districts, and who know little, if nothing, about the problems, seek to set themselves up as spokesmen for their State ASC committees, and the Department of Agriculture, echoing statements which they later have to retract upon being confronted with the facts.

Mr. Speaker, with reference to the hearings recently held in Jefferson City, and of course I am not going to include the more than 200,000 words in this speech since the hearings will be printed, I will only point out some typical examples of the high-handed manner in which the Republican-controlled ASC committee in Missouri has been operating.

Not only does the chairman of the State committee, Mr. Murray Colbert, under oath, admit that his committee told a county committee that unless they appointed a man selected by the State committee as county office manager that the county committee would be suspended or dismissed, but in his admission he frankly stated on interrogation that, "maybe I didn't correctly have the authority," and added, "I haven't been perfect all my life." After admitting, under oath, that the man selected by the county committee did have the minimum qualifications, Mr. Colbert went on to admit further that the county committee was dismissed solely on the grounds that the committee would not employ the office manager selected by the State committee. It is interesting, Mr. Speaker, to read in this same testimony that Mr. Colbert, the State ASC chairman, still insists that his committee is operating under procedures set forth by the Department of Agriculture.

But the real tragedy of this situation, Mr. Speaker, is that the Secretary of Agriculture, apparently not only condones, but actually approves the illegal practices which are taking place in Missouri, for no later than last week, the announcement was made that the chairman of the Missouri ASC committee has been reappointed. And remember, this announcement of the reappointment of this man was made after Secretary Benson had an opportunity to read the sworn testimony of the hearings in Jefferson City, including the statement of the chairman of the State committee when he admitted that he took action in the discharging of members of county committees which action was in direct violation of the law and the regulations issued by the Secretary of Agriculture.

In a letter, under date of December 30, 1955, addressed to the two distinguished Senators from Missouri, and signed by True D. Morse, Acting Secretary of Agriculture, that official, presumably acting in the absence of Secretary Benson, seeks to evade the responsibility which rests directly on the shoulders of the Secretary, by declining to review the illegal operation of the ASC program in Missouri. Instead he suggests that those 55 committeemen who have been suspended, dismissed, and discharged, file an appeal with the State ASC committee in Missouri. Imagine, those who have been unjustly wronged filing an appeal with a committee, the chairman of which has already under oath admitted practices which the Department of Agriculture regulations clearly state are violations of the law.

It is most unfortunate, Mr. Speaker, that it now appears that the only relief that the farmers of Missouri can expect under such disgraceful conditions as Secretary Benson has permitted to exist in our State is for Congress to pass legislation which will spell out specifically that the selection of members of the county committees shall rest solely with the farmers of that county, and that they be permitted to select the employees of their own office without interference from any partisan political committee.

Mr. Speaker, I have told you some of the political things that are taking place in Missouri in the administration of the farm program. That is why it is distressing to me to read in the President's message on the state of the Union the statement that we should approach the agricultural problem on a bipartisan or nonpartisan basis; and yet we have the farm program under the direction of a Secretary of Agriculture who has refused even to see that the law is enforced in his own Department in the State of Missouri as it refers to the political activity of the Republican State committee. Remember, we have sworn testimony there that his State committee has openly violated the law, yet he refused to review the actions of that State committee.

What can we expect when we read in this message today talking about putting payments through the ASC committee? Am I to expect that in my county that a committee—and I should not say in my county because we have a good committee in my county and have had all the time; but are we going to permit the State committee to appoint political hacks to run the farm program in Missouri? Does it mean that they are going to have control of these funds that we are going to pay? These are some of the things we have got to look into. I have got to see the Secretary get his hands clean before he starts this program; they are not clean at this time. He has refused to review these charges that have been brought to his attention, but tells us to go to the State committee dominated by Republicans to get redress.

I have one other comment to make about the President's message today and that is with regard to his suggestion on

the farm program. This message contains a lot of promises, and I do know that sometimes when your farmers are in distress they are misled by promises just as they were in 1952 when candidate Eisenhower promised them 100 percent of parity. Some were misled and voted the Republican ticket, and I have letters in my files from Republicans who apologized for their mistake at that time. Let me call your attention to this statement in the President's message of today:

I ask the Congress to consider placing a dollar limit on the size of price-support loans to any one individual or farming unit. The limit should be sufficiently high to give full protection to efficiently operated family farms.

I wonder if sometime later we will have someone trying to explain that "full" does not mean 100 percent. When I think about "full," I think about 100 percent and running over. We are going to have to have that explained, too. I am not going to take any further time.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman from North Carolina, the distinguished chairman of the House Committee on Agriculture.

Mr. COOLEY. I would like to ask whether or not in connection with these committeemen the gentleman referred to the Department of Agriculture through its officials preferred any charges against them that were dismissed?

Mr. JONES of Missouri. In many cases they suspended people, keeping them off the job for as long as 30 days, during which time they consistently refrained from filing any charges. In some instances those committeemen were reinstated without charges ever having been filed at any time.

Mr. COOLEY. I am referring specifically to those who have been dismissed. Were they given a day in court?

Mr. JONES of Missouri. They were not.

Mr. COOLEY. Were they given an opportunity to see, to read, and to understand the charges that had been preferred against them?

Mr. JONES of Missouri. I could not say in all cases, but I do know in some of the cases with which I am familiar that members of the committee who were dismissed were denied the opportunity of seeing any of the charges that were made against them.

Mr. COOLEY. The gentleman indicates that he thinks these dismissals were prompted by politics.

Mr. JONES of Missouri. The sworn testimony of the hearing at Jefferson City bears that out. Witness after witness, and even Mr. Colbert, the chairman of the State committee, admitted that he told these people he would fire them if they did not hire a Republican appointee as county office manager.

Mr. COOLEY. As I understand the program, it is contemplated that the local committeemen shall be elected by the farmers.

Mr. JONES of Missouri. That is right, that is what has been our understanding.

Mr. COOLEY. By what authority does the Secretary dismiss duly elected committeemen except for corruption or malfeasance in office or something of that kind?

Mr. JONES of Missouri. I think the charges have been made through the State committee that they will not cooperate with the State committee in the majority of cases and it is stated that that cooperation, or lack of cooperation, has been based upon refusal of the county committee to hire a county office manager selected by the State committee, whereas the rules and regulations clearly state that the county committee has the right to select the county office manager with the approval of the State committee.

Mr. COOLEY. When a committeeman is once dismissed, as I understand what the gentleman is saying, the Secretary of Agriculture takes it upon himself, operating through the State committee, to fill the vacancy which has been created by appointing someone to take over the duties of the man who had theretofore been duly elected by the farmers?

Mr. JONES of Missouri. I think that is right, although I do not want to state that as a fact.

Mr. CHRISTOPHER. Mr. Speaker, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman who has served on a county committee and who was also at the hearing at Jefferson City.

Mr. CHRISTOPHER. When a committeeman is discharged, the alternate comes in and takes his place. If the alternate is discharged, another election is held.

Mr. CURTIS of Missouri. Mr. Speaker, will the gentleman yield for about 5 minutes?

Mr. JONES of Missouri. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. Mr. Speaker, first I want to comment on what my colleague said in reference to the Curtis code of ethics having to do with presenting and debating matters on the floor of the House. What he read in that letter I reiterate. I think it is very important that all of us, if we can, follow that procedure.

I want to point out that far from launching an attack on August 2 I was trying to answer an attack that had been launched on July 29 on the floor of the Senate which was given wide publicity and laying the groundwork, I might state, for this Senate subcommittee hearing out in Missouri.

It was impossible in the last few days of the session—I know we all realize that—under the Speaker's ruling to secure special orders for any length of time, or even to get one minute to speak. The best we could do was to insert something in the RECORD. I know the gentleman from Missouri also recognizes that those last few days are hectic ones. Personally, I regret that there was not the opportunity available to either him or me to have taken the floor of the House so that we could have conducted a debate somewhat along these lines in order to go into the charges that had been made and to see whether or not they were justified. I do not apologize for using that procedure at the tail end of the session because it was the only method we had available. I would do so again. I do believe, however, that whenever possible—which is usually most of the time—this procedure should be followed. I want to commend the gentleman from Missouri also for notifying me ahead of time that he was going to bring this matter up on the floor of the House today. I think that is proper.

Now just one general remark in regard to these hearings in Missouri. Regrettably, the hearings, at least as far as I know, are not available yet and have not been printed up. I know the Senate subcommittee has not even commented on it, so I think it is highly improper for us here today to be debating conclusions from what that evidence might adduce, as well as—and we are unable to do this, I might state—even comment on the procedures used at the hearings, because it happens to be a Senate subcommittee. It is going to be pretty difficult for us to debate what went on in a Senate subcommittee hearing here on the floor of the House. I regret it.

Mr. JONES of Missouri. Mr. Speaker, will the gentleman yield?

Mr. CURTIS of Missouri. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. It was a public hearing. The gentleman was there.

Mr. CURTIS of Missouri. Yes, I was there.

Mr. JONES of Missouri. And other people were there, and everything said there was available to the public and to the Secretary of Agriculture who declined an opportunity to be represented and to be heard at that hearing.

Mr. CURTIS of Missouri. To that extent I thoroughly agree with the gentleman. The matters brought up in that hearing and the testimony adduced, if we can refer to that specifically and agree on what was said, why then, yes, we can, but the difficulty lies in the fact—and I do not want to traduce our rules on this. Let us put it this way. There is some question as to the equitableness, the fairness of the procedures of that hearing or any hearing, for that matter. There is always that question of whether or not both sides were given ample opportunity to present their side of the case as well as to cross-examine witnesses, and so forth, and so forth. Those things always come up. I believe that there will be quite a bit of discussion on the floor of the Senate in regard to that matter. But, as far as some of the general conclusions that my colleague drew from testimony that was adduced at Jefferson City, I must say that I was there the entire time with the exception of a few hours. Incidentally, those hearings went from 9 o'clock one morning until midnight. I missed the after-dinner session that one evening, but then we took up again the next day at 9 o'clock and quit at 1 o'clock in the morning, and I was there the entire time, and I can state that I cannot agree with my colleague from Missouri as to either the testimony or certainly the conclusions

drawn from that. I, myself, have already commented in a letter that I wrote to the Department of Agriculture giving them the benefit of my views and the conclusions I drew from the hearings.

I might say to my colleague from Missouri that there incidentally was a forum for him to have presented some of these charges that he had been making which lay at the base for this trouble in Missouri. I certainly was there those 2 days in order to do what I could to refute those charges which I think were not correct, but the gentleman from Missouri [Mr. JONES], did not avail himself of that forum; at least, he was not present there, and that is one of the places where we can iron these things out to find out whether they are true or not.

Mr. JONES of Missouri. The gentleman did not mean to infer that at a congressional hearing is the time for Members to debate the program.

Mr. CURTIS of Missouri. It is the time to get the facts out in the open to find out if there are specific data that will back up general charges, yes, I do, and it is from those things that you can then go on to debate.

And, I want to point out one other thing. Your quotation of Mr. Colbert saying that they would have to hire Republicans is directly contrary to the evidence. In fact, Mr. Colbert said just the opposite. And, the test of whether or not political hacks have been hired in Missouri, is that 70 percent of the county managers that have been hired under the present program have had bachelor of science degrees in agriculture, and that is something no other State in the Union can match, and I think if we can only go on that plane to try to get better qualified people on those jobs, the program is going to benefit. Senator HUMPHREY at the tailend of the hearing said that: At any rate, at least, it looks like the farm program is going on all right even though there is a lot of argument over the technical personnel administration of the thing.

Mr. JONES of Missouri. The gentleman is talking about getting the facts. Does he not think the best way to get the facts is to bring in witnesses and place them under oath?

Mr. CURTIS of Missouri. Yes.

Mr. JONES of Missouri. And that was done at this hearing.

Mr. CURTIS of Missouri. But there was no opportunity to cross-examine or bring in rebuttal witnesses.

Mr. JONES of Missouri. The gentleman is not saying at this time that Mr. Colbert did not admit that he fired one county committee because specifically they would not hire the county office manager that had been recommended by the State committee? The gentleman would not say he did not testify to that?

Mr. CURTIS of Missouri. No; it is a great deal more complicated than that. He did not.

Mr. JONES of Missouri. The gentleman says that he did not admit that?

Mr. CURTIS of Missouri. That is right; not in the words that the gentleman has used. The gentleman asked a specific question. He asked whether he said this and that, and I said, "No; he did not"; the question involved was a great deal more complicated than the way the gentleman presented it. I think if the gentleman had listened to the witnesses at those hearings, he would have seen that it was a great deal more complicated. It was not an open-and-shut thing.

There is a real area here where we, in Congress, ought to be figuring out just how we want these committees set up and we must not blame people down the line for a failure to clarify the picture.

Mr. JONES of Missouri. I still say that I am blaming the operation of the program in Missouri where 55 committeemen were suspended or dismissed. That represents 25 percent of all the dismissals which have taken place in the United States. Surely there is something wrong there.

Mr. CURTIS of Missouri. There was something wrong. My allegation was that there were political manipulations before.

Mr. JONES of Missouri. In closing, Mr. Speaker, I merely want to say this. The gentleman from Missouri, from St. Louis County, will not deny, I believe, that the chairman of the State committee in Missouri made this specific statement that I quoted: "Maybe I did not correctly have the authority," and "I have not been perfect all my life."

Does the gentleman deny that he did not make those statements?

Mr. CURTIS of Missouri. If the gentleman will give the rest of the context of the statement, it would clear it up. Does the gentleman not admit that he makes mistakes too? There are a lot of mistakes made, and some of them are honest ones.

Mr. JONES of Missouri. In the particular case I am talking about where he said he fired the committee because they would not select a certain county office manager—one that the State committee had selected.

Mr. CURTIS of Missouri. No; that is not the fact.

Mr. JONES of Missouri. I have a copy of the sworn testimony in which that statement is made.

Mr. CURTIS of Missouri. I would like to see it.

Mr. JONES of Missouri. And I will state it as a fact.

Mr. CURTIS of Missouri. I was present.

Mr. JONES of Missouri. Mr. Speaker, I refuse to yield further.

I shall also state that the Secretary of Agriculture has been furnished with copies of this sworn testimony. It has been documented to him under oath showing where this program has been operated illegally in Missouri. And in a letter, which I have here, he refused to review the situation in Missouri, to see that that politically dominated machine does not still operate the ASC program in Missouri.

I am stating that as a fact.

Mr. COOLEY. Mr. Speaker, will the gentleman yield?

Mr. JONES of Missouri. I yield to the gentleman from North Carolina.

Mr. COOLEY. I think the gentleman should correct his remarks. The gentleman referred to the county committee when I think he intended to refer to the manager of the county office. If I understand the gentleman, these men were fired because they did not employ a certain person as manager of the office.

Mr. JONES of Missouri. That is correct.

Mr. COOLEY. Who was recommended to them to be employed.

Mr. JONES of Missouri. That is correct.

Mr. COOLEY. And that is what happened?

Mr. JONES of Missouri. That is what happened.

Mr. COOLEY. The gentlemen is a member of the Committee on Agriculture and if the gentleman thinks that this matter needs to be further investigated, I am sure the gentleman knows that the House has authorized our committee, through subcommittee or otherwise, to investigate charges such as the gentleman is now bringing to the attention of the House. If the gentleman is unable to obtain accurate information in regard to the dismissal of these 55 county committeemen in the State of Missouri, I can assure the gentleman that our committee will cooperate with him in trying to obtain accurate information.

Mr. JONES of Missouri. I appreciate the statement of the chairman of the committee, but I think that all of this information taken under oath will be available to the Congress. I think we perhaps will want to take some action in passing legislation. We have found in the past that frequently when we pass legislation in which there is some discretion left to the administrator the intent of Congress is not carried out and later we must come back and amend that legislation. I think that is what is taking place here. The Secretary of Agriculture has gone beyond the intent of Congress in his interpretation.

I will say this, and I want to be perfectly fair in this matter. There are some employees in the Department of Agriculture who have apologized to me for some of the things that have taken place there in Missouri. I have been told by people in high position in the Department of Agriculture that they should have stopped this thing several months ago when it was first called to their attention. In fact, they brought the State committee up here one time, and it was generally understood at that time that either the State committee was going to be discharged or at least they were going to be disciplined to get the thing back on the beam.

In that connection, may I ask my colleague from St. Louis County one question: Does he know of the chairman of the ASC committee in Missouri ever coming to Washington on official business when he was not accompanied by the chairman of the Republican State committee?

Mr. CURTIS of Missouri. I will answer that.

Mr. JONES of Missouri. I will yield the gentleman 2 minutes to answer that question. He could answer it yes or no. Does he know of any such occasion?

Mr. CURTIS of Missouri. I had only one occasion to meet the gentleman concerned, Mr. Colbert, in Washington. On

that occasion it was the time I referred to when he was brought here to answer these charges, and he was accompanied by the State chairman, which I thought was quite appropriate, inasmuch as the charges were made that there had been political manipulations.

Mr. JONES of Missouri. I asked the gentleman a simple question. Does he know of any visit the chairman of the State ASC committee in Missouri has made to Washington on official business—and he has made several such visits here—when he was not accompanied by the chairman of the Republican State committee?

Mr. CURTIS of Missouri. I answered within my knowledge, that there was only one time that he was in Washington that I knew about.

Mr. JONES of Missouri. I asked the gentleman to answer "Yes" or "No." Does he know about any?

Mr. CURTIS of Missouri. The one time I saw him it was true. I may say to the gentleman that as far as that particular occasion is concerned, it involved the Mississippi County situation, which I personally went into. I am very happy that the Department of Agriculture had the good sense to back up the State committee on that thing in the final run, because the action taken I think was clearly proven to be in the best interests of the farmer and the farm program, and yet politics was alleged in that instance, too.

Mr. JONES of Missouri. I will not agree with anything that is said about that, because the gentleman is just as wrong about that as he has been in some of the other cases. He is just as wrong about that as he was when he went before a committee and told about a man being put in the penitentiary and serving a sentence, and then later he had to retract that and admit the man got a $100 fine.

WHITHER STATESMANSHIP?

Mr. MARTIN. Mr. Speaker, I ask unanimous consent that the special order granted to the gentleman from New York [Mr. COLE] for this afternoon be vacated, and that he be permitted to extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. COLE. Mr. Speaker, Saturday, September 24, 1955, will take its place in history as one of the dark and fateful days of American history.

In the early hours of dawn, on that day, our great President and patriot, Dwight D. Eisenhower, suffered a heart attack of unknown intensity and the distressing news was dispatched to the four corners of a stunned and sorrowful world. Bewilderment and disorder of panic proportions began. Humble, but fervent, prayers were soberly chorused in scores of foreign tongues and foreign lands, as well as in our great country. The whole world waited with bated breath for the successive bulletins issued from the bedside at Denver, Colorado. God be praised. Our prayers were answered, and the bulletins almost immediately struck a note of encouragement and hope. Our gloom gradually became dispelled—at least temporarily.

Since that time there has been a constant din of speculation as to whether President Eisenhower would run for reelection—little, if anything, has been said as to whether he should be the candidate again.

Today, I feel it my duty to voice my own personal opinion on this momentous question, involving as it does, not only the welfare of our beloved President, but also the destiny of his beloved Nation. In speaking primarily to my Republican colleagues in this and the other body, I also address my remarks to my friends on the Democratic side of the aisle, and in all humility to the citizens of this great Nation.

Although my remarks are directed to all those persons, if but one man hears and heeds them, I shall have fulfilled my purpose for what I have to say concerns that one man.

In speaking today as I do, it is as a Republican of deep and abiding faith in the principles and purposes of our great party, but also with a consciousness of its responsibilities to our country. But I do not speak today as a Republican partisan. As a Member of this great legislative body, I speak with confidence that my words will be heard with understanding on both sides of the aisle. I speak as an American citizen with an appreciation for the priceless heritage of freedom, and also with the awareness of the concomitant obligations of those who would enjoy it.

The matter of which I speak, undoubtedly, is upon the conscience of more Americans than have given it expression. It has been upon my own for many months.

I speak in opposition to those who would urge a President of admittedly uncertain health to seek a second term. This I do for many reasons, the principal ones of which are that it is not fair to Dwight Eisenhower to appeal to his sense of duty by urging him to run again; and that it is not for the best interest of the country that he attempt a second term.

Four years ago, under the banner of the Republican Party, an American who had already given a lifetime of service to his country culminating in the commanding generalship of our victorious armies in World War II, again responded to the call of duty and assumed the heaviest burden of leadership in the history of the world.

With full recognition of the great contributions this man had already made to the freedom and security of the Nation and the world, Democrats joined the Republicans to demand a continuance of his service and sought his leadership by placing him in the highest office of the land.

Their call was an unprecedented demonstration of affection and gratitude. It was an expression of boundless confidence that his seasoned hand could hold our ship of state on a steady course through dangers as great as any which ever faced this or any other nation of free men.

This is neither the time nor place to expound on the great service to our country and the world which Dwight Eisenhower has rendered. We are all aware of it, and history will confirm it. Nor do I have the ability to give proper expression to the eternal debt which is owed to him. I can only acknowledge it on behalf of millions of men of all nations, all colors, and all creeds.

As for his service to the United States, it is a sufficient statement to say he has given 41 of his 65 years. He has given it unstintingly, proudly, willingly, industriously, effectively—yes, gloriously.

We have bestowed upon him the highest honor within our power. He has responded to the limit of endurance.

What is the limit of a man's patriotic duty. Does the superior quality of his leadership condemn him forever to its burdens?

Will the Nation not be content with 41 years of a man's life in public service or do we demand all of it?

It is with sorrow and with regret that I contemplate our greed and insatiability. No matter how great a man's service, no matter how much of his life he has given to the public weal, there are those who would demand more.

Already the pressures are being built up to deny Dwight Eisenhower the well-earned right to lay aside the mantle of state with a sense of duty fully done.

My sense of Christian charity prompts me to forgive all those who would take advantage of Dwight Eisenhower's sense of duty in this way, because I am sure they do not do so in selfishness, but in what they conceive to be the best interest of our country. I do not have to defend on the floor of this House my devotion to President Eisenhower. This body well knows the manner in which I have supported his principles and programs. Today, I am again speaking in his behalf.

But I am also speaking in behalf of the Nation. What is the situation we face? The burdens of the Presidency have been described in the past as "killing." In these days of hydrogen weapons, of intercontinental bombers and missiles, can any man foresee these burdens as becoming less onerous?

The high challenges and deep obligations of the Presidency in our times are fully known to Dwight Eisenhower. No man knows better than he the great opportunity for personal service and dutiful patriotism that the Presidency offers, and the wearing demands it places upon him who fills it. No man's life exemplifies better than Eisenhower's a full and complete response to the call of duty, on the battlefield, in the council chambers, and in the highest office of our Government.

I say that if Dwight Eisenhower again becomes a candidate for President, he will be elected, and if he were in full and sound health, I would urge him to run. But I believe that Dwight Eisenhower should not, and will not again become a candidate for public office. He will not because of the very sense of duty that is synonymous with his name. He will transcend the immediate, and, in an ultimate act of patriotism, step down for his country's good.

To ask him to do otherwise is to belie his sense of duty and it is unfair to him personally.

But there is more at stake than our sense of justice and gratitude, and more is involved than our respect for this beloved man. We would be unworthy of his leadership if we failed to consider our country.

My colleagues in the House will acknowledge the need for frankness. They will be quick to acknowledge, too, that the burdens of the Office of the President are greater than those of any Member of this or of the other body, and far greater than those of any other post which mortals are called upon to fill.

And never in our history has the Presidency called for greater reserves of energy, greater reservoirs of patience, and greater capacity for searching analysis and aggressive solution of crushing problems. It is very well to speak of the return to a normal life of those other persons who have suffered heart attacks, but there is nothing normal about the Presidency.

There is nothing normal about the Presidency and there is nothing normal about the times.

I said when I began that I spoke as a Republican but not as a partisan. As a partisan, it would serve the short-term interest of my party to have our great leader once again at the head of the ticket. But as a Republican it would be to substitute expediency for right, politics for principle.

We owe it to Dwight Eisenhower, we owe it to ourselves, and we owe it to our country so to comport ourselves in compassion and understanding that in fulfillment of his highest duty he may relinquish with honor the heavy burdens of his office, and for decades to come continue to live among us, giving of his wisdom, his humanity, and his vision.

THE PRESIDENT'S FARM MESSAGE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, this administration has reduced the farmer's price, increased his cost and cut his acreage. The Department of Agriculture has held the products of American farmers off world markets while the United States Government provided funds to increase foreign production of the same commodities.

Our Government has provided hundreds of millions of dollars for tractors, gins and combines, yes and good seeds, for irrigation and for flood control, all to expand foreign production for export. We have granted tax concessions to Americans for foreign investment and held our commodities off world markets in order to give it to them.

Mr. Speaker, today the United States is paying the salaries of 740 American agriculturists who are busy teaching foreign countries how to add to world surpluses.

Actually we are giving away commodities the Department would not offer for sale for dollars through normal channels.

Through these giveaway programs we are supplying world needs, until through foreign aid we get foreign production increased to the point United States farmers will never have a foreign market.

No, Mr. Speaker, the President's message does not correct this situation, but rather, he recommends that we take United States land out of production by paying the American farmer this election year. Could it be they will use this cash payment to obtain votes? Could it be they would use this means to get the American farmer to cut back to the point of producing for the American consumer only? That is where the policies of the past few years lead.

The message overlooks many facts if the farmer is to obtain a fair share of the national income.

I would like to present some of the facts which have been largely overlooked:

Present law provides two price systems; First, sales on domestic markets at support level plus reasonable carrying charges; second, sales in world markets at any price.

Discussions of two price systems really have to do with two-level support price, or rather a support price for domestic consumption only.

Modern parity formula divorced supports from costs the farmer pays and now is a percentage of the average price the farmer has received for the past 10 years. Thus increasing costs will not be reflected.

Flexible provisions of present law would lower percentage of modern parity as United States supplies on hand increase. Thus any commodities not sold because the United States would not offer at competitive price would reduce percentage of parity-support level.

Under law governing acreage, reduced exports cut acreage, quantity on hand above normal supply cuts acreage.

Price supports not tied to the cost of what the farmer has to buy are misleading and to a large extent meaningless.

In view of high-concentrate fertilizers, cutting out acreage with no restriction on how much can be grown on the remaining acreage will not substantially cut production.

Cutting United States production will not reduce world supplies—unless United States supplies are kept constantly on the world markets for sale at competitive prices—United States acreage merely moves overseas.

The present program—where the United States is furnishing capital, machinery, fine seed, technical assistance, tax concessions for United States investors abroad, plus holding United States commodities off world markets at competitive prices, thereby holding an umbrella over foreign expansion for export—can only have the effect of wrecking any farm program.

Present programs of making grants, gifts, and sales for foreign currencies in substitution for sales through normal channels cannot retain or regain customers for United States farmers.

This year's proposals must be accepted as an election-year deal—for the same people have sponsored foreign aid to finance increases in foreign production for export. They have tried to eliminate the existing soil-conservation program, for which the Federal Government pays only a third of the cost. They recommended and obtained a change in the parity formula so that it is not longer tied to the cost of what the farmer buys. They refused to offer to sell at truly competitive prices in world trade. They have tried to cut the school-lunch program each year.

A recommendation from this group for a direct payment from the Treasury to the farmer should be taken with tongue in cheek.

If the farmers sell they must accept this billion dollars offered this election year to offset high cost, lower price, and restricted acreage—all of which have been supported by Mr. Benson and these particular farm leaders—the farmers had better get commitments for 1957, 1958, and 1959. Election year payments will run mighty thin when spread over 4 years.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. YATES (at the request of Mr. O'BRIEN of Illinois), on account of illness.

Mr. DAVIS of Tennessee (at the request of Mr. PRIEST), for this week, on account of official business.

Mr. METCALF (at the request of Mr. BOLLING), for this week, on account of official business.

Mr. CLARK (at the request of Mr. DENTON), for this week, on account of official business.

SENATE BILLS, JOINT AND CONCURRENT RESOLUTIONS

Bills, joint and concurrent resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 65. An act to amend section 1 (d) of the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

S. 530. An act for the relief of the Sacred Heart Hospital; to the Committee on the Judiciary.

S. 637. An act to provide for the conveyance of Camp Livingston, Camp Beauregard, and Esler Field, La., to the State of Louisiana, and for other purposes; to the Committee on Armed Services.

S. 792. An act for the relief of Spyros Nicholaou Lekatsas; to the Committee on the Judiciary.

S. 872. An act for the relief of Sam Bergesen; to the Committee on the Judiciary.

S. 938. An act to provide for the payment and collection of wages in the District of Columbia; to the Committee on the District of Columbia.

S. 1255. An act for the relief of Brigitta Poberetski; to the Committee on the Judiciary.

S. 1352. An act for the relief of A. J. Crozat, Jr.; to the Committee on the Judiciary.

S. 1584. An act for the relief of Raymond D. Beckner and Lulu Stanley Beckner; to the Committee on the Judiciary.

S. 1748. An act to authorize the appointment of Reserve midshipmen in the United States Navy, and for other purposes; to the Committee on Armed Services.

S. 1749. An act adopting and authorizing the improvement of Rockland Harbor, Maine, to the Committee on Public Works.

S. 1959. An act to direct the Secretary of the Army or his designee to convey a six and eighty-nine one-hundredths acre tract of land out of a one hundred ninety-nine and nine hundred fifty-nine one-thousandths acre tract of land situated in the vicinity of Houston, Harris County, Tex., to the State of Texas; to the Committee on Armed Services.

S. 2130. An act for the relief of Nicholas John Beltsos; to the Committee on the Judiciary.

S. 2154. An act for the relief of Lucia Mary Ann Lucchesi Marchi; to the Committee on the Judiciary.

S. 2166. An act for the relief of Nickolas Menis; to the Committee on the Judiciary.

S. 2182. An act for the relief of the city of Elkins, W. Va.; to the Committee on the Judiciary.

S. 2364. An act to amend the Federal Property and Administrative Services Act of 1949, as amended, and for other purposes; to the Committee on Government Operations.

S. 2374. An act to authorize the Secretary of the Army to enter into contracts to furnish water for municipal water supplies from flood control and river and harbor projects; to the Committee on Public Works.

S. 2446. An act to permit sale of Commodity Credit Corporation stocks of cotton that are in excess supply for unrestricted use at current market prices; to the Committee on Agriculture.

S. 2568. An act to amend title I of the act entitled "An act to authorize and direct the construction of bridges over the Potomac River, and for other purposes"; to the Committee on the District of Columbia.

S. 2587, an act to amend the Public Health Service Act to authorize the President to make the commissioned corps a military service in time of emergency involving the national defense, and to authorize payment of uniform allowances to officers of the corps in certain grades when required to wear the uniform, and for other purposes; to the Committee on Interstate and Foreign Commerce.

S. 2591. An act to amend section 602 of the Federal Property and Administrative Services Act of 1949 with respect to the utilization and disposal of excess and surplus property under the control of executive agencies; to the Committee on Government Operations.

S. 2624. An act to amend an act entitled "An act to provide for the sale of the Port Newark Army Base to the city of Newark, N. J., and for other purposes," approved June 20, 1936, as amended; to the Committee on Armed Services.

S. J. Res. 93. Joint resolution authorizing the acceptance of a gift from the Ericsson Memorial Committee of the United States; to the Committee on House Administration.

S. J. Res. 104. Joint resolution equalizing the salaries of employees in the Senate Press Galleries with those of employees in the House of Representatives Press Galleries; to the Committee on House Administration.

S. Con. Res. 49. Concurrent resolution to print certain matters in connection with the acceptance by Congress of the statue of the late Chief Justice Edward Douglass White, of Louisiana; to the Commitee on House Administration.

S. Con. Res. 51. Concurrent resolution to print for the use of the Committee on Banking and Currency additional copies of hearings entitled "Stock Market Study"; to the Committee on House Administration.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House following the legislative program and any special orders heretofore entered was granted to:

Mr. WILLIAMS of Mississippi, for 45 minutes on Thursday.

Mr. GENTRY, for 30 minutes on Thursday next.

Mr. COLE, for 30 minutes on today.

Mr. GUBSER, for 30 minutes on Thursday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. WILLIAMS of Mississippi and to include extraneous matter.

Mr. MACHROWICZ.

Mr. BOLLING and to include extraneous matter.

Mr. GRAY and to include extraneous matter.

Mr. BURDICK.

Mr. GAVIN in regard to the late Mrs. Vera Buchanan, and that his remarks be included in the permanent RECORD with remarks of other Members concerning Mrs. Buchanan.

Mr. VAN ZANDT (at the request of Mr. GAVIN).

Mr. REED of New York (at the request of Mr. MASON) and to include extraneous matter.

Mr. DAWSON of Utah (at the request of Mr. MARTIN).

Mr. CRETELLA.

Mr. JOHANSEN.

Mr. FEIGHAN and to include extraneous matter.

Mr. WRIGHT.

Mr. DIXON in two instances.

ADJOURNMENT

Mr. COOPER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock), under its previous order, the House adjourned until Thursday, January 12, 1956, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1335. A letter from the Assistant Secretary of Agriculture, transmitting the report of operation, expenditures, and obligations under the Soil Conservation and Domestic Allotment Act for the fiscal year ending June 30, 1955, pursuant to the act of June 28, 1937 (50 Stat., 329); to the Committee on Agriculture.

1336. A letter from the Secretary of the Army, transmitting a report on Department of the Army aviation personnel above the rank of major and by age group, with the average monthly flight pay authorized by law to be paid such officers for the period July 1, to December 31, 1955, pursuant to Public Law 301, 79th Congress; to the Committee on Armed Services.

1337. A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to require enlisted members of the Armed Forces to make up time lost during enlistments"; to the Committee on Armed Services.

1338. A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to amend title II of the Women's Armed Services Integration Act of 1948, by providing flexibility in the distribution of women officers in the grades of commander and lieutenant commander, and for other purposes"; to the Committee on Armed Services.

1339. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation entitled "A bill to authorize the Commissioners of the District of Columbia to designate and regulate holidays for the officers and employees of the Government of the District of Columbia for pay and leave purposes"; to the Committee on the District of Columbia.

1340. A letter from the vice president, the Chesapeake & Potomac Telephone Co., transmitting a report of the Chesapeake & Potomac Telephone Co. to the Congress of the United States for the year 1955; to the Committee on the District of Columbia.

1341. A letter from the chairman, Council on Law Enforcement in the District of Columbia, transmitting a report of the official operations of the Council on Law Enforcement in the District of Columbia from January 1, to December 31, 1955, pursuant to title IV, section 401 (c) of an act to provide for the more effective prevention, detection, and punishment of crime in the District of Columbia, approved June 29, 1953; to the Committee on the District of Columbia.

1342. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of proposed legislation entitled "A bill to amend section 345 of the Public Health Service Act"; to the Committee on Interstate and Foreign Commerce.

1343. A letter from the Attorney General transmitting a draft of proposed legislation entitled "A bill to amend title 18, United States Code, so as to prohibit intrusion upon the privacy of Federal juries"; to the Committee on the Judiciary.

1344. A letter from the Director, Administrative Office of the United States Courts, transmitting a draft of proposed legislation entitled "A bill to amend section 1292 of title 28 of the United States Code relating to appeals from interlocutory orders"; to the Committee on the Judiciary.

1345. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes"; to the Committee on Banking and Currency.

1346. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated April 19, 1955, submitting a report, together with accompanying papers and an illustration on a review of reports on Juneau and Douglas Harbors, Alaska, requested by a resolution of the Committee on Rivers and Harbors, House of Representatives, adopted on October 30, 1945 (H. Doc. No. 286); to the Committee on Public Works and ordered to be printed with an illustration.

1347. A letter from the president, Gorgas Memorial Institute of Tropical and Preventive Medicine, Inc., transmitting the 28th Annual Report of the work and operation of the Gorgas Memorial Laboratory, covering the fiscal year ended June 30, 1955, pursuant to section 3 of the act of Congress approved on May 7, 1928, as amended (22 U. S. C. 278a) (H. Doc. No. 287); to the Committee on Foreign Affairs and ordered to be printed.

1348. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to transfer certain responsibilities of the Secretary of the Interior to the Public Housing Commissioner and the Secretary of Agriculture, and for other purposes"; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, pursuant to the order of the House of January 5, 1956, the following bill was reported on January 6, 1956:

Mr. SPENCE: Committee on Banking and Currency. H. R. 7871. A bill to amend the Small Business Act of 1953; with amendment (Rept. No. 1633). Referred to the Committee of the Whole House on the State of the Union.

[Submitted January 9, 1956]

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DAVIS of Tennessee: Committee on Public Works. H. R. 7930. A bill authorizing the completion of the initial stage of development for flood control and other purposes in the Russian River Basin, Calif.; without amendment (Rept. 1634). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CHRISTOPHER:

H. R. 8218. A bill to prohibit insurance companies doing insurance business of an interstate character from issuing group health, hospitalization, and accident insurance which may be canceled after a period of 3 years for any reason other than nonpayment of premium; to the Committee on Interstate and Foreign Commerce.

H. R. 8219. A bill to amend section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended, to provide for administration of farm programs by democratically elected farmer committeemen; to the Committee on Agriculture.

By Mr. SAYLOR:

H. R. 8220. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. CARRIGG:

H. R. 8221. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. FENTON:

H. R. 8222. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. VAN ZANDT:

H. R. 8223. A bill to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes; to the Committee on Banking and Currency.

By Mr. ALLEN of Illinois:

H. R. 8224. A bill to provide for the issuance of a postage stamp in commemoration of the 100th anniversary of the Lincoln-Douglas joint debates; to the Committee on Post Office and Civil Service.

By Mr. H. CARL ANDERSEN:

H. R. 8225. A bill to authorize the addition of certain lands to the Pipestone National Monument in the State of Minnesota; to the Committee on Interior and Insular Affairs.

By Mr. BARTLETT:

H. R. 8226. A bill to amend section 1 of the act of March 4, 1915, as amended (48 U. S. C., sec. 353); to the Committee on Interior and Insular Affairs.

By Mr. BENTLEY:

H. R. 8227. A bill to amend the Vocational Rehabilitation Act to provide additional Federal support to States and certain nongovernmental agencies to enable them to carry out adequate demonstration programs for the vocational rehabilitation of the homebound; to the Committee on Education and Labor.

By Mr. BOGGS:

H. R. 8229. A bill to amend the Tariff Act of 1930 to provide that nickel ore concentrates imported into the United States shall be exempt from duty; to the Committee on Ways and Means.

By Mr. BOYLE:

H. R. 8230. A bill to amend the Railroad Retirement Act of 1937 to provide a new method for determining monthly compensation in computing annuities, and to eliminate all restrictions upon the right of a spouse to receive benefits simultaneously under that act and the Social Security Act; to the Committee on Interstate and Foreign Commerce.

H. R. 8231. A bill to provide for a 15-percent increase in the annuities and pensions payable to railroad employees and their survivors; to the Committee on Interstate and Foreign Commerce.

By Mr. BROWN of Ohio:

H. R. 8232. A bill to authorize the Secretary of Agriculture to assist landowners and operators to conserve and store water; to the Committee on Agriculture.

By Mr. BUCKLEY:

H. R. 8233. A bill to authorize the Chief of Engineers to publish information pamphlets, maps, brochures, and other material; to the Committee on Public Works.

By Mr. CANFIELD:

H. R. 8234. A bill to provide for an experimental national flood indemnity and reinsurance program, and for other purposes; to the Committee on Banking and Currency.

By Mr. CELLER:

H. R. 8235. A bill to amend section 1114 of title 18 of United States Code relating to the protection of officers and employees of the United States; to the Committee on the Judiciary.

By Mrs. CHURCH:

H. R. 8236. A bill to provide for comprehensive reports by the Bureau of the Budget with respect to all branches of the Government and the executive agencies thereof; to the Committee on Government Operations.

H. R. 8237. A bill to provide for the mutualization of the Federal intermediate credit banks, and for other purposes; to the Committee on Agriculture.

H. R. 8238. A bill relating to the premiums to be charged for insurance issued by the Federal Crop Insurance Corporation; to the Committee on Agriculture.

H. R. 8239. A bill to require certain agencies of the United States engaged in activities affecting the fiscal policy of the Government to advise and consult with the Secretary of the Treasury, or his designee, with respect to the credit policy of the Government of the United States; to the Committee on Banking and Currency.

H. R. 8240. A bill to provide for reorganizing the insurance operations of the Veterans' Administration, to create a Veterans' Insurance Corporation, and for other purposes; to the Committee on Veterans' Affairs.

H. R. 8241. A bill transferring to the Secretary of Defense the management of certain properties presently classified in the national industrial reserve, and for other purposes; to the Committee on Government Operations.

H. R. 8242. A bill to require agencies of the United States engaged in lending operations, or the insuring or guaranteeing of loans, to make certain annual reports to the Congress and the Secretary of the Treasury; to the Committee on Banking and Currency.

H. R. 8243. A bill to authorize the Rural Electrification Administration to borrow money, and for other purposes; to the Committee on Agriculture.

H. R. 8244. A bill relating to the direction and supervision of the comptroller organization of the Department of Defense; to the Committee on Armed Services.

H. R. 8245. A bill to provide for improving management and technical personnel in the support activities of the Department of Defense, and for other purposes; to the Committee on Armed Services.

H. R. 8246. A bill authorizing the Federal Housing Administration to provide for its financing through the issuance of bonds, and for other purposes; to the Committee on Banking and Currency.

H. R. 8247. A bill relating to the lending activities of the Export-Import Bank of Washington, and for other purposes; to the Committee on Banking and Currency.

By Mr. CRETELLA:

H. R. 8248. A bill to provide for an experimental flood indemnity and reinsurance program and for other purposes; to the Committee on Banking and Currency.

By Mr. CURTIS of Massachusetts:

H. R. 8249. A bill to establish a national policy with respect to commercial fisheries; to establish the Office of Assistant Secretary of Commerce for Commercial Fisheries, and define his functions, powers, and responsibilities; to strengthen the commercial fisheries segment of the national economy, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. DEMPSEY:

H. R. 8250. A bill to require conformance with State and Territorial fish and game laws and licensing requirements on Federal lands not subject to such laws; to the Committee on Merchant Marine and Fisheries.

By Mr. DORN of New York:

H. R. 8251. A bill to amend title II of the Social Security Act to prevent the payment of any pensions thereunder to individuals who have been convicted of espionage, sabotage, or subversive activities; to the Committee on Ways and Means.

By Mr. FENTON:

H. R. 8252. A bill to amend the Small Business Act of 1953; to the Committee on Banking and Currency.

By Mr. FERNANDEZ:

H. R. 8253. A bill to require that hunting and fishing on military reservations, when permitted, shall be in full compliance with the game and fish laws of the State or Territory wherein such military reservations are located; to the Committee on Merchant Marine and Fisheries.

By Mr. FINO:

H. R. 8254. A bill to amend title II of the Social Security Act so as to increase the minimum amount of the monthly insurance benefits payable thereunder; to the Committee on Ways and Means.

By Mr. FLYNT:

H. R. 8255. A bill to provide benefits under title II of the Social Security Act for the survivors of certain individuals who died prior to 1940; to the Committee on Ways and Means.

By Mr. HESELTON:

H. R. 8256. A bill to provide for an experimental national flood indemnity and reinsurance program, and for other purposes; to the Committee on Banking and Currency.

By Mr. HILLINGS:

By Mr. WESTLAND:

H. R. 8316. A bill for the relief of Verulo M. Herrera; to the Committee on the Judiciary.

Mr. WIGGLESWORTH:

H. R. 8317. A bill for the relief of George W. Arnold; to the Committee on the Judiciary.

By Mr. WITHROW:

H. R. 8318. A bill for the relief of A. W. Mussallem; to the Committee on the Judiciary.

By Mr. ZELENKO:

H. R. 8319. A bill for the relief of Isaias Antoine Elias Khoury, Mary (Marie) Khoury, Henri Antoine Khoury, Alexis Elias Khoury, and Matilde Gladis Khoury; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

418. By Mr. BUSH: Petition of residents of Williamsport, Pa., favoring passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

419. Also, petition of residents of Towanda and Bradford County, Pa., favoring the passage of legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air; to the Committee on Interstate and Foreign Commerce.

420. By Mr. HALE: Petition of the Biddeford-Saco Chamber of Commerce urging Congress to establish promptly import quotas on textiles and apparel adequate to maintain the jobs of Maine and American textile workers and safeguard the billions invested in these industries, and to establish in legislation regarding said import quotas suitable machinery for administration and enforcement as well as specific direction that the imports be equitably distributed between different types of cloth; to the Committee on Ways and Means.

421. By Mr. WOLCOTT: Petition of Vera E. Sutherland and others, urging legislation prohibiting the transportation of alcoholic beverage advertising in interstate commerce; to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

Natural Gas Issue

EXTENSION OF REMARKS
OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Monday, January 9, 1956

Mr. WILEY. Mr. President, earlier today it was my privilege to deliver an address before a variety of public-spirited individuals and organizations which have banded together to protect the interests of American consumers of natural gas by advocating defeat of the Fulbright bill.

It is my intention to do everything I can toward the objective of protecting the public interest by carrying on my share in this battle, as I have down through the years, when the predecessor legislation to this bill came up.

I send to the desk the text of the statement which I delivered, and I ask unanimous consent that it be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SENATOR WILEY URGES AVALANCHE OF PUBLIC REACTION TO PROTEST AND KILL NATURAL GAS EXEMPTION BILL—SAYS BOTH PARTIES HAVE TO IMPROVE THEIR POSITION ON ISSUE

(Excerpts of address delivered by Hon. ALEXANDER WILEY, of Wisconsin, ranking Republican on Senate Judiciary and Foreign Relations Committees, before meeting of consumer-labor-women's-business groups opposed to national gas-exemption bill, Washington, D. C.)

It is a pleasure for me to greet this fine assembly of civic-minded citizens.

I am particularly pleased with the wide variety of groups which you represent, because the task which you have undertaken—the protection of the interests of upward of 29 million American consumers of natural gas—is one which definitely requires the strongest possible alliance of grassroots Americans in every walk of life.

I am going to talk to you today exclusively about the practical aspects in the battle now looming before us.

OUR PURPOSE TODAY IS TO PLAN FOR BATTLE

I am not going to attempt at this point to make a detailed evaluation of the Fulbright-Harris bill which would basically exempt producers of natural gas from Federal control. There is not time on this occasion for either a detailed legal evaluation or a detailed economic evaluation.

I believe, of course, that you are already familiar with the evil effects of the legislation in its arbitrary nullifying of effective regulation under the Natural Gas Act of 1938 and its deliberate overturning of the Supreme Court's decision in the Phillips case.

Let us therefore use this brief occasion as a public planning session. Planning for what? Planning for the battle to protect the public interest. This is deservedly a factual public session because, unlike our

opposition, we are trying to thwart ignorance and misinformation and behind-the-scenes deception. We seek an informed, aroused public, eager to do battle against greedy, entrenched monopolistic forces.

Now, let me spell out a few of the points which I think should command our attention, as we prepare to do battle:

AN AVALANCHE REACTION OF PROTEST BY THE PUBLIC IS NECESSARY

1. First and foremost, I want to emphasize that nothing short of an avalanche reaction from the grassroots of America will suffice to defeat this legislation.

I mean an avalanche through the air and on the ground—an avalanche of responsible phone calls, personal visits, telegrams, letters, postal cards, petitions, and every other means available to the people at the grassroots of this Republic.

I am not asking for any blind or artificial propaganda effort, such as may sometimes occur on an issue which the people do not understand, but on which they are told to communicate to the Congress.

Instead, I am urging the only sort of voluntary, enlightened campaign in which I feel you of this audience and I are interested. It must be an intelligent reaction, based upon at least a general understanding of the issues. I refer to an understanding that this bill can have disastrous consequences on our economy by skyrocketing inflationary pressures, an understanding that this is perhaps one of the final, decisive rounds in a long effort by a relatively small group of individuals ruthlessly to exploit the American public by charging all that the traffic will bear.

Of course you in this audience today will be engaged in the very democratic process which I am urging—responsibly contacting Members of the Congress. But I want to say that infinitely more must be done by your associated groups and affiliated members throughout the Nation, and it must be done now.

MARGIN OF VICTORY IN DOUBT

Now, of course, both sides in the approaching Senate fight have been making nose counts, so to speak.

They have counted up the Senators who are committed for and against the bill.

They have counted up those who are still uncommitted, but who may lean in one direction or another.

As a result of the nose counts, opinion may vary as to the precise number of Senators in each category.

Fortunately for America, it is certain that our side, the public side, has been gaining strength in past months. It is certain that the superoptimistic outlook—"it's in the bag"—on the part of our opponents has been dampened a good deal by recent impressive additions, allies to our side, the public's side.

Nevertheless, as of the present date, January 9, 1956, I want to state very factually and frankly that, in my personal opinion, we definitely do not have a margin of superiority to defeat this bill.

That does not mean, however, that the opposition has a decisive margin.

On the contrary, the group of Senators who are today uncommitted, will swing this vote either way. And I want to stress that an objective view of the facts, an objective view of the enormous pressures being brought to bear from the other side, seems to signify this: Unless there is a blizzard of protest against this bill, then the chances are probably better than even, that the supporters of the Harris-Fulbright bill will win out.

In other words, the time for the American people to act in their own enlightened self-interest is now. They have the opportunity to protect themselves, and they must not lose this fleeting opportunity.

FUEL RATES WILL SHOOT UPWARD

If the bill is enacted, you can expect another type of blizzard to occur. It will be a blizzard of rate increase applications—which will cost consumers upwards of three-fourths billion dollars per year.

Not only will producers charge more and more for natural gas, but you can expect petroleum prices to edge upward as well.

The whole situation resembles a contrived Alphonse-Gaston act. The petroleum people will say to their friends and affiliates—the natural-gas people—"our rate increase after yours my dear Alphonse." And the gas people will say, "after yours, my dear Gaston."

First, the gas price will go up, then petroleum, then gas, then petroleum. And the net result will be that the consumers will more and more lose out while the gas industry, already representing $16 billion in assets will enrich its owners further.

IF PEOPLE ACT NOW, CONGRESS WILL PROTECT THEM

Some months from now, if this evil, greedy bill is approved, we can almost imagine the scene in the average American breakfast room. The husband will be reading his morning paper. His wife will be telling him, "John, I don't know where we're going to find the money to pay all these increasing bills. Our gas rate has gone up still again."

And one can almost imagine John replying, "Well, it's probably those fellows in Washington who are responsible."

Well, the so-called "fellows in Washington" would certainly be partly responsible. But it is really John, Mary, Susan, and Jack at the grassroots who would be responsible for the fate of this legislation—for the trend, vertically upward of their own gas rate.

Let no one pass the buck exclusively to the Congress. It is we in the Senate, of course, who are responsible for actually writing the bill at this stage.

But the Congress is only the voice and reflection of the American people.

If the American people choose to be silent (while eloquent proponents of the natural-gas interests are busily talking up their case), if the American people choose to sit on their hands, while the multi-million-dollar natral-gas lobby works tirelessly, night and day, 12 months a year, then the result is forecast.

But we need not get a negative result. We, the people, can achieve success, if we set our minds and our hearts and, yes, our shoe leather to it.

I am delighted at the support which has already been given to the battle against the bill. In my own State, with its outstanding tradition of safeguarding the public, an impressive number of public officials, organizations, and individual citizens have given me the fullest support in my personal efforts.

I am particular delighted that throughout our country, local gas distribution companies are acting with commonsense and devoted public spirit in this fight to inform the American people of precisely the peril that is involved to the United States.

But infinitely more needs still be done.

BILL SHOULD HAVE BEEN RECOMMITTED TO COMMERCE COMMITTEE

2. The second major point that I should like to make is that, in the judgment of many people, including myself, the bill should really have been recommitted to the Senate Interstate Commerce Committee.

I do not believe that the record of that committee is complete in either the necessary legal or the economic data.

I point out, too, that a considerable amount of new evidence has come in since the committee, by a vote of 11 to 4, reported it out.

I do not question the fact that the bill has nominally been on the Senate Calendar for some months. But I think that the people would have been entitled to be heard further on this matter before the Commerce Committee.

Let me point out very clearly that, as a believer in the democratic, representative process, I definitely do not believe in arbitrarily pigeonholing or bottling up legislation. That is particularly my feeling when an expert committee of the Senate has already made its report and a recommittal proposal is considered.

Rather, I would have hoped that this committee could have studied the issue anew in all of its serious implications to our economy, in the light of the facts which are known as of January 1956. Then, the committee could have reported the bill out in its original or amended form, with comparatively little time elapsing.

Of course, the bill is now the pending business of the Senate.

If the Senate is disinclined to recommit the bill, if it wants a showdown now, then I say that, at the very minimum, there must and will be the fullest possible debate of every single angle of this issue. There are going to be a very considerable number of amendments which are going to have to be taken up one by one, slowly and surely.

Let me make it quite clear that I fully recognize that the general arguments over this issue are old ones. Most of the principal points have been hashed and rehased many times. But that does not diminish our obligation to give to the American people, to give to the Federal Power Commission, to give to the courts—the fullest and most complete possible record, for their later study of this issue, as it may come up.

BOTH PARTIES SHOULD STRENGHTEN THEIR POSITION IN PROTECTING THE CONSUMER

3. Now, the third point that I should like to make relates to the political parties. I am not going to make a partisan statement at the present time, because this is of course, not a partisan occasion or issue.

We all know that party lines and so-called 'liberal'—conservative lines within the parties have tended to be somewhat scrambled on this issue.

We have seen men who are commonly called liberals reverse their pattern and support the Harris-Fulbright bill for exemption from Federal control.

We have seen men who are regarded as so-called rock-ribbed conservatives fight ably against the bill for exemption from Federal controls. (These latter colleagues of mine will be somewhat surprised, incidentally, to note the fantastic charges by the opposition that they—uniformly respected as conservative Senators—are supporting a measure which allegedly leads to socialism and public ownership. Such charges are obviously absurd; they are an insult to the intelligence of any thinking person who notes the thousand and one precedents, yes, during Republican, as well as Democratic Administrations, for Federal regulation in the public interest.

In any event, in this election year of 1956, I want to say very frankly that neither of the major political parties has covered itself with honor in this respect—neither my friends in the Democratic camp, nor my own Republican Party.

WHO IS SO-CALLED FRIEND OF BIG BUSINESS?

I would hope that my own party would strive to improve its position on this issue in both legislative and executive branches. And, if I may be permitted, I would certainly hope that those Democrats who so often have criticized my party as the so-called friend of big business would take the blinders off their own eyes and see exactly who is fighting for so-called Big Business on this issue.

The facts are that this Harris-Fulbright bill, will add perhaps 20 or more billion dollars in value to reserves in the ground, held by gas blue-chip companies. And this little unearned bonus to them—has been sponsored by Democratic, steamrollered through Democratic controlled committees, and rushed to

Senate and House floors, to be led rather ably—I may say, by Democratic leadership.

Concerning the question of so-called big business and free enterprise, I shall say—somewhat more later on.

FINE EFFORTS BY SOME SEGMENTS OF DEMOCRATIC PARTY

To keep the record straight, however, I want to say right now in all fairness, that there are segments of the Democratic Party which have nobly fulfilled the traditions of Woodrow Wilson and other great Democratic leaders of both North and South on this issue. Yes, from Virginia, mother of Presidents, from "little Rhodie," Rhode Island, and from other Democratic strongholds have come magnificent support.

In the Senate, in particular, this Nation is indebted to a great many individual Democrats, without whose help we who are fighting for the public could not possibly be as far advanced as we are in our uphill efforts toward victory. And if I were to single out any one champion, it would, of course, be the gentlemen from Illinois, Senator PAUL DOUGLAS, who, true to his valiant marine record of ably fighting against odds, come what may, has been masterfully leading the fight for what he holds dear to his conscience, as do you and I.

VOTERS SHOULD QUESTION SENATORS ON THEIR STAND

In any event, one-third of the United States Senate wil go to the people in November and even before that, will face the people in a good many primary fights, as well.

And I should think that not a single one of them should be excused from stating, at the outset, in his campaign precisely why he voted one way or the other on this evil bill.

Yes; the American people have a particular right to ask every supporter of the Harris-Fulbright bill in the House, the Senate, why he did not act to protect the rights of the public in this battle.

ALL-OUT, NOT TOKEN ACTION REQUESTED

I say "act," not just "vote." I am not seeking simply votes for our side; I am seeking all-out action.

Let none of us—inside or outside the Senate—who are opposing the Harris-Fulbright bill think that a half-hearted, token fight on any of our parts will suffice. All-out action—a fight to amend this bill in the public interest from stem to stern, to debate it in fullest detail rather than willy-nilly chitchat merely over the Fulbright or Harris versions—this is what is called for.

THE MASQUERADE OF THIS BILL

4. Now, fourth, I want to turn briefly to the bill itself and to the arguments which have been advanced by its supporters.

First, let me say, however, that as individuals, I have a tremendously high personal regard for many of the Members of the Senate who happen to be leading the effort for this bill. I am sorry to have to oppose them on it, first, because they are able battlers, and, second, because I wish they would put their abundant talents to better use right now in terms of fulfilling the needs of the American people.

ABLE OPPONENTS ARRAYED

I am thinking of that young, masterful Texan, the Senate's tireless majority leader, who the entire Nation rejoices, has recovered from his sudden physical misfortune. I am thinking of my good, scholarly friend from Arkansas, who has contributed so expertly on the Foreign Relations Committee, on which I am privileged to serve. And I am thinking of the two able scrappers from Oklahoma and the junior Senator from Texas, and others. Yes, I am thinking, too, of "Mr. Sam" over on the House side, whose long record of service to the Republic is hailed by friend and foe alike.

My remarks, of course, carry no imputation whatsoever on the individual Members of the Senate or House as legislators. I believe that they, in good faith, are fighting for what they believe will best serve the interests of the American people.

I believe, however, that my good friends of the opposition are wrong in their beliefs and evaluation. But I believe, too, that we can lock horns in this fight, as we have in the past, on the level of issues and never on personalities.

THIS BILL IS STRICTLY A PHONY

It just so happens, in my judgment, that this bill is now and has always been as phony as a 3-cent piece or a $4 bill. It was a phony as the Moore-Rizley bill. It was a phony as the Kerr bill. It is a phony as the Harris-Fulbright bill. (The last named, i. e., the present bill before us, is incidentally even worse than the Kerr bill in that it would go so far as to extend the "carte blanche" exemption from control not only to independent producers, but even to production activities of the pipeline companies and to producing affiliates of the pipelines).

Why is this bill a phony? Because the bill is not anything like what its supporters say it is.

YOU CAN'T CONTROL A PRICE IN MIDSTREAM

It is a phony because every thinking person knows that you cannot control a price in midstream; you've got to control, if the control is to be at all effective, at the source. But section 2 trickily redefines "sales" so that they are to be considered in interstate commerce only after transportation has commenced. Thus, the Federal Power Commission loses all effective control authority.

So, we are supposed to have controls without controls—now you see them, now you don't.

Continuing, the bill's so-called protections to consumers are a farce, so ambiguous and unenforceable are the so-called standards for fixing the price of natural gas at the source.

And there are other sham features as well.

It is alleged that this is a free-enterprise bill, but it is basically a bill to advance the cause of monopolistic forces which are the very contradiction of free enterprise.

THE GAS INDUSTRY HAS PIONEERED

It is alleged that if this bill is not enacted, the natural-gas industry will not have sufficient incentive to expand.

That phony argument is riddled by the whole record of the past, in which the natural-gas industry, despite admitted doubts over this legislation and the status of controls, has been skyrocketing in expansion.

Now, I want, at this point, to say a sincere word of tribute to the natural-gas industry. Starting from scratch to the point where today it serves approximately 25 percent of the energy market of the Nation, it is a breathtaking example of the dyanmic force which the profit-and-loss system provides.

Here we have an amazing material which was formerly regarded as mere waste, emerging by the wizardry of production, transportation, and storage as a tremendous economic asset to the United States and to the free world.

I want to pay tribute to the men inside and outside the Lone Star State who had the vision, the financial acumen, the pioneering strength to take risks and build this industry up as one of the great pillars on the American scene. The fact that I oppose them in their effort to reach out greedily for too much profit does not mean that I have any less regard for their building of the industry so fast.

It is a big business, but I, for one, welcome large-scale enterprise in this complex, technological age, so long as it does not trample the little fellow or the public.

One would think from some of the artificial groans issued by the big companies' skilled public relations and advertising agencies, that this industry would hover at death's door if this bill is not enacted. But the contrary facts have shown, I believe, that in our entire country, no individual industry, but one, has a better record of avoiding business failures, that is, in the terms of the number of companies which have gone out of business. Yes, the only industry which has had relatively fewer business failures in our country is that old standby, the undertaking industry.

The natural-gas industry has prospered, and I hope it will continue to prosper. I want its stockholders and its bondholders to get a fair break. I believe 100 percent in Americans being entitled to the fruits of their labor, the fruits of their savings and investment—subject, of course, to any possible infringements of the public's rights.

But one may rightly ask just how much incentive does this industry reasonably expect it is entitled to? Does it think it must have say, an astronomic 25 or 30 percent return on its investment in order to expand?

Would it also prefer, say, a 50 percent depletion allowance, to begin with? Does it not believe that the public has any rights—or the United States Treasury? Or does it feel, the "public be damned" as some other mistaken sources seemed to feel at odd times in American history?

Remember, it is 29 million United States consumers whose interests are right now at stake—small consumers with an enormous investment in gas appliances which they are stuck with—if prices skyrocket. Last year, there were 200 household customers of natural gas for every 15 commercial customers and every single industrial customer.

CONCLUSION

Now, friends, I have spelled out a few of what I regard to be major elements in this fight. I could have referred in detail to a great many more issues involved in it.

I have spoken frankly, because I believe that this is a time for frankness.

I have spoken grimly, because I believe that it is no time for a Polyanna-like optimism, which assumes that there will be success for the public side automatically, when we know the reverse could be the case.

Victory will not come automatically, but it can come and it should come—with lots of sweat.

In any event, we are in the battle for the duration—in the Congress, in the Federal Power Commission, and yes, in the courts, beyond.

I am humbly proud of the role which my State, the Badger State, has played thus far—in the long Phillips battle from Bartlesville to Washington. You can be sure that this particular son of the Badger State is not going to give in nor will you, of Virginia, or New York, or Illinois, or Michigan, or Ohio, or the other States as well.

It has been a great pleasure to be with you today, and I wish you every success in your efforts to protect the public interest.

Elective Governor of Alaska

EXTENSION OF REMARKS

OF

HON. WILLIAM A. DAWSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. DAWSON of Utah. Mr. Speaker, today I have introduced legislation to provide for an elective Governor and an elective Lieutenant Governor of Alaska. I have taken this action as a stanch supporter of full statehood for Alaska.

My research has convinced me enactment of the legislation I introduced today would hasten, rather than delay, the day when Congress will finally recognize that the people of this vast and rich area are entitled to full citizenship rights—including the right to be represented in this Chamber.

This legislation is not being introduced as a substitute for statehood. There is no substitute for the full representative rights of the United States citizen. This measure is introduced as a step toward full statehood.

But this legislation is more than just a step toward full statehood. It fills an immediate administrative need of the Territory of Alaska. All issues of statehood aside, the present method of governing Alaska is outmoded and some rather serious administrative troubles are developing that this measure would correct.

An appointive governor was first provided for Alaska by an act of Congress in 1884. Since that time, there have been only two other measures enacted by Congress having any marked impact on Alaska's governmental setup. In 1906, Congress granted the Alaskan people the right to send an elected delegate to this House and in 1912 an act of Congress created the Territorial Legislature.

Congress has not enacted any legislation to add to Alaska's powers of self-government since 1912—44 years ago. This is a sorry record.

As a member of the House Interior Committee, I went to Alaska during adjournment and learned first hand of some of the problems Alaskans are having. Many of them could be solved by passage of this legislation.

The Governor of Alaska administers laws enacted by an elected legislature. But the Governor is responsible—not to the legislature, not to the electorate of Alaska—but to the President of the United States. Fortunately, because of the caliber of appointive governors, no serious conflicts have as yet occurred. But the potential is certainly there.

Knowing that they have no voice in the selection of their chief territorial executive, the people of Alaska, through their elected legislators, are reluctant to vest him with any authority over their affairs. This is understandable and is no reflection on the integrity of the present or past governors of Alaska.

As a consequence of this reluctance to give the governor authority to govern, there has now grown up in the Territory of Alaska a government by boards, and commissions, of which the governor is not even allowed to sit as a member. This system is creating all sorts of administrative difficulties, and I am confident it would cease to exist if the Alaskan people had a right to elect their own chief executive and it would never have come into being if this power had been given the Territory years ago when the complexities of government first showed it was needed.

The people of Alaska, I am sure, would not tolerate an unwieldly government by boards and commissions if they had the power to elect, and vote out, their own governor. This legislation is needed during the period when the fight for statehood is still going on. I hope you all can give it your support, regardless of your position on full statehood for Alaska.

Address of United States Senator Thomas C. Hennings, Jr., of Missouri, Before the Lawyers' Association of St. Louis, St. Louis, Mo., November 3, 1955

EXTENSION OF REMARKS
OF
HON. RICHARD BOLLING
OF MISSOURI
IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. BOLLING. Mr. Speaker, the following fine address by the distinguished senior Senator from Missouri, the Honorable THOMAS C. HENNINGS, JR., deserves the attention of all those who love liberty:

Mr. Chairman, distinguished guests, ladies, and gentlemen, about a year ago you graciously invited me to address the Lawyers Association of St. Louis on its 20th anniversary. And now again you have honored me with an invitation to participate in an equally significant ceremony. It is a privilege to join with you tonight in paying tribute to the members of our Federal and State judiciary who sit here in St. Louis and in St. Louis County. We Missourians, indeed, are most fortunate in having as judges, lawyers of such outstanding ability and character. This fact is the pride of our bar. It is also the pride of the people of the State of Missouri.

This meeting is also held as part of the Lawyers Association's observance of the John Marshall bicentennial. We cannot discuss questions of American constitutional law, as we shall do tonight, without bringing vividly to mind John Marshall and his great leadership in shaping American constitutional doctrine. He has become a symbol of the Constitution of the United States. John Marshall was the first who fully understood the role of the Constitution in molding a national government. During his 34-year tenure as the Chief Justice of the United States he enunciated and implemented the constitutional position of the Supreme Court as 1 of the 3 great powers of our constitutional government and thus decisively determined the course of American democracy. With reverence we commemorate him tonight.

Last year, I emphasized that an incorruptible, independent judiciary and a learned, gallant bar are the mainstays of our country and of our civilization—one of the cornerstones of constitutional democracy. Liberty of person and security of property depend on our ancient tradition to provide a fair trial and an adequate defense for one accused of crime.

The highest dignity of law finds its manifestation in the administration of criminal justice, because here the State pits its authority against the honor of human personality. In a democracy, where the individual enjoys the constitutional guaranties of freedom, a criminal trial is also the crucial test of dedication to the principles of democratic society. And in this test the harmonious interaction between a high-minded, impartial judge and informed and fearless advocates is indispensable.

We lawyers often bear the brunt of heavy criticism for being conservative, for resisting change, for reactionary defense of the status quo. We lawyers and judges alike are proud of our conservatism. It is our tradition, our heritage. It flows naturally from our knowledge of history and from our intimate acquaintance with legal institutions—an acquaintance which is constantly renewed by our daily contact with the law courts. We know that liberty and security are, at best, precarious. Our training and our traditions at the bar impel us, in spite of the calumny that is heaped upon us from time to time as individual advocates and judges, to do everything within the law to preserve the hard-won rights of our people—the rights our ancestors wrung from the British Crown by revolutionary action. Most important of these rights is the right of one accused of crime, however heinous, to receive a fair trial and an adequate defense.

Where a government of law prevails, the legal profession exerts a decisive influence in society. Because of our training, we know intimately the protective value of our traditional institutions and fully realize the dangers of change occasioned by hasty rulings and hurried enactments. We are keenly aware of the dynamic quality of the law which may easily affect the balance of the social order. We recognize that, carelessly used, it may destroy the very rights and freedoms that our forefathers have fought for generations to establish. For these reasons—and rightly so—we instinctively follow the exhortation of Tacitus: "Think of your forefathers! Think of your posterity!"—as it was rendered by John Quincy Adams in his historic speech in Plymouth in the year 1803.

If this attitude of lawyers—our respect for the past and our care for the future—is termed conservatism, let us accept it as a compliment—as proof that we are fulfilling our highest duty to society and to our free institutions.

In this spirit, I sponsored in the Senate one of several resolutions calling for more orderly procedures of investigating committees. None of these have been passed, but several Senate committees have, on their own, established rules for a fairer treatment of witnesses and issues. The effort, as you see, was not in vain, and the dangerous investigative trends on which I reported to you last year, have subsided. The same ideas led me to oppose such radical constitutional innovations as the Bricker amendment. And I have said, over and over again, that I shall resist with all my force any efforts to treat lightly the provisions of the Constitution.

In the same spirit of conservatism, I have looked with growing apprehension at some hasty, yet far-reaching, changes which recently took place in our municipal law. Their effect on individuals has been noticed by many, but their impact on the foundations of our law, I think, has escaped general notice.

As a lawyer, identifying myself with the conservative essence of the law, I shall discuss with you my apprehensions regarding some of these radical departures from our legal traditions.

The threat of Communist ideology and subversive activities to the survival of democracy calls for measures to secure our national integrity. This urgent task confronts us with the fateful problem: How to curb subversive elements without seriously jeopardizing democratic institutions—the cherished patrimony which we defend. The seriousness of our problem is highlighted by the fact that a totalitarian regime is burdened with no such considerations; it simply destroys its internal enemies.

The guarantee of a constitution lies, as Hegel said, "in the indwelling spirit and the history of the nation by which constitutions have been made and are made." It is a proud task to examine, in this light, our national record.

The greatness of our Constitution is in its realism. With admirable skill and vision

the Founding Fathers translated the spirit of our country into simple, restrained yet forceful words. For this reason, the Constitution has become our life, and our life—the Constitution. Not only do we Americans feel this, but it is a fact recognized the world over—by free peoples, with reverence; by totalitarians, with hatred and misgivings.

The Constitution was born in the 18th century when man began to free himself from the political and economic shackles of feudal estatism and started on the road of individual self-determination. Our Constitution was the first political document that unreservedly gave expression to the new order of things and thus became the starting point of a new epoch based on the principle of individual liberty. Our social order is that of an association of free men protected in the expression of their personality.

The spiritual core of our Constitution is the Bill of Rights. Although the body of the Constitution itself contains few protective clauses, we know from the debates in the Constitutional Convention and in the First Congress, which passed the first 10 amendments that, in the view of the Founding Fathers, the Constitution itself embodied by implication the ideas of the Bill of Rights.

Through our entire history, these facts and principles have been recognized by the American people. Every generation of Americans dedicated itself to sustain them as the way of our life, despite some tendency in times of international and internal strain to depart from this straight road. Examples of such temporary departures can be found in the turbulent episode of the Alien and Sedition Acts and in the suppression by President Lincoln of the writ of habeas corpus during the Civil War.

Our consistent dedication to the supreme principle of individual freedom and dignity imposes on us additional strains today when, in the unprecedented conditions of the cold war with the Communist world, we seek a way to expose and to fight totalitarian subversion without endangering the tenets and practices of democracy. It is, therefore, not surprising that in our attempt to perform such a formidable task, we witness relaxations in the operation of the Bill of Rights.

Last February, Chief Justice Warren, speaking here at Washington University, called the attention of the country to the erosion of individual rights which the Constitution guarantees. Some thoughtful people, said the Chief Justice, have begun to doubt that the Bill of Rights would be passed by Congress at the present time. It was a shocking experience to hear from Justice Warren of a case where Government employees hesitated to display the Bill of Rights because, they argued, it is a controversial document.

Similar warnings have been and are sounded by other distinguished judges, by members of the bar and by church and civic groups and leaders. Recently, the Federal courts, by reversing administrative rulings involving individual rights, have indicated that grave constitutional questions confront us as a people. The fact of erosion cannot be doubted.

To understand the causes underlying the present abridgements of constitutional rights, however, does not justify apathy, nor does it minimize the seriousness of the relevant facts. The democratic traditions of our country forcefully demand a considered discussion of the issues that threaten their survival.

As lawyers, we all know a number of cases where individual rights have been violated and—this is most important—where the ax of infringement fell not on Communists or subversives but upon innocent people caught in the meshes of administrative practices. The cause of this evil, it seems to me, lies in a creeping but inordinate extension of administrative law, a kind of creeping statism. Such extension spells dangers not only to the constitutional guaranties but if unchecked, will seriously affect our traditional concepts of justice and fair play. In this light, then, we must examine the practices of the Department of State governing the issuance of passports, and some features of the loyalty-security program.

According to the recent article of Chief Justice Warren in Fortune magazine, the loyalty-security program alone affects more than 8 million Americans, including some 3 million in the Armed Forces, 2.4 million civilian Government employees, and nearly 3 million employees of defense contractors.

Actually, this figure is higher if we consider security investigations in nondefense industry and the families of these people. On this basis, the editors of Fortune magazine say that the total number of Americans now subject to Federal security investigations might be as high as 20 million. This program, as we see, is no longer remote; it has become a truly national problem. Now it touches you and me, our friends and our neighbors.

The administrative innovations, in their newest development, decisively deviate from our legal traditions. The use of undisclosed witnesses in security hearings who cannot be confronted or cross-examined; the shifting of the burden of proof to the accused (which is tantamount to a presumption of guilt); the doctrines of guilt by association, guilt by friendship, and guilt by kinship—these are some of the strange aspects of the growing new body of law. If fully accepted and consistently followed, they may destroy our civil liberties and, in fact, nullify the protective clauses of the Constitution. The application of such doctrines, tending to make the Bill of Rights a simulacrum of right, can result only in the subversion of democracy and the destruction of the spirit of our country.

Considering the far-reaching and dangerous implications of these new legal practices, why is it that the discussion of this trend is not more widespread and that more people are not deeply concerned; In a country with our traditions, this lack of keener interest cannot be accidental. In my opinion, it derives from our failure to evaluate in technical traditional terms the significance of these novel and undemocratic doctrines within the framework of our legal system. Into what part of our law do they fall? The answer is that they belong to a new branch of law which I would call administrative criminal law and which appears incompatible with the Anglo-Saxon ideas of justice, at least as we have known them in the past.

Administrative law came into being during the last few decades as a result of the growing complexity of government. It introduced into our law a principle repugnant to our traditional notions of justice—the principle that an administrative agency, which, as distinguished from a court, may be a party in interest, has the power to decide controversies and to dispose of property rights involving individuals and corporations. The development of administrative law was recognized as a threat to individual rights, and administrative proceedings were subjected to judicial review. In this way, the danger to the operation of the due process clause was, at least in part, checked. Even so, some of us who have practiced before administrative tribunals feel that much more should be done to limit the authority of these agencies.

The position of administrative proceedings within the system of our law was pointedly defined in the following words of the United States Supreme Court:

"The vast expansion of the field of administrative regulation in response to the pressure of social needs is made possible under our system by adherence to the basic principles that the Legislature shall appropriately determine the standards of administrative actions and that in administrative proceedings of a quasi-judicial character the liberty and property of the citizen shall be protected by the rudimentary requirements of fair play." (*Morgan* v. *United States* (304 U. S. 1, 58 S. Ct. 773, 999).)

Furthermore, in the process of judicial review, the United States Supreme Court established more detailed tests for the validity of administrative determinations. Aside from jurisdictional competence, a valid administrative proceeding must be based on a hearing where the party in interest has the opportunity to submit and to scrutinize evidence. An administrative determination cannot stand unless it is supported by substantial evidence. Inversely, it is reversible of arbitrary and capricious. In short, administrative proceedings are admitted into our law only insofar as they represent administrative trials.

At this point, it is important to keep in mind that administrative proceedings were conceived as being in the nature of civil actions. Administrative law was intended primarily to regulate property rights. When it tends to enlarge the scope of its subject matter, we are confronted with a new situation. The fact that we have adopted administrative procedures into our law does not imply that we are willing to permit without a scrutiny de novo, the extension of administrative law to other domain of social relationships.

Suppose for a moment that an administrative agency would attempt to decide a divorce case, claiming jurisdiction because one or both parties are its employees. Would we recognize the validity of such arrogation just because we recognize administrative proceedings as an institution of our law? The answer is, of course, an emphatic no. The subject matter of the issue would stamp the proceeding as an administrative divorce case, an institution utterly foreign to our legal tradition.

Some of you may consider this example as too remote and as such lacking persuasion. To this I would reply that institutions, like principles, once established and recognized have the tendency to expand themselves to the limit of logic. I still also remind you that equity acquired its jurisdiction by setting forth the doctrine of adjudication in personam. This doctrine, when first asserted, caused a violent clash between the Chancellor and the courts of common law, and, as a result, equity jurisdiction found its beneficial though limited place, in the system of Anglo-Saxon jurisprudence.

At the present time, administrative law has invaded fields hitherto not within its domain. In this sense, though under different historical circumstances, the struggle between the courts of common law and the King's Chancellor, is revived. To understand this fact is our duty as citizens and as lawyers. It is also our duty to seek a sensible solution of the controversy.

For this reason, I feel it necessary to emphasize that in the loyalty-security program, administrative law has specifically invaded the domain of criminal law, and that these proceedings are administrative criminal trials.

If we detach ourselves from border cases, we have no difficulties in discerning the nature of criminal law. In the course of this discussion, a general definition is impossible and unnecessary, but we will all agree that it is severe law operating directly against the person of the individual, placing in jeopardy his life, social status, and honor. We will also agree that punishment is the outward manifestation of the logic of criminal law.

It is my submission that loyalty-security proceedings are substantially trials for treason which in the eyes of our law belong to the category of infamous crimes. As a mat-

ter of fact, our Constitution regards treason as the infamous crime and takes special care to afford the accused a special protection.

There is no question, I believe, that loyalty-security proceedings place the individual in jeopardy of infamy and punishment. As a matter of fact, the punishment that hangs over his head is a severe punishment. At first glance we may not see this, but it is clear the moment we determine legally the kind of punishment it is. In substance, it is outlawry. Modern criminal law does not recognize it, but primitive Anglo-Saxon law and early common law did. The security risk not only is stigmatized as a traitor, he is, in fact, expelled from the community, and his stigma may strike his entire family. In these circumstances, it is irrelevant to consider whether Government employment is a right or a privilege.

I am aware of the argument that a punishment which is not on the statute books cannot technically be considered as such. As lawyers we all appreciate the significance of statutory words and phrases. But in our time and age where the law has shed the idea of formulas magic, we cannot close our eyes to situations which do violence to our ideas of justice.

I am also aware that our statute books carry criminal provisions which deal with certain offenses akin to treason. The fact that these statutes do not mention treason, does not, however, lift them from the class of treasonable actions.

Here we come to another aspect of criminal jurisprudence. The recognized severity of criminal law has led to a special care for the protection of the accused person's rights.

It is certainly not accidental that modern criminal law rests on the principle nulla poena sine lege. Nor is it accidental that criminal statutes must be based on the traditional formulations of the common law or must be the result of considered legislative actions. This position is fortified by the corollary that criminal statutes are subject to strict interpretation and that there can be no prosecution for analogically constructed offenses. In the light of these principles, it seems an incredible thought that an individual may today be placed in jeopardy of infamy and outlawry on the basis of administrative regulations which can be altered by arbitrary administrative action. In this connection, it is sufficient to mention the 1950 amendment of the loyalty order of March 21, 1947. In the original order, the standard of disqualification of Government employees was reasonable grounds for belief that the person involved is disloyal. But by a stroke of the pen, the amendment substituted the words "reasonable doubts" for "reasonable grounds." This substitution largely escaped notice but we as lawyers should not fail to realize that the change destroyed the presumption of innocence. From then on, the accused had the burden of proving his loyalty beyond reasonable doubt.

Here we have a flagrant example of how an easy administrative reformulation may, under the color of administrative law, casually remove an agelong protection of our legal institutions.

This example of the easy mood in which the loyalty-security program is operated is not unique. Another, by no means less significant, illustration is the Attorney General's list of subversive organizations. The International Military Tribunal in Nuremberg took months of hearings to declare some of the Nazi organizations criminal. Vast evidence was submitted, witnesses were heard and cross-examined and the issue was argued by counsel. Even so, the prosecution was granted only a part of its recommendations. But here, in the United States of America, where the issue touches on the dignity of United States citizens, the Attorney General, without hearings, on the basis of undisclosed evidence, declares innumerable organizations subversive with the inevitable result of stigmatizing their members automatically. And such a list now determines not only the fate of our Government employees, but has become a decisive factor in private employment.

The loyalty-security program equally disregards other rules of criminal procedure devised to protect the individual right of the accused to his freedom. Especially grave is the denial of confrontation with accusers and the resulting impossibility of cross-examination.

The argument for such denial is the reluctance of the Government to expose its sources of information. The detrimental consequences to the accused, however, create a situation which may be repugnant to constitutional guaranties. This issue has not yet been finally resolved by the courts.

The Supreme Court has not yet spoken. But last week the Circuit Court of Appeals for the Ninth Circuit in a 2 to 1 decision declared unconstitutional the Coast Guard's Port Security Regulations. The court's decision is squarely placed on the issue of confrontation and cross-examination. "It is a matter of public record," the decision states, "that the somewhat comparable security risk program directed at Government employees has been used to victimize perfectly innocent men." "The objective of perpetuating a doubtful system of secret informers likely to bear upon the innocent as well as upon the guilty, and carrying so high a degree of unfairness to the merchant seamen involved cannot justify an abandonment here of the ancient standards of due process."

This decision confirms me in my doubts as to the fairness of the Federal loyalty-security procedures.

Those of us who have had experience as prosecutors well know the necessity of relying on the testimony of informers and accomplices. During my many years as an assistant circuit attorney and later as a circuit attorney, I had occasion in a good many cases to use the testimony of informers before grand juries and in trials in open court. No one knows better than I how important such testimony is in obtaining indictments and in finally convicting the guilty. But not informers themselves are here at issue—only their ominous anonymity, which utterly destroys the principles of our law. Anglo-Saxon legal history retains a vivid recollection of the trial and execution of Sir Walter Raleigh. The chief evidence against him came from a confessed conspirator whose testimony thus was tainted by the suspicion that by accusing Raleigh he expected to save his neck. The court received his written statement but refused to permit confrontation and cross-examination. In this refusal, the court persisted even after the accused had produced a retraction. Finally, the judgment was passed when the prosecution produced a retraction of the retraction. But Raleigh was lucky. At least he knew the name of his accuser.

Incredibly enough, in the security proceedings, this anonymity does not stop with the accused. Not even the determining security officers and boards are permitted to hear the secret informers, but must rely on unevaluated summaries of investigative agencies. Even if we assume that by submitting its report the investigative agency expresses its belief in the trustworthiness of the informer, we still have only its word for it, a conclusion which no one else can check, reached by men, who being human, might err. And we know that men do err. The recognition of this fact is embodied in the sixth amendment.

Still another feature of the loyalty-security program is the lack of provision for the standards of its personnel. It is known, for instance, that the charges in the Fort Monmouth case were prepared by a man whose sole qualifications as a security officer were those of a chauffeur and a uniformed plant guard. By comparison, the administration of criminal justice lies exclusively in the hands of experienced judges and government attorneys, excluding even referees and arbitrators recognized in civil procedure.

The advocates of the loyalty-security program emphasize that it is carried out in good faith and that administrative proceedings themselves supply avenues of righting wrongs. Secretary Benson, for instance, was finally compelled to admit the injustice of declaring Ladejinsky a security risk. As now conceded by the Secretary, the loyalty-security stigma was used simply as an expedient. The real reason for dismissal was the opinion of Mr. Benson that the Department of Agriculture must be staffed with native-born Americans.

This case, relating to a recognized expert on agriculture and a faithful servant of our country, conclusively proves how dangerous it is to substitute the rule of men for the rule of law, and unchecked administrative procedures for established procedures of our traditional law. Even if it is true that our security procedures have the means of rectifying wrongs, it is a fact that the majority of our security cases were reversed only under the pressure of the press and public opinion.

During the last decade we have successfully checked the arbitrary growth of administrative law in order to protect property rights. And it seems inconceivable to me that now administrative law shuold be permitted free rein when it attempts to invade individual freedoms, freedoms which are the foundation of our Constitution. I respectfully submit that judicial review and legislative action are urgently needed to protect our citizens from administrative criminal trials where not only the principles of criminal law are being violated but where even the accepted rules of administrative proceedings—including confrontation and cross-examination—are disregarded.

I fully realize that the clash between the reluctance of the Government to disclose the sources of its information and the right of the accused to be confronted with witnesses against him, presents difficulties of the first order. But even this issue, I believe, with good will, is capable of practical solution. It occurs to me—and I submit this idea for your consideration and study—that it might be possible to appoint a sufficiently large panel composed of members of the bar who would get a top security clearance, and whose character would not be tainted by religious, racial, and other bias. The lawyers so appointed will have the right, on the request and in behalf of the accused or his counsel, to confront and to cross-examine the undisclosed witnesses. For their services these attorneys will be compensated by the Government and it should be provided that any indiscretion on the part of these, let us call them public defenders, will be subject to criminal prosecution and punishment.

The seriousness of the issues just discussed moved the members of the Senate Subcommittee on Constitutional Rights to undertake the difficult task of inquiring into the state of individual rights under the Constitution.

It was a task never before undertaken in our Nation's history, and we decided to make a comprehensive study of the questions before us. For the sake of completeness and objectivity we decided on a systematic examination of grievances following, clause by clause, the first 10 amendments, the Civil War amendments, and then the relative provisions of the Constitution. Also—and this seemed to me particularly important—we decided to examine individual cases indicative of some policy or rule or practice which in itself constitutes an infringement of some constitutional right.

In making this latter decision we knew that the facts revealed might, in many instances, be unpleasant and shocking. We knew that, in consequence, we might find ourselves in the realm of sharp controversy, personally unpopular, and subject to slander and political attacks.

We realized that extremists of all sorts and disgruntled individuals might do everything to frustrate and discredit our work. They might attempt by every devious means of innuendo, trickery, and downright deceit to impeach our motives, to stir animosities among us, and to demoralize our staff.

These tactics are not new and, unfortunately, I have been exposed to them before. Many of you, I am sure, will recall that these same unsavory methods were used in an effort to halt the work of several committees on which I served—committees which were assigned the duties of investigating the 1950 Maryland election campaign, of inquiring into the affairs of the junior Senator from Wisconsin, of investigating campaign expenditures. In none of these instances did the committee allow itself to be diverted from its purpose, and I know I speak for my fellow members on the Constitutional Rights Subcommittee when I say they will not be intimidated. We have chosen an uphill road, but, in good conscience, we could not choose the alternative.

This judgment of free men by governmental boards or officials without either the safeguards given to property rights under administrative boards or the safeguards given to accused criminals in our courts may be illegal. It may be suicidal. This return to outlawry as a punishment without benefit of legal trial could produce public sympathy for those convicted as dangerous to our rule of law as that once given to Robin Hood. If our new and radical ways of weeding out traitors are, even though meant in good faith and for desirable ends, unconsciously leading us toward the destruction of our Constitution and our freedom under the Bill of Rights, we must know it. Our committee will try to find out the facts and show them to you as lawyers and to all the American people.

The peoples of the world have awakened to the unlimited possibilities of present-day technological revolution. They strive for a share in its benefits, and there is no doubt that they will proceed on the road of technical progress with ever-increasing insistence. This promising and happy development, however, is unfortunately not unmarred. In many parts of the globe, the break-through to technological mastery has been accompanied by social upheavals. It is tragic that the national and economic awakening resulted in the establishment of a number of totalitarian regimes. Never before was totalitarianism so strong and so beguiling. This plague seems to be the historical price mankind has to pay for its onward march. As a result, never has the struggle for freedom and dignity of the individual reached such tensity and sharpness. In fact, the deadly struggle between the free and the Communist world is waged on this spiritual issue. Dangers surround our social order.

In addition, experts tell us that the Communist world has challenged our technical ability and gradually matches our weapons and military strength. In the face of this threat to our national security, we must keep strong and dedicate our ingenuity to meeting the challenge. Yet it is possible that we are approaching a stalemate. If so, it is time that we search the arsenal of democracy for a superweapon.

In my view, democracy possesses it, a weapon unsurpassed and unsurpassable—I mean the Bill of Rights which guarantees man his individual liberty and dignity.

To defend it in its operation is the duty of all the people of the United States. It is a special duty of the American bar to guide the people in this sacred and fateful fight.

Such is the present. But time will pass, the intoxication of technical achievement will wear off. The achievements of our technological revolutionary age will solve economic problems which prior generations, because of scarcity, were unable to resolve. Then, I am convinced, a period of meditation will set in, and people the world over will long for individual freedom and dignity. When that happens, democracy will fulfill its historic destiny and the world will greet us as the fathers of the blessings of liberty.

With this faith in my heart, I say to our country the solemn words once addressed to Constantine the Great: "In this sign thou shalt conquer."

Russia Objects

EXTENSION OF REMARKS
OF

HON. USHER L. BURDICK

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. BURDICK. Mr. Speaker, Mr. Nikita S. Khrushchev, head of the Communist Party in Russia, got on his "high horse" last week and bawled out the President of the United States for sending Christmas greetings to the people of Eastern Europe and expressing the hope that someday they might be free and have a government of their own choosing. That was the most Christian greeting that could be imagined. It did not fit in, however, with the ideas of the dictatorship of Russia, where 3½ percent of the population govern absolutely the other 96½ percent.

The President replied to that tirade and announced that it has been, still is, and will continue to be the policy of the United States to liberate the voiceless people behind the Iron Curtain, and that we will not cease our efforts until we are successful. That was all he had to say, period. That gave Mr. Khrushchev something to chew over, and I am glad someone gave this bragging, chest-pounding dictator something to digest. I do not think we need fear enemies of this stamp, for usually anyone who prances around, pounds his chest, exhibits his biceps and announces what he is going to do, uses up all his energy before the fight begins, and such boasters are not difficult to dispose of.

While I am glad the President tackled Khrushchev for a loss, it will be a long costly grind if we undertake the liberation of all peoples behind the Iron Curtain. Those people must realize that they themselves will have to fight for their liberty. They did that before in Russia, and they can do it again. They cannot count too much on our intervening in their revolution.

First of all, it is a costly undertaking in money and men, and many of the people here, or their ancestors, came to America in the first place to get away from the wars in Europe. They saw how useless it was to try to keep the peace, as history shows that every three years from the date of recorded history there has been some conflict raging somewhere. They objected to having their boys compelled to join the armed forces, and were tired of being submerged in a sea of taxation. They pulled stakes and came here and proceeded to build on these shores a government that existed for the people, and which guaranteed liberty and freedom. How well they succeeded is evidenced by the wonderful progress made by the United States in the last 150 years. We started out with 13 settlements, called Colonies, with no fixed central government, and were probably the weakest-looking nation in the then list of nations. After 150 years of free government we became the world's strongest government, and one which many other nations envied and endeavored to copy.

Our first step in European entanglements was taken in 1917. Again in 1941 we got enmeshed, then once more in Korea. After World War II stopped we endeavored to use our money, men and resources to establish peace. Since that date we have expended the following sums: Outright gifts to foreign governments, $44,103,112,291; credits—which will not be paid—$12,347,775,908; other credits—still gifts—$10,123,872,197.

Today everyone will admit that we are no nearer to world peace than we were before we began this program. In the meantime we have increased our debt limit, and now again we are dangerously near the new limit. In addition, we are running on an unbalanced budget. Other countries like Great Britain and Yugoslavia have balanced their budgets from gifts made by the United States. What is more important, the above costs do not take into consideration that other awful price element which was inflicted on our troops by death, wounds, imprisonment and torture.

The argument is made that it will not take us long to carry out our intention of liberating the enslaved people of other countries. It has been 10 years since the end of World War II, and still we have not accomplished our purpose, nor have we made much progress. As the second session of Congress starts, one of the first things to come before it will be a request for a further appropriation of $4 billion in foreign aid.

The official opinion seems to be that in this atomic age a war will not last long. It will be a matter of days, not years. The people have been given to understand that one bomb, or at best a very few of them, will destroy the earth itself. I do not subscribe to this theory at all. This earth was created by divine power, and people were put here on this planet by that same power. It is consistent with faith to say that a few insignificant creatures inhabiting the earth by the grace of this divine power can undo in a matter of minutes all that the Almighty has done? This is fear in the nth degree. If the mind of man can contrive such a dangerous instrumentality the brain of man can also contrive a means of making it ineffective. Every positive has a negative, and the whole world and everything in it constitutes a system of balances.

I would like to see the people of Russia liberated, but remember that when a reigning government which has 3½ per-

cent of the people voluntarily supporting it and the other 96½ percent of the population are vassals living under the heel of dictators, any change will have to come from within. The people themselves will finally have to take action to emerge from their condition of serfdom. There will be much blood spilled, but the road to freedom is costly, and no nation knows it better than we do.

However, there are certain things that we can do now to help the people of Russia and other dictator-dominated countries. They are: First, withdraw recognition from this bloody regime of Russia; second, oust Russia from the United Nations or get out ourselves.

We know now, and should have known right along that Russia is our enemy, and has, does, and will continue to oppose every move we make in the interest of world peace. While we sit in the United Nations with our arm around our beloved brother, with both of us pledged to world peace, this beloved brother is looking for the most favorable opportunity to stab us in the back, and is working with unremitting energy to destroy us and all we stand for.

If we take the steps above suggested these moves will give the people behind the Iron Curtain new hope, and they will gain new strength when they see that the United States will no longer uphold or condone the tyranny of the Russian leaders.

Statement in Praise of the President's Message on Agriculture and the Method and Spirit in Which It Was Evolved

EXTENSION OF REMARKS
OF
HON. HENRY ALDOUS DIXON
OF UTAH
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. DIXON. Mr. Speaker, President Eisenhower in his state of the Union message, Senator ELLENDER, Democrat, Louisiana, chairman, Senate Agriculture Committee, and Representative COOLEY, Democrat, South Carolina, chairman, House Agriculture Committee, have made earnest pleas that farm legislation be kept out of partisan politics. If it is possible for both parties to hold the line for this approach, which I devoutly hope will be possible, I am satisfied that we will come out with an excellent farm program.

The more political and emotional the issue becomes the greater the likelihood for the disputants to freeze on one solution to the exclusion of many other equally good solutions and to become insensitive to the recommendations of the farmers, the farm organizations, the professional people, the United States Department of Agriculture, and to the National Agricultural Advisory Committee.

The less political the issue becomes the greater the opportunity for a scientific approach and the greater the opportunity to include in the legislation the best ideas that have been developed regardless of their source and regardless of who gets the credit.

The President's message on agriculture still retains the flexible price support principle; yet he and Secretary Benson adopted the scientific approach in seeking from all sources suggestions for modifications in the former program.

I commend the President, Secretary of Agriculture, and the many people and organizations representing different parties and different points of view upon the democratic way in which the message was evolved, and also upon the great merit of this message.

Van Zandt Urges Congressional Action on Proposed Amendments to the Railroad Retirement Act

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. VAN ZANDT. Mr. Speaker, as the Representative in Congress of a large group of active and retired railroad employees, at their request I introduced on January 3 a series of bills designed to liberalize the Railroad Retirement Act and increase benefits.

During the past several months in covering the 20th Congressional District of Pennsylvania I had the opportunity of meeting and talking personally with hundreds of active and retired railroaders as well as widows of deceased railroad employees and other survivors. Not only did I find a lot of dissatisfaction among the retired people because of the failure of Congress to increase benefits, but also a general feeling among active railroaders that the retirement law should be revised for the purpose of providing a more adequate annuity at the time of retirement.

The series of bills introduced today are in addition to the following bills introduced in January 1955 at the beginning of the first session of this Congress, namely:

H. R. 856, which provides full annuities at compensation of half salary or wages based on the 5 years of highest earnings, for individuals who have completed 35 years of service or have attained the age of 60.

H. R. 858 provides retirement on a full annuity at age 60 or after 30 years of service and that such annuity for any month shall not be less than one-half of the individual's average monthly compensation for the 5 years of highest earnings.

H. R. 859 provides for an across-the-board increase of 25 percent in the annuities and pensions payable to retired railroad employees or their survivors.

H. R. 2443 provides that an annuitant may be eligible for his retirement annuity even though he renders compensated service for an employer other than railroads by whom he was last employed before his annuity became effective. This bill covers the situation where a retired employee is denied the opportunity to serve as a clerical employee of a church, civic, fraternal, or social organization.

In regard to the series of bills which I have introduced this date they are as follows:

H. R. 7982 provides that the present dual benefit restrictions on spouse's annuities shall be eliminated. If this bill becomes a law some 6,000 spouses who have earned social-security benefits in their own right will be entitled to receive such benefits without having the amount deducted from their railroad retirement benefits as is being done at the present time.

H. R. 7984 provides for a 25-percent across-the-board increase in the annuities and pensions payable to retired railroad employees, their widows, or other survivors. This bill is a revision of H. R. 859 and is necessary because of changes made by the 1955 amendments to the Railroad Retirement Act.

H. R. 7990 provides a 10-percent across-the-board increase in the annuities and pensions payable to retired railroad employees, their widows, or other survivors.

H. R. 7988 provides a 15-percent across-the-board increase in the annuities and pensions payable to retired railroad employees, their widows, or other survivors.

H. R. 7986 provides a 20-percent across-the-board increase in the annuities and pensions payable to retired railroad employees, their widows, or other survivors.

H. R. 7983 is a bill designed to provide a 25-percent increase in widows' annuities.

H. R. 7989 provides a 10-percent increase in widows' annuities.

H. R. 7987 provides a 15-percent increase in widows' annuities.

H. R. 7985 provides a 20-percent increase in widows' annuities.

Mr. Speaker, on November 1, 1955, the Railroad Retirement Board was paying 313,116 annuities and pensions to retired railroaders, 108,896 annuities to spouses of retired employees, and 205,371 monthly survivor benefits to widows and other survivors, or a grand total of 627,383 monthly annuities. Many of these beneficiaries under the Railroad Retirement Act live in my congressional district, and it is at their request that I have introduced railroad retirement legislation in both sessions of this Congress.

Already in an effort to secure prompt consideration of the bills mentioned I have written to Chairman PERCY PRIEST, of the House Interstate and Foreign Commerce Committee, and to A. E. Lyon, secretary, Railway Labor Executives Association, as well as to the legislative representatives of the railroad brotherhoods, the International Association of Machinists, and the A. F. of L.-CIO.

Mr. Speaker, the interest of the active and retired railroad employees in seeking amendments to the Railroad Retirement Act should receive serious consideration by Congress. This is their retirement system supported entirely by contributions from the employees and railroad

management, and its is the duty of Congress to give full consideration to the request for liberalization of the Railroad Retirement Act and an increase in benefits.

Fort Worth: 100 Years of Progress or When the West Began Beginning

EXTENSION OF REMARKS
OF
HON. JIM WRIGHT
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. WRIGHT. Mr. Speaker, on the banks of the Trinity River in Texas, a city rises out of the open prairie. It is Fort Worth, where the West begins. It is the capital and queen city of west Texas, a 120,000 square mile domain.

Down the canyon of West Seventh Street the wind whistles off the plain at 45 miles an hour between tall buildings that stab at the sky as if pointing the direction of Fort Worth's future. It is a friendly, big, garrulous, open-hearted town. Here live 350,000 people in this year 1956.

All of this began 100 years ago with four events noted at the time by only a handful of interested and determined settlers. In 1856, the first general school was created by community action. The first industry was launched. A post office was established. And in that fateful year, by dint of undaunted determination, Fort Worth became the county seat.

The future was pregnant with promise. Fort Worth's hour of destiny had not yet struck, but the wheels of history had been set in motion.

Only 6 years earlier, the United States Army had founded here on the untamed prairie a fort, charged with the mission of protecting the increasing wagonloads of settlers from the ravages of the savage Indian tribes which roamed the area.

In 1853, with the thin edge of settlement pushing westward, the fort had been abandoned and in its place had sprung up a tough-rooted little civilian community on a bluff overlooking the Trinity Valley and the southward tilt of the rolling plain.

Other settlements, to be sure, had clawed a tenuous foothold in this new frontier. Others opened schools and post offices, hopefully started infant industries, became county seats.

But there was, even then, something about the spirit of this frontier village which marked it for permanency. It was like a hardy little prairie flower, determined not to wither on its vine under the scorching southwestern sun.

Wagon trains of settlers were rolling westward, looking for a place to get a new start and stake the family future. Some 30 miles to the east lay Dallas, already established, like a roadblock across the trail.

When the wagons rumbled through on the westward track, Dallas men would stop them with lurid tales of danger to the west. "The Indians will surely scalp you if you venture to Fort Worth," they warned. Here, perhaps, began Fort Worth's much vaunted early reputation as a wild and woolly place.

Here, too, began an intense rivalry which has raged for a hundred years. Picking up the challenge, the Fort Worth settlement sent riders to intercept the wagons east of Dallas and escort them to Fort Worth along a trail that bypassed the neighboring village.

And here, also, was born a tradition of resourcefulness in building a city. Fort Worth had no doctor. When Julian Field, a leading community figure, became ill, it was necessary to send to Dallas for young Dr. Carroll Peak. The townspeople immediately set upon him with blandishments. They would not hear of his leaving. He and his wife were put up in an abandoned barracks, and he stayed in Fort Worth.

Unwilling to trust the schooling of the children to the erratic comings and goings of wandering tutors, the infant community in 1856 called an election, chose a school board, imported two regular teachers, and erected a crude school building.

The first industry, appropriately enough, was milling. Julian Field, R. S. Mauk, and David Man built a gristmill to make flour from the wheat brought in from neighboring farms.

The nearest post office was Dallas. Dr. Peak hired a horseman to ride over semiweekly and bring back all missiles addressed to Fort Worth's residents, and for this service he charged a dime a letter. In 1856, President Franklin Pierce recognized the new community carved out of the frontier by appointing Julian Field as the postmaster, and Fort Worth built its own post office.

The dauntless tradition then aborning was most dramatically portrayed, however, in the circumstances surrounding the removal of the county seat to Fort Worth from Birdville, then a separate village some 5 miles to the east.

A delegation went to Austin, buttonholed lawmakers, finally prevailing upon the legislature to call an election in which Tarrant County's settlers could choose between the two villages for their seat of justice.

The competition was keen, if not entirely clean. As an added lure to voters, Birdville leaders cached a big barrel of whisky in an oak grove at the edge of town. Fort Worth merchants, with less propriety but not to be outdone, stationed huge barrels of free whisky on the public square. Adding insult to injury, an overzealous group of Fort Worthers stealthily made their way into Birdville's grove and siphoned away their neighbors' liquor, leaving the adversary dispirited in more ways than one.

Riders went out from both cities in all directions to round up voters. It was afterward contended that the total vote far outnumbered the aggregate male population of the county, but a precise census was virtually impossible. Sam Woody, of Decatur, told in later years of having brought in 14 men from Wise County to vote for Fort Worth that day in 1856. When all ballots were in, Fort Worth had carried the election by seven votes.

That night a torchlight procession gleefully made its way to Birdville and physically removed the courthouse effects, then and there conveying them to their new and permanent home.

This same instant resourcefulness and unashamed partisanship have characterized every step of Fort Worth's ascent up the ladder to eminence.

Two decades later, the Civil War-disrupted Texas economy was pulled out of the doldrums by the cattle drives which took bawling herds of rangy longhorns up the long, dusty trail to Abilene, Kans. It was in this era that Fort Worth, still a drowsy hamlet of but a few hundred people, seized upon opportunity and became the base of supply for West Texas stockmen.

Adjusting its pace to the trail-driving age, the town provided a welcome release for the pent-up energies and appetites of the cowhands after long, dull months on the range. It was a noisy, lusty, brawling place, but nobody cared. The cowboy was king; and this was Cowtown.

The open sesame for any aspiring township of the day was a railroad, and Fort Worth set out to have one. In the 1870's B. B. Paddock, editor of the Fort Worth Democrat, displayed the town's unrestrained ambition when he published a drawing that he called the Tarantula Map. Its center was a heavy blob denoting Fort Worth, while lines, like the hairy legs of the huge Southwestern spider, reached out in 9 directions to represent the 9 railroads which the editor prophesied would 1 day serve the town. Although rival towns scoffed, his prediction eventually came to pass.

With enthusiasm, Fort Worth leaders set out to promote their first railroad. An agreement was struck whereby the Texas & Pacific would be given large land grants from the State of Texas and 320 acres at Fort Worth, donated by such local enthusiasts as Van Zandt and Daggett, upon the condition the road reached Fort Worth by January 1, 1874. Work was begun, and the town danced with excitement over the prospects.

Catastrophe loomed when the powerful northern financial house of Jay Cook & Co. went broke. Risk capital froze in panic throughout the Nation, and the twin rails were halted in the middle of nowhere, several miles east of town.

Not to be denied, Fort Worthers determined they would have the road completed, if they had to build it themselves, foot by painful foot. They organized the Tarrant County Construction Co., subscribing its stock with cash, materials, labor, supplies—whatever they had. A bargain was driven with the T. & P., whereby the local company agreed to prepare the roadbed, the railroad to lay the track.

In a dramatic night-and-day race against time, with townswomen bringing food and coffee to the perspiring workmen and section crews resorting to the most unorthodox improvisations, the tracks were laid and an old wood-burning engine puffed into town to beat the second deadline set by the State legislature.

A churning cauldron of activity then erupted upon the prairie. Oliver Knight in his excellent work, Fort Worth, Outpost Upon the Trinity, from which most of this information was derived, has said that this was "by all odds the greatest

day in the history of Fort Worth," pointing out that within a few weeks after the first train rolled into town 59 new businesses had opened, and that within 4 years there were no less than 460.

Now joined to the East by railroads, the rapidly growing city attracted a web of stagecoach lines, becoming in 1878 the eastern terminal for the world's longest stage route which stretched for 1,500 aching miles to the California border at Fort Yuma, Ariz.

The Fort Worth story is one of vision, and of a community's ability to adapt to changing circumstances. While money flowed into town on the wings of transportation and cattle drives, Fort Worth was not content to soak up this boon with the impassivity of a sponge. Why not capitalize permanently upon these two advantages?

On Fort Worth's old North Side, where all the accoutrements of the early West are still much in evidence, a group of farsighted leaders founded the Texas Dressed Beef & Packing Co. A stockyard and slaughtering pens were built. Meat was dressed and shipped under refrigeration to the eastern markets, and the plant paid ranchmen 50 cents a head above the prevailing Kansas City price.

The taproot was driven deeper into the bruised soil upon the Trinity's banks. Fort Worth had industry.

It was then, near the turn of the century, that an air of real permanence began to settle upon the ebullient Cowtown. Other industries slowly took hold. Municipal improvements came in a wave—a dependable water system, sanitary sewers, street paving and a modern fire department. Law and order took firmer grasp, churches thrived and women's clubs burst upon the scene.

The boisterous, rough-neck town was growing up. Like a self-conscious overgrown farm youngster in the city, the seam-splitting prairie colossus developed a newfound interest in higher education.

The Methodists in 1881 founded Polytechnic College on the present Texas Wesleyan site, then some 4 miles southeast of Fort Worth.

The Christian church in 1889 took over Add-Ran Institute, began in Fort Worth as early as 1869 but moved by its founders to Thorp Springs to avoid "the alluring vices of the city." The Church transplanted the Institution for a time in Waco, then brought it home to Fort Worth in 1910 as Texas Christian University.

In that same year, the Baptists opened Southwestern Baptist Theological Seminary which has flourished ever since.

But even with the stabilizing influences of culture, the spontaneity of fierce community pride continued. With the new century came the automobile, and Fort Worth took up the craze.

In their penchant for new horizons, the town's civil leaders foresaw that highways would one day be the new arteries of commerce. The State adopted a constitutional amendment in 1904 permitting counties to issue road bonds, and with characteristic vision Tarrant County became the very first in the entire Southwest to approve road and bridges bonds for $1,600,000.

Aviation evoked immediate enthusiasm in Fort Worth. The first daredevils to schedule a barnstorming tour through this part of the country made the mistake—or perhaps it was not a mistake for them, as it turned out—of booking an exhibition in Dallas but none in Fort Worth. This would not do. Amon Carter raised a public subscription and paid the four-man troupe $5,000 to demonstrate their talents in Fort Worth.

Fort Worth became an early aviation center at the outset of World War I. The Canadian Government established three flying fields near the city—Hicks, Everman, and Benbrook—where pilots were trained for the Royal Canadian Flying Corps.

In recent years, Fort Worth has carved itself a permanent niche in the history of aviation. During World War II, its Convair plant performed the impossible in production of our B–24 Liberator bombers. And in 1949 a new epoch in world history may even have come into being with the very first nonstop flight around the earth, originating and ending at Fort Worth's Carswell Air Force Base.

It is today the home of one of the world's most thoroughly modern international airports, known as Amon Carter Field.

As it had become the capital of the cattle industry, Fort Worth in the 1920's again grasped the elusive figure of opportunity and gambled on oil. With the throbbing exhilaration of west Texas boomtowns, Fort Worth girded itself as the gateway and supply base for the oil kingdom.

Just bring out something new, and it will find a home in Fort Worth. In 1921, Harold Hough held the torch of vision which had lighted the wilderness for Cowtown's early planners when he pioneered radio with WBAP. Twenty-seven years later, Fort Worth had the first television station in Texas.

The most recent sales management survey indicates that during the decade just ended, Fort Worth was the fourteenth fastest-growing city in the Nation. In the latest census of manufactures, Fort Worth's rate of industrial growth is shown to outstrip that of any other industrial center in the United States.

Today, the city's skyline glistens in the bright Texas sunlight. The rather tired old courthouse overlooks the Trinity in the same spot where the Army dragoons built their fort more than a hundred years ago. But in the city's heart pulsates the rhythm of change, of growth, of still untamed ambition. It dreams new dreams and still believes in a better tomorrow.

The Anniversary of President Wilson's 14 Points

EXTENSION OF REMARKS
OF

HON. THADDEUS M. MACHROWICZ

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. MACHROWICZ. Mr. Speaker, under leave to extend my remarks, I wish to place into the RECORD a statement on the 14 points of President Wilson, whose birth we celebrate this year.

The hundredth birthday anniversary of one of our greatest Presidents, Woodrow Wilson, will be celebrated this year all over the United States. During his Presidency, at the turning point of American history, the ideals of the American Declaration of Independence spread all over the world.

At that time the United States made a colossal effort to establish a just peace among nations, and for these efforts President Wilson, still in the White House, was awarded the Nobel Peace Prize in 1919.

President Wilson's idea of a just peace was based on the principle of every nation's self-determination and full independence, notwithstanding the size of the country, or the number of people, or their importance in the world. The most powerful expression of President Wilson's ideas was his attitude toward Poland. During the First World War the international situation put the problem of Poland into the foreground. Even before the United States entered the First World War, President Woodrow Wilson said in his message of January 22, 1917:

> Statesmen everywhere agreed that there should be a united, independent, and autonomous Poland.

Now it is fitting to remember, that on January 8, 1918, President Wilson announced his famous 14 points, which expressed fully his peace program. And it is also fitting to remember that his peace terms announced on January 8, 1918, were fully accepted by the defeated Germans on November 11, 1918.

President Wilson's 13th point, concerning Poland, made the greatest impression of all. This point reads as follows:

> An independent Polish state should be erected which should include the territories inhabited by indisputable Polish populations, which should be assured a free and secure access to the sea, and whose political and economic independence and territorial integrity should be guaranteed by international covenant.

At that time the message of the President made it clear to all, that the regaining of independence of Poland is one of the main aims for which the war was fought by the Allies.

When Poland regained her freedom and independent after the First World War, the Polish nation never failed to express its gratitude for President Wilson. His message of January 8, 1918, strengthened and deepened the traditional ties of friendship between the American and Polish nations.

The fundamental principles of the American foreign policy still follow the tradition of American ideals: The ideals of every nation's self-determination, their full independence in a just and lasting peace—these ideals are still alive. This policy was reaffirmed by Presidents Franklin D. Roosevelt and Harry Truman. They were expressed in the declaration of December 30, 1955, on behalf and with the approval of President Eisenhower:

> The peaceful liberation of captive peoples has been, is, and until success is achieved, will continue to be a major goal of the United States foreign policy.

Unemployment in Economically Depressed Areas

EXTENSION OF REMARKS
OF

HON. KENNETH J. GRAY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. GRAY. Mr. Speaker, on the opening day of the 2d session of the 84th Congress, I introduced H. R. 7902, a bill to establish an effective program to alleviate conditions of excessive unemployment in certain economically depressed areas.

It is of the utmost importance to all the people of southern Illinois that this bill become law in this session of the Congress. I hope we will be able to hold early hearings on this bill and that it may be passed without undue delay in order to alleviate human suffering.

Under unanimous consent request, I wish to have inserted the following statement by me made before the United States Senate Labor Subcommittee on January 6, 1956:

STATEMENT BY THE HONORABLE KENNETH J. GRAY, REPRESENTATIVE IN CONGRESS, 25TH DISTRICT, ILLINOIS, BEFORE THE UNITED STATES SENATE LABOR COMMITTEE, ON JANUARY 6, 1956

Mr. GRAY. Mr. Chairman and members of this fine committee, I am indeed grateful for the invitation and opportunity to appear before your committee which is studying the economic conditions in depressed areas of our country.

I have the honor of representing the 15 southernmost counties in the great State of Illinois and before settling down to specific facts concerning our true economic conditions as they now exist in southern Illinois, please let me first preface my remarks by saying that due to coal and fluorspar mine closures and other factors, the economy of southern Illinois has been slipping for the past 10 years. The people of this region, through their chambers of commerce, Southern Illinois, Inc., community development programs, and other groups have done an outstanding job in trying to promote private industry to our region to take up some of the unemployment slack; however, the economic decline has been so great that the results of their endeavors have not been fast enough to prevent an economic recession in which we find ourselves at the present time.

Southern Illinois is made up of fine people, good schools, churches and bounded on both sides by two of the greatest navigable streams in the world, the Ohio and Misssissippi Rivers, but is severely hurt economically and if Federal help is not forthcoming, thousands of additional people will be forced to leave the area to seek employment. There are 31,000 able-bodied men and women in my congressional district unemployed and according to the latest figures from the Illinois Public Aid Commission there are 51,876 persons receiving Government surplus food in the 15 lower counties of southern Illinois. In an effort to spotlight the needs of Southern Illinois and to give each community a chance to stand up and speak out in behalf of their wants and needs, I called a nonpolitical factfinding forum for December 31, 1955, and urged every man, woman, and child in southern Illinois to attend. I invited every State and Federal official, concerned with this type of problem, from President Eisenhower on down. I was indeed gratified by the huge success of the meeting which was made possible by the attendance of 35 southern Illinois mayors, an estimated 5,000 private citizens and a score of various chambers of commerce and other spokemen who came to the "sink or swim" meeting to tell their story and every word uttered received the utmost attention of the following State and Federal officials who were in attendance:

LIST OF STATE AND FEDERAL OFFICIALS ATTENDING "SINK OR SWIM" MEETING HELD AT WEST FRANKFORT, ILL., DECEMBER 31, 1955

PAUL H. DOUGLAS, United States Senator, chairman, Joint Committee on Economic Report.

Bert Baker, State representative, Illinois.

Russel Travis, representing Illinois State Director of Labor.

Lester E. Leigh, representing Ezra T. Benson, Secretary, United States Department of Agriculture.

Harry P. Raymond, Interstate Commerce Commission.

J. M. Ballard, representing Administrator Wendell Barnes, Small Business Administration.

Charles S. Green, representing Illinois Department of Labor.

Paul Dorris, representing Illinois Industrial and Planning Commission.

CHARLES W. VURSEL, Member of Congress, 23d District of Illinois.

G. R. "Bob" Beckmeyer, State representative, Illinois.

Dean Hammick, State representative, Illinois.

Clyde Miller, United States Department of Commerce, personal representative of President Dwight D. Eisenhower.

A. L. Rascher, Jr., United States Department of Commerce, personal representative of President Dwight D. Eisenhower.

Paul Zeigler, State representative, Illinois.

Clyde Choate, State representative, Illinois.

V. O. Verhines, State representative, Illinois.

E. Bishop Hill, representing United States Health, Education, and Welfare.

L. D. Norman, representing Department of Public Welfare.

Clyde W. Campbell, representing Interstate Commerce Commission.

John M. Darr, representing Wendell Barnes, Administrator, Small Business Administration.

Ralph Warnack, representing Wendell Barnes, Administrator, Small Business Administration.

Russell L. Kelly, representing Illinois Department of Labor.

H. K. Olds, representing State of Illinois auditor's office.

E. E. Crawford, representing United States Department of Interior.

H. E. Stiles, representing United States Department of Interior.

I expended months of hard work in organizing such a factfinding forum and I believe it was well worth the effort because it accomplished at least three specific things: (1) It gave the people of southern Illinois a chance to tell of the true economic conditions existing in their respective communities; (2) through questionnaires an opportunity was provided to list projects needed to stimulate the local economy; and (3) focused State and Federal attention on our plight with a view that the information derived from each community will be helpful in setting up a distressed-areas program. Speakers came from every walk of life—rich man and poor man, banker and coal miner, and each one reiterated a common plea to officials in attendance that "we don't want charity or doles, we want to work"—but they pointed out they had no chance to work. No jobs were to be found, they said, unless they left their homes and went to some other place.

It was brought out in the meeting that the people are very disgruntled with the Government for sending billions of dollars overseas in foreign aid while communities in the United States could be utilizing these funds to alleviate human suffering in this country.

We were privileged to have Senator DOUGLAS at our meeting to discuss some of our problems and offer ways of improving conditions and have him explain the provisions of his depressed-areas bill, S. 2663.

President Eisenhower personally directed that Mr. Clyde Miller and Mr. A. L. Rascher, of the United States Department of Commerce, report back to him their findings of the forum. They summed up conditions in southern Illinois by including in their report that the "area is economically depressed and needs Federal assistance."

Gentlemen, I call these facts to your attention because they reflect the opinion of unbiased individuals who were sent into our area to review our economic plight. Similar reports will be forthcoming from other State and Federal officials in attendance.

In addition to our industrial plight, our farmers are also experiencing undue hardship. In a survey that I conducted in my district in cooperation with the Bureau of Census, it was determined that there has been a net loss of 4,000 farms in my congressional district since 1951. This means only one thing—the small farmer is being forced out of business and has been selling his acreage to the larger farmer. This can be substantiated by the fact that the average acreage per farm has increased. We have also lost over 25,000 people in the past 5 years who have moved to other sections of the country to find work.

I think I have expounded long enough as to our need. The main concern of mine at this time is what can we do about it. I believe it is incumbent upon the Congress to pass some type of depressed areas bill in this session so we may go about the task of stimulating the economy of our communities without further delay. I have read thousands of questionnaires that have been filled out by individuals, organizations, and cities. I am thoroughly convinced that a program designed merely to loan money will not be sufficient to cope with the problem. In addition to loans to communities with which to induce new industry, other things will be needed—public works projects such as new highways and streets, city halls, new schools and additions to old ones, improved water and sewerage systems, artificial lakes to insure an adequate water supply, increased dredging projects for navigation and flood control, and new sources of electrical power. To help carry out some of the aims of area development, I have just introduced H. R. 7902 which is similar to S. 2663 introduced by Senator PAUL DOUGLAS in the Senate. I expect to have some slight changes in my bill after completion of the study of the thousands of suggestions contained in the questionnaires I circulated in conjunction with the "sink or swim" meeting held last week.

On behalf of all the fine people of southern Illinois, may I urge upon you very strongly to take drastic action in an effort to alleviate the critical unemployment situation existing not only in southern Illinois but the other economic sore spots in the country. We do not ask for handouts, but merely be given some projects and tools with which to work so that we may make our area more attractive to private industry.

Thank you very kindly for your attention and for this opportunity to testify before this committee.

Senator DOUGLAS (chairman of Subcommittee on Labor, presiding). May I interrupt a moment? You know, of course, that section 9 of S. 2663 authorizes the appropriation of an additional $100 million for public works and public facilities outside the sums carried in other appropriation bills?

Mr. GRAY. That is exactly right. As I have said, I have had the honor of introducing a companion measure to your bill in the House, H. R. 7902, and I realize that. I merely mention this because I think some of the supporters of depressed areas bills will merely want to make money available to lend to these various communities. I don't think that is going to do the job by itself. I don't think the economy of some of these communities will allow them to put up the necessary capital to obtain a loan. I think there are going to have to be types of projects other than just lending money to these various communities. That is the reason I pinpoint and mention this.

Senator DOUGLAS. Yes. May I ask this question? It is not true that though the averag rainfall over a period of years in southern Illinois has in the past been adequate, though not in certain years, that nevertheless there is something connected with the soil so that there are not natural lakes in the region, and it would be necessary probably in order to build up the region to have a series of artificial lakes or reservoirs both for the use of the community and to provide industrial water for new industry which may come there? It would be, therefore, necessary to have a public-works and public-facilities program to go along with loans to new industries.

Mr. GRAY. That is exactly right, Mr. Chairman; not only for possible irrigation farming and industry, but in the past 3 years almost every city reservoir in southern Illinois has dried up, and they have had to pump water from as far as 30 miles away to supply their local communities.

I might say that after looking over thousands of these questionnaires I may have some additional recommendations to make to this committee. There is some wonderful testimony in the questionnaires, both from individuals and groups, and due to the fact that the meeting was only last Saturday, I haven't had a chance to go over all of them.

Every person who came to the microphone to speak at the meeting told that we didn't want doles, but we would like to have some things to raise our economy up with the economy of the rest of the country, and to provide these people with a decent living.

As I say, there are 31,000 unemployed in my district, plus the 25,000 who have had to move off to other places, including the potash mines of New Mexico. Many own their homes, and would like to come back to them. So if you added that figure, we probably would have 50,000 or 75,000 unemployed if they all could come back home. This is a matter that has been discussed pro and con as to whether or not the Government should help these areas, and in my opinion, after listening to this nonpolitical fact-finding forum, it is a must, for some Federal action if these communities are to survive. My home town of West Frankfort, Ill., in 1940 had a population of 15,800. Today it has an estimated population of 9,000. Imagine such a loss in population when most cities have grown considerably since the war.

Last week, on the very day that I called the fact-finding forum, we had a very large department store on Main Street, one of the largest in town, close after 35 years of operation, because of economic conditions. Thirty-five years in the same spot, and it closed the very day we had this forum.

Senator DOUGLAS. That is the same thing that happened in Johnson City.

Mr. GRAY. That is right. All those towns.

I again say I certainly appreciate this opportunity. I am at the disposal of this committee any time that I can give information that I have derived from these questionnaires or from personal knowledge of the problem. The questionnaires contain the unbiased opinions of the people of southern Illinois, regardless of political affiliations, and we are at your command at any time.

Address by Congressman John J. Flynt, Jr., to the National Association of County Officials

EXTENSION OF REMARKS
OF
HON. JOHN BELL WILLIAMS
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. WILLIAMS of Mississippi. Mr. Speaker, on July 17, 1955, our distinguished colleague, Hon. JOHN J. FLYNT, Jr., of Georgia, delivered a memorable address to the National Association of County Officials at their annual meeting in Richmond, Va. Congressman Flynt's address emphasized the importance of local governments and stressed the very pressing need of our people for the right of local self-determination. Under leave to extend my remarks in the CONGRESSIONAL RECORD, I am pleased to include the major portion of Congressman FLYNT'S address:

EXCERPTS FROM ADDRESS BY CONGRESSMAN JOHN J. FLYNT, JR., TO THE NATIONAL ASSOCIATION OF COUNTY OFFICIALS ANNUAL MEETING IN RICHMOND, VA.

Mr. President, ladies and gentlemen, I am grateful to you and your executive committee for the invitation to meet with you today, and I am especially delighted to discuss with you our joint responsibility to the respective subdivisions of Government which we serve. In most instances you who serve your counties, districts, and parishes do so because of a genuine desire to be of public service. It matters not what capacity in which you serve. I believe I make a safe statement when I say that each of you put far more into the job you perform than you receive out of it in monetary compensation.

In the entire history of the American people of our Nation and of the States and local subdivisions of government which comprise our Nation, it has been a historical fact that the best public servants and the best public officials are those who serve out of a genuine and conscientious desire to improve the community, State and Nation in which they live.

The principle is well established that the responsibility of government under our law and Constitution rests with the people. The American people are the only sovereign power under our form of Government. We who in one form or another have been chosen to elective office have received from this sovereign power our commission and our mandate to be public servants in a representative form of Government. If ever we fail to realize that we are a part of a representative form of Government and if ever we fail to fulfill the commission entrusted to us, then we have failed in the basic concept of the form of Government which has made this Nation the greatest in the history of civilization.

There is a phrase in the State constitution of my own State of Georgia. In fact, it is paragraph 1 of article I of our State constitution. It reads:

"All government, of right, originates with the people, is founded upon their will only, and is instituted solely for the good of the whole. Public officers are the trustees and servants of the people, and, at all times, amenable to them."

Of the responsibilities which rest upon you as a governing official of the county in which you live, three of them stand out above all. First, there is a responsibility to your own local government of which you are a part to lend to it a dignity and stature so that all persons may have a genuine and deserved respect for constituted authority.

In this connection, it seems to me that the first responsibility of local officers, indeed the first responsibility of all public officials, is to maintain and preserve the principle of local self-government and local self-determination. This country of ours and our government on every level has become the great Government that it is and the great Nation which we are because of strong foundations on the local level.

We could no more have built a strong national government with weak local foundations that you could build a pyramid on its point or suspend this building in space without solid, genuine foundations.

It is for this basic, underlying reason that we who live in the South are so firm and so confident of the rightness of our position which the Supreme Court of the United States has recently sought to overturn and overthrow. If the Supreme Court of the United States, or any other tribunal by whatever name it may be known, can destroy the principle of local self-government and local self-determination on the issue of public schools, then it can also do it in every phase of local government. This decision of the Supreme Court to which I refer was aimed at the South, and under the guise of a legal decision it overturned every precedent known to legal minds. Those of you who have read the Supreme Court decision are well aware of the fact that it admitted that it was not based on law but was based on sociological and psychological factors.

Therefore, we urge and call upon you who live in other parts of the United States to join with us as we seek to preserve the principle of local self-government and local self-determination.

Don't say it can't happen to you, for just as surely as the principle of local self-government is destroyed in Georgia or Virginia or Alabama, then before you know it, even perhaps before the moon changes again, you will lose certain rights which you think are safe and secure to you today.

So, never send to know for whom the bell tolls, it tolls for you.

We have long believed that we enjoy more freedoms than any other people in the world, and yet by recent decisions of the Supreme Court of the United States, that Court has destroyed the most basic and fundamental freedom of all, the freedom of choice.

Secondly, a public official owes a responsibility to the citizens of the political subdivision he serves, whether it be on a municipal, county, State or national level. "A public office is a public trust." Any public official who undertakes to conduct the duties of his office in any spirit other than that he is performing a sacred trust is unworthy to hold the position to which he has been chosen.

The third of the three responsibilities which are enumerated here is the responsibility to one's self. "This above all: To thine own self be true, and it must follow, as the night the day, Thou canst not then be false to any man." If and when this thought becomes the guiding spirit which motivates each public official in the performance of his public duty then we shall be assured for all time of better and finer government on every level of government known to American people.

Public confidence in public officials and in local self-government is determined largely by the manner in which the duties of local public offices are conducted and carried out. Each and every public official is, and at all times should be, responsible for his every public action.

It is, of course, necessary on all levels of government to hold what are known as executive sessions, that is in certain phases of

legislation and certain phases of carrying out administrative and executive duties, it is necessary that these sessions be conducted in relative privacy. But one indispensable part of our form of government is that the results and actions of these executive sessions, once they have been made, be made freely and openly available to inspection by the public generally. This is as it should be, because truth is a weapon of freedom; and conversely the suppression of truth is a weapon of dictatorship.

There are two essential characteristics which a successful public official must possess. One is a thick skin and the other is courage.

It is not necessarily right, but it is nevertheless true and correct that any public official, good or bad, is at all times subject to attacks sometimes minor and on the other hand sometimes extremely vicious. He, therefore, must at all times be ready, willing and able to withstand any attack which may be made upon him as an individual or as an office holder. He must be able to laugh at those which are made in either a joking or half-joking fashion, and at the same time, he must be able to repel by whatever means necessary those of a vicious and scurrilous nature.

The other characteristic which every public official must have is that of courage. He must be able to make decisions and to stand upon the decision he has made so long as he believes that decision to be right and just. He cannot vacillate and he cannot change his mind with each changing wind or each waxing moon.

There is a story told that during the reign of Henry VIII, of England, there was a bishop of Westminster by the name of Hugh Latimer. Whatever faults Henry VIII had, he was a regular attendant at worship services in Westminster Abbey Sunday in and Sunday out. One difference between him and other worshippers was that he didn't sit in the congregation as you or I do; Henry VIII sat in his royal box and looked down upon the pulpit and congregation alike. Whenever he disagreed with anything contained in one of Bishop Latimer's sermons, he would voice something akin to a negative amen. One day at the end of Bishop Latimer's sermon, Henry VIII rose in his royal box and said, "Bishop Latimer, your King is speaking to you. On next Sunday morning, you will return to this cathedral and renounce and recant every word which you have spoken today." Needless to say, it was not necessary to send out notices to fill the pews the following Sunday. When next Sunday rolled around, the bishop was in his pulpit, the King was in his royal box, and every available pew and standing space was filled. After the prayer was prayed and after the hymns were sung, Bishop Latimer took his place. He first turned in the direction of the King and addressed himself: "Bishop Latimer, Bishop Latimer, understandest thou that thou are in the presence of the Sovereign King of England who has the power to sever thy head from thy shoulders?" Then Bishop Latimer lifted his eyes toward the sky and again addressed himself, saying, "Hugh, Hugh, knowest thou that thou comest from Almighty God who has the power to cast thy body and soul into everlasting hell. Speak the truth, man, speak it with all thy heart." And then he proceeded to preach the identical sermon he had preached the Sunday before. There wasn't a sound in the cathedral as he finished. Everyone was waiting for what would come next. Presently, Henry VIII rose, faced the bishop and faced the congregation, and said, "I thank God for one man in my kingdom with the wisdom to know what is right and the courage and strength to say it, even in the face of death."

A great many, perhaps most of you, are men and women who occupy positions charged with the building and maintenance of public roads and highways. In view of this, I am sure that you are vitally interested in the legislative deliberations in the United States Congress on the proposal known as the Federal highway program. I think that you might be interested to learn of the plans that have been advanced. The administration plan, oftentimes called the Clay plan, has not been passed and probably will not be passed by either House of Congress, and I am one of those who would have opposed it if the administration's plan had reached the floor of the House of Representatives. This particular plan had what I consider five basic defects which would render it unsound, ineffective and actually un-American legislation.

1. Under the pending proposal contemplated in the administration plan, every dollar's worth of road would eventually cost the taxpayers $1.55.

2. The average life of a road is 20 years. Under the administration plan, it would take our children 30 years or more to pay for the cost of roads which had long since been worn out.

3. The administration plan would completely unbalance our road program, by freezing all work on our regular primary and secondary systems at $622½ millions annually while spending $2 billion each year (three times as much) on an interstate network of super-highways. Three-fourths of all Federal road funds on a system which constitutes only about 2 percent of our highway mileage and carries only one-seventh of our traffic.

4. The increase the administration plan seeks to provide is too abrupt. During the fiscal year just ended, we've appropriated $25 million for this particular network. The administration bill would increase this to approximately $2 billion, or 80 times as much * * * an increase of 8,000 percent.

5. The administration plan would increase our national indebtedness by $31.5 billion and ultimately mean an unavoidable increase in taxes.

I hope that you and each of you can and will make your views on Federal highway legislation known to your respective Members of Congress, for I believe I speak the sentiments of my colleagues in the House of Representatives when I say that we have a great deal of confidence and faith in the county officials who serve the counties which comprise the districts we have the honor to represent.

I am confident that I speak the feelings and sentiments of all of us when I say we are truly living in a changing world. We are living in a world which perhaps stands on the brink of the greatest era of world progress in which the American Nation will naturally play a leading part, or we stand on the threshold of destruction and eternity.

There are many people who believe that the cold war is almost over and that that which will follow will be peace or destruction. Whichever comes, we will go through a considerable change—an era of transition.

Public officials are called upon to take the lead, to make decisions, and above all, to show courage in times of crisis and on days of decision.

If you and I, as public officers, are to serve our Nation, our States, our counties, our families, and ourselves, it is the solemn responsibility of each of us to accept the challenge which comes our way and to meet with courage and determination each decision which we have to make.

An Italian poet, Alighieri Dante, once said:

"There is one heaven and one hell, but there are many roads which lead to each."

To that he added:

"The hottest places in hell are reserved for those who in a period of moral crisis maintain their neutrality."

The United States of America, the youngest of the great nations of the world, has become the greatest economic, moral, and spiritual force in the history of civilization. This has been no accident; it has been because of the will and the determination of the American people. These people, even as you and I, who have carved out of the wilderness the greatest Nation in the history of mankind, have done so because of their intense desire for a way of life similar to that preached by the Man of Galilee 2,000 years ago. They have lived it in their daily lives; they have charted their course for the future in times of prosperity and times of adversity, and that course has been based upon the same principles and ideals which are expressed in a quotation on a statute on the capital grounds in Atlanta, Ga.:

"Give us the fortitude, which through the clouds, and gloom, and sorrow of apparent failure, can see the distant pinnacles upon which the everlasting sunlight rests."

Some time ago, I read a pamphlet in which a 10 or 12-year-old, barefoot boy dressed in overalls and a straw hat, freckled face with a fishing pole over one shoulder and a can of worms in his hand, was looking up to you and me. This boy, my friends, is typical of American boys all over, and this is (in essence) what he said:

"Why not hold off turning everything over to the Government, so that the Government can issue it back in the form of so-called 'security and welfare benefits?' How about giving me a chance at America the way you found it when you first came of age?"

We owe the greatest of all responsibilities to this boy who asks you and me that simple question. We owe it to him and to all others like him to fulfill our responsibilities and obligations to them as well as to the Nation we love and serve and thereby leave to him the kind of country he wants to live in and has a right to live in.

Our democratic institutions, and with them our American way of life, exist by reason of their very virtue. If ever they cease to exist, it will be when you and I have forgotten the past, have become indifferent to the present, utterly reckless as to the future.

Courage has been exemplified in the lives of four centuries of Americans who by their lives have kept up the installments on our contract with freedom, and the blood of American heroes who have given their lives in defense of our Nation has been the moisture content which has built the concrete structure we call America—this same America of which Oliver Wendell Holmes spoke when he said:

"The thing that sets America apart from the rest of the world is that we always sail on. Sometimes we sail with the wind, sometimes against the wind; but we always sail. We never drift or lie at anchor."

Anniversary of Ukrainian Independence

EXTENSION OF REMARKS
OF
HON. ALBERT W. CRETELLA
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. CRETELLA. Mr. Speaker, January 22 marks the 38th anniversary of the declaration of independence by the 40 million people of the Ukrainian National Republic.

Ukrainia is a traditionally democratic nation lying within the orbit of Soviet tyranny. The people of this tiny repub-

lic have always cherished freedom above all material treasure and have never ceased their long struggle for this liberty.

I point with pride to the fact that New Haven, Conn., located in the district which I represent, was the first city in the United States to recognize Ukrainian Independence Day. Again this year the blue and gold colors of Ukrainia will fly over our city hall. It is a fitting ceremony in these times which clearly demonstrates our protests to the international Communists who treacherously design the envelopment of the entire world.

The historic claim of Ukrainia to national freedom and independence cannot be ignored. Its place as a sovereign and equal partner in the mutual construction of the free world of tomorrow must be assured if the foundation of permanent peace among freedom-loving nations is to be impregnable.

Farmers Should Be Relieved From Federal Gasoline Tax

EXTENSION OF REMARKS
OF
HON. DANIEL A. REED
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. REED of New York. Mr. Speaker, I have just introduced a bill which carries out President Eisenhower's recommendation that farmers be relieved of the burden of the present Federal excise taxes on gasoline and lubricating oil when used in tractors, trucks, and other farm equipment for agricultural purposes. I predict that Congress will act promptly and favorably on this proposal.

I do not consider this to be a tax-reduction measure but an act of simple equity designed to correct a long-standing injustice against the American farmer. These Federal excises merely serve to increase the farmer's production costs. In so doing, they add materially to the severe price-cost squeeze from which, in the words of President Eisenhower, "our farm people, with the help of Government, must be relieved."

Of course, it is true that the farmer today can deduct, in computing his income taxes, these Federal excises to the extent that they are business expenses. By this means, he is partially relieved of their burden. Unfortunately, this relief varies widely between different taxpayers. The average small farmer with only a small taxable income gets very little benefit from the deduction. The farmer who does not have enough income to be subject to the income tax at all gets absolutely no benefit whatsoever. My bill will correct this discrimination and will relieve all farmers of this burden.

Congress will again consider this session a highway program. It has been widely proposed that the cost of this program be met, at least in part, by increased taxes on gasoline. In my opinion, it would be unconscionable for nonhighway farm operations to be forced to share this burden when such operations would receive no benefit from the program. I consider this to be an important reason for prompt action on my bill.

Thirty-Eighth Anniversary of Ukrainian National Independence

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Monday, January 9, 1956

Mr. FEIGHAN. Mr. Speaker, on January 21, the eve of the celebration of the 38th anniversary of Ukrainian National Independence, it was my privilege to be the guest speaker at a dinner sponsored by the Ukrainian Congress Committee of America and Ukrainian Association of Washington, D. C.

I was happy to see so many of my colleagues in the Senate and the House in attendance at this dinner, and to hear stirring words of encouragement for the cause of human freedom. It was also significant that in attendance at this dinner were many representatives of organizations which advocate the restoration of national independence to all of the nations now enslaved. Because I feel my remarks on this occasion will be of interest to those Members of Congress who did not have an opportunity to attend this dinner, under unanimous consent I insert my address in the RECORD:

RUSSIAN COMMUNIST COLONIALISM: THE SCOURGE OF ALL MANKIND

Mr. Chairman, it is a real pleasure for me to join with you on this occasion when we commemorate the 38th anniversary of national independence of the Ukrainian nation. An occasion such as this is always a welcome one because it affords me the opportunity to meet so many old friends and to take part in a program which is always sure to bring forth some new ideas beneficial to the cause of individual liberty. This year, in my judgment, is a unique one because world developments are compelling us to return to fundamentals and to decide upon a course of action capable of beating the Russian Communists at their insidious game of peaceful coexistence. I believe it is apparent to all gathered here tonight, that the Russian Communists used the conferences at the so-called summit which took place in Geneva, Switzerland, to launch their latest political offensive, and that we have not yet awakened from the sedatives applied to liberty-loving men at the Geneva conferences, because we have failed to launch anything that could be called a political offensive against the Russian Communists. I am equally certain that everyone gathered here this evening would like nothing better than to see such a political offensive launched, if one could be produced, which would give better hopes than the sterile containment policy, or the latest version of containment which has been appropriately called evolution, not revolution.

I think it is very fitting that on this occasion we should discuss ways and means of restoring national independence to all those nations which have lost it to the Russian Communists. We meet each year on occasions such as this in order to keep bright the happy memory of the times when those nations were free and independent. We also hope that by keeping this memory bright, we will give added hope and promise to the hundreds of millions of people in those enslaved nations, that they are not forever doomed to a life of tyranny and colonial exploitation. More than anything else, it is high time that we developed a practical and winning program in order to give real purpose to our hopes and aspirations for all the people of the world.

In my considered judgment, the greatest threat confronting the free world today is that presented by colonialism. I mean, of course, Russian Communist colonialism because that is the only colonial power today which is in the acendency and which, in fact, does threaten all of mankind. I believe it is fair to say that whatever is left in the world of colonial empires, other than the Russian, represents nothing more than the death-bed throes of an archaic system which civilized mankind completely rejects. All of us are heartened to see so many nations formerly in colonial status, securing their national independence. We all hope that the number of nations regaining their national independence, while breaking the chains of colonial status, will continue to grow with each passing year. We cannot help but hope that the day has come when not one more nation on the face of this earth will be subjected to the degradation and agony of colonial status.

But we have not yet had the courage to face up to the many questions raised by the ruthless colonial practices of the Russian Communists. In fact, I am told that it is quite improper, while moving in certain circles here in Washington, to even make mention of the ruthless colonial practices of the Russians, or to even infer that the Russians are Communists. In those same circles, the rules of etiquette require that the word Soviet be used when referring to Russians, Communists, and Red colonialism.

This same phony etiquette has caused many Americans to become very confused as to whether the enemy is communism, Russian imperialism, or the workers, soldiers, and peasants of Russia. I say this because as most of you know, the only understandable meaning of the word "soviet" is a council of workers, peasants, and soldiers. I find it very difficult to believe that the American people would ever align themselves against a council comprised of workers, peasants, and soldiers. Certainly our basic traditions require us to take an unalterable stand against Russian colonialism and communism, regardless of what cover name these twin evils may be operating under.

With this understanding and with the assurance that I intend to break every rule of etiquette established by that crop of global strategists who acclaim themselves to be Russians experts, I would like to say a few words about the colonial practices of the Russian Communists. All one has to do is to consult any global map, other than those prepared in Moscow or by Russian sympathizers elsewhere in the world, and it becomes immediately obvious that the area of the world now occupied by the Russian Communists constitutes the greatest colonial empire in all of recorded history. That empire stretches from the Baltic Sea in north Europe all the way across the Eurasian continent to the Pacific Ocean. At a glance, one immediately realizes what a tremendous expanse of geography this empire occupies, but it takes a second glance to notice all the non-Russian nations which comprise this land mass, and which, in every sense of the word, are abject colonies being subjected to the most ruthless exploitation. It takes a little more study to learn that well over 900 million people are held within the bondage of this empire and that less than 9 million of that total population comprise

the new elite class called members of the Communist Party. It takes not only a little more study, but indeed a great deal more objectivity to acknowledge that in this empire of over 900 million human beings, less than 90 million of them are Russians. The importance of this last statement can best be measured by recalling to memory that Stalin frequently referred to the Russians as the superior people of the Soviet Union.

I am sure the record will bear me out when I say that the present empire over which the Russian Communists rule, is made up of more once free and independent nations than any other colonial empire in the history of mankind. It is startling when one recognizes that in addition to Ukraine the following nations are held in colonial bondage by the Russian Communists—Estonia, Latvia, Lithuania, Byelorussia, Poland, East Germany, Czechia, Slovakia, Hungary, Rumania, Bulgaria, Albania, Georgia, Armenia, Azerbaijan, Turkestan, North Caucasia, Idel-Ural, Inner and Outer Mongolia, Manchuria, China, North Korea, North Vietnam, and Tibet.

This empire certainly goes far beyond the imperialistic dreams of the czars, Peter and Ivan. Moreover, it dwarfs the conquests of Caesar, Genghis Khan, Attila, and Tammerlane. There can be no doubt, therefore, that the great problem of mankind in our times is that of Russian Communist colonialism.

It is one thing to recognize the menace created by the ruthless colonial practices of the Russian Communists, but it is still another thing to develop a program to counteract and defeat the Russian imperial empire. I feel that the platform afforded me here this evening is an ideal one from which to launch a four-point program which, at least, represents the beginning of a political campaign to eradicate the plague of colonialism from the face of the earth.

As a starting point, I believe it is necessary that we fully identify and then expose the Russian colonial empire for what it really is. The time has come for us to stop talking about Soviet imperialism and Red imperialism and to start using language that the man on the street the world over, understands. We must make it known to all the people of the still free world, particularly those who are indulging in the dangerous practice of neutralism, the unvarnished facts concerning the colonial empire of the Russian Communists.

When one understands the political struggle now taking place in Southeast Asia, it immediately becomes elementary that we expose to the world the fact that the Asian nations of Turkestan, Idel-Ural, Inner and Outer Mongolia, as well as Manchuria, China, Tibet, North Korea, and North Vietnam, are now being subjected to a colonial exploitation unequaled in any chapter of history. This same political principle applies in a geopolitical sense to every quarter of the world. As a first task, therefore, we must fully and objectively identify Russian Communist colonialism and then we must, by all the information media at our command, expose the ruthless practices to all the world.

As a second step in this political campaign, I feel it is necessary to acquaint the people of the world with our traditional stand on colonialism and imperialism. From my own personal experience, I state that there is a great deal of confusion in the world today concerning our position on colonialism. For example, throughout most of Asia, the people there who want terribly to be our friends, find it difficult to understand our basic stand on colonialism. This is so because we have attempted to straddle an issue which it is not possible to straddle. I am sure the people of Asia understand our desire to help them in their aspirations for national independence, but I am sorry to say that they still have grave doubts concerning our position on the question of colonialism. I believe this same situation applies throughout other areas of the world such as Africa, the Near and Middle East. This poses a problem which must be quickly resolved if we are to hold the confidence and good will of millions and millions of people, most of whom reside in the so-called twilight zones of the world.

One has only to recall the effort being made by the Russian colonizers in these twilight zones to understand the importance of the need for getting across our basic position on colonialism and imperialism.

It is fortunate that we already have a powerful instrument which properly conveys the position of the American people on the subject of colonialism and imperialism in order to meet this crying need in our foreign policy. I refer to House Concurrent Resolution 149, which was introduced in the Congress by the distinguished majority leader of the House—a great American patriot, the Honorable JOHN W. MCCORMACK, of Massachusetts. That resolution, in clear and inspiring fashion, sets forth our traditional policy against all forms of colonialism and imperialism as well as our unqualified support for the principle of national self-determination and the right of nations to national sovereignty. It restates our time-honored position of support in enabling all nations to assume and maintain an equal station among all the nations of the world. The McCormack resolution is an ideal starting point from which we can and must acquaint the people of the world of our stand against colonialism and imperialism. That resolution, in my judgment, is a magnificent weapon to remove the uncertainty which exists in the minds of so many people of the world who want to be our steadfast allies and warm friends.

Finally, it is an excellent vehicle to eliminate our fence straddling position on the subject of colonialism and imperialism which has caused us to lose a major part of the initiative in the conduct of the cold war.

As a third step, I believe it is urgently necessary that we shake the dust, feathers, and fuzz out of our foreign policy. In order to do this, I feel it is necessary that we make our primary national objective the eradication of colonialism and imperialism from the face of the earth. Once having taken this step, we must then harness the full strength of our diplomatic, political, and economic capabilities to the task of winning through on that objective. I would like particularly in this connection to point out the great opportunity that is ours in the forum of the United Nations to strike a blow on behalf of all the enslaved non-Russian nations in the Russian colonial empire. I am sure most of you are acquainted with House Resolution 183 which sought to require the United States Delegate to the United Nations to introduce a resolution branding Soviet Russia as an aggressor and therefore a threat to the peace. This same resolution will, if furthered by the Department of State, unavoidably raise all the pertinent questions on Russian Communist colonialism and the exploitation of the non-Russian nations.

I fervently hope and pray that House resolution 183 will be passed by the present session of Congress and that the United States delegation to the United Nations will have the honor to be joined by other nations in leading the fight against colonialism, in which fight they will surely be joined by the overwhelming majority of the nations holding membership in the United Nations.

As a fourth step in this program, it is necessary that we take maximum advantage of all the media of communications in getting across to the people of the world our determined position on colonialism and imperialism and our fervent desire to assist each and every nation which struggles against colonialism and for their national independence.

In the last session of Congress, I introduced House Resolution 433 calling for the creation of a joint committee of Congress on United States international information programs. The reason I introduced this resolution is that I am convinced that unless and until we begin to use all our scientific advances in the field of communications to bring our fundamental beliefs and aspirations to all the people of the world, we will continue to remain on the defensive in the face of the political offensive being carried out by the Russian Communist colonizers.

In connection with my resolution, I want to make one thing crystal clear. The purpose of this joint committee would be to work with the officials responsible for all our information programs in order that we can begin to build a program based upon long-range objectives and one clearly calculated to both expose and offset the massive propaganda output carried on by the Communist conspirators. The governing spirit of such a joint committee should be that it is one thing to criticize and find fault, but it is still another thing to create a long-range winning program in which the best brains and leadership in this country all play a responsible part.

All of us are heartened by President Eisenhower's advocacy of an enlarged and a more dynamic program for the United States Information Agency. I have no doubt but that Congress, in the face of the present world situation, will support the President in his call for an expanded and more dynamic program for the United States Information Agency. President Eisenhower's recommendation to the leaders of Congress underscores the need for a practical bipartisan approach to building the type of United States international information program demanded by the political offensive of the Russian Communists.

I hope that my resolution will pass in the present session and that we will thereby, in the years ahead, reap a rich reward from the benefits which will certainly come from a constructive, bipartisan approach in the field of international information programs.

I have this evening attempted to lay the cornerstone of a foreign policy that would give practical purpose to our long expressed hope that all the nations enslaved within the Russian colonial empire, will soon again be free and independent. I recommend this program as an expression of my fervent desire that Ukraine and all the other nations enslaved within the Russian Communist empire, will, in the foreseeable future, attain their God-given rights of equity among nations and a position of equality in the family of nations. I remain convinced that there shall be no true and just peace in this world until all nations are free and independent.

Liberalization of Agricultural Credit

EXTENSION OF REMARKS

OF

HON. HENRY ALDOUS DIXON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. DIXON. Mr. Speaker, basically agriculture, in spite of low prices and declining farm income of the last few years, is in a relatively sound condition. For example, the market value of total farm assets is nearly $163 billion. This, Mr. Speaker, is only $3 billion less than

the total of all farm assets in the peak year of 1955. Compared with total farm assets of $163 billion, total debt obligations of all farms is only 11 percent of the total assets, about $18 billion.

Also, Mr. Speaker, only 3 out of every 10 farmers have mortgage debt obligations, and over one-half of all farms mortgaged are mortgaged for less than 30 percent of their market value. In 1955, according to the administrative office of the Federal court system, only 386 bankruptcy cases out of some 59,404 involved farmers. Farm bankruptcies for the last 5 years have comprised less than one percent of the annual number of such proceedings. I believe, Mr. Speaker, these facts indicate the basically sound financial position of American agriculture.

However, Mr. Speaker, certain storm warning signals are beginning to appear which make it prudent for us to consider legislation at this time to help good farmers who cannot obtain credit from private or cooperative sources. For example, farmers in 1955 had to borrow $487 million from the Federal Lank Bank System and their 1,100 local farm loan associations. This was an increase of 59 percent in the amount of such loans over 1954. Also, $338 million of this money loaned in 1955 was "new money borrowed"—a 50 percent increase over 1954.

During the first 10 months of 1955, 498 production credit associations lent their farmer-members some $1.1 billion. As you know, Mr. Speaker, these associations lend funds obtained from investors in obligations held by the Federal intermediate credit banks.

You can see, therefore, Mr. Speaker, that even those farmers who have adequate collateral and satisfactory credit ratings are beginning to borrow in increasing amounts and at an increased rate. The Farmers' Home Administration of the Department of Agriculture, on the other hand, Mr. Speaker, has had the difficult responsibility of extending credit to good farmers who for various reasons simply cannot meet the standards set by commercial credit institutions, including the local loan and production credit associations I just referred to. The cost-price squeeze that farmers have been experiencing since 1951 has had the greatest effect upon farmers who find themselves in this unenviable position. But as Secretary Benson said at his address of last October 15, before the National Association of Mutual Credit Companies at St. Louis, Mo.:

> When disaster strikes in agriculture, credit is urgently needed. If there is real distress, farmers often cannot meet the standards of commercial credit. Collateral is insufficient, terms needed for repayment are too long, and administrative costs are too great. It is in the interest of these farmers—and the Nation's interest—to help them get onto their feet. These farmers are good credit risks if the lender can afford to wait. Our Farmers Home Administration makes substantial loans to farmers who cannot meet the standards of commercial credit. Their records of 9 years of operation show 93 percent of the principal repaid.

So you see, Mr. Speaker, F. H. A. borrowers, as they are called in general are good farmers and they are good credit risks provided they are given adequate repayment conditions commensurate with their ability to repay. But many FHA borrowers throughout the country are having extreme difficulty meeting their present obligations. Many other would-be FHA borrowers, especially among the younger farmers, are not going to stay in agriculture unless they can obtain FHA loans on more liberal terms than the Farmers' Home Administration has authority to make at the present time. With these farmers in particular experiencing a great intensive negative effect due to the cost-price squeeze, it is essential that the terms of FHA loans be more readily adapted to meet their needs. Especially is this true in drought disaster areas such as those which have been designated in Utah.

Therefore, I send to the desk two bills for introduction and proper referral, which will expand the Farmers Home Administration's loan program.

The first would authorize the Secretary of Agriculture, through the Farmers Home Administration, to—

First. Make or insure loans for the purpose of refinancing, consolidating, renewing, or extending all, or part, of the existing debts of the applicant for farm operating and subsistence expenses, whether secured or unsecured by real or personal property.

Second. Such loans are to be made to farmers operating family type farms who are unable to repay their existing indebtedness in accordance with present repayment schedules and who cannot secure refinancing through private or cooperative sources on terms that they could be expected to meet under present circumstances.

Third. Such loans are to be repaid when it appears that the borrower can obtain a loan from cooperatives or private sources, including the local loan associations and Production Credit Associations under the terms borrowers can meet.

Fourth. Such loans are to carry such interest rates and conditions of repayment as the Secretary of Agriculture deems advisable under the circumstances, provided, however, that the total principal indebtedness of a borrower shall not exceed the fair value based on earning capacity or the normal market value of the farm.

Fifth. The aggregate total of such loans shall not exceed $45 million in any 1 fiscal year.

The second bill, Mr. Speaker, will permit the Farmers Home Administration to provide more effective assistance to production and subsistence loan borrowers by providing that—

First. The term of any such loan shall not exceed 11 years from the date the original loan was made. This extends from 7 to 11 years the repayment period.

Second. No person who has failed to liquidate his indebtedness in 11 consecutive years shall be eligible for additional loans until such indebtedness has been paid.

Postal Decentralization

EXTENSION OF REMARKS

OF

HON. AUGUST E. JOHANSEN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, January 9, 1956

Mr. JOHANSEN. Mr. Speaker, under permission to extend and revise my remarks, I include the following statement regarding decentralization of post-office administration and operations which I have sent to my colleagues on the House Committee on Post Office and Civil Service:

I wish to make a brief statement with respect to the report of the Subcommittee on Post Office and Postal Operations which the House Committee on Post Office and Civil Service today voted to make a House document.

In making this statement I speak for myself alone and entirely on my own initiative, and at the request or suggestion of no one else.

I do so with misgivings because of my great respect for the chairman and every member of the subcommittee, as well as for the two ex officio members of the subcommittee. In what I have to say, I would not knowingly transgress any rule of propriety or courtesy toward my colleagues. Particularly I do not want to appear to arrogate to myself knowledge or wisdom equal to that of the subcommittee in a field which has been the subcommittee's special area of investigation. My sole motive is to seek more information.

My comments are directed to the section of this subcommittee report dealing with postal reorganization and decentralization, covering pages 4 to 18, inclusive, of the committee print.

This section contains what appear to me to be very categorical findings and conclusions. I shall itemize the particular findings and conclusions with which I am concerned later in this statement. First of all, however, I should like to make a few very brief comments about these findings and conclusions.

1. It is my understanding, and I state this simply as a matter of fact and not critically, that these findings and conclusions are not documented by any printed hearings and lack any detailed elaboration within the subcommittee report itself.

2. The scope and character of these findings and conclusions constitute, in my judgment, a definite and severe indictment either of the soundness and validity of much of the postal decentralization program or the soundness of its present administration and operation.

3. These findings and conclusions, and the publicity already given to them, seem to me to cast a shadow of concern and uncertainty over the Post Office Department, over the key personnel of the regional and district offices, and over the postmasters in relation to the decentralization program, which ought to be cleared up as speedily as possible in the interests of the postal service.

4. It seems to me that because of these considerations it is desirable that the Post Office Committee as a whole, or through this same subcommittee, further explore and disclose the full facts on which its findings and conclusions are based, to the end of either correcting any mistaken impressions or of recommending further constructive corrective procedures by the Post Office Department.

5. For the same reasons, it would seem to me that the Post Office Department should and would welcome further exploration of

the matter, with a full opportunity for Department officials to present all relevant information and views they may have to offer on the matter. My feeling on this score is strengthened by the fact that simultaneously with the release of this subcommittee report, the Post Office Department prepared and issued to the committee members a mimeographed statement in the nature of an analysis and rebuttal of some of the subcommittee's findings and conclusions. Indeed, I believe the Department has an obligation to present in even greater detail its views with respect to the subcommittee's findings and conclusions.

6. Finally, I am deeply interested, as a member of this committee, in further clearing up the entire picture because the findings and conclusions of the subcommittee are, in so many particulars, completely opposite to the impression I have gained with respect to the decentralization program. My impressions, admittedly limited, are based on conversations with postmasters and other members of the postal service both within and outside my own district, and on my own most satisfactory experience with the services extended to my constituents and to me under the regional and district office setup.

Let me say, at this point, that I am not posing as a champion of the Post Office Department in this matter, beyond being concerned that full justice should be done the Department in view of the herculean efforts it has devoted to the decentralization program and in view of its vast importance, for good or ill, to the postal service.

Certainly I do not contend—and I am sure the Department would not contend—that the program is perfect, either as to plan or operation. Certainly I share the concern of the subcommittee that no topheavy or costly and unproductive bureaucracy be set up under this program. I do not wish any facts to be concealed for any imagined benefit to the Post Office Department or its present administration. On the contrary, I hope there will be an opportunity to secure more facts—many more facts. I am simply concerned that the findings and conclusions contained in the subcommittee report do not prove to be a verdict based on inadequate facts.

Now permit me to cite some of the specific findings and conclusions in this subcommittee report which are the basis of the concern I have expressed:

1. The statement (p. 14) that "analysis by the subcommittee of the organizational structure which has been placed in effect within the regions visited discloses information and evidence that the present provision for 91 district managers, with office staffs, is neither essential nor desirable to the efficient functioning of the regional organizations."

2. The statement (also p. 14) that "the interposition of this additional layer of supervision * * * will, it is believed, create a serious impediment to postmasters in the management of their offices which would not exist if the plan were revised to require that the postmasters report direct to the heads of the regional offices."

3. The statement (p. 15) that "the subcommittee found that there is no clear-cut definition of authority retained by the Department and that delegated to postmasters," and that "such a condition obviously tends to foster confusion and misunderstanding."

4. The statement (again on p. 15) that "the establishment of district managers to function between the regional organizations and the postmaster would seem to bring about conflict in authority and might eventually make the postmaster an impotent figurehead."

5. The further statement (p. 16) that "any increase in staff or authority for the district managers would cause further conflict in authority and eventually place the postmasters who, in 23,000 offices, are appointed by the President and confirmed by the Senate, in a rather unimportant position."

6. The statement (also on p. 16)—and one to which I must respectfully take exception both as to content and tone—that "it is not believed to be the intention of the Department to eliminate the position of postmaster and replace that official with a lower-salaried supervisor."

7. The statement (p. 15) that "Postmasters have been and should continue to be the local managers of the postal service." It had been my understanding that because of the necessity, prior to decentralization, for postmasters to clear so many details of authority and operation with Washington, they previously fell far short of any business concept of being true local managers. It has also been my understanding that by bringing the Department closer to the postmasters through decentralization, their role as local managers has been greatly improved.

8. The statement (again on p. 16) that "the subcommittee believes that in any reorganization of the Department's affairs a great deal more authority should be delegated to the postmaster"—which statement I cite particularly because of an impression I have gained that the postmasters feel that the present decentralization program has, in intent and in fact, actually served to enhance and strengthen the efficiency, authority, and prestige of the postmaster by providing him a more direct and prompt contact with the Post Office Department.

9. The statement (p. 17) that "if the Department considers it desirable to have field representatives in the areas where district offices have presently been established, these district managers could remain at their same locations, not in the capacity of supervisors of postmasters but in the capacity of service representatives of the regional operations manager or the regional director." I cite this statement particularly because I believe that any confusion (either in fact or in the subcommittee's mind) as to the supervisory versus service representative status of the district manager needs to be cleared up.

10. A final statement, appearing on page 8 of the report, that "Since the Department has undertaken this reorganization program, it is the judgment of the subcommittee that it should be accomplished expeditiously." I cite this statement because it seems to me to stand in absolute contradiction to the clearly critical and condemnatory content of so much of the report with respect to the decentralization program. If the program is as bad, and is fraught with as grave evils as much of the report seems to imply, the consistency of urging a speeding up of the completion of the program somehow escapes me.

In conclusion—in view of what seems to me to be the great importance of the findings and conclusions I have cited, and because I believe there should be further opportunity for the architects of this decentralization program to review that program with the subcommittee or the full committee, I feel I must reserve judgment on the subcommittee report and await more information. I hope this committee will, in its wisdom, be of like mind.

SENATE

THURSDAY, JANUARY 12, 1956

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father, strong to save, amid the shifting shadows of the temporal, give us clear and clean eyes to discern the shining truth of the eternal. Forgive us that in the heat of partisanship so often we have forgotten that, above our selfish ambitions and our hollow pride, lie unchangeable verities like granite peaks piercing the sky.

Facing days which tax all our resources, give us the untroubled calm which illumines faith in the final triumph of every true idea let loose in the world, and against which the gates of hell cannot prevail. And, in a world which is a battlefield where truth and falsehood are locked in mortal combat—even as we face unnumbered foes, bar our own hearts to all cynicism and hatred, and as we fight the good fight, may our strength be as the strength of ten because our hearts are pure. We ask it in the name of that Holy One who declared, "Blessed are the pure in heart, for they shall see God." Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Monday, January 9, 1956, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries.

EXPANDING EDUCATIONAL NEEDS—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 292)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read and referred to the Committee on Labor and Public Welfare.

(For President's message, see House proceedings for today.)

REPORT ON DISPOSAL OF UNITED STATES SURPLUS AGRICULTURAL COMMODITIES—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 294)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read, and with the accompanying report, referred to the Committee on Agriculture and Forestry.

(For President's message, see House proceedings for today.)

REPORT ON FOREIGN SERVICE RETIREMENT AND DISABILITY FUND—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 295)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which

was read and, with the accompanying papers, referred to the Committee on Foreign Relations.

(For President's message, see House proceedings for today.)

REPORT OF ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 293)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Public Works.

(For President's message, see House proceedings for today.)

REPORT ON EFFECTS OF MALNUTRITION AND OTHER HARDSHIPS IN CERTAIN CASES—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 296)

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read and, with the accompanying report, referred to the Committee on Labor and Public Welfare.

(For President's message, see House proceedings for today.)

EXECUTIVE MESSAGES REFERRED

As in executive session.

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

CONVENTIONS RELATING TO CUSTOMS FACILITIES FOR TOURING AND ON TEMPORARY IMPORTATION OF PRIVATE ROAD VEHICLES—REMOVAL OF INJUNCTION OF SECRECY

The PRESIDENT pro tempore. As in executive session, the Chair lays before the Senate Executive A, 84th Congress, 2d session, a convention concerning customs facilities for touring, signed at New York on June 4, 1954, and Executive B, 84th Congress, 2d session, a customs convention on the temporary importation of private road vehicles, signed at New York on June 4, 1954. Without objection, the injunction of secrecy will be removed from the conventions, and they will be referred to the Committee on Foreign Relations, and the message from the President will be printed in the RECORD. The Chair hears no objection.

The messages from the President are as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith certified copies of (1) a Convention Concerning Customs Facilities for Touring, signed at New York on June 4, 1954, and (2) a Customs Convention on the Temporary Importation of Private Road Vehicles, signed at New York on June 4, 1954.

The purposes of the conventions are explained in the report of the Secretary of State which is transmitted herewith for the information of the Senate.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 12, 1956.*

(Enclosures: 1. Certified copy of a Convention Concerning Customs Facilities for Touring. 2. Certified copy of a Customs Convention on the Temporary Importation of Private Road Vehicles. 3. Report of the Secretary of State.)

CONVENTION FOR PROMOTION OF INTER-AMERICAN CULTURAL RELATIONS—REMOVAL OF INJUNCTION OF SECRECY

The PRESIDENT pro tempore. The Chair lays before the Senate Executive C, 84th Congress, 2d session, a convention for the promotion of Inter-American cultural relations, signed at Caracas on March 2[illegible], 1954. Without objection, the injunction of secrecy will be removed from the convention, and it will be referred to the Committee on Foreign Relations, and the message from the President will be printed in the RECORD. The Chair hears no objection.

The message from the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a certified copy of the Convention for the Promotion of Inter-American Cultural Relations, signed at Caracas on March 28, 1954.

The purposes of the convention are explained in the report of the Acting Secretary of State which is submitted herewith for the information of the Senate.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 12, 1956.*

(Enclosures: 1. Certified copy of the Convention for the Promotion of Inter-American Cultural Relations. 2. Report of the Acting Secretary of State.)

CONVENTION ON INTERNATIONAL PLANT PROTECTION—REMOVAL OF INJUNCTION OF SECRECY

The PRESIDENT pro tempore. The Chair lays before the Senate Executive D, 84th Congress, 2d session, the International Plant Protection Convention, which was open for signature at Rome from December 6, 1951, to May 1, 1952, and during that period was signed on behalf of the United States of America and 36 other states. Without objection, the injunction of secrecy will be removed from the convention, and it will be referred to the Committee on Foreign Relations, and the message from the President will be printed in the RECORD. The Chair hears no objection.

The President's message is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a certified copy of the International Plant Protection Convention, which was open for signature at Rome from December 6, 1951, to May 1, 1952, and during that period was signed on behalf of the United States of America and 36 other states.

The purposes of the convention are explained in the report of the Secretary of State, which is transmitted herewith for the information of the Senate.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 12, 1956.*

(Enclosures: 1. Certified copy of the International Plant Protection Convention. 2. Report of the Secretary of State.)

TREATY OF AMITY, ECONOMIC RELATIONS, AND CONSULAR RIGHTS WITH IRAN—REMOVAL OF INJUNCTION OF SECRECY

The PRESIDENT pro tempore. The Chair lays before the Senate, Executive E, 84th Congress, 2d session, a treaty of amity, economic relations, and consular rights between the United States of America and Iran, signed at Tehran on August 15, 1955. Without objection, the injunction of secrecy will be removed from the treaty, and it will be referred to the Committee on Foreign Relations, and the President's message will be printed in the RECORD. The Chair hears no objection.

The President's message is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith a treaty of amity, economic relations, and consular rights between the United States of America and Iran, signed at Tehran on August 15, 1955.

I transmit also, for the information of the Senate, the report by the Secretary of State with respect to the treaty.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 12, 1956.*

(Enclosures: 1. Report of the Secretary of State. 2. Treaty of amity, economic relations, and consular rights, signed at Tehran August 15, 1955.)

PROTOCOL RELATING TO CERTAIN AMENDMENTS TO CONVENTION ON INTERNATIONAL CIVIL AVIATION—REMOVAL OF INJUNCTION OF SECRECY

The PRESIDENT pro tempore. The Chair lays before the Senate Executive F, 84th Congress, 2d session, a protocol dated at Montreal June 14, 1954, relating to certain amendments to the Convention on International Civil Aviation. Without objection, the injunction of secrecy will be removed from the protocol, and it will be referred to the Committee on Foreign Relations, and the message from the President will be printed in the RECORD. The Chair hears no objection.

The President's message is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification,

I transmit herewith a certified copy of a protocol dated at Montreal June 14, 1954, relating to certain amendments to the Convention on International Civil Aviation.

I also transmit, for the information of the Senate, the report made to me by the Secretary of State with respect to this matter.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *January 12, 1956.*

(Enclosures: 1. Certified copy of protocol dated at Montreal June 14, 1954, relating to certain amendments to the Convention on International Civil Aviation. 2. Report of the Secretary of State.)

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Committee on Finance was authorized to meet during the session of the Senate today.

COMMITTEE SERVICE

Mr. JOHNSON of Texas. Mr. President, I send to the desk an order, and request that it be read.

The legislative clerk read the order, as follows:

Ordered, That the Senator from Tennessee [Mr. GORE] is hereby excused from further service as a member of the Committee on the District of Columbia, and that the Senator from Delaware [Mr. FREAR] is hereby appointed to fill the said vacancy.

Mr. JOHNSON of Texas. Mr. President, I should like to say at this time for the information of the Senate, before it considers the order which has just been read, that the resignation of the Senator from Tennessee was entirely voluntary and at his request. He has served ably on the District of Columbia Committee, and I wish to take this opportunity of expressing my gratitude for this fine service.

I feel sure that the Senator from Delaware, who is replacing the Senator from Tennessee on the committee, will bring to the committee the same vigorous and conscientious spirit of cooperation and interest which makes our committees function as well as they do.

I have informed the acting minority leader of this order. Inasmuch as it is more or less an internal order, I should like to have it acted on at this time.

The PRESIDENT pro tempore. Without objection, the order is entered.

MEMBERS OF BOARD OF VISITORS TO COAST GUARD AND MERCHANT MARINE ACADEMIES

Mr. MAGNUSON. Mr. President, I wish to announce that I have reappointed the Senator from Rhode Island [Mr. PASTORE] and the Senator from Connecticut [Mr. PURTELL] as members of the Board of Visitors to the United States Coast Guard Academy.

I have also reappointed to the Board of Visitors to the United States Merchant Marine Academy the Senator from North Carolina [Mr. ERVIN] and appointed the Senator from Maine [Mr. PAYNE].

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that there be the usual 2-minute limitation on statements made during the morning hour.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, I desire to make a brief announcement. Calendar Order No. 1246, H R. 5614, to amend the Communications Act of 1934, was cleared by the majority policy committee. I conferred with the distinguished minority leader immediately after the policy committee met last week. In making an announcement on the legislative program on Monday last, I did not, purely through an oversight, include that bill as one which would be considered today, although previous announcement had been made concerning the bill.

It will be the intention of the leadership, if action is completed on other bills which are scheduled, and provided the Senator in charge of H. R. 5614 is ready to proceed with it, to call it up today.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield to the Senator from Rhode Island.

Mr. PASTORE. I wish to assure the distinguished majority leader that I am ready to proceed with the bill.

Mr. LANGER. Mr. President, will the Senator from Texas yield to me?

Mr. JOHNSON of Texas. I yield to the Senator from North Dakota.

Mr. LANGER. It was announced on the radio this morning that the Harris bill would be taken up on Monday. I desire to ask the majority leader if that is correct?

Mr. JOHNSON of Texas. I think the Senate will probably make the Fulbright bill the unfinished business at the conclusion of its session today, but no discussion of the bill will take place today. It is the intention of the leadership to have a call of the calendar on Monday, and when the call of the calendar is completed, to discuss the Fulbright bill.

Mr. LANGER. I thank the Senator.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following communication and letters, which were referred as indicated:

AGRICULTURAL PROBLEMS IN THE GREAT PLAINS AREA

A communication from the President of the United States, relating to agricultural problems in the Great Plains area (with an accompanying document); to the Committee on Agriculture and Forestry.

PROCUREMENT OF MEDICAL AND DENTAL OFFICERS OF THE ARMY, NAVY, AND AIR FORCE

A letter from the Director, Legislative Programs, Department of Defense, transmitting a draft of proposed legislation to provide for the procurement of medical and dental officers of the Army, Navy, and Air Force (with accompanying papers); to the Committee on Armed Services.

REPORT ON DISPOSAL OF GOVERNMENT-OWNED SYNTHETIC RUBBER PLANT, INSTITUTE, W. VA.

A letter from the Chairman, Rubber Producing Facilities Disposal Commission, Washington, D. C., transmitting, pursuant to law, a report on the disposal of the Government-owned synthetic rubber plant at Institute, W. Va. (with an accompanying document); to the Committee on Banking and Currency.

DISTRICT OF COLUMBIA REDEVELOPMENT LAND AGENCY—NOMINATION

A letter from the Secretary, Board of Commissioners, District of Columbia, as in executive session, transmitting the nomination of James E. Colliflower for reappointment as a member of the District of Columbia Redevelopment Land Agency (with accompanying papers); to the Committee on the District of Columbia.

REPORT OF GEORGETOWN BARGE, DOCK, ELEVATOR & RAILWAY CO.

A letter from the law firm of Steptoe and Johnson, Washington, D. C., transmitting, pursuant to law, a report of the Georgetown Barge, Dock, Elevator & Railway Co., Washington, D. C., for the year ended December 31, 1955 (with an accompanying report); to the Committee on the District of Columbia.

AUDIT REPORT ON INLAND WATERWAYS CORPORATION

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Inland Waterways Corporation, for the fiscal year ended June 30, 1955 (with an accompanying report); to the Committee on Government Operations.

REPORT OF COMPTROLLER GENERAL OF THE UNITED STATES

A letter from the Comptroller General of the United States, transmitting, pursuant to law, his report on the activities of the General Accounting Office, for the fiscal year 1955 (with an accompanying report); to the Committee on Government Operations.

AUDIT REPORT ON FARMERS' HOME ADMINISTRATION

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Farmers' Home Administration, Department of Agriculture, for the fiscal year ended June 30, 1954 (with an accompanying report); to the Committee on Government Operations.

LAWS ENACTED BY LEGISLATURE OF VIRGIN ISLANDS

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of laws enacted by the First Legislature of the Virgin Islands (with accompanying papers); to the Committee on Interior and Insular Affairs.

PROPOSED CONCESSION PERMIT, SEQUOIA NATIONAL PARK, CALIF.

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed concession permit in the Sequoia National Park, Calif. (with an accompanying paper); to the Committee on Interior and Insular Affairs.

TEMPORARY ADMISSION INTO THE UNITED STATES OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting temporary admission into the United States of certain aliens (with acompanying papers); to the Committee on the Judiciary.

ADMISSION INTO THE UNITED STATES OF CERTAIN DEFECTOR ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law,

copies of orders granting admission into the United States of certain defector aliens (with accompanying papers); to the Committee on the Judiciary.

COMPENSATION AND TERM OF OFFICE OF JUDGE OF DISTRICT COURT OF GUAM

A letter from the Director, Administrative Office of the United States Courts, Washington, D. C., transmitting a draft of proposed legislation relating to the compensation and term of office of the Judge of the District Court of Guam (with an accompanying paper); to the Committee on the Judiciary.

EXTENSION OF CIVIL SERVICE RETIREMENT ACT TO CIVILIAN FACULTY MEMBERS IN CERTAIN CASES

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to extend the benefits of the Civil Service Retirement Act of May 29, 1930, as amended, to members of the civilian faculties of the United States Naval Academy and the United States Naval Postgraduate School (with an accompanying paper); to the Committee on Post Office and Civil Service.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Philadelphia (Pa.) Federation of American Hellenic Socities, relating to certain atrocities in Istanbul and Ismir, Turkey; to the Committee on Foreign Relations.

By Mr. PASTORE (for himself and Mr. GREEN):

A resolution of the General Assembly of the State of Rhode Island; to the Committee on Banking and Currency:

"Resolution memorializing Congress to enact legislation for the creation of Federal disaster insurance

"Whereas the tremendous losses, suffering and economic dislocation which are caused by hurricanes and floods are too great to be borne alone by those who are directly affected, and private insurance companies have found no feasible means of writing insurance protection against the risks of such natural disasters; and

"Whereas the need for disaster insurance protection in Rhode Island is immediate and particularly urgent while flood-protective devices are being studied and constructed so that Rhode Island citizens will have effective protection against floods and hurricanes before they strike again. Now, therefore, be it

"Resolved, That the General Assembly of the State of Rhode Island and Providence Plantations hereby urges the Congress of the United States to act boldly in creating a Federal disaster insurance program which will include the following:

"1. Reasonable premium rates.

"2. Comprehensive coverage to be available to business and industry, municipalities and States, and also to the average family, both homeowner and tenant.

"3. The total amount of disaster insurance to be written large enough so that the program will provide more than token protection.

"4. No arbitrary upper limit on compensation to individual firms and businesses, since adequate compensation is necessary for prompt restoration of jobs; and be it further

"Resolved, That the Senators and Representatives from Rhode Island in said Congress, be, and they hereby are, earnestly requested to use their concerted effort to bring about the enactment of such legislation in the 2d session of the 84th Congress; and be it further

"Resolved, That the Secretary of State be, and he is hereby authorized and directed to transmit to the Senators and Representatives from Rhode Island in the Congress of the United States duly certified copies of this resolution."

COTTON CROP ALLOTMENT—RESOLUTION OF VALLEY CHAMBER OF COMMERCE

Mr. JOHNSON of Texas. Mr. President, the production of cotton is of great economic importance to the lower Rio Grande Valley of Texas. A special situation regarding cotton production exists in this four-county area of Cameron, Hidalgo, Starr, and Willacy.

The board of directors of the Valley Chamber of Commerce, a regional organization, recently passed a resolution calling attention to this special situation, and I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the Lower Rio Grande Valley Chamber of Commerce recognizes the need for an equitable distribution of acreage for farm crops as provided by law and as administered by the Department of Agriculture and the State Agriculture and Stabilization Committee of Texas; and

Whereas the Lower Rio Grande Valley Chamber of Commerce desires to cooperate with all farmers on all types of farms, whether extensive, family-size, or small, and

Whereas farmers throughout the State of Texas deserve the right to an equitable apportionment of the crop acreage: Now, therefore, be it

Resolved, That the Lower Rio Grande Valley Chamber of Commerce, a regional chamber, serving the counties of Cameron, Hidalgo, Starr, and Willacy, call attention to the early planting date of cotton in this area of the State of Texas to all parties concerned, and furthermore respectfully suggest that any formula for crop allotments be apportioned to each farmer in the lower Rio Grande Valley and the entire State of Texas on the same formula. And we further respectfully suggest that each crop year be analyzed and allotments based on factual conditions.

DEVELOPMENT OF MISSOURI RIVER BASIN—RESOLUTIONS

Mr. LANGER. Mr. President, I present two resolutions coming from the State of North Dakota, and ask that they be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas local, State, and Federal agencies interested in river management and the development of the water resources of the Missouri River Basin, particularly in the control and use of the water therein for generation of needed electric energy, irrigation, municipal, and industrial water supplies, recognize that in order to obtain these benefits the waters of the Missouri River must be impounded in the Oahe, Big Bend, and other reservoirs in the Dakotas as envisioned and authorized by the Flood Control Act of 1944; and

Whereas funds appropriated by the Congress for the construction of the Oahe Dam in South Dakota have so far been inadequate to maintain the construction schedule agreed upon by all agencies involved and approved by the Missouri Basin Interagency Committee; and

Whereas planning funds for the Big Bend Dam in South Dakota have not yet been provided notwithstanding their authorization in the said Flood Control Act of 1944: Now, therefore, be it

Resolved by the North Dakota State Water Conservation Commission, in regular session this 17th day of August 1955, That the Federal Bureau of the Budget be, and it is hereby, respectfully requested and urged to develop, approve and recommend increased and adequate estimates for fiscal year 1957 for continuing construction on the Oahe Dam in the most orderly and economical schedule, and for planning of the Big Bend Dam at the earliest possible time, in order that the benefits from said projects may be available as and when the need and demand therefor may require; and be it further

Resolved, That the Secretary of the Commission be and is hereby directed to mail a copy of this resolution to the President, the Director of the Bureau of the Budget, and to each of our State delegation in Congress.

Whereas Public Law 566, commonly known as the Watersheds Protection and Flood Prevention Act, is designed primarily to furnish financial assistance to local groups interested in the prevention and control of floods; and

Whereas several surveys of small watersheds in Montana are now in progress, but there are only remote possibilities that any of them will qualify under this act as now written; and

Whereas at its annual meeting in Butte last year, the Montana Association of Soil Conservation Districts petitioned the Congress of the United States to so amend the act to permit Federal financial and technical assistance in making beneficial uses of impounded floodwater, pointing out that in this semiarid cilimate water for irrigation is of primary importance and that flood conditions are usually caused by a combination of mountain snow melt and rainfall during the spring season followed generally by drought conditions, making the storage of sufficient water to carry crops through the summer the major problem. The resolution further stated that structures to handle flood waters in excess of irrigation requirements are necessary, but should be made the secondary objective of most projects in Montana and other semi-arid States; and

Whereas the feasibility of projects at present is based upon flood damages which, in most cases in Montana, are insufficient to qualify the project, but total benefits from beneficial use of the impounded water would make such qualification possible: Now, therefore be it

Resolved, That the Montana Association of Soil Conservation Districts again petition the Congress to enact such amendments at the earliest possible date so that operation of the act under our conditions will be more practical and groups interested in obtaining irrigation benefits as well as flood control will be encouraged to go ahead with plans for maximum watershed development; and be it further

Resolved, That copies of this resolution be sent to the Montana and other Western State congressional delegations, the chairman of the Senate and House Agricultural Committees, the director of the Bureau of the Budget, the Secretary of Agriculture, the Administrator of the Soil Conservation Service, the president of the National Association of Soil Conservation Districts, the governors of the State of Montana and other Western States and the chairman of the State Soil Conservation Committee.

PROHIBITION OF TELEVISION AND RADIO ADVERTISEMENTS OF LIQUOR—PETITIONS

Mr. LANGER. Mr. President, I present petitions from the State of Illinois, in behalf of the proposed legislation to prohibit liquor advertising by television and radio stations. I ask unanimous consent that the names be printed in the RECORD, together with the petitions.

There being no objection, the petitions and signatures were ordered to be printed in the RECORD, as follows:

PETITION: INTERSTATE ADVERTISING BILLS, S. 923, LANGER; H. R. 4627, SILER

We, the undersigned, respectfully petition you to exercise the proper discretion vested in you by passing legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air, a practice which nullifies the rights of the States under the 21st amendment to control the sale of such beverages. At a time when 1 out of 10 drinkers is becoming an alcoholic there should be no encouragement to increasing the use of such beverages. Children and youth are being misled to consider them harmless, especially by the powerful audio and visual suggestions of radio and television.

Myra Earley, Lora Bowman, Myrtle John, Lois E. Cline, Zulah E. Duncan, Letha Simpson, Lucille Thursby, Esther Jesse, Dorothy Bettis, Melvin Bettis, Russell Lemarr, Clara Etta Lemarr, Shirley Masten, Loren Ross, Laura Ross, Hazel L. Turner, Donald L. Vance, Norman E. Turner, Howard Thursby, Mildred Vance, Leo Clevenger, Gerald Vance, Willis A. Earley, John Jesse, Joanne Thursby, Wendell Ross, Florence M. Gordon, Mary Lou Scroggins, Ralph Vance, Walter Lane, Ida Lane, Lena M. Ross, Mary Thaxton, Elmer Thaxton, Otella Patterson, Charles Thursby, Hattie Sims, Nellie Young, Clyde D. Marten, Sarah R. Angelo, Palmyra, Ill.

DEAR SIR: We, the undersigned, respectfully petition you to exercise the proper discretion vested in you by passing legislation to prohibit the transportation of alcoholic beverage advertising in interstate commerce, and its broadcasting over the air, a practice which nullifies the rights of the States under the 21st amendment to control the sale of such beverages. At a time when 1 out of 10 drinkers is becoming an alcoholic there should be no encouragement to increasing the use of such beverages. Children and youth are being misled to consider them harmless, especially by the powerful audio and visual suggestions of radio and television.

(Each must sign with ink as registered at the polls.)

Decker, Nellie Mills, Fern Ward, Mildred Gressel, Eunice Carson, Bertha Cartright, Eileen Armistead, Iva Levin, F. R. Waterford, Anna Stewart, Sena Tinsman, Edith Hocking, Leona Paul, H. J. Paul, Mabel Ross, Herman Ross, Violet Couger, C. E. Couger, Rufus A. Carrell, Marjorie McMorris, Florence Stroin, Marjorie W. Craig, Marjorie Brooks, Lois Newlin, Lowell M. Newlin, John Couger, Wayne Couger, Dorotha Ewart, M. C. Ewart, E. E. Holsapple, Maxine Nichols, Ray W. Nichol, Opal Nichols, Agatha Holsapple, Rev. Virgil L. DeVore, Louise DeVore, George E. Grigsby, Greenup, Ill.; B. W. Dalyrmple, Toledo, Ill.; Norma Heddins, Arthur Heddins, Oltre Edwards, Anna Scales, Nellie Hardy, Eleanor Hardy, Erma Paul, Effie Holsapple, Richard Harris, Odessa Harris, Greenup, Ill.; Margaret Dalrymple, Toledo, Ill.; Marie Stevens, Greenup, Ill.

MODESTO, ILL.

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

DEAR SIR: We, the undersigned, respectfully petition you to exercise the proper discretion vested in you by passing legislation to prohibit the transportation of alcoholic-beverage advertising in interstate commerce, and its broadcasting over the air, a practice which nullifies the rights of the States under the 21st amendment to control the sale of such beverages.

At a time when 1 out of every 10 drinkers is becoming an alcoholic, there should be no encouragement to increasing the use of such beverages. Children and youth are being misled to consider them harmless, especially by the powerful audio and visual suggestions of radio and television.

We favor S. 923, the Langer bill.

Mr. LANGER. Mr. President, I send to the desk and ask to have printed in the RECORD a series of letters which I have received from various persons in connection with the so-called liquor advertising bill.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WARREN, ILL., *January 1, 1956.*

Hon. W. E. LANGER,
Washington, D. C.

DEAR SIR: We are in favor of the Langer bill—S. 923—to prohibit the transportation in interstate commerce and over the air of alcoholic beverage advertising.

Respectfully,

Mrs. EMERY WERKHEISER.

WOODLAWN, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor Langer bill to prohibit the transportation in interstate commerce and over the air of alcoholic beverage advertising.

Yours truly,

Mrs. MARIETTA BOLDT.

I'm president of the Ashley Women's Christian Temperance Union.

FOWLER, ILL., *January 3, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate.

DEAR SIR: We are in favor of S. 923, Langer bill, to prohibit the transportation in interstate commerce and over the air of alcoholic beverage advertising.

Sincerely,

Mr. and Mrs. OSCAR OETKER,
Mrs. SADIE BITTE.

MOUNT CARMEL, ILL., *January 3, 1956.*

DEAR SIR: We favor S. 923, the Langer bill.

C. J. WOOD.

NORMAL, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

DEAR MR. LANGER: You certainly are right about the distribution of alcoholic beverages. It has gone too far. I am very much in favor of the Langer bill (S. 923). I hope it will be enforced.

Mrs. IMOGENE AYER,
WCTU Member.

JANUARY 5, 1956.

DEAR SIR: I am writing you this letter, in reference to alcoholic beverages. I think it is a disgrace to have it on the air, or television. I am hoping you will have good luck in putting it out. I am pleased to know that you are against it.

It isn't only on television or radio but on the highway or any place.

Hoping to hear from you real soon, in reference to this letter.

Wishing you a happy and prosperous new year.

In regards.

MAXINE BARR.

BEECHER CITY, ILL.

JANUARY 6, 1956.

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C:

KIND SIR: We heartily endorse the Langer bill S. 923 and wish you to know we are strongly in favor of protecting our families from such aggression as is being made by the liquor traffic in their methods of advertising.

Respectfully yours,

Mr. and Mrs. C. V. IAGGI.

DUNDAS, ILL.

MODESTO, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C:

We favor S. 923, Langer bill, To prohibit the transportation in interstate commerce, and over the air, of alcoholic beverage advertising.

ELVA SNIDLE.

MODESTO, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor S. 923, Langer bill, to prohibit the transportation in interstate commerce, and over the air of alcoholic beverage advertising.

H. C. SNIDLE.

MODESTO, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor S. 923, Langer bill, to prohibit the transportation in interstate commerce, and over the air of alcoholic beverage advertising.

CLARA CAMPBELL.

MODESTO, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor S. 923, Langer bill, to prohibit the transportation in interstate commerce, and over the air of alcoholic beverage advertising.

DAVID CAMPBELL.

BARRINGTON, ILL., *January 1, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

DEAR SIR: We favor your bill S. 923 to prohibit the transportation in interstate commerce and over the air of alcoholic beverage advertising.

Our prayers are with you.

Sincerely,

Mr. and Mrs. E. H. TATE.

MODESTO, ILL., *January 2, 1956.*

Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor S. 923, Langer bill, to prohibit the transportation in interstate commerce, and over the air of alcoholic beverage advertising.

LOREN O. ROSS.

MODESTO, ILL., *January 2, 1956.*
Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.:

We favor S. 923, Langer bill, to prohibit the transportation in interstate commerce, and over the air of alcoholic beverage advertising.

LAURA ROSS.

CEDARVILLE, ILL., *January 5, 1956.*
Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

DEAR SIR: We who live in this lovely little town where Jane Addams was born, are much interested, as she was, in the welfare of its citizens and those of our wonderful country. Therefore we favor bill S. 923—to prohibit transportation in interstate commerce, and over the air of alcoholic beverage advertising.

Yours truly,

MRS. DONALD FINK.

MODESTO, ILL., *January 2, 1956.*
Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

We favor S. 923, Langer bill, to prohibit the transportation in Interstate Commerce, and over the air of alcoholic beverage advertising.

LENA M. ROSS.
MORRIS R. ROSS.

MODESTO, ILL., *January 2, 1956.*
Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

We favor S. 923, Langer bill, to prohibit the transportation in Interstate Commerce, and over the air of alcoholic beverage advertising.

LENA M. ROSS.

PITTSFIELD, ILL., *January 5, 1956.*
Hon. WILLIAM E. LANGER,
United States Senate,
Washington, D. C.

DEAR SIR: I am writing to say we favor the bill S. 923 to prohibit the transportation in interstate commerce and over the air of alcoholic beverage advertising.

Please do all you can to help protect the public from such aggression.

Yours for a better America.

MRS. GUY GRAY.

TRANSPORTATION IN INTERSTATE COMMERCE OF ADVERTISEMENTS OF ALCOHOLIC BEVERAGES—NOTICE OF HEARINGS

Mr. MAGNUSON. Mr. President, I am sure the announcement I am about to make will be of interest to all Senators, and particularly to the Senator from North Dakota [Mr. LANGER], who is now present on the floor.

On February 15 and 16, the full Committee on Interstate and Foreign Commerce will hold public hearings on a bill introduced by the Senator from North Dakota [Mr. LANGER], S. 923, to prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes.

The first day of the hearings will be devoted to the testimony of the proponents. On the second day the committee shall hear from the opposition.

In view of the widespread, intense interest in this proposed legislation, I thought Senators would like to be informed of the forthcoming hearings.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. MAGNUSON. I yield.

Mr. LANGER. Will the full committee or a subcommittee hold the hearings?

Mr. MAGNUSON. It was felt that the members of the committee are so busy and serving on so many subcommittees that to create another subcommittee would decrease attendance rather than increase it. It is hoped to have a goodly number present. The chairman himself will be present. I am sure the hearings will be not only fruitful, but will also bring to light the very serious question proposed by the Senator from North Dakota.

CONSTRUCTION OF ATOMIC-ENERGY PLANT AT ELK RIVER, MINN.—RESOLUTIONS

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, and appropriately referred, two resolutions supporting a proposal that the Atomic Energy Commission construct an atomic energy powerplant at Elk River, Minn.

One of the resolutions was adopted at an annual meeting of the Minnesota Association of Cooperatives held on October 31 and November 1, 1955.

The other resolution was adopted at a regular meeting of the board of directors of the Northern Electric Cooperative Association on December 14, 1955.

There being no objection, the resolutions were referred to the Joint Committee on Atomic Energy, and ordered to be printed in the RECORD, as follows:

"Whereas Rural Cooperative Power Association has proposed to the Atomic Energy Commission a reasonable plan whereby a relatively small experimental atomic power generating plant might be constructed at Elk River, Minn., which is located in one of the highest fuel cost areas in the United States; be it

"*Resolved*, That M. A. C. hereby express its support for RCPA's proposal, and recommend its acceptance by AEC; be it further

"*Resolved*, That we commend RCPA for providing active leadership in the vital matter of seeking a way to adopt the use of atomic energy to generation of electric power by relatively small powerplant units that will fit the needs of rural electric cooperatives and small municipalities."

This will certify that the above resolution appears in its exact form in the official minutes of the annual meeting of the Minnesota Association of Cooperatives held on October 31 and November 1, 1955, at the Hotel Lowry, St. Paul, Minn.

HARRY J. PETERSON,
Executive Secretary.

"Whereas the Rural Cooperative Power Association of Elk River, Minn., has made a proposal to the Atomic Energy Commission for the installation and operation of an atomic nuclear steam electric powerplant; and

"Whereas Congress has provided funds available to the Atomic Energy Commission for the purpose of testing the feasibility of using atomic power for peacetime uses in small industry; and

"Whereas Minnesota is in a high fuel-cost area and the Rural Cooperative Power Association is supplying electric power to a large rural area in Minnesota and is ideally situated to determine the feasibility of using nuclear energy as a substitute for fuel in generating electricity in relatively small plants and thereby bringing the benefit of atomic energy to rural America where the need for low-cost power is the greatest: Now, therefore, be it

"*Resolved*, That the directors of the Northern Electric Cooperative Association, Virginia, Minn., hereby urge the Atomic Energy Commission and the Rural Electrification Administration to give favorable consideration of the proposal submitted by the Rural Cooperative Power Association; be it further

"*Resolved*, That copies of this resolution be forwarded to the Atomic Energy Commission, Rural Electrification Administration and the Minnesota congressional delegation."

I, Emil H. Sande, do hereby certify that I am the duly elected, qualified, and acting secretary of the Northern Electric Cooperative Association, and the keeper of its records; that the foregoing copy is a true and correct copy of the resolution as adopted at the regular meeting of the board held on December 14, 1955, at its principal office of business, in the city of Virginia, Minn.

In witness whereof, I have hereunto set my hand and affixed the seal of the cooperative this 29th day of December 1955.

EMIL H. SANDE,
Secretary.

ELIMINATION OF CONTROL OF COMPANIES CARRYING NATURAL GAS TO MINNESOTA—RESOLUTIONS

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, and appropriately referred, three resolutions expressing opposition to the Fulbright bill, S. 1853; and the Harris bill, H. R. 4560, which would eliminate regulation of companies carrying natural gas to Minnesota.

One resolution was adopted by the St. Paul Trades and Labor Assembly on November 25, 1955; one resolution is from the St. Paul City Council, adopted December 16, 1955, and one resolution was adopted by the City Council of Minneapolis on December 9, 1955.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas the Fulbright bill (S. 1853) would limit jurisdiction of the FPC and thereby raise the cost of natural gas the undersigned wish to solicit the aid of the St. Paul Trades and Labor Assembly in expressing opposition to the so-called Fulbright bill (S. 1853) now pending in Congress; and

Whereas recent press reports disclose that this bill was recommended to pass by the Committee of Interstate and Foreign Commerce of the House of Representatives on Wednesday, June 8, 1955, by a vote of 16 to 15; and

Whereas the Fulbright bill proposes to limit jurisdiction of the Federal Power Commission to regulate natural-gas industry so as to only reach sales for resale of such gas occur after the completion of production and gathering of the same and after delivery is made of such gas to pipeline companies. In other words, the price charged by producers would no longer be subject to control by the Federal Power Commission; and

Whereas we, the undersigned, feel that if this bill passes and becomes law the sale price of natural gas will become so high that it will not be competitive with other fuels; and

Whereas if this bill were passed, it would affect not only the members in our unions, but it would directly affect the consumer inasmuch as he would have to pay more for his gas: Therefore be it

Resolved, That the St. Paul Trades and Labor Assembly go on record opposing the

Fulbright bill (S. 1853). Copies of this resolution shall be sent to Senators and Congressmen, notifying them of the action taken.

(Adopted by the St. Paul Trades and Labor Assembly, November 25, 1955.)

Whereas the city of St. Paul through the city council has at all times heretofore expressed its opposition to the passage of the so-called Harris bill (H. R. 4560) by the House of Representatives of the United States of America, said opposition as expressed by the city council having been based upon conclusions that said legislation would be inimical to the economic welfare and well-being of all of the citizens of the city of St. Paul who are users of natural gas, in that passage of such legislation could lead to only one result and that would be higher rates for the ultimate consumers of this natural resource; and

Whereas the council of the city of St. Paul further expresses the conclusion that producers of natural gas are entitled to a fair and reasonable rate of return and can secure such return under the proper Federal regulatory authority; and

Whereas, further, the Council of the City of St. Paul is firmly of the mind that the proper regulation of natural gas producers would in no manner defeat any economic or financial incentive which it is asserted is necessary to attract investors and to stimulate discovery and recovery of natural gas; and

Whereas, further, the Fulbright bill (S. 1853) is now on the calendar of the Senate, having been reported out by the Senate Interstate and Foreign Commerce Committee; and

Whereas the said Fulbright bill, while differing in some extent from the provisions of the Harris bill, is similar in import and effect and could lead to only one end result in the consumer market, and that would be an increased rate to be paid by the ultimate consumer of natural gas: Now, therefore, be it

Resolved by the City Council of the City of St. Paul, That it reiterates its conclusions, heretofore arrived at, that the Harris and the Fulbright bills, as amended, are contrary to the best interests of the whole gas-consuming public in this city; and be it further

Resolved, That the Council of the City of St. Paul herein again records its full and complete opposition to the Harris bill, as amended, and also to the Fulbright bill, and respectfully requests that the Senate of the United States return said Fulbright bill, as amended, to the Senate Committee on Interstate and Foreign Commerce for further hearings on said bill and the amendments which have been added to it since the last public hearing thereon. Said referral of the bill back to the Senate Committee on Interstate and Foreign Commerce will, at least, give the public of the United States an opportunity to present its side of the case before the honorable Senate committee; and be it further

Resolved, That the City Council of the City of St. Paul hereby again urgently requests the Senators and Congressmen from the State of Minnesota to exercise their utmost efforts to defeat this legislation which is not in the public interest; and be it further

Resolved, That a copy of this resolution be forthwith transmitted to the Honorable Senators and Congressmen from the State of Minnesota, to each member of the United States Senate Committee on Interstate and Foreign Commerce, and to the clerk of said committee and the clerk of the Senate of the United States.

Adopted by the council December 16, 1955.

Approved December 16, 1955.

JOSEPH E. DILLON,
Mayor.

CITY OF MINNEAPOLIS, *December 14, 1955.*

Hon. HUBERT H. HUMPHREY,
United States Senator,
Washington, D. C.

DEAR SIR: Attached you will find copy of a resolution passed by the City Council of the City of Minneapolis, Minn., at a meeting held December 9, 1955, expressing opposition to the Harris and Fulbright bills to remove Federal regulation of producers of natural gas, and requesting further hearings thereon.

Very truly yours,

LEONARD A. JOHNSON,
City Clerk.

Resolution expressing opposition to the Harris and Fulbright bills to remove federal regulation of producers of natural gas, and requesting further hearings thereon

Whereas on March 11, 1955, the city council adopted a resolution in opposition to the passage of the so-called Harris bill (H. R. 4560) by the House of Representatives in Congress, and requested Members in Congress from Minnesota to oppose said bill; and

Whereas on June 10, 1955, the city council again adopted a resolution in opposition to said bill and any legislation having a similar effect; and

Whereas amendments were made to the Harris bill in the Interstate and Foreign Commerce Committee of the House of Representatives in Congress, and said bill was passed as amended; and

Whereas the so-called Fulbright bill (S. 1853), which differs from the Harris bill, but which proposes similarly to remove the producers of natural gas from regulation by the Federal Power Commission, has been considered by the Interstate and Foreign Commerce Committee of the United States Senate, and amended and recommended for passage by said committee; and

Whereas the city council firmly believes that both the Harris and the Fulbright bills as amended are contrary to the best interests of the gas consumers in the city of Minneapolis, and in its judgment are likely to increase the cost of natural gas to said consumers: Now, therefore, be it

Resolved by the City Council of the City of Minneapolis, That it again records its opposition to said Harris bill as amended, and likewise records its opposition to the Fulbright bill as amended, and respectfully requests that the Senate of the United States refer said Fulbright bill as amended back to its Committee on Interstate and Foreign Commerce for further hearings on said bill and the amendments that have been made to it since the hearings which have previoulys been held; be it further

Resolved, That the City Council of the City of Minneapolis urgently requests the Senators and Congressmen from the State of Minnesota to exercise their utmost efforts to defeat said bill, and that a copy of this resolution be forthwith transmitted to each Congressman and Senator from the State of Minnesota, and to each member of the Senate Committee on Interstate and Foreign Commerce.

Passed December 9, 1955.

GEORGE W. MARTENS,
Vice President of the Council.

Approved December 13, 1955.

ERIC G. HOYER,
Mayor.

Attest:

LEONARD A. JOHNSON,
City Clerk.

RESOLUTIONS OF GREAT LAKES COMMISSION

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, and appropriately referred, two resolutions adopted by the newly established Great Lakes Commission at its initial meeting in Chicago on December 12, urging early and favorable consideration of legislation pending in the Congress approving the Great Lakes Basin Company and authorizing the deepening of the connecting channels in the upper Great Lakes.

There being no objection, the resolutions were referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

CONGRESSIONAL CONSENT TO THE GREAT LAKES BASIN COMPACT

(Resolution adopted by the Great Lakes Commission, Chicago, Ill., December 12, 1955)

Whereas the Great Lakes Basin Compact provides that the eight Great Lakes States—Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania and Wisconsin—and the Provinces of Ontario and Quebec may become party to the compact; and

Whereas ratification of the compact by Illinois, Indiana, Michigan, Minnesota and Wisconsin, has made the compact effective; and

Whereas the approval of the Great Lakes Basin Compact by the Congress is desirable and essential to obtaining the participation of the Canadian provinces; and

Whereas legislation introduced in the first session of the 84th Congress—S. 2688, H. R. 7550 and H. R. 7812—grants approval to the compact: Therefore be it

Resolved, That the Great Lakes Commission meeting in Chicago, Ill., on December 12, 1955, urges early consideration and approval by the United States Congress of the Great Lakes Basin Compact; be it further

Resolved, That the compact of State Governments be requested to send copies of this resolution to the Members of the Congressional delegations from the eight Great Lakes States and to members of the Senate Committee on Foreign Relations and the Committee on Foreign Affairs in the House of Representatives.

DEEPENING OF THE CONNECTING CHANNELS OF THE UPPER GREAT LAKES

(Resolution adopted by the Great Lakes Commission, Chicago, Ill., December 12, 1955)

Whereas improvement by deepening the connecting channels in the upper Great Lakes will result in important benefits to the economy and defense of the Nation; and

Whereas a study by the Corps of Engineers of the cost of such improvements has clearly demonstrated a favorable benefit-cost ratio; and

Whereas the House of Representatives of the 84th Congress, 1st session, has approved H. R. 2552 authorizing such improvement; and

Whereas identical legislation has been introduced in the Senate: Therefore, be it

Resolved, That the Great Lakes Commission meeting in Chicago, Ill., December 12, 1955, urges early consideration and enactment of legislation now pending in the United States Senate for deepening the connecting channels in the upper Great Lakes in accordance with the recommendations of the Corps of Engineers; be it further

Resolved, That the Council of State Governments be requested to send copies of this resolution to the Members of the congressional delegations from the eight Great Lakes States and to Members of the Senate Committee on Public Works.

PAYMENTS IN LIEU OF TAXES—LETTER AND RESOLUTION

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed

in the RECORD, and appropriately referred, a letter that I received from Mr. Patrick Healy, Jr., executive director of the American Municipal Association. I also ask unanimous consent to have printed following the letter, the resolution adopted by the 32d annual American Municipal Congress at its recent meeting in Miami, Fla., approving calling upon the Congress to enact a broad program of payments to municipalities in lieu of taxes on federally owned property.

There being no objection, the letter and resolution were referred to the Committee on Government Operations and ordered to be printed in the RECORD, as follows:

AMERICAN MUNICIPAL ASSOCIATION,
Washington, D. C., January 3, 1956.

The Honorable HUBERT H. HUMPHREY,
United States Senate,
Washington, D. C.

DEAR SENATOR HUMPHREY: At the 32d annual American Municipal Congress just concluded at Miami, Fla., the membership which represents 12,000 municipalities unanimously approved the enclosed resolution calling upon Congress to enact a broad program of payments to municipalities in lieu of taxes on federally owned property.

We feel that the legislation which was passed in the last Congress, granting relief to some 60 communities in which are located federally owned factory properties, is a step in the right direction. This legislation, however, does not begin to meet the needs of our cities, particularly those in which a large percentage of the property is owned by the Government.

Our members urge you to support a comprehensive program of payments in lieu of taxes as recommended by the Commission on Intergovernmental Relations (Kestnbaum report).

We will be happy to provide additional information on this vital subject or to otherwise assist the Congress in this matter.

Sincerely yours,

PATRICK HEALY, Jr.,
Executive Director.

This association and the 12,000 cities which it represents consistently have urged the Congress to authorize the payment to municipalities by the Federal Government of local property taxes or the payment of an annual sum in lieu of taxes on Federally-owned property. The Commission on Intergovernmental Relations in its report to the President noted that the immunity of the National Government from State and local taxation requires urgent attention. This immunity reduced the tax base of municipalities. The burden falls unevenly, being most severe in areas where the value of Federal property is large in proportion to the total property value, the Commission reported.

Congress has from time to time recognized the necessity of obligating the Federal Government to pay some State and local taxes or their equivalent. In the last session, Congress passed Public Law 388, which grants temporary relief to about 60 communities by authorizing Federal agencies to make payments to local authorities in lieu of property taxes on property transferred since 1946 by the Reconstruction Finance Corporation.

The American Municipal Association commends the Congress for its efforts but recognizes that the measure does not meet the needs of our cities. What is needed is a greatly expanded and permanent program for payments in lieu of taxes. The association urges the Congress to adopt the recommendations of the Commission on Intergovernmental Relations and "* * * inaugurate a broad system of payments in lieu of property taxes to State and local government."

(Passed unanimously November 30, 1955, Miami, Fla.)

LONG-RANGE MERCHANT MARINE PROGRAM—RESOLUTION

Mr. MAGNUSON. Mr. President, it has been my privilege on numerous occasions in the past to bring to the attention of the Senate various formal activities by the American Legion in behalf of the American merchant marine.

This great veteran organization has been indefatigable in its efforts to sustain and strengthen this vital arm of our country's commerce and security.

As further evidence of the enlightened interest and activity of the Legion in this respect, I send to the desk a copy of the resolution adopted at the 1955 national convention by the Legion held October 10 to 13, 1955, embodying a 16-point long-range merchant marine program.

In the conviction that this resolution warrants the attention of Congress and the American public alike, I ask unanimous consent that the resolution be printed in the body of the RECORD at this point in my remarks.

There being no objection, the resolution was referred to the Committee on Interstate and Foreign Commerce, and ordered to be printed in the RECORD, as follows:

RESOLUTION No. 622

Whereas in the event of a national emergency, attack with atomic weapons is a certainty and will require instantaneous use of a fleet of fast ships in being and ready for action; and

Whereas the cold war, the extended global commitments of United States foreign policy, and the increased technical development in warfare, all require added naval power, greater speed and lift capacity for the American merchant marine; and

Whereas previous experience has proven that reliance upon the merchant fleets of foreign nations not only is inadequate and costly, but dangerous to our national security; and

Whereas American industry depends upon imports for industrial metals and minerals designated as critical by the President's Materials Supply Commission; and

Whereas the national maritime policy as set forth in the Merchant Marine Act of 1936 has proven itself to be vital to our national security and is contributing to our economic welfare; and

Whereas the Department of Defense is dependent upon the continuous availability of shipyards, plant know-how and a nucleus of skilled shipyard workers; and

Whereas the American Legion has long recognized that a strong American flag fleet is essential to the defensive strength of the Nation and to the prosperity of our country: Therefore be it

Resolved, That the American Legion reaffirms its 37-year support of a strong, privately owned and operated American merchant marine, and urges the adoption of such policies and procedures as will:

1. Implement as fully as possible the sound national maritime policy established in the Merchant Marine Act of 1936.

2. Assure that operating differential payments to contract lines will continue to be based on the concept of parity with foreign flag competitors.

3. Encourage the Congress of the United States to keep Government obligations incurred by operating differential contracts with American flag steamship lines on a current basis.

4. Encourage further steps to stabilize the industry and attract private investment in it, such as (a) assuring that there is final agreement on the amount of construction differential to be paid on a vessel before the contract is completed; (b) and providing 100 percent mortgage guaranties to finance the construction of American ships by qualified American operators.

5. Establish an orderly and evenly scheduled ship replacement program so as to avoid block obsolescence of the fleet and to provide a steady workload for American shipyards.

6. Inform Congress and the Administration more fully on the mechanics of the Cargo Preference Act of 1954 (the 50–50 law), pointing out that the 50/50 policy is designed so as not to impede farm surplus disposal programs or deprive foreign-aid programs of United States dollars.

7. Encourage United States exporters and importers to use American ships wherever possible.

8. Withdraw ships operated by Government agencies from service where private ships can provide adequate ocean transportation.

9. Work to remove discriminatory practices of foreign nations against American shipping through diplomatic negotiations.

10. Seek to restore our American coastwise fleet, the hardcore of merchant shipping, so that it will again be available for any emergency.

11. Encourage intercoastal shipping by revising tolls on United States ships for passage through the Panama Canal to provide that such tolls should be adequate to pay the costs actually attributable to the operation of the waterway but should not defray the overall cost of maintaining the Canal Zone.

12. Reactivate the Merchant Marine Naval Reserve as an effective component of the United States Naval Reserve.

13. Maintain the United States Merchant Marine Academy at King's Point, N. Y. as a permanent institution comparable to the service academies and to continue to encourage and support the maritime academies in Maine, Massachusetts, California and New York.

14. Urge the Congress of the United States to weigh carefully all proposals that have been made to assure that America shall sail the seas with the first atomic ship.

15. Recommend a more equitable distribution and utilization of available shipbuilding facilities throughout the United States.

16. We recommend the operation and continuance of an American-owned oceangoing ore-carrier fleet.

Whereas, the American Legion has adopted and intends to continue a program of direct action for a strong American merchant marine; and

Whereas in order to implement the broad and extensive information and educational campaign by the American Legion on behalf of a strong American merchant marine for our national security; now, therefore, be it

Resolved, That the director of the national security commission and the chairman of the merchant marine committee of the American Legion are hereby directed to continue to seek and obtain from all possible sources such information and assistance as will insure the effectiveness of the mandates of this convention concerning the American merchant marine; and to encourage public relations officers of the various departments of the American Legion to arrange meetings and forum discussions on maritime affairs and recommend that the department commanders invite informed speakers on such subjects to appear before their annual department conventions; and, further, that the director and the chairman of the merchant marine committee be, and are hereby

authorized, to participate in all hearings affecting said program; and be it further

Resolved, That the American Legion at its 37th Annual National Convention, assembled in Miami, Fla., October 10–13, 1955, instructs the national headquarters of the American Legion to prepare and to conduct an extensive informational and educational program about the American merchant marine as "our fourth arm" of national security.

APPRENTICESHIP TRAINING—RESOLUTION OF WISCONSIN STATE FEDERATION OF LABOR

Mr. WILEY. Mr. President, today I received a letter from George W. Hall, who is secretary-treasurer of the Wisconsin State Federation of Labor, enclosing a resolution with reference to apprenticeship training. I ask unanimous consent that the letter and the resolution be printed in the RECORD.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

MILWAUKEE, WIS., *January 10, 1956.*

The Honorable ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: I am enclosing a copy of a resolution adopted by our last convention which you will find is self-explanatory.

We request your assistance in carrying out the intent and purposes of this resolution.

With personal best wishes, I am

Very truly yours,

GEORGE W. HALL,
Secretary-Treasurer,
Wisconsin State Federation of Labor.

RESOLUTION NO. 2

Whereas it has come to our attention that two field offices of the Bureau of Apprenticeship, United States Department of Labor, located in the State of Wisconsin, have been closed because of curtailment of funds; and

Whereas the training of tradesmen is absolutely essential to the national health and welfare; and

Whereas history shows that governmental assistance is needed in the promotion of on-the-job training for the youth of our land as part of the civilian defense program which sustains the front line of defense; and

Whereas the curtailment of promotional efforts to train young men as tradesmen in the metal and manufacturing firms will seriously jeopardize our position in national and international prestige: Therefore, be it

Resolved, That the delegates to the Wisconsin State Federation of Labor in convention assembled in the city of Oshkosh, Wis., August 15 through 18, 1955, go on record as vigorously opposing any reduction in the personnel of the Bureau of Apprenticeship, United States Department of Labor; and be it further

Resolved, That every effort be made to reestablish those offices already closed in Wisconsin; and be it further

Resolved, That copies of this resolution be sent to the President of the United States and to all Wisconsin Senators and Representatives; and be it further

Resolved, That copies of this resolution be sent to the Secretary of Labor, United States Department of Labor, William F. Patterson, Director of Bureau of Aprenticeship, United States Department of Labor, and to Brother Al Hayes, president, International Association of Machinists.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GREEN, from the Committee on Rules and Administration, without amendment:

S. Con. Res. 60. Concurrent resolution authorizing the printing of additional copies of the hearings on automation and technological change for the use of the Joint Committee on the Economic Report (estimated cost $2,088.75);

H. Con. Res. 94. Concurrent resolution favoring the waiver of State residence requirements in certain elections (Rept. No. 1372);

S. Res. 144. Resolution to print as a Senate document a revised edition of a document entitled "How To Obtain Birth Certificates" (estimated cost $361.59); and

S. Res. 159. Resolution extending the time for certain expenditures by the Committee on Public Works (Rept. No. 1373).

By Mr. GREEN, from the Committee on Rules and Administration, with an amendment:

S. Con. Res. 61. Concurrent resolution authorizing the printing of additional copies of the joint committee print entitled "Federal Tax Policy for Economic Growth and Stability," for the use of the Joint Committee on the Economic Report (estimated cost $2,830.68); and

S. Con. Res. 62. Concurrent resolution to print as a document a pamphlet entitled "A Handbook for Americans" (estimated cost $5,963.24).

By Mr. GREEN, from the Committee on Rules and Administration, with amendments:

S. Con. Res. 55. Concurrent resolution to print for the use of the Senate copies of certain hearings and reports of the Internal Security Subcommittee of the Judiciary Committee of the Senate (Rept. No. 1371).

By Mr. GEORGE, from the Committee on Foreign Relations:

H. R. 5844. A bill to increase the fee for executing an application for a passport from $1 to $3; with an amendment (Rept. No. 1370).

By Mr. BYRD, from the Committee on Finance, without amendment:

H. R. 4582. A bill to amend the Internal Revenue Code of 1954 with respect to deductions from gross income of amounts contributed to employees trusts (Rept. No. 1375);

H. R. 5428. A bill to amend the Internal Revenue Code of 1939 with respect to the period of limitation for filing claims by certain transferees and fiduciaries for credit or refund of income taxes (Rept. No. 1376);

H. R. 7036. A bill to amend section 37 of the Internal Revenue Code of 1954 with respect to the earned income limitation on retirement income (Rept. No. 1377);

H. R. 7282. A bill relating to the allowance of the credits for dividends received, for dividends paid, and for a Western Hemisphere trade corporation in computing the alternative tax of a corporation with respect to its capital gains (Rept. No. 1378); and

H. R. 7364. A bill relating to the application of the documentary stamp tax to transfers of certain obligations paid for in installments (Rept. No. 1379).

EXPENDITURES AND TEMPORARY PERSONNEL, COMMITTEE ON RULES AND ADMINISTRATION (S. REPT. NO. 1374)

Mr. GREEN, from the Committee on Rules and Administration, reported the following original resolution (S. Res. 176), which was placed on the calendar:

Resolved, That the Committee on Rules and Administration, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) the election of the President, Vice President, or Members of Congress;

(2) corrupt practices and contested elections;

(3) credentials and qualifications;

(4) Federal elections generally;

(5) presidential succession.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the prior consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $50,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EMPLOYMENT OF TEMPORARY ADDITIONAL CLERICAL ASSISTANTS BY COMMITTEE ON FOREIGN RELATIONS—REPORT OF A COMMITTEE (S. REPT. NO. 1369)

Mr. GEORGE, from the Committee on Foreign Relations, reported an original resolution (S. Res. 161), which was placed on the calendar, as follows:

Resolved, that the Committee on Foreign Relations is authorized to employ two additional clerical assistants from February 1, 1956 through January 31, 1957.

INVESTIGATION OF MATTERS PERTAINING TO TECHNICAL ASSISTANCE AND RELATED PROGRAMS

Mr. MANSFIELD, from the Committee on Foreign Relations, reported the following original resolution (S. Res. 162), which was placed on the calendar:

Resolved, That the subcommittee (as authorized by S. Res. 214 of the 83d Cong., 2d sess., agreed to July 6, 1954) of the Committee on Foreign Relations is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with the jurisdictions of the Committee on Foreign Relations specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to technical assistance and related programs.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 13, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and person-

nel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $27,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

INVESTIGATION OF CERTAIN PROBLEMS RELATING TO INTERSTATE AND FOREIGN COMMERCE

Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce, reported the following original resolution (S. Res. 163), which was placed on the calendar:

Resolved, That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to—

(1) interstate and foreign commerce generally;

(2) maritime matters;

(3) domestic surface transportation;

(4) communications;

(5) civil aeronautics; and

(6) fisheries and wildlife.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $250,000 shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

STUDY OF MATTERS PERTAINING TO CONSTITUTIONAL RIGHTS

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 165) which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to examine, investigate, and make a complete study of any and all matters pertaining to constitutional rights.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $115,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

INVESTIGATION OF MATTERS PERTAINING TO IMPROVEMENT OF FEDERAL CRIMINAL CODE

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 166), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to examine, investigate, and conduct a full and complete study of any and all matters pertaining to the improvement and strengthening of the Federal Criminal Code, including ways and means of improving the laws and enforcement procedures designed to control the illegal trafficking in narcotics, marihuana, and similar drugs in the United States.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $35,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EXAMINATION OF ADMINISTRATION OF THE PATENT OFFICE

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 167), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommitttee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate, to conduct a full and complete examination and review of the administration of the Patent Office and a complete examination and review of the statutes relating to patents, trademarks, and copyrights.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $128,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

INVESTIGATION OF CERTAIN PROBLEMS IN CONNECTION WITH EUROPEAN REFUGEES

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 168), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, to examine, investigate, and make a complete study of any and all matters pertaining to the problems in certain Western European nations created by the flow of escapees and refugees from Communist tyranny.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956 to January 31, 1957, inclusive, is authorized (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the department or agency concerned and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for such legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. The expenses of the committee under this resolution, which shall not exceed $33,361.75, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

INVESTIGATION OF NATIONAL PENITENTIARIES

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 169), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to examine, investigate, and inspect national penitentiaries.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $8,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

STUDY OF ANTITRUST LAWS AND THEIR ADMINISTRATION

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 170), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to make a complete and comprehensive study and investigation of the antitrust laws of the United States and their administration, interpretation, operation, enforcement, and effect, and to determine the nature and extent of any legislation which may be necessary or desirable to (a) clarify existing statutory enactments, and eliminate any conflicts which may exist among the several statutes comprising such laws; (b) rectify any misapplications and misinterpretations of such laws which may have developed in the administration thereof; (c) supplement such statutes to provide any additional substantive, procedural, or organizational legislation which may be needed for the attainment of the fundamental objects of such statutes; and (d) improve the administration and enforcement of such statutes.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $275,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EXAMINATION OF ADMINISTRATION OF TRADING WITH THE ENEMY ACT

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 171), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to conduct a full and complete examination and review of the administration of the Trading With the Enemy Act.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $60,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

STUDY OF IMMIGRATION AND NATURALIZATION MATTERS

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 172), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommitte thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate to examine, investigate and make a complete study of any and all matters pertaining to immigration and naturalization.

SEC. 2. For the purposes of this resolution the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $102,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

STUDY OF JUVENILE DELINQUENCY

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 173), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the Committee on the Judiciary to conduct a full and complete study of juvenile delinquency in the United States, including (a) the extent and character of juvenile delinquency in the United States and its causes and contributing factors; (b) the adequacy of existing provisions of law, including chapters 402 and 403 of title 18 of the United States Code, in dealing with youthful offenders of Federal laws; (c) sentences imposed on, or other correctional action taken with respect to, youthful offenders by Federal courts, and (d) the extent to which juveniles are violating Federal laws relating to the sale or use of narcotics.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with its recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. Expenses of the committee, under this resolution, which shall not exceed $150,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

INVESTIGATION OF ADMINISTRATION OF INTERNAL SECURITY ACT OF 1950

Mr. KILGORE, from the Committee on the Judiciary, reported the following original resolution (S. Res. 174), which was referred to the Committee on Rules and Administration:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized under sections 134 (a) and 136 of the Legislative Reorganization Act of 1946, as amended, and in accordance with its jurisdiction specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the committee hereunder, to make a complete and continuing study and investigation of (1) the administration, operation, and enforcement of the Internal Security Act of 1950; (2) the administration, operation, and enforcement of other laws relating to espionage, sabotage, and the protection of the internal security of the United States; and (3) the extent, nature, and effect of subversive activities in the United States, its Territories and possessions, including but not limited to, espionage, sabotage, and infiltration by persons who are or may be under the domination of the foreign government or organizations controlling the world Communist movement or any other movement seeking to overthrow the Government of the United States by force and violence.

SEC. 2. For the purposes of this resolution, the committee, from February 1, 1956, to January 31, 1957, inclusive, is authorized to (1) make such expenditures as it deems advisable; (2) to employ upon a temporary basis, technical, clerical, and other assistants and consultants; and (3) with the consent of the heads of the departments or agencies concerned, and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities and person-

nel of any of the departments or agencies of the Government.

SEC. 3. Expenses of the committee, under this resolution, which shall not exceed $285,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

MYRTLE E. CARRICO

Mr. GREEN, from the Committee on Rules and Administration, reported the following original resolution (S. Res. 177), which was placed on the calendar:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Myrtle E. Carrico, widow of Everett C. Carrico, Sr., an employee at the time of his death, a sum equal to 1 year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

GEORG B. TENNYSON

Mr. GREEN, from the Committee on Rules and Administration, reported the following original resolution (S. Res. 178), which was placed on the calendar:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, jointly to Christine Himes, daughter, and Georg B. Tennyson, son, of Emily I. Tennyson, an employee of the Senate at the time of her death, a sum equal to 11 months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

ANNUAL REPORT OF SELECT COMMITTEE ON SMALL BUSINESS (S. REPT. NO. 1368)

Mr. SPARKMAN. Mr. President, from the Select Committee on Small Business, I submit the sixth annual report of that committee. I ask unanimous consent that the report be printed, with illustrations.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Alabama? The Chair hears none, and it is so ordered.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. MAGNUSON, from the Committee on Interstate and Foreign Commerce:

Ector B. Latham, and sundry other persons, for permanent appointment in the Coast and Geodetic Survey.

By Mr. GEORGE, from the Committee on Foreign Relations:

Exec. F, 83d Congress, 2d session, a protocol amending the slavery convention of September 25, 1926; without reservation (Ex. Rept. No. 1); and

Exec. P, 82d Congress, 2d session, a protocol modifying the convention of July 6, 1890, concerning creation of an International Union for the Publication of Customs Tariffs; without reservation (Exec. Rept. No. 2).

By Mr. BYRD, from the Committee on Finance:

Russell C. Harrington, of Rhode Island, to be Commissioner of Internal Revenue;

William E. Dowling, of Michigan, to be a member of the United States Tariff Commission for the remainder of the term expiring June 16, 1957, vice James Weldon Jones; and

Lowell Thelwell Coggeshall, of Illinois, to be Special Assistant on Health and Medical Affairs to the Secretary of Health, Education, and Welfare, vice Chester Scott Keefer, resigned.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and by unanimous consent, the second time, and referred as follows:

By Mr. BUTLER:

S. 2893. A bill to authorize an appropriation for the development, construction, and operation of an atomic-powered railway locomotive; to the Joint Committee on Atomic Energy.

(See the remarks of Mr. BUTLER when he introduced the above bill, which appear under a separate heading.)

By Mr. WILEY:

S. 2894. A bill to amend the Agricultural Act of 1949, as amended, so as to continue and increase the consumption of fluid milk by children in nonprofit schools of high school grade and under; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. WILEY when he introduced the above bill, which appear under a separate heading.)

By Mr. NEELY (by request):

S. 2895. A bill to amend the acts of February 28, 1903, and March 3, 1927, relating to the payment of the cost and expense of constructing railway-highway grade elimination structures in the District of Columbia; and

S. 2896. A bill to amend the act relating to cemetery associations; to the Committee on the District of Columbia.

By Mr. GOLDWATER:

S. 2897. A bill for the relief of Lim Gin Wey; to the Committee on the Judiciary.

S. 2898. A bill directing the Administrator of Veterans' Affairs to permit retired officers and enlisted men to use available hospital facilities; to the Committee on Labor and Public Welfare.

By Mr. LANGER:

S. 2899. A bill to provide for accrued servicemen's indemnity payments in certain cases; to the Committee on Finance.

(See the remarks of Mr. LANGER when he introduced the above bill, which appear under a separate heading.)

By Mr. LANGER (for himself and Mr. YOUNG):

S. 2900. A bill to provide for the establishment and maintenance of a forest experiment station in the State of North Dakota; to the Committee on Agriculture and Forestry.

By Mr. PAYNE:

S. 2901. A bill for the relief of Frederika Anna Elizabeth Leitl; to the Committee on the Judiciary.

S. 2902. A bill to extend for a period of 2 years the education and training provisions of the Servicemen's Readjustment Act of 1944, as amended; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. PAYNE when he introduced the last above-mentioned bill, which appear under a separate heading.)

By Mr. HILL (for himself and Mr. SPARKMAN):

S. 2903. A bill to amend the cotton-acreage allotment provisions of the Agricultural Adjustment Act of 1938, as amended; to the Committee on Agricultural and Forestry.

By Mr. SMITH of New Jersey:

S. 2904. A bill for the relief of Rosalind Chang; to the Committee on the Judiciary.

By Mr. SMITH of New Jersey (for himself, Mr. CASE of New Jersey, and Mr. DUFF):

S. 2905. A bill to authorize a 5-year program of Federal assistance to States and communities to enable them to increase public elementary and secondary school construction; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. SMITH of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. LEHMAN (for himself, Mr. DOUGLAS, Mr. HUMPHREY, and Mr. MCNAMARA):

S. 2906. A bill to amend the Immigration and Nationality Act to provide that no deductions pursuant to the Displaced Persons Act of 1948 shall be made from the immigration quota of any quota area after the close of the fiscal year 1955; to the Committee on the Judiciary.

By Mr. KILGORE:

S. 2907. A bill to amend section 4161 of title 18, United States Code, relating to commutation for good conduct; to the Committee on the Judiciary.

(See the remarks of Mr. KILGORE when he introduced the above bill, which appear under a separate heading.)

By Mr. HOLLAND:

S. 2908. A bill for the relief of Tsui Yung Wong; to the Committee on the Judiciary.

By Mr. MAGNUSON (by request):

S. 2909. A bill to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. THYE:

S. 2910. A bill to provide for the issuance of a special series of stamps in commemoration of the 100th anniversary of the birth of Dr. Nikola Tesla; to the Committee on Post Office and Civil Service.

By Mr. JENNER:

S. 2911. A bill to amend title 18 of the United States Code in order to provide that certain acts of violence committed on certain aircraft and motor vehicles shall be a criminal offense; to the Committee on the Judiciary.

(See the remarks of Mr. JENNER when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of South Dakota:

S. 2912. A bill authorizing issuance of patent in fee to Joshua Standing Elk; to the Committee on Interior and Insular Affairs.

DEVELOPMENT OF ATOMIC-POWERED RAILWAY LOCOMOTIVE—INTRODUCTION OF BILL

Mr. BUTLER. Mr. President, I ask unanimous consent that I may proceed for 4 minutes.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Maryland? The Chair hears none, and the Senator may proceed.

Mr. BUTLER. Mr. President, I introduce, for appropriate reference, a bill to authorize an appropriation for the development, construction, and operation of an atomic-powered railway locomotive.

Since my return from the Atoms-for-Peace Conference in Geneva, Switzerland, I have often been asked to summarize my impressions of this remarkable meeting. In a few short words, these feelings are contained in the statement that an understanding of the atom offers a great promise for good. If we have faith in man's future, and in the future of our country, we must demonstrate that the potential of the atom for good is even greater than its potential for destruction. Mankind must develop the wisdom to make this true, for it is in his grasp to do so.

This is indeed the age of the atom. From the horrendous, awesome spectacle of the A-bomb and the H-bomb, men of science have emphasized the great potential for the application of atomic energy for peaceful uses, for the betterment of all mankind. In the fields of medicine, agriculture, industry, transportation, and a host of others, the possibilities are unlimited. It could even be said that, in terms of energy and power sources, we are on the precipice of an industrial evolution of unprecedented proportions.

Our position as first partner in the community of free nations requires that we continue to evidence leadership in the development of all peaceful uses of atomic energy. To this end, President Eisenhower's dramatic plan to build an atomic-powered merchant ship which could tour the world as a floating manifestation of our atomic progress deserves favorable action. Last year, I was the cosponsor of legislation to undertake the prompt construction of this vessel. Surely, the Congress should approve the President's proposal in its present session, and this objective will have my full support.

It has also been my opinion that the American people—in spite of press, radio, and television coverage—cannot fully comprehend the wonders of atomic energy until they likewise have the chance to view such exhibits. For this reason, I am today offering another bill to authorize the speedy construction of an atomic-powered locomotive. The development of this essential new device should forerun a further evolution in domestic transportation.

An atomic-powered locomotive, as I envision it, could travel throughout the United States leading an exhibit train which would feature the coming changes.

Every American could thereby experience the thrill, and gain the vital knowledge which good citizenship demands, of the marvels of the atom. Almost certainly, an exhibition train of this nature would stimulate new applications of atomic methods, and could do as much as any single act to spark our expansion in a new economic age.

Private capital, with opportunities unlimited for many small businesses and larger companies as well, must find its own future in this field. It is only as we can make information available, and license more broadly the processes and materials of atomic energy, without detriment to basic security, that this American ingenuity can come into play on a broad front. This, it is most important that we do.

In introducing this measure, I think it only fair to state that the Baldwin-Lima-Hamilton Corp. of Philadelphia, and the Denver and Rio Grande Railroad are currently conducting studies of the engineering, technical, and economic aspects of an atomic locomotive at the instigation of the Atomic Energy Commission. Results of these studies will be made known in March, and I am confident that they will confirm the opinions as to the feasibility and practicality of an atomic locomotive which have been shared with me by a number of leading physicists, scientists, and industrialists.

Mr. President, in expressing the hope that my bill will receive immediate consideration, I ask unanimous consent that the full text of the measure be printed in the body of the RECORD at this point in my remarks.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2893) to authorize an appropriation for the development, construction, and operation of an atomic-powered railway locomotive, introduced by Mr. BUTLER, was received, read twice by its title, referred to the Joint Committee on Atomic Energy, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That (a) for the purpose of developing the economic uses of nuclear transportation power in peaceful pursuits of domestic commerce, the Atomic Energy Commission, with the advice and assistance of the Interstate Commerce Commission, is authorized to develop and construct an atomic energy propulsion facility for adaptation to a railway locomotive of such characteristics and design as will make it usable in American railroad transportation. The Atomic Energy Commission, with the advice and assistance of the Interstate Commerce Commission, is authorized to arrange for the construction of such locomotive.

(b) Except as otherwise determined by the Atomic Energy Commission, the development, construction, and installation of the atomic energy propulsion facility herein authorized shall be so conducted as not to impair substantially the prosecution of other atomic energy research and development or construction projects of the Atomic Energy Commission.

(c) Upon completion of such locomotive, the Secretary of Commerce shall make suitable arrangements for such licenses as are required by the Atomic Energy Act of 1954, as amended, and for the display of such locomotive at such places as the Secretary of Commerce on direction of the President shall determine to be consistent with the common

defense and security and the health and safety of the public. In connection with the display of such locomotive the Secretary of Commerce may arrange for demonstrating the capabilities of such locomotive in providing both freight and passenger train service, and, in consultation with the Atomic Energy Commission, for an exhibit on a train drawn by such locomotive showing the peaceful uses of atomic energy. Such locomotive may be utilized to generate electricity from atomic energy and, under such terms, rates, or conditions as the Secretary of Commerce may prescribe, may be utilized to supply for demonstration or emergency purposes such electrical energy to the electric utility system of any place in which such locomotive is a visitor.

(d) No charge shall be made to any person visiting such locomotive or any train connected thereto containing exhibits while such locomotive and train are operated by the Government.

SEC. 2. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this act.

FUNDS FOR SPECIAL SCHOOL HEALTH PROGRAM

Mr. WILEY. Mr. President, I introduce, for appropriate reference, a bill to increase by $10 million the amount of funds allocated for the special school-milk program for the current year.

This bill proposes to amend the Agricultural Act of 1949, as amended, so as to increase the present authorization of Commodity Credit Corporation funds for the special school-milk program from $50 million to $60 million for the fiscal year ending June 30, 1956.

As I pointed out last Monday, this additional amount of funds is urgently needed to avoid a slowdown in the distribution of milk to schools.

I request unanimous consent that my letter of January 11 to the Senator from Louisiana [Mr. ELLENDER], chairman of the Senate Committee on Agriculture and Forestry, be printed at the conclusion of my remarks in the RECORD.

In this letter I have urged the committee to give this proposed legislation its early and favorable consideration, and that the committee report it to the floor at the earliest possible date.

I have been informed that my colleague from Wisconsin in the other House, Representative MELVIN R. LAIRD, is introducing a similar measure in the House of Representatives today. I have been happy to issue with him a joint news release on this subject.

I request unanimous consent that this release be printed in the RECORD, along with the letter to the Senator from Louisiana.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letter and release will be printed in the RECORD.

The bill (S. 2894) to amend the Agricultural Act of 1949, as amended, so as to continue and increase the consumption of fluid milk by children in nonprofit schools of high-school grade and under, introduced by Mr. WILEY, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

The letter and release presented by Mr. WILEY are as follows:

JANUARY 11, 1956.

Hon. ALLEN J. ELLENDER,
United States Senator, Chairman, Senate Agriculture and Forestry Committee, Senate Office Building, Washington, D. C.

MY DEAR SENATOR ELLENDER: I wish to extend my best wishes to you and to your committee in the difficult and complex undertaking in which you are engaged in preparing farm parity and related legislation.

As you may know, I recommended on January 9 that Congress take prompt action to authorize increased funds to complete the special school milk program for the current year. A rapid expansion of the program has necessitated the additional funds.

I am initiating legislation on Thursday, January 12, to amend the Agricultural Act of 1949, as amended, to increase the present authorization of CCC funds for the school milk program from $50 million to $60 million for the fiscal year ending June 30, 1956.

I am advised by the Department of Agriculture, which is implementing the program, that the funds are needed promptly to avoid a slowdown in milk distribution.

I hope you will give this urgently needed legislation your favorable consideration and report it to the floor at an early date.

I have also introduced legislation (S. 2869) to provide a larger amount of funds for the special school milk program during the coming 1956–57 school year. My bill proposes to increase the total amount of money allocated for the special school milk program from $50 million to $75 million.

To be in full accordance with the President's message, I recommend that the program be extended through the 1956–58 (instead of 1956–57) school years, with an annual expenditure of $75 million.

I may say, incidentally, that I regard that $75 million figure a minimum floor, not a maximum ceiling. As the program expands, it may be necessary to further increase funds for the distribution of milk to our schoolchildren.

I respectfully urge early action on these bills for two specific reasons: First, the schools now under the program need to be assured for a continued program, so that they may plan accordingly; and, second, new schools or those not now under the program, need time to set up the machinery for participation in the 1956–58 programs.

With kindest personal regards, I am,

Sincerely yours,

ALEXANDER WILEY.

SENATOR ALEXANDER WILEY, REPUBLICAN, OF WISCONSIN, AND REPRESENTATIVE MELVIN R. LAIRD, REPUBLICAN, OF WISCONSIN, INTRODUCE BILLS TO PROVIDE URGENTLY NEEDED FUNDS FOR SCHOOL-MILK PROGRAM

Senator ALEXANDER WILEY, Republican, of Wisconsin, and Representative MELVIN R. LAIRD, Republican, of Wisconsin, announced today that they are introducing bills on Thursday, January 12, which would increase the amount of the special school-milk program fund from $50 to $60 million for the 1955–56 year.

The money is urgently needed to avoid a slowdown in the distribution of milk to the schools.

Wisconsin, for example, will need at least twice as much money as has been tentatively allocated, if the program is to be continued at the existing rates to the end of the school term.

Senator WILEY and Representative LAIRD have already introduced bills this session which would increase the total amount allocated for the coming 1956–57 school year from $50 million to $75 million. Both Senator WILEY and Representative LAIRD regard this $75 million figure as a minimum floor, not a maximum ceiling.

ACCRUED SERVICEMEN'S INDEMNITY PAYMENTS IN CERTAIN CASES

Mr. LANGER. Mr. President, I introduce, for appropriate reference, a bill to provide for accrued servicemen's indemnity payments in certain cases. I ask unanimous consent that the bill, together with a statement, prepared by me, relative to the bill be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and statement will be printed in the RECORD.

The bill (S. 2899) to provide for accrued servicemen's indemnity payments in certain cases, introduced by Mr. LANGER, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That section 3 of the Servicemen's Indemnity Act of 1951 (38 U. S. C. 852) is hereby amended by substituting a comma for the period at the end of the section and adding the following: "except that there shall be paid to the estate of any beneficiary within the permitted class all installments which such beneficiary could have received during his lifetime, had not death intervened."

SEC. 2. This amendment shall be effective from June 27, 1950.

The statement presented by Mr. LANGER is as follows:

STATEMENT BY SENATOR LANGER

This bill would carry out the provisions of resolution No. 18 adopted at the November 19, 1955, meeting of the national executive committee of the American Legion.

Approval of the measure would permit payment to the estate of a deceased beneficiary of those monthly installments of the servicemen's indemnity which, based upon a claim filed by or on behalf of the beneficiary, could have been paid, except that such beneficiary died.

Amended would be the last sentence of section 3 of the Servicemen's Indemnity Act of 1951 (pt. I, Public Law 23, 82d Cong., approved Apr. 25, 1951), which now reads:

"Any installments of an indemnity not paid to a beneficiary during such beneficiary's lifetime shall be paid to the named contingent beneficiary, if any; otherwise, to the beneficiary or beneficiaries within the permitted class next entitled to priority: *Provided*, That no payment shall be made to the estate of any deceased person."

The amendatory legislation is proposed to be effective June 27, 1950, the initial date from which the protection of the servicemen's indemnity was provided.

If enacted, a typical case which would benefit is here cited. The person with indemnity protection died in active service on November 20, 1952. He had $3,000 contract insurance so $7,000 indemnity was payable. His wife was the named sole beneficiary for the contract insurance which was paid in one sum. The date of his death found her in an institution, mentally incompetent. Within a month a court appointed a guardian for her who took immediate steps to file a claim and submitted the evidence to prove her the widow. The Veterans' Administration on July 30, 1953, informed the guardian that the claimant, the widow, had been determined to be the surviving spouse eligible to the indemnity award. On October 15, 1953, the guardian was notified by VA that settlement was made and on the same date a check was issued covering the period November 20, 1952–October 20, 1953. The widow, a war

veteran herself, died October 25, 1953, before the check was received by the guardian. In consequence, the primary surviving beneficiary received no benefit whatever from the indemnity.

EXTENSION OF EDUCATION AND TRAINING PROVISIONS OF SERVICEMEN'S READJUSTMENT ACT

Mr. PAYNE. Mr. President, I introduce, for appropriate reference, a bill to extend for 2 years the education and training provisions of the Servicemen's Readjustment Act of 1944, as amended. I ask unanimous consent that a brief statement prepared by me on this bill, as well as the bill itself, be printed in the RECORD at this point.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement and bill will be printed in the RECORD.

The bill (S. 2902) to extend for a period of 2 years the education and training provisions of the Servicemen's Readjustment Act of 1944, as amended, introduced by Mr. PAYNE, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The statement and bill are as follows:

STATEMENT BY SENATOR PAYNE

There is an increasing awareness in this country of the growing need for more and better trained citizens, particularly in the scientific and teaching professions. This bill to extend the education and training benefits of the Servicemen's Readjustment Act of 1944, as amended, for 2 years would help achieve this end in one small but important way.

Figures compiled by the Veterans' Administration show that there are now about 88,000 men and women studying under the world war GI bill. About 80 percent of these are studying on a part-time basis. Education and training benefits under this law will terminate on July 25, 1956, for all of these students. This bill would amend the law so that benefits would terminate on July 25, 1958.

It should be made clear, however, that this bill would not extend the educational benefits to anyone who did not begin his education or training within 4 years of the date of his discharge from the service or prior to the termination of World War II on July 25, 1947, whichever is later.

In addition, since 1951 such education or training ordinarily has had to be continuous from the time the course of study began in order that the student may qualify for the benefits. In other words, the number of students who could benefit by this bill generally is limited to the 88,000 now studying under the act. And by the date benefits terminate on July 25, 1956, the entitlement of some of these students will have run out.

It would clearly be to the benefit of the entire Nation to enable many of these students to continue their education. It has been estimated by the Veterans' Administration that about 5,000 of the total number of students are taking teacher training courses on a part-time basis. Many others are studying for advanced degrees in a wide range of subjects in order to enable them to enter into secondary, college, and graduate teaching. In many cases, these student because of their age, family responsibilities and the need to gain experience in their profession must work, thus making it possible for them to continue study only on a part-time basis. Studying on a part-time basis means, of course, that their entitlement is used up slowly and makes more necessary the need for a 2-year extension provided in this bill.

Besides teachers, many others would benefit, including scientific personnel, which this Nation needs so greatly in order to maintain and improve the level of its technical skills and the quality and scope of its research in a wide variety of scientific fields.

The benefits which can result from an extension of the World War II education and training benefits are so great in relation to the cost that it is my earnest hope that the Congress will thoroughly study this matter and, if the facts clearly show the need which I believe exists, extend the benefits at the earliest possible opportunity.

Be it enacted, etc., That the last proviso of section 1 of part VIII of Veterans' Regulation No. 1 (a) is amended by striking out "nine" and inserting in lieu thereof "eleven."

SCHOOL CONSTRUCTION

Mr. SMITH of New Jersey. Mr. President, I introduce, for appropriate reference, the administration's revised school-construction bill, which is in line with the message which the President sent today to both Houses of Congress, on the subject of school construction. The official title of the bill is "A bill to authorize a 5-year program of Federal assistance to States and communities to enable them to increase public elementary and secondary school construction."

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2905) to authorize a 5-year program of Federal assistance to States and communities to enable them to increase public elementary and secondary school construction, introduced by Mr. SMITH of New Jersey (for himself and other Senators) was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. SMITH of New Jersey. Mr. President, I ask unanimous consent to be permitted to proceed for 5 or 6 minutes to analyze the bill and present to the Senate its important features.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from New Jersey is recognized for 5 minutes.

Mr. SMITH of New Jersey. Mr. President, before I begin my remarks, I wish to pay the highest possible tribute to my colleague, Mr. HILL, chairman of the Committee on Labor and Public Welfare. I was hoping that he would be able to join in sponsoring the bill, but he thought that, inasmuch as it was an administration bill, it would be more appropriate for me to introduce it rather than for him to introduce it, as he would have the right to do as chairman of the committee. During the past several months he has helped in endeavoring to arrive at certain conclusions in connection with the bill, and I wish to pay him this tribute as I begin these few remarks.

A number of school-construction bills were introduced last session. None of these measures received the approval of the Congress. This Nation is faced with a serious shortage of classrooms. The primary responsibility for eliminating this shortage rests squarely with the States and local communities. This has been and remains the philosophy of this administration. It is also the philosophy expressed by the White House Conference on Education, which I personally had the privilege of attending about a month ago.

But in order to assist the States in their efforts on a basis of financial need it has become necessary for the Federal Government to step in—on an emergency and temporary basis—with a school-construction program.

Last November the White House Conference on Education was held. At this conference there were over 1,800 representatives of all walks of life. They had gathered here in Washington not to pass resolutions, but to advise the President of the United States.

The conference dealt with six equally important questions affecting our Nation's school. At this moment, as legislators, our concern is with the problem of dealing with a nationwide shortage of classrooms. The White House Conference dealt with this problem. The delegates, on a genuinely grassroots basis, after their deliberations which lasted nearly a week, arrived at the following statement:

The participants approved by a ratio of more than 2 to 1 the proposition that the Federal Government should increase its financial participation in public education. Of those favoring such increase, the overwhelming majority approved an increase in Federal funds for school-building construction.

I may add that I heard some of the discussions. The delegates were opposed—as I think we all are—to the Federal Government getting into education, in the sense of paying running expenses, salaries, and so forth. However, school building construction appeared to be a different matter, and they all favored the Federal Government helping to solve the construction problem, which is so serious.

The report went on to note:

All States and Territories and the District of Columbia should be eligible for Federal funds but that they should be granted only on the basis of demonstrated needs.

The report concluded that "the destiny of our children and our free society demands that we use more of our wealth for education.

With these basic principles in mind, the administration is here proposing a new and expanded program of assistance to the States and communities to build badly needed classrooms.

This bill does not propose a permanent program. Rather, it is designed to eliminate the existing classroom deficit within the next 5 years.

I wish to point out that this bill is consistent with the principles expressed by the White House Conference, which the President initiated and the Congress approved.

Briefly summing up the provisions of the bill, title I of this bill is quite similar to title I in last year's bill, S. 968. It provides for a 5-year program of purchases by the Federal Government of bonds issued by local school districts, to finance school construction when such bonds cannot be sold to private investors at

reasonable rates of interest. For this purpose, funds not to exceed an aggregate of $75 million would be authorized for a 5-year period. These bonds would be purchased at the going Treasury rate for such long-term obligations, plus three-eighths of 1 percent. It is not the purpose of the Federal Government to preempt the school bond market. Rather, it is a proposal to put a ceiling on school bond interest rates and to improve that market.

Title II, as in last year's administration bill, provides for Federal credit assistance to State school building agencies. Under this title the States would be assisted by the Federal Government in supporting bonds issued by State school financing agencies for school construction, in such a way that local districts could obtain schools on a lease-purchase basis, without making capital outlays. This lease-purchase plan would be of special value in cases in which restrictive debt limits prevent further bond financing at that level. I point out that there is nothing compulsory about the opportunity afforded by this proposed legislation.

In the end, assuming successful operations under the leases, this title contemplates complete repayment to the Federal Government of the contribution to the reserve fund by the various State agencies. And the bonds issued by the State agencies would be retired by the school districts through the rental on the newly built schools.

The proposal would authorize participation by the Federal Government in establishing State-Federal reserve funds sufficient to back a maximum of $6 billion worth of State agency bonds issued for school construction. It is estimated that this would require total appropriations of $150 million for the 5-year program.

Of course, as those bonds are ultimately retired, the money will come back to the Federal Government, and this liability will come to an end.

Title III, the important part of the bill, provides for Federal grant assistance to the States.

The bill would authorize to be appropriated $250 million for the fiscal year beginning July 1, 1956, and $250 million for each of the four succeeding fiscal years, or $1¼ billion covering a period of 5 years.

These funds would be allotted to the States on the basis of the income per child of school age, the school-age population—I stress this next point—and the effort made by the States with respect to school construction.

The State educational agencies would administer the program in accordance with plans developed by each State.

The bill adjusts Federal grants in such a way as to induce States to make an effort equal to or above the average national school effort.

Following the same principle the bill attempts to assure that the States will, in planning the expenditure of Federal-State funds, give priority to those communities within the States which, despite real efforts, cannot meet fully their classroom needs.

The bill contains a "State efforts test." State and national school effort indexes will be established.

Any State whose school effort index as determined in two ways—on the basis of school expenditures in relation to State income, and on the basis of the relative level of such expenditures per school child—is lower in both respects than the national average of the school effort index would have its allotment proportionately reduced.

That language sounds rather complicated. However, after the bill has been introduced and referred, I shall send copies of it to every Member of the Senate. I am having copies of the bill made and shall send them to all Senators, so that they may study the provisions of the bill.

Any funds accruing as a result of such reductions would be reallotted among the States whose financial efforts were equal to or above the national school effort index.

This State-efforts test, together with the requirement of State matching, make it very unlikely that any State would reduce its present school building efforts.

The last section of title III contains the Davis-Bacon prevailing wage provisions, which are customarily included in legislation of this type. It will be recalled that this provision was also in S. 968, last year's administration bill, and in S. 5, the school construction bill sponsored by the senior Senator from Alabama and other Senators last year, and on which extensive hearings were held.

Title IV of the bill provides for Federal grant assistance to States to help pay administrative costs for developing State programs to improve State and local school-construction finance. It authorizes to be appropriated a sum totalling $20 million over a 5-year period. The funds would be allotted on the basis of relative school-age population. State matching on a dollar for dollar basis is required.

This title is identical with title IV in last year's bill, S. 968.

Title V is the general provision title of the bill and is almost identical with the general provisions in last year's bill, S. 968. It contains definitions of terms used in the bill, provides for judicial review, and establishes various general administrative requirements.

The last section of title V contains a specific guaranty prohibiting Federal interference with regard to personnel, curriculum, and programs of instruction in our public schools.

That is a new provision, which did not appear in any of the bills last year, so far as I know.

An outstanding feature of this revised proposal is the State efforts test which is patterned after the bipartisan aid to education measures which Senator Taft and others sponsored in the 80th and 81st Congress.

The Senator from Alabama [Mr. HILL], other Senators, and I were sponsors of those measures, and all of us approved the principle which was adopted in those measures.

This would inject into this program the theory of helping those who make an effort to help themselves. This test will also encourage all States to make that effort in order to receive Federal assistance.

The bill attempts to back up the general feeling of this administration and of the American public that Federal assistance should not be extended to those who have made no effort to solve their own school construction problems.

Mr. President, I ask unanimous consent that this bill be left open for cosponsors from both parties, until the end of business on Wednesday, January 18th.

I ask for that additional time because it is my purpose to circulate copies of the bill to all Members, on both sides of the aisle. I make the request with the approval of the Senator from Alabama. In that way all of us will be able to better understand the bill as it goes to the committee for consideration.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SMITH of New Jersey. I also ask unanimous consent to have printed in the RECORD at the close of my remarks a document entitled "Fact Sheet" issued by the administration in connection with legislative proposals of 1956 for school construction.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

SCHOOL CONSTRUCTION

There was an ebb in school construction and maintenance from 1930 to about 1950. The first of these decades was marked by economic depression and low birth rate; the second by labor and material shortages caused by World War II. Thus, school construction deficiencies began to accumulate years ago.

In recent years the deficiencies have been intensified by rapid increases in public school enrollment—from 25,070,000 in the school year 1949–50 to about 30,500,000 this past fall. The enrollment increase is expected to continue—to about 37,300,000 pupils in 1959–60, about a 50-percent increase over 10 years. The classroom shortage also has been aggravated by increased mobility of the population.

EFFORTS TO DATE TO MEET THE SHORTAGE

In the face of these mounting needs, States and communities have been increasing their school construction effort. In 1949–50, they spent about $1 billion to build 36,000 new classrooms. They have increased their programs each year since then; this year, they estimate they are building 67,000 classrooms at a cost of almost $2½ billion.

For several years, even after the construction rate swung upward, new schools failed to keep pace with each year's expanding classroom needs. So the accumulated deficit continued to increase. For the past 2 years, however, the construction rate has slightly exceeded each year's new classroom needs. Thus, some progress has been made in reducing the deficit.

At the current rate of construction, however, it would take many years before the classroom shortage would be eliminated.

THE EXTENT OF NEED TODAY

It is impossible to state the exact number of additional classrooms needed today—or the precise number that will be needed over a period of years. Information is available,

however, to outline broad dimensions of the problem:

Over the next 5 years, based on population estimates, school enrollment increases alone will require about 210,000 new classrooms.

States report that this year, about 2,250,000 pupils are enrolled in excess of normal capacity of public schools in use. Thus, to relieve existing overcrowding, double shift school sessions or use of buildings not designed as schools, the States estimate an additional need of approximately 80,000 classrooms.

In addition to the future enrollment increase and the existing shortage of space—factors which can be measured with relative accuracy—there is a third and less precise area of classroom needs. This is the need for replacement of obsolete, unsafe, and otherwise unsuitable facilities. Sufficient information is not available for making precise determinations of replacement needs. It is a matter of judgment when a schoolroom becomes unfit for use. However, on the basis of the data available, the Office of Education has concluded that a reasonable goal would be the replacement of approximately 180,000 obsolete classrooms over the next 5 years.

In the light of all these needs, a reasonable goal for total classroom construction over the next 5 years would be approximately 470,000 rooms.

THE PURPOSE OF FEDERAL AID

The Administration is proposing Federal aid to accomplish two broad objectives:

First, to help the States and communities continue their current rate of increase in school construction. This is basic, for there is general agreement that the great bulk of financing will be State and local. (Local and State governments already are spending almost $2½ billion for school construction this year.)

Second, in partnership with the States, to provide grants to financially needy school districts to help overcome the remaining classroom deficit.

THE ADMINISTRATION'S PROPOSALS

Bond purchases: An appropriation of $750 million would be authorized during a 5-year period for the purchase, by the Federal Government, of all or part of an issue of bonds which local school districts have sought unsuccessfully to market to private lenders at reasonable rates of interest.

Federal purchase of these bonds would be contingent upon certification by the State that the legality of the bonds is supported by an opinion of a qualified attorney, and that the proceeds from sale of the bonds will be used for buildings which conform to State redistricting policies and school construction standards.

The local school bonds would be purchased, under this proposal, at the current interest rate borne by long-term United States Treasury obligations plus three-eighths of 1 percent. All bonds purchased would mature in 30 years or less.

Fundamentally, this proposal would work to set a ceiling on school bond interest rates. The Federal Government would not displace the normal channels for investment in school bonds.

State school financing agencies: Federal advances would be authorized to assist States to support bonds issued by State school financing agencies to finance school construction.

Under this lease-purchase plan, which is widely used for other public construction, the State would set up an agency coordinated with the State education department and empowered to issue bonds. Through equal contributions to a basic reserve fund equal to 1 year's payment of interest and principal, the State and Federal Governments would help strengthen the agency's bonds. This would help assure more favorable interest rates for these issues.

With the proceeds of its bonds, the State agency would finance the construction of schools in local school districts, which would pay rent for the new schools. Rentals would be sufficient to cover payment of interest and principal of the bonds outstanding, a small addition to a supplemental reserve fund, and a share of the administrative expenses of the State school financing agency.

In the event of defaults in rent by a number of school districts, the supplemental reserve fund would be used first to make up deficiencies. If necessary, the basic reserve would then be used. In that event, the Federal Government would replenish its half of the basic reserve fund, up to a maximum annual Federal contribution of one-half of the total debt service (interest and principal) for the year. When the total reserve funds of the State school financing agency equalled 2 years' debt service, the entire Federal advance would gradually be repaid by the agency.

The bill would permit Federal participation with respect to as much as $6 billion aggregate principal amount of State agency bonds issued during the 5-year period of the bill. If this amount of bonds is issued, it is estimated that the Federal advances to the initial reserve funds supporting such bonds would be in the neighborhood of $150 million. The amount required for possible subsequent advances to the reserve funds by the Federal Government cannot be readily estimated.

State programs to increase school construction: Appropriations totaling $20 million would be authorized over a 5-year period for allocation to the States for development of State programs designed to improve the ability of local school districts to finance school construction. Funds would be allotted on the basis of relative school-age population and would be matched by the States. Funds could be expended only for administrative costs of such State programs.

Grants to the States: A total of $1,250,000,000 would be authorized for Federal grants to all the States, Territories, and the District of Columbia, at the rate of $250 million each year for 5 years, for the construction of public schools in financially needy school districts in each State. Four principal features of the grant program are:

Matching requirements: Federal funds would be matched in the first year by the States and school districts and thereafter by the States alone. This requirement is designed to produce more school construction, encourage States to improve laws relating to financing of school construction, and promote sound administration of the program. Matching would be on a sliding scale. The State with the lowest income per child would put up $1 for every $2 of Federal grants received. The State with the highest income per child would put up $2 for every $1 received. The combined Federal-State payment would supplement such local funds as may be available for new schools.

Distribution according to need: Funds will be distributed according to relative State income per school-age child. The State with the least income per child would receive approximately 3 times as much per child as the State with the highest income per child. The purpose of allotting Federal funds in this way is to give the greatest help where there are the least resources for classroom needs.

A priority plan within each State. Such State plans would take into consideration the need for facilities to relieve or prevent double shifts, overcrowding, or unhealthful or hazardous conditions, and assure that the highest priority in granting assistance will be given to communities which are unable fully to meet their classroom needs because of lack of resources.

Recognition of effort commensurate with ability. The annual allotment would be reduced proportionately for States which are below the national average both in the proportion of their income devoted to schools and in their dollar expenditures per pupil. This provision gives recognition to the principle that reasonable State and local effort is fundamental to a sound program of Federal aid for school construction. It should give incentive to the few lagging States to increase their efforts.

State educational agencies would administer the school construction program in accordance with plans developed by each State.

SUMMARY

The provisions for purchase and support of school construction bonds, together with the grants for planning, are designed to help the States and communities continue to increase school construction. If they continue to expand construction by 5,000 rooms each year, as they have done for several years, States and communities would build 410,000 rooms over the next 5 years.

The provision for Federal grants, matched by the States, is designed to complete achievement of the goal of building 470,000 classrooms over the next 5 years.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. SMITH of New Jersey. I yield.

Mr. LANGER. How does the bill differ from the one introduced by the late Senator Taft, myself, and other sponsors?

Mr. SMITH of New Jersey. I cannot give the Senator the details on that point. I shall send him a copy of the bill, and we can then discuss it. I do not know all the details at this time. The bill includes plans for the issuance of bonds and also plans for grants. It differs somewhat in its approach, but covers many of the points raised in the past.

COMMUTATION OF TIME FOR GOOD CONDUCT

Mr. KILGORE. Mr. President, I introduce, for appropriate reference, a bill to amend section 4161 of title 18, United States Code, relating to commutation for good conduct, which has been recommended by the Director of the Bureau of Prisons, United States Department of Justice.

Mr. President, I ask that an attached memorandum in explanation of this proposal be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the memorandum will be printed in the RECORD.

The bill (S. 2907) to amend section 4161 of title 18, United States Code, relating to commutation for good conduct, introduced by Mr. KILGORE, was received, read twice by its title, and referred to the Committee on the Judiciary.

The memorandum presented by Mr. KILGORE is as follows:

MEMORANDUM TO ACCOMPANY BILL TO AMEND SECTION 4161 OF TITLE 18, UNITED STATES CODE, RELATING TO COMMUTATION FOR GOOD CONDUCT

The proposed amendment is to bring the section in line with the administrative construction of the statute since the revision effective September 1, 1948. Since that revision and until the decision in the case of *Hunter* v. *Facchine* (CA 10, 195 F. 2d, 1007),

the Bureau of Prisons had construed the revised version of the statute to authorize deducting the entire amount of good time possible for the prisoner to earn and prorating that deduction over the remainder of the sentence to be credited to the prisoner as earned. This was the policy which was urged upon the revisers and which they thought was accomplished by the change made in the old statute. In the Facchine case, however, the Court of Appeals disagreed with the construction with the result that prisoners would be required to serve a longer time than they did under the application of the statute before revision.

SEALS FOR BUREAUS AND OFFICES IN DEPARTMENT OF COMMERCE

Mr. MAGNUSON. Mr. President, by request of the Secretary of Commerce, I introduce, for appropriate reference, a bill to authorize the Secretary of Commerce to prescribe seals for bureaus and offices for the Department of Commerce, and for other purposes. I ask unanimous consent that there be printed in the RECORD at this point a statement of purpose and need for the proposed legislation, prepared by the Department of Commerce.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 2909) to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes, introduced by Mr. MAGNUSON (by request), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

THE SECRETARY OF COMMERCE,
Washington, October 27, 1955.

HON. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

DEAR MR. PRESIDENT: There are attached 4 copies of a proposed bill to authorize the Secretary of Commerce to prescribe seals for bureaus and offices of the Department of Commerce, and for other purposes.

There is also attached a statement of purpose and need for the proposed legislation.

We are advised by the Bureau of the Budget that it would interpose no objection to the submission of this proposed legislation.

Sincerely yours,

SINCLAIR WEEKS,
Secretary of Commerce.

STATEMENT OF PURPOSE AND NEED

The Department of Commerce, in performance of its diverse and widespread activities, functions through 11 primary organization units, each responsible to the Secretary for a defined area of department jurisdiction.

In the normal conduct of operations the bureaus and offices of the department are regularly called upon or required to certify certain documents for use as evidence in court proceedings or as official documents for purposes of recordation. Except in the case of the Patent Office and the Bureau of the Census, which have seals authorized by the Congress (66 Stat. 792 and 68 Stat. 1012, respectively), such papers are required to bear the seal of the Department of Commerce, which is in the custody of the Office of the Secretary in Washington, D. C.

Since many of these documents are located at installations of the primary organization units outside the District of Columbia, there is a constant exchange of documents between offices in the field and the office of the Secretary for the purpose of affixation of the department seal. The alternative is the use of original bureau documents for court use or official filing, which obviously precludes their availability to the bureaus and the public generally.

While many courts and States accept certification by the bureaus and offices without questioning the legal authority therefor, the question is raised for purely legalistic reasons or as delaying tactics in court proceedings in a sufficient number of instances to warrant enactment of legislation providing for seals of the individual units and judicial notice thereof.

The proposed legislation will not only result in considerable savings of time and money in the processing of certified papers and documents, but will also lend the proper dignity to documents of departmental bureaus such as the Weather Bureau and the Coast and Geodetic Survey, which operate more or less autonomously in substantive program areas.

PUNISHMENT FOR ACTS OF SABOTAGE ON AIRCRAFT AND MOTOR VEHICLES

Mr. JENNER. Mr. President, I introduce, for appropriate reference, a bill to provide penalties under Federal law for acts of sabotage on aircraft and motor vehicles in interstate commerce. Similar penalties are already provided for the sabotaging of trains in interstate commerce.

Our Nation has become increasingly a people in movement. Our commerce and our national defense both depend on the ability of goods and personnel to move from State to State. No nation has an interstate-transportation system nearly as well developed as ours. Our vast area, the distribution of our national resources make it essential that the acts of violence resulting in damage to aircraft and motor carriers in commerce should be swiftly punished.

Although I am a great believer in the power of the Federal Government and in maintaining State authority, I believe that this is properly a Federal problem, because of modern developments in transportation. For this reason, I believe that Federal authority must be exercised.

We all remember the recent incident in which an irresponsible youth brought about the death of an entire planeload of passengers in his desire to murder his own mother. I can see no more proper means of bringing such people to justice than through Federal legislation along the lines of the bill I have introduced.

The bill would provide a penalty of up to $10,000 fine and up to 20 years in prison.

If such acts result in the death of any person, the penalty is life imprisonment or, in the discretion of the court, death.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2911) to amend title 18 of the United States Code in order to provide that certain acts of violence committed on certain aircraft and motor vehicles shall be a criminal offense, introduced by Mr. JENNER, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That chapter 97 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"§ 1993. Aircraft and motor vehicles

"Whoever sets fire to any aircraft or motor vehicle used, operated, or employed in interstate or foreign commerce, or to the cargo of any such aircraft or motor vehicle, or tampers with any such aircraft or motor vehicle or any part thereof, or places any explosive in or upon such aircraft or motor vehicle, or wrecks, disables, or does any other act to or within such aircraft or motor vehicle while within the jurisdiction of the United States, with intent to injure or endanger the safety of the aircraft or motor vehicle, or of its cargo, or of any person on board, whether the injury or danger is so intended to take place within the jurisdiction of the United States or after the aircraft or motor vehicle has departed therefrom; or

"Whoever willfully attempts to do any of the aforesaid acts or things—

"Shall be fined not more than $10,000 or imprisoned not more than 20 years, or both.

"Whoever is convicted of any such crime, which has resulted in the death of any person, shall be subject also to the death penalty or to imprisonment for life, if the jury shall in its discretion so direct, or, in the case of a plea of guilty, if the court in its discretion shall so order.

"For the purpose of this section the terms 'aircraft' and 'motor vehicle' shall have the same meaning as in section 2311 of this title except that the term 'motor vehicle' shall include any trailer."

SEC. 2. (a) The caption of chapter 97 of title 18 of the United States Code is amended to read as follows:

"CHAPTER 97—RAILROADS, AIRCRAFT, AND MOTOR VEHICLES."

(b) The analysis of chapter 97 of title 18 of the United States Code immediately preceding section 1991 of such title is amended by adding at the end thereof "1993. Aircraft and Motor Vehicles."

(c) The analysis of part I of title 18 of the United States Code, immediately preceding chapter 1 of such title, is amended by striking out "97. Railroads" and inserting in lieu thereof "97. Railroads, Aircraft, and Motor Vehicles."

EXTENSION OF ADVISORY COMMITTEE ON WEATHER CONTROL

Mr. CASE of South Dakota. Mr. President, on behalf of myself, the Senator from New Mexico [Mr. ANDERSON], the Senator from North Dakota [Mr. YOUNG], the senior Senator from Wyoming [Mr. BARRETT], the Senator from Washington [Mr. MAGNUSON], the Senator from Rhode Island [Mr. PASTORE], my colleague, the senior Senator from South Dakota [Mr. MUNDT], the Senator from Ohio [Mr. BRICKER], the junior Senator from Wyoming [Mr. O'MAHONEY], the Senator from California [Mr. KUCHEL], the Senator from Utah [Mr. WATKINS], and the Senator from Nebraska [Mr. HRUSKA], I introduce, for appropriate reference, a bill to extend for 2 years the Advisory Committee on Weather Control. I ask unanimous consent that other Senators who

wish to, may add their names as cosponsors of the bill.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CASE of South Dakota. I ask unanimous consent that an explanation of the bill, prepared by me, be printed in the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 2913) to extend for 2 years the Advisory Committee on Weather Control, introduced by Mr. CASE of South Dakota (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The statement presented by Mr. CASE of South Dakota is as follows:

STATEMENT BY SENATOR CASE OF SOUTH DAKOTA

Today I am introducing a bill which would extend the life of the Advisory Committee on Weather Control 2 years.

The Advisory Committee on Weather Control is a small and temporary but, in my opinion, important Federal agency created by legislation sponsored by myself and a number of other interested Members of the Congress.

The legislation specified that this committee study and evaluate public and private experiments in weather control with the view of recommending to the Congress the extent to which the Federal Government should experiment with, engage in, or regulate activities designed to modify the weather. The law asked for a report no later than June 30, 1956, whereupon the committee would go out of existence.

I now propose that the life of the Advisory Committee be extended 2 years, not because the committee has failed to get the job done in the time provided, but because it has succeeded in establishing some positive and important results which justify the Federal Government continuing its interest in the field.

When the Congress first considered making appropriations to get this work under way, I told one of the committees of the Senate that:

"If the Advisory Committee finds that weather modification experiments cannot produce important results, it will so report and thus deter farmers and ranchers from spending their money unwisely. This will, if such a report has to be made, save the public millions of dollars.

"If the Advisory Committee finds that weather modification activities work only in certain circumstances, it will find out what those circumstances are and thus encourage feasible projects and discourage those which are not feasible.

"If the advisory committee finds out it can confirm the results claimed by the reports it has so far received from reputable and scientifically competent operators—increases of from 7 to 50 percent and more—than the dollar benefits to agriculture, industry, and Government will be so great as to be incalculable."

In other words, I said at that time, whatever the committee reported, this would produce tangible and real economic benefits to the water users of this Nation.

Since the committee received its first appropriation on July 1, 1954, and began its evaluation work, I have followed its activities quite closely. The committee, appointed by President Eisenhower, has been composed of a group of unusually competent and able citizens with Capt. Howard T. Orville, United States Navy, retired, now associated with the Bendix Aviation Corp., as its chairman. My interest in the accomplishments of the committee have been furthered by the fact that its vice chairman is A. M. Eberle, dean of agriculture at South Dakota State College, and its executive secretary is Chas. Gardner, Jr., also of South Dakota.

I can now authoritatively state that of the three possibilities I outlined, when the Senate originally considered appropriating money for this activity, the second is the most nearly correct: "that weather modification activities work only in certain circumstances * * *."

I must, however, qualify that somewhat. The committee has produced a series of statistical evaluations showing that cloud seeding does produce ascertainable and economically important results in certain circumstances, but this does not at all mean that cloud seeding will not produce important results in other circumstances. What the committee has established so far provides the reason for requesting that its work be extended over another 2-year period.

Considering the obstacles faced by cloud seeders in attempting to produce results at a time when they have only begun to develop their techniques, and considering the great difficulty in establishing these effects statistically mainly because of the natural variability of weather, these results are quite important historically. They mean that the Nation has crossed an important ridge and now must consider the entire subject in a new light provided by this positive information.

The committee's results show that, in one area of the Nation, cloud seeding can produce precipitation increases running from 10 percent to 15 percent. Increases of this magnitude may not seem spectacular but the important thing is that now they have a reality never before established. Economic studies indicate that such increases are economically important and will create benefit-cost ratios ranging from 4 to 1 to 20 to 1, greatly in excess of those which we expect from ordinary water resources development and conservation projects.

These 10 to 15 percent increases should not be considered as a maximum. Further and less conservative evaluation might show larger results. In addition, we can reasonably expect that the cloud seeders will develop improved techniques. For one thing, they have begun to use radar as an instrument in their operations, equipment which enables them to find out when seedable storm situations approach and ascertain the effects of seeding at different times and in different situations. They are also developing a closer-in technique and are on the verge of developing new generators, including those remotely controlled by radio or telephone.

Now, an important aspect of the committee's results so far is that they apply to only one area of the country, in fact only to three States. This has come about for the very practical reason that the committee was under pressure to get some evaluations completed in a short time and on sound scientific grounds felt it should concentrate attention on an area where it felt it could most reasonably expect to detect important consequences.

I can reasonably and conservatively estimate that precipitation increases of the magnitude indicated could produce average annual benefits of $20 million and quite possibly up to $50 million in these States.

But it is also very important to see if these benefits can be extended to other States as well. Further statistical evaluation and physical evaluation as performed by the committee to date can help find out if present cloud-seeding techniques have worked in these other States or can be improved to produce economically important results. The committee has worked out an improved methodology for statistical evaluation and a program for expanded physical evaluation which it can get started without delay in its effort to broaden its answers.

I hope that farmers, ranchers, and other water users will continue to sponsor cloud-seeding projects, keeping in mind the uncertainty of results in some areas but also the importance of the benefits compared to the relatively small cost if the seeding succeeds. They should probably insist on more careful scientific design of these projects and should probably introduce greater permanency in the projects so as to make evaluation feasible.

The natural variability of weather is so great that a good or a bad precipitation year may simply be a natural consequence. In a good year the cloud seeder may not have created the apparent beneficial effects or in a bad year the cloud seeder may have still increased precipitation over what would have fallen naturally. In each case, however, those who hired the services of a cloud seeder might come to the wrong conclusion.

The only answer to this is to continue projects over a period of several years.

If farmers and ranchers will recognize this problem and contract for cloud seeding, not for what it will produce in any given storm or in any given season, but over the long run, then they stand a better chance of getting satisfactory results and will also assist the Government in its effort to establish more carefully and precisely the extent of those results.

I must mention another apparent result from the committee's investigation. In several areas of this country and in other countries cloud seeders have attempted to suppress hail. Unfortunately, most of these projects cannot be evaluated statistically because of a lack of data. However, the data in one very important case show a drastic reduction, and experience in at least one other area in this country shows a similar result. It is incumbent on us to encourage further research in this field and encourage further evaluation of those projects which private groups are willing to sponsor.

Such results hint at the possibility that with closed seeding techniques man might mitigate the effect of tornadoes and other severe storms. We should not now allow ourselves an extravagent view of the prospects but we should certainly continue our interest in uncovering the possibilities.

At a time when large areas of the country have been distressed by storms of great violence, we should, it seems to me, act promptly to extend the studies of the advisory committee on weather control for another 2 years.

DESIGNATION OF FEBRUARY EACH YEAR AS AMERICAN HEART MONTH

Mr. BARKLEY. Mr. President, all of us are tragically aware of the ravages of diseases of the heart. More than 10 million Americans are affected in some way by one form or another of heart disease. Heart disease is responsible for the death of more persons than tuberculosis, cancer, polio, pneumonia, typhoid fever, highway deaths, and many other categories.

In order that the attention of the American people may be drawn more definitely to this tragic situation, I introduce a joint resolution authorizing and requesting the President of the United States to designate the month of February of each year as a month devoted to the effort to secure funds, not from Congress or the Government, but

from the public, to continue the drive against heart disease.

Under the rule, the resolution will be referred to the Committee on the Judiciary. I hope there may be forthwith a favorable report on the joint resolution, because it designates the month of February; and if that month is to be designated this year, it is necessary to secure prompt action from the Congress.

If there is no objection, Mr. President, I should like to have the joint resolution read at this time, for the information of the Senate. This measure is not very long.

The PRESIDENT pro tempore. The joint resolution will be read for the information of the Senate.

The Chief Clerk read as follows:

Whereas diseases of the heart and circulation constitute our Nation's foremost health problem in that they affect more than 10 million persons at all ages, are responsible for more deaths than all other causes combined, result in the loss to our economy of 1¼ billion man-hours annually, and are a major cause of rejections from military service; and

Whereas recent progress in treatment and prevention gives hope and assurance that the control of heart disease can be achieved through the expansion of heart research, education, and community programs now being carried forward through voluntary public support of the American Heart Association, and through the Government by the National Heart Institute of the Institutes of Health of the Public Health Service; and

Whereas February is by custom the month of each year during which public attention is focused on the medical, social, and economic aspects of this primary health problem: Therefore be it

Resolved, etc., That the President of the United States is authorized and requested to issue annually a proclamation designating February as American Heart Month, and to invite governors of the States and Territories of the United States to issue proclamations for like purposes; and that the President's proclamations urge the people of the United States to give heed to the nationwide problem of heart and circulatory diseases, and to support all essential programs required to bring about the solution.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred.

The joint resolution (S. J. Res. 115) designating the month of February in each year as American Heart Month, introduced by Mr. BARKLEY, was received, read twice by its title, and referred to the Committee on the Judiciary.

THE PROPOSED CONSTITUTIONAL AMENDMENT RELATING TO ELECTION OF PRESIDENT AND VICE PRESIDENT

Mr. THURMOND. Mr. President, I introduce, for appropriate reference, a joint resolution proposing an amendment to the Constitution of the United States to provide that the electoral votes of each State for President and for Vice President shall be cast in proportion to the popular vote cast in such State. This plan would—

First. Give electoral votes to candidates for elector for President and Vice President in proportion to the total number of votes cast by the people for each successful candidate for elector. Under the system followed by the political parties in placing slates of candidates for elector on the ticket, this would mean, generally, that electoral votes would be limited to the top three slates.

Technically, this would mean a division of the total electoral vote of each State so as to provide that any candidate for elector receiving a sufficient number of votes to rank him among a total number of candidates not exceeding three times the total number of electoral votes to which his State is entitled, would be entitled to an electoral vote equivalent to his ratio of the total number of votes cast for all successful candidates.

Example: New York has 45 electoral votes. Under this plan it would be possible for 135 candidates for elector to receive fractional electoral votes to cast for a candidate for President and Vice President. In South Carolina, which has 8 electoral votes, it would be possible for 24 electors to cast fractional votes.

Second. More accurately reflect in the national total of 531 electoral votes for President and Vice President the proportion of the popular vote cast for each candidate.

Third. Select electors in direct proportion to the will of the people.

Fourth. Preserve the independence of the individual elector.

Fifth. Retain the present electoral college without any change in the mechanics of the system.

Sixth. Protect the rights of the States—as the Constitution now does—for political parties to select their slates of electors by whatever method they desire.

Seventh. Eliminate splinter parties.

Mr. President, I ask unanimous consent that the full text of the joint resolution be printed in the RECORD.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S. J. Res. 116) proposing an amendment to the Constitution of the United States to provide that the electoral votes of each State for President and Vice President shall be cast in proportion to the popular votes cast in such State, introduced by Mr. THURMOND, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as part of the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE —

"SECTION 1. Notwithstanding the provisions of the second paragraph of section 1 of Article II of this Constitution and of the 12th article of amendment thereto, each State shall provide for the voting of its people for electors who shall cast their votes for President and Vice President. The people voting for electors in each State shall have the qualifications requisite for the electors of the most numerous branch of the State legislature. By such election, there shall be selected in each State from the candidates receiving the largest numbers of votes a number of electors equal to three times the number of electoral votes to which such State is entitled. Each elector so selected shall cast a whole or fractional, or a whole and fractional, number of electoral votes which shall bear the same ratio to the whole number of electoral votes to which his State is entitled as the number of votes received by such elector bears to the total number of votes received by all electors selected by such election. When the ballots cast by electors of all States are counted, the person having the greatest number of electoral votes for President shall be the President, if such number be a majority of the electoral votes so cast and the person having the greatest number of electoral votes for Vice President shall be the Vice President, if such number be a majority of the electoral votes so cast. If no person shall receive a majority of the electoral votes cast for President or Vice President, such officers shall be chosen in the manner prescribed by the 12th article of amendment to this Constitution.

"SEC. 2. This article shall take effect on the first day of March following its ratification, but shall not be so construed as to affect the election or term of any President or Vice President chosen before it becomes valid as a part of the Constitution.

"SEC. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the States within 7 years from the date of its submission to the States by the Congress."

THE ADMINISTRATION'S AREA DEVELOPMENT PROGRAM—ADDITIONAL COSPONSORS OF BILL

Pursuant to the order of the Senate of January 12, 1956, the names of the following Senators were added as additional cosponsors to the bill (S. 2892) to assist areas to develop and maintain stable and diversified economies by a program of financial and technical assistance and otherwise, and for other purposes, introduced by Mr. SMITH of New Jersey (for himself and other Senators):

The Senators from Utah [Mr. WATKINS and Mr. BENNETT, and the Senator from California [Mr. KUCHEL].

ABOLITION OF FORCED LABOR

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, a joint resolution which provides for United States cooperation with other nations through the International Labor Organization in abolishing forced labor.

I ask unanimous consent that the text of the joint resolution be printed at this point in my remarks.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S. J. Res. 117) to provide for United States cooperation with other nations through the International Labor Organization To Abolish Forced Labor, introduced by Hr. HUMPHREY, was received, read twice by its title, referred to the Committee on Labor

and Public Welfare, and ordered to be printed in the RECORD, as follows:

Whereas forced labor for political or economic purposes is abhorrent to all civilized nations and is repugnant to the constitutional and statutory concepts of the republican form of Government on which life in the United States is based; and

Whereas the people of some nations are subjected to forced labor for political or economic purposes; and

Whereas the existence of forced labor in any nation is inimical to the interests of the United States and other free nations morally, politically and economically and constitutes a threat to the security, well-being and even the existence of democratic institutions and free economic systems; and

Whereas to meet this threat and to promote the welfare and dignity of human beings throughout the world, the United Nations and the International Labor Organization, at the initiative of the American Federation of Labor, appointed an Ad Hoc Committee to study the nature and extent of forced labor for political or economic purposes throughout the world; and

Whereas the Ad Hoc Committee on forced labor issued a carefully considered and well documented report detailing the existence of forced labor for these purposes in a number of nations of the world; and

Whereas the International Labor Organization is now considering the adoption of an international instrument designed to abolish forced labor for political or economic purposes wherever it may exist; and

Whereas the United States Government has exercised leadership in the United Nations to mobilize world opinion for the abolition of forced labor for political and economic purposes: Now, therefore, be it

Resolved, etc., That the Government of the United States exercise leadership in the International Labor Organization to develop and adopt an international convention which will effectively outlaw forced labor for political and economic purposes.

Mr. HUMPHREY. Mr. President, I wish to make only a brief comment on the reason for my submitting the resolution. The International Labor Organization has made a study of the subject of forced labor and slave labor. The ILO sent out a questionnaire to every government, calling for observation and for comments, which any government may wish to make pertaining to the special study made by the ILO.

The questionnaire asks what the governments are willing to do to implement the recommendations of the study. Only one government has not responded, and that is the Government of the United States of America. Apparently we are too busy writing articles for Life magazine.

I suggest that our Government take the leadership, and respond to the questionnaire, and that it become a champion against forced and slave labor in any form.

TEMPORARY ADDITIONAL CLERICAL ASSISTANTS FOR COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. JOHNSTON of South Carolina submitted the following resolution (S. Res. 164), which was referred to the Committee on Post Office and Civil Service:

Resolved, That the Committee on Post Office and Civil Service is authorized, from February 1, 1956, through January 31, 1957, to employ one additional clerical assistant to be paid from the contingent fund of the Senate at rates of compensation to be fixed by the chairman in accordance with the provisions of Public Law 4, Eightieth Congress, approved February 19, 1947, as amended.

ADDITIONAL EXPENDITURES BY SELECT COMMITTEE ON SMALL BUSINESS

Mr. SPARKMAN submitted the following resolution (S. Res. 175), which was referred to the Committee on Rules and Administration:

Resolved, That the Select Committee on Small Business is authorized to expend from the contingent fund of the Senate the sum of $100,000 for the purpose of discharging obligations incurred by it from February 1, 1956, through January 31, 1957, in carrying out the duties imposed upon it by S. Res. 58, Eighty-first Congress. Such sum shall be in addition to any other moneys available to the committee for such purpose, and shall be disbursed upon vouchers approved by the chairman.

INVESTIGATION OF PRICES OF SHEEP, BEEF CATTLE, HOGS, AND PRODUCTS THEREOF

Mr. BARRETT (for himself, Mr. CASE of South Dakota, Mr. ALLOTT, Mr. YOUNG, Mr. WELKER, Mr. DWORSHAK, Mr. MANSFIELD, Mr. MURRAY, Mr. POTTER, Mr. O'MAHONEY, Mr. CURTIS, Mr. KUCHEL, Mr. HRUSKA, and Mr. GOLDWATER) submitted the following resolution (S. Res. 179), which was referred to the Committee on Agriculture and Forestry:

Resolved, That the Senate Committee on Agriculture and Forestry, or any duly authorized subcommittee thereof, is authorized and directed to make a full and complete study and investigation of (a) the difference between (1) the prevailing market price of sheep, beef cattle, and hogs on the hoof and (2) the prevailing retail market price of lamb, mutton, beef, and pork, and (b) whether such difference in price is greater than that obtaining in previous year, and if so, the reasons therefor.

SEC. 2. For the purposes of this resolution the committee, from the date of the adoption of this resolution until January 31, 1957, inclusive, is authorized to (a) make such expenditures as it deems advisable, (b) employ upon a temporary basis technical, clerical, and other assistants and consultants, and (c) with the consent of the heads of the departments and agencies concerned and the Committee on Rules and Administration, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 31, 1957.

SEC. 4. The expenses of the committee under this resolution, which shall not exceed $, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

ADDITIONAL FUNDS FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. MAGNUSON submitted the following resolution (S. Res. 180), which was referred to the Committee on Interstate and Foreign Commerce:

Resolved, That the Committee on Interstate and Foreign Commerce is authorized to expend from the contingent fund of the Senate, during the 84th Congress, for the purposes specified in section 134 (a) of the Legislative Reorganization Act of 1946, $10,000 in addition to the amount authorized in such section.

PARTICIPATION BY THE UNITED STATES IN THE FOOD AND AGRICULTURE ORGANIZATION AND INTERNATIONAL LABOR ORGANIZATION—AMENDMENT

Mr. BRICKER submitted an amendment, intended to be proposed by him to the joint resolution (S. J. Res. 97) to amend certain laws providing for membership and participation by the United States in the Food and Agriculture Organization and the International Labor Organization and authorizing appropriations therefor, which was ordered to lie on the table and to be printed.

APPOINTMENT OF ADDITIONAL CIRCUIT AND DISTRICT JUDGES—AMENDMENT

Mr. KILGORE. Mr. President, on March 2, 1955, I introduced the bill, S. 1256, which was recommended by the Judicial Conference of the United States, providing for the appointment of additional circuit and district judges and for other purposes. That bill and similar bills have been the subject of hearings before the Committee on the Judiciary during the past session of Congress.

Since that time the Judicial Conference of the United States has held two sessions for the consideration of the subject of additional circuit and district judges. As the result thereof the Conference has recommended certain deletions and additions to S. 1256. I therefore submit, for appropriate reference, an amendment in the nature of a substitute to S. 1256 setting forth the recommendations of the Judicial Conference of the United States as they exist at the present time. I ask unanimous consent to have printed in the RECORD at this point a letter from the Administrative Office of the United States Courts, dated January 5, 1956, outlining the action of the Judicial Conference of the United States.

The PRESIDENT pro tempore. The amendment will be received, appropriately referred, and printed; and, without objection, the letter will be printed in the RECORD.

The amendment was referred to the Committee on the Judiciary and ordered to be printed.

The letter presented by Mr. KILGORE is as follows:

ADMINISTRATIVE OFFICE OF
THE UNITED STATES COURTS,
Washington, D. C., January 5, 1956.

Hon. HARLEY M. KILGORE,
Chairman, Senate Judiciary Committee,
United States Senate,
Washington, D. C.

DEAR MR. CHAIRMAN: On March 2, 1955, you introduced in the Senate, S. 1256, entitled "A bill to provide for the appointment of additional circuit and district judges" to

carry out recommendations of the Judicial Conference of the United States. Since that date two meetings of the Judicial Conference have been held at which further consideration was given to the state of the business of the courts of appeals and district courts and their needs for additional judges. The first of these meetings was a special session held March 24 and 25, 1955, and the second was the regular annual session held September 19 and 20, 1955. As a result of the consideration given at these meetings some of the recommendations for additional judges have been modified or withdrawn by the Conference and additional recommendations made. These changes are, of course, not reflected in S. 1256.

At its March session the Conference was informed that the judicial council of the ninth circuit was then of the opinion that the business of the Court of Appeals for the Ninth Circuit could be handled without the appointment of additional circuit judges. Consequently the Conference withdrew its previous recommendation for the creation of two additional permanent judgeships and one temporary judgeship for that circuit. The Conference recommended the creation of the following additional judgeships not theretofore proposed and these recommendations were reaffirmed at the September session:

One additional circuit judgeship for the Second Circuit.

One additional district judgeship for the district of Connecticut.

One additional district judgeship for the northern district of Texas.

One additional district judgeship for the eastern district of Michigan.

One additional district judgeship for the district of Colorado.

One additional district judgeship for the eastern district of New York (confirmation of a mail vote taken earlier).

The Conference also at the March session recommended one additional district judgeship for the middle district of Pennsylvania on a temporary basis and one additional district judgeship for the district of Arizona, but these recommendations were withdrawn at the September session.

At the September session the Judicial Conference recommended the following additional judgeships not theretofore recommended:

One additional district judgeship for the eastern district of Pennsylvania (making a total of two additional district judgeships recommended for this district).

One additional district judgeship for the district of Maryland.

One additional district judgeship for the western district of Texas.

There is enclosed for the consideration of your committee a proposed amendment to S. 1256 which would strike out all after the enacting clause and insert in lieu thereof the present recommendations of the Judicial Conference for additional judges. I hope that the recommendations of the Conference as embraced in this amendment may have the early consideration of your committee. Representatives of the Conference and of this office will be happy upon request to furnish you any additional information you may desire with regard to the recommendations.

With kind regards, I am,

Sincerely yours,

HENRY P. CHANDLER.

EXTENSION OF SUGAR ACT OF 1948—AMENDMENTS

Mr. MAGNUSON submitted amendments, intended to be proposed by him, to the bill (H. R. 7030) to amend and extend the Sugar Act of 1948, as amended, and for other purposes, which were referred to the Committee on Finance, and ordered to be printed.

RESOLUTIONS TAKEN FROM CALENDAR AND REFERRED

On motion of Mr. JOHNSON of Texas, and by unanimous consent, the following resolutions were taken from the calendar and referred to the Committee on Rules and Administration:

S. Res. 155. Authorizing the Committee on Banking and Currency to investigate certain matters and authorizing expenditures therefor; and

S. Res. 160. Authorizing further expenditures and temporary employment of additional assistants by the Committee on Banking and Currency to study public and private housing.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. LEHMAN:

Address delivered by him at the civil-rights rally at the Manhattan Center, in New York City, on December 15, 1955.

By Mr. BUTLER:

Address delivered by him before Executives' Industrial Relations Conference at Valley Forge Military Academy, Wayne, Pa., on September 24, 1955.

By Mr. GOLDWATER:

Address delivered by him before the American Mining Congress Convention, at Las Vegas, Nev., on October 10, 1955.

Address delivered by him before the National Association for the Advancement of Colored People, at Tucson, Ariz., on October 12, 1955.

By Mr. SCOTT:

Address on postal policy, delivered by Senator JOHNSTON of South Carolina at the annual meeting of the Associated Third-Class Mail Users, at Chicago, Ill., on September 13, 1955; and editorial entitled "Post Office Department: Service or Business?" published in the Progressive Farmer for January 1956.

By Mr. McCARTHY:

Four addresses delivered by him, and several letters and releases, all relating to the Communist conspiracy.

By Mr. DOUGLAS:

Article entitled "Federal Regulation of Independent Natural Gas Producers Is Essential," written by Senator DOUGLAS, and published in the October issue of the Public Utilities Fortnightly.

NOTICE OF HEARINGS ON CERTAIN NOMINATIONS BY COMMITTEE ON FOREIGN RELATIONS

The PRESIDENT pro tempore. As chairman of the Committee on Foreign Relations, the Chair desires to announce that the Senate received today the following nominations:

The following-named persons, who were appointed during the last recess of the Senate, to the offices indicated:

Herbert V. Prochnow, of Illinois, to be a Deputy Under Secretary of State.

Robert R. Bowie, of Maryland, to be an Assistant Secretary of State.

Isaac W. Carpenter, Jr., of Nebraska, to be an Assistant Secretary of State.

Wiley T. Buchanan, Jr., of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Luxembourg.

John D. Hickerson, of Texas, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Finland.

Thomas C. Mann, of Texas, a Foreign Service officer of class 2, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to El Salvador.

Robert H. Thayer, of New York, to be Envoy Extraordinary and Minister Plenipotentiary of the United States of America to Rumania.

I give notice that these nominations will be considered by the Committee on Foreign Relations at the expiration of 6 days.

INCREASED ANNUITIES TO ANNUITANTS OF FOREIGN SERVICE

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1287) to make certain increases in the annuities of annuitants under the Foreign Service retirement and disability system, which was to strike out all after the enacting clause and insert:

That the annuity of an annuitant under the Foreign Service retirement and disability system pursuant to the Act of May 24, 1924 (43 Stat. 140), as amended, or the Foreign Service Act of 1946 (60 Stat. 999), as amended, shall be increased the first day of the second month following enactment of this act in accordance with the following rules:

If the annuitant was formerly a participant in the system, the annuity to which he is entitled shall be increased $324, provided he retired before July 1, 1949.

SEC. 2. In the case of an officer who elected a reduced annuity at time of retirement and who availed himself of the restoration clause in section 821 (b) of the Foreign Service Act of 1946, as amended, such officer shall be entitled to receive the increase provided by section 1 of this act.

SEC. 3. If the annuitant receives an annuity as the survivor of a former participant in the system, the annuity shall be increased in the amount of $324.

SEC. 4. If a wife of a Foreign Service officer who retired prior to July 1, 1949, becomes an annuitant subsequent to the effective date of this act, as a result of the election made by the officer at time of retirement, such widow shall be entitled to the same increase as though she was an annuitant on the effective date of this act.

SEC. 5. In any case where a widow survivor annuitant of a Foreign Service officer who retired before July 1, 1949, is receiving an annuity of less than $1,200, the Secretary of State is authorized and directed to make grants or loans to supplement such annuity by whatever sum is necessary to increase the annuity to a maximum of $1,200 for such period, and on such terms as he shall prescribe, out of such funds as may be appropriated for the purpose if he finds that such widow (whether remarried or not) is in actual need and without other adequate means of support.

SEC. 6. In any case where a participant under the Foreign Service retirement disability system died before August 29, 1954, leaving a widow who is not entitled to receive an annuity under the system, the Secretary of State is authorized and directed to make grants or loans not exceeding $100 per month to such widow, for such period and on such terms as he shall prescribe, out of such funds as may be appropriated for the purpose, if he finds that such widow (whether remarried or not) is in actual need and without other adequate means of support.

SEC. 7. In no case shall an annuity increased under this act exceed the maximum annuity payable under section 821 (a) or (b) of the Foreign Service Act of 1946, as amended.

SEC. 8. No annuity currently payable to any annuitant under the Foreign Service retirement and disability system shall be reduced as a result of the provisions of this act.

Mr. SPARKMAN. I move that the Senate disagree to the amendment of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. SPARKMAN, Mr. MANSFIELD, and Mr. KNOWLAND conferees on the part of the Senate.

ADDRESSES AT THE CHRISTMAS PAGEANT OF PEACE

Mr. SMITH of New Jersey. Mr. President, last Monday, the distinguished Senator from Montana [Mr. MANSFIELD] called attention to the celebration at the Christmas Pageant of Peace here in Washington. It was my privilege to be associated in this endeavor, but unfortunately because of a bad cold I was unable to be present. The Senator from Montana outlined the spirit and general vision of the program, and he inserted in the RECORD, at pages 233 to 237 the remarks of the distinguished Senator from Rhode Island [Mr. GREEN], who presided on Saturday, December 31, and the remarks of the distinguished Ambassadors present on that day.

My distinguished colleague, the Senator from Utah [Mr. WATKINS], presided on Sunday, January 1, and presented an additional group of Ambassadors, who made further statements of peace and good will to the people of our country and the world.

Following the insertion by the Senator from Montana in the RECORD of the remarks of the Ambassadors who spoke on Saturday, under the chairmanship of the Senator from Rhode Island, I ask unanimous consent to have inserted in the body of the RECORD the remarks of the Senator from Utah [Mr. WATKINS], who presided on Sunday, January 1, 1956, and the messages of the various Ambassadors who so kindly participated with us in this important celebration on that day.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

REMARKS OF ARTHUR V. WATKINS, SENIOR SENATOR, UTAH, ON THE ELLIPSE STAGE OF THE WASHINGTON PAGEANT OF PEACE, SUNDAY, JANUARY 1, 1956

I am pleased to join in this beautiful New Year's Day gathering. It is a tribute to Mr. Carr, president of the Pageant of Peace, and his committee, that distinguished representatives of nations from all parts of the world are gathered here today, each with a vitally important message for the American people and for the world at large.

May I express the regrets of my colleague, H. ALEXANDER SMITH, of New Jersey, for his inability to be here today. He has been indisposed by a cold and is quite unable to attend these beautiful ceremonies on the Ellipse stage. Many of the speakers here today are his warm personal friends and he has asked that I convey his regrets to this distinguished assemblage. We all wish him a speedy recovery.

The program today seems to dramatize the fact that international relations and diplomatic relations are in the last analysis, human relations.

It seems to go a step beyond that idea to an underlying spiritual theme—a theme that we must recognize our human limitations and in a spirit of humility and faith seek divine guidance and the divine inspiration that will lead us to the ideal of peace on earth, good will toward men.

This is a lofty goal. It is a goal that can be attained, and with God's help, will be attained on this earth.

To Mr. Carr and the officials of the Pageant of Peace, to all the participants and the unselfish supporters who have made it possible, our heartfelt congratulations.

We commend you for your idealism and for your hardheaded practicality. You have kept your feet on the ground while your head has been in the clouds. We hope, Mr. Carr, that you will continue to give your inspiring leadership to this great effort and this most worthy cause.

And now we will hear from the distinguished guests on the Ellipse stage at the Christmas Pageant of Peace.

THE NEW YEAR'S MESSAGE OF HIS EXCELLENCY, SADAO IGUCHI, AMBASSADOR OF JAPAN, TO THE AMERICAN PEOPLE AT THE NEW YEAR'S INTERNATIONAL GREETING OF THE 1955 PAGEANT OF PEACE

On behalf of the people of Japan, I wish to express to the American people the most sincere best wishes for a happy and prosperous New Year.

In the United States, there is the time-honored tradition of exchanging Christmas gifts and cards as an expression of good will and friendship among relatives, neighbors, and friends. In Japan, a similar time-honored tradition occurs during the New Year's holidays. At this time, congratulatory cards are sent to friends and acquaintances, expressions of success and happiness are offered to family and relatives, and the pine and bamboo decorations, which, like the Christmas wreath in this country, are placed before the entrance of each home symbolize the prayers for a long and happy life.

Although the origins of these two national traditions stem from differing cultural bases, they carry a meaning understood by all people. These traditions give expression to the very fundamental human desire for peace and good will among men. Each year finds this exchange of the season's greetings reaching farther and farther beyond our national boundaries. Cards and gifts flow between our two peoples in ever increasing numbers as evidence of the individual's desire for international friendship.

In this expression of good will between our two peoples, indeed between all peoples, we find our hope for a peaceful future and for greater understanding among nations. The pageant of peace here in the Capital of the United States is a beautiful dramatization of this hope. And in this, the Japanese people join people everywhere.

As once again we enter a new year, may we face with renewed courage and faith the problems of our day. And may we all, in the year of 1956, strive to bring about a greater realization of man's desire for peace and good will among all peoples and all nations.

EL-SHERIF MOHAMMED SHARAF, COUNSELOR OF THE EMBASSY OF JORDAN

Ladies and gentlemen, as I send this greeting to my people I am happy to greet you here at the same time.

My countrymen, the Ambassador of the Hashimite Kingdom of Jordan has asked me to send you a greeting in his name as the representative of the Embassy. Before my address, I would like to thank all those who have participated with Mr. John O'Brien in arranging for this international program in which 54 Embassies and legations are taking part. The aim here today is the well-being of mankind and peace for the world.

I am standing now in Washington, D. C., in the land of freedom, to let my voice be heard by my Arab sisters and brothers. Speaking to you is the happiest opportunity that has befallen me during this past year. It is difficult for me to speak of peace when I know what is now going on in the Holy Land. It saddens me as a spokesman of Jordan, the home of Jesus Christ and the cradle of Christianity, that this holy ground is a victim of aggression. A new year is here, I can't forget past injustices, but I pray that the New Year will bring happiness and contentment to the Arab world and all nonaggressive nations.

The past year has welded the Arab people together. The new year, we face it alertly, decisively, and full of confidence in our ability to achieve our national rights and in bearing our responsibilities toward our dear fatherland. We have more confidence now than ever before.

My best wishes this New Year is for prosperity and victory for the Hashimite Kingdom of Jordan and the whole Arab World.

To His Majesty, King Al Hussein the First, I pledge, on this occasion, the loyalty and best wishes of His Majesty's Embassy and the Jordanian community. God save the King!

In conclusion, I express my best and most sincere wishes to President Eisenhower and the noble American Nation. I pray that when this same ceremony is held next year that the world will be free of war, and that all nations on the globe understand well the value of justice in bringing forth peace to the world. There can be no peace without justice. There can be no justice without conscience. There is no conscience without God.

Thank you.

AMBASSADOR OUROT R. SOUVANNAVONG, EMBASSY OF LAOS

Ladies and gentlemen, I wish to thank Mr. Carr and the members of the committee of the Pageant of Peace for having given me the opportunity to address you.

First of all, may I invite you to join me in elevating our thoughts to President and Mrs. Eisenhower and to their family. May we renew the expression of our admiration and respect for them as well as the fervent hopes of each one of us for their happiness and their good health.

Let us pray to God to grant a long life to the President, for his life is necessary to the happiness of many of us and to the peace of the world.

Dear American friends, I am happy to transmit to you, on this first day of the new year, the cordial best wishes and a fraternal salute from the Lao people.

I know of your interest in my country, and am therefore pleased to tell you that a new day is dawning for Laos. For last December Laos was admitted to the United Nations. We already owed you so much for your economic and financial aid. We owe you even more today since you supported our cause to the final triumph. For we are quite aware that it was your Government, your statesmen, your diplomats, who labored so that the door of the international forum was finally opened to us.

Another piece of good news which I am pleased to announce to you is the victory of the pro-Western parties in the legislative

elections which have just taken place in Laos.

Since we are embarking upon a new year, let us have the pleasure of formulating the wish that 1956 may find you even more prosperous and even more powerful. Our wishes are all the more fervent because we are so aware of your extreme generosity and your noble heart, always offering to aid those less fortunate than you, and to help the least-developed countries to an ever higher standard of living.

To you then, all our thanks, and our very great thanks.

LIBERIAN PARTICIPATION IN PAGEANT OF PEACE AT WASHINGTON

(This statement by Ambassador Simpson was recorded prior to his leaving for Liberia for Christmas and the presidential inauguration.)

On behalf of the President of Liberia and my countrymen across the wide Atlantic in distant Africa, I send a message of good tidings to Liberia's friends everywhere. Distant though some of us are from each other in geographic location, there is at this time of year a strong feeling of the general oneness of peoples all over the world.

I have brought with me to these African shores the spirit of the great Pageant of Peace which I was privileged to experience with you last year in Washington. Irrespective of religion or politics or race, we stand in the sign of good will among men. Here in my homeland, Christmas arives during the summer season with temperatures in the middle eighties. The houses in the cities are decorated and the streets are gay with holiday lights and figurines. On Christmas Day families sit down to a holiday dinner of chicken, rice, and gravy, greens, mincemeat pie and ice cream, and other good things to eat. Firecrackers and colorful displays of fireworks mark the festivities. Young boys wander through the streets in groups singing and following one or another dressed in the unusual, Liberian Santa Claus costume with a unique headdress. The elders toss coins to the passing youngsters. A Christmas tree in Liberia usually is a palm tree decorated with bells and stars of gaily colored paper. In the interior of the land, the exchanging of gifts is not so prevalent, but there, too, natives dress in their best robes and lappas, dance to the beat of the drums in long celebrations, singing and feasting.

Liberians are a happy and peace-loving people and religious faith plays an important part in our daily lives. Fullest religious freedom exists. Though we are principally a Christian nation, our Government assists in the dissemination of religious teachings to which the majority of the population of a specific region subscribe—be it the Old or the New Testament or the Koran.

Right now there are congregating in Monrovia, our capital city, representatives from many nations of the globe and people from all walks of life in Liberia to help mark the reinauguration of the man who was most instrumental in establishing these broad-minded and far-sighted policies and who guides them—our President, William V. S. Tubman.

We Liberians are most heartily in support of international understanding and coworking to better the lot of all. That is the reason why we participate so fully in the activities of the United Nations and its specialized agencies where people truly work together.

We preach what we practice at home as applicable to world affairs. It is our fervent hope that the fine spirit illustrated by the Pageant of Peace will prevail throughout the New Year and throughout the wide world and that this annual event will continue to grow in stature, gain additional strength, recognition, and support.

NEW YEAR'S GREETINGS TO THE AMERICAN PEOPLE ON BEHALF OF P. ZADEIKIS, MINISTER OF LITHUANIA, BY MR. J. KAJECKAS, COUNSELOR OF THE LEGATION

First of all, I wish to express my sincere gratitude for the wonderful opportunity accorded me by the Christmas Pageant of Peace to address the American people on behalf of the enslaved people of Lithuania. It is indeed an honor and a great privilege to speak to you from the foot of a monument dedicated to the Father of this great country. Nearby, there stands a monument dedicated to another great American who said that a nation guided by its trust in God would not perish from the earth.

More than 4,000 miles from this spot, there live the freedom-loving Lithuanian people. They lost their God-given rights and liberties temporarily as a result of an unscrupulous aggression. Many of Lithuania's unfortunate sons and daughters have found in this country a secure haven from this aggression. America has always supported the hopes and efforts of the Lithuanian people, has sympathized with their plight, and condemned aggression wherever it appeared.

On this New Year's Day the heartfelt thanks of the people of my enslaved land go out to America—to its leaders—its Senators and Congressmen, to its governors and mayors, but above all to the common man of America, who has always believed that the inalienable rights of life, liberty, and the pursuit of happiness belong to all men. Our earnest prayer is that God during the coming year may grant universal peace which the American people so greatly desire and for the attainment of which they spare no efforts. May a peaceful world based on freedom, decency and justice crown your efforts. May the day approach when my people shall be freed from bondage and all people can live together in peace under God.

NEW YEAR'S MESSAGE FROM MR. MOHAMMED ALI, AMBASSADOR OF PAKISTAN TO THE UNITED STATES

Ladies and gentlemen, just as the Holy Bible exhorts Christians to seek peace and to pursue it, so does the Holy Koran set forth for the followers of Islam a pattern for peace.

For the seeking of peace is the first law of any religious ideology. When this law is broken, only suffering and ugliness can follow.

No amount of policing by great international bodies nor endless round-table discussions by learned leaders can guarantee freedom from fear—for that, after all, is the true meaning of peace. It must come from the mind, the heart, and the faith of the individual.

And so, in the words of a poet whose name has been lost to time, I give this wish to each of you:

"I pray the prayer the Easterners do,
May the peace of Allah abide with you,
Wherever you stay, wherever you go,
May the beautiful palms of Allah grow;
Through days of labor and nights of rest,
The love of good Allah make you blest.
So I touch my heart as Easterners do—
May the peace of Allah abide with you.
Salaam Alaikum—Peace be with you."

HIS EXCELLENCY SENOR DR. DON JOAQUIN JOSE VALLARINO, AMBASSADOR OF PANAMA

In the first place, I wish to express my sincere congratulations to President Carr, Mr. O'Brien, and to the other members of the Committee of the Christmas Pageant of Peace, for the great effort and tremendous amount of work devoted by them in carrying out this Pageant of Peace so successfully.

Secondly, I wish to express also my gratitude to the Voice of America for permitting us to send to the people of our country, and of the whole world, our greetings on this momentous occasion.

On this holiday season, when the Christian world is inspired by the divine phrase "Glory be to God in the highest and peace on earth to the men of good will," it is my pleasure and my privilege to send a fraternal message to the peoples of the world, and in particular of the American Continent and my country, Panama, along with my warmest wishes that the Almighty may enlighten and guide us so that we may reach the peace which we so anxiously seek.

At this particular point I place emphasis in sending a message of cordial regards to the President of Panama, Ricardo M. Arias, and to the President of the United States, Dwight D. Eisenhower, and my best wishes for their health and happiness during the coming year and the years to follow.

Our countries have been blessed to have their destinies ruled by men of ability and understanding, who have devoted a great deal of their time to the well-being of our people. The President of the United States is today the most outstanding person in his efforts to bring peace and prosperity to the whole world. In that respect he is not only a citizen of the United States but is considered a citizen of the universe, and everyone looks up to him as the person who can accomplish these purposes.

Humanity is faced with what we might call a dilemma: Either man conquers his present problems or will be destroyed by them. Union means strength, and if we, particularly in this hemisphere, continue united in our efforts and our endeavors, our countries will live in peace and prosperity. A very good friend of mine recently told me a very interesting anecdote: A large rock was to be removed and there were 21 men present to do the task. Each one attempting to move the rock separately found his efforts futile, but when the 21 joined their efforts, the rock was easily removed. Let us, therefore, live and work together and settle our differences, whatever they may be, in a friendly manner so that we may have peace and prosperity for the rest of our lives.

Again my sincere and warmest wishes for the happiness of all the people of the world.

NEW YEAR'S MESSAGE BROADCAST BY DR. V. K. WELLINGTON KOO, CHINESE AMBASSADOR TO THE UNITED STATES

Today begins the New Year 1956 and we all rejoice in entering upon it. As we look forward to the next twelve months, scan the international horizon and evaluate the prospect of peace, we naturally form our hopes and wishes. However different the freedom-loving nations may be from one another in history, geography, race and culture, there can be no doubt that they all long for peace and desire to devote all their energies, talents and knowledge to their peaceful pursuits. But whether our hopes and wishes can be realized depends not upon them but upon the leaders of the Communist world.

Both Moscow and Peiping profess peace and advocate peaceful coexistence with what they call the capitalistic world. But their actions belie their words. In different parts of the world they say different things and act differently. In fact, they are double-faced. In the East their top-ranking comrades have toured several countries as envoys to entice and deceive with their smiling faces and sweet words the emotional and simple-minded people of Asia and to sow the seeds of distrust in them toward the Western democracies. In the West they have now launched a triple-barreled political, diplomatic and economic offensive. Today the so-called Geneva spirit has entirely evaporated, and once again we begin to hear the howlings and growlings from the Kremlin and its satellite countries. The cold war, in all its ugly aspects and with increased tempo, is in full force again.

The fact is that the Communist parties and Communist countries of the world constitute but one body bent upon world domination. Whatever methods and means they adopt at any given time, their basic aim remains fixed and unalterable. The peoples of the free world and their leaders whether in Asia, Africa, Europe, or America, must not be misled by their smiles and soft talk any more than by their vituperation and threats. These guiles do not mean anything more than shifting tactics deliberately adopted by the Communists to serve their sinister purpose.

The best way to preserve world peace, in my humble opinion, is for the nations of the free world to understand fully the great danger of Communist imperialism to the cause of freedom and to realize the utter unscrupulousness of the Communist leaders in choosing methods to pursue their objective. With that understanding it will not be difficult for the free nations to achieve a unity of purpose and with that unity to combine their efforts to be firm and strong in defending the common cause of freedom against Communist aggression.

In the last analysis, therefore, it is the knowledge and awareness of the Communist menace that is most important not only for the leaders of the free world but also for their peoples. With that knowledge and awareness prevailing in the free world, not only the task of building a strong and united front against Communist imperialism would come easier, but also the danger of complacency and preference for expediency over principle would become easier, and also the danger of complacency and preference for expediency over principle would disappear. Only then can the free world succeed in preserving its precious freedom and establishing an enduring peace.

This is the message which I wish to leave with you today, but I cannot conclude it without extending to you all the greetings and best wishes for a very happy New Year from the people and government of the Republic of China which I have the honor to represent.

NEW YEAR'S GREETINGS—DR. MARIO NÚÑEZ DE VILLAVICENCIO, FIRST SECRETARY, CUBAN EMBASSY

It is with much pleasure and joy that on behalf of His Excellency, Dr. Miguel Angel Campa, Ambassador of Cuba, I wish to extend the greetings and best wishes of the people of Cuba to the people of the United States and to all the nations of this world for the new year of 1956.

At the beginning of each year, nations and individuals prepare and make new resolutions which they plan to carry out during the year with the highest spiritual determination.

Sometimes those new resolution cannot become a true reality because of the persistent obstacles that remain present in the course of the new year, and nations and individuals must comply with the circumstances created by those obstacles, notwithstanding their best wishes for peace on earth and their anxiety for the progress and well-being of all humans.

What to do—and how to act so as to eliminate those impending barriers that keep peace loving nations and peoples from carrying out their New Year's resolutions inspired by the deepest and most sincere desires for progressive human relations, is something that man, strangely enough in this day and age of fantastic material advancement, has not been able to formulate, as he has otherwise done in the field of science.

Perhaps one of the resolutions that we could make for this new year could be to take a little rest in our constant material endeavors and transfer that interest to the betterment of human relations even if we have to use the disciplines of science to the utmost.

God has given us faith and many spiritual and material instruments, let us not be partial in their application. Let us hope that during this year of 1956 we will be able to attain, with His help a spiritual "know how" for a worldly understanding which will support the aspirations that we have so heartily enclosed in all of our New Year's resolutions. And in a less global manner, we Cubans not only hope, but firmly know that the brotherly relations that have always existed between the United States and our country will continue to flourish during this year in the same friendly and simpatico way. Again, and with our thanks and congratulations to the organizers of the Christmas Pageant of Peace, the Ambassador and the people of Cuba extend their greetings and best wishes to everyone during the year that begins today.

STATEMENT OF THE AMBASSADOR OF IRELAND, MR. JOHN JOSEPH HEARNE, DELIVERED BY MR. DENNIS B. O'SULLIVAN

I am honored to have this opportunity on the occasion of the Christmas Pageant of Peace to send a New Year's greeting to my countrymen and to friends of Ireland everywhere.

May God's blessings descend on them and on all people of goodwill throughout the coming year, and may the gift of peace find welcome in all lands. Ireland, which it is my privilege to represent here today, will for her part strive earnestly, as a new member of the United Nations Organization, for the preservation of the spirit of peace and understanding, so well exemplified by the many countries and faiths participating in this Pageant of Peace.

THE SPIRIT OF BETHLEHEM

(By Gen. Carlos P. Romulo, delivered by Mr. Mauro Calingo, Minister Counselor)

This time of the year, as in all years since the Christian era began, the bells of Christendom will peal out the happy tiding of the advent of the Prince of Peace. There can be no more doubt left in man's mind that the Christmas we celebrate with undiminished luster through the centuries is an event truly God-given and not the mere invention of human fancy. The fervor of the first adoration before the manger has remained pure and unsullied in our Christian hearts. Through the long years each of us has stood in love and wonderment before the Christ Child just as the shepherd did under the Star of Bethlehem nearly 20 centuries ago.

We rededicate ourselves to that original act of faith. Symbolically, the Star of Bethlehem is before us again, and once more we kneel in reverent affection under its ineffable glory. There is no act as tender and sweet as this act of adoration in the collective spiritual life of all Christian peoples, and I can say that no event in our religious life can excell it in its power of inculcating good will in the minds of men.

The Holy Child was born into this world to establish peace. It was to be peace for all men of good will for, otherwise, there could be no peace. The first requisite was that anger and hate must leave the human heart, for angry men, hating men cannot be at peace with their own selves, let alone with others. What should follow from this proposition is that we must not think ill of others, that we must love our fellowmen. All barriers must go, all frontiers must give way to the flow of human feelings and ideas.

It is not Christian to shun the association of our fellowmen. The various races of mankind do not constitute airtight compartments antagonistic to each other; what is more, they have no reason for being, or have they any chance of continuing to exist, as such separate compartments. The absolute oneness of human destiny is indisputable in the philosophy of the Christian religion.

These thoughts come to me at this time of the year. I have little doubt that they must likewise to most men in the spirit of Christmas. We cannot avoid them. We are of the stuff of mortality, and one of our weaknesses is to be proud. The episode of Bethlehem was an example of perfect humility. No pride was involved, but only the truth that the Messiah had come in the tatters of absolute poverty. It is in the context of that demonstrated poverty that we must take stock of our values and no time of the year is more propitious for this inventory than Christmas.

The underlying principle is humility. This is not a widely observed virtue. The boast of heraldry and the pomp of power are still too much with us. The so-called big powers not unusually feel too big to give heed to the small ones, with the result that the small ones harbor grievances against the big. We are all familiar with big-power politics, and we know how in many cases the little peoples' interests are seriously injured in the exchange of blows. Not infrequently, the haves carry the day, leaving the have-nots to their desolate fate.

What I wish especially to emphasize as the central theme of this Christmas is that the world should think of the poor among the nations that compose it, in the same manner that the spirit of Bethlehem must turn our thoughts to the poverty enshrined in that dark stable on which the Star of God shed its pure effulgence on Christmas Eve.

The poor peoples of the world are we the peoples of the world deserving of the undivided attention of the international community. Our family of nations cannot live in peace so long as only a few of them have the goods of life and the most of them only the crumbs. The existing imbalance in the distribution of the earth's resources is manifestly not in consonance with the requirements of our Christian peace.

Thus we cannot but turn our thoughts now to the grave implications of so much wealth, or rather the whole wealth, of nuclear resources and know-how being concentrated in the hands of a few powers, leaving the rest of us dwelling in less developed areas completely at the mercy of the possessors of that wealth. And when we consider the fact that there has been, and is, clear hesitation to share the resources as well as the knowledge with the poorer sectors of mankind, we cannot but shudder at the possibility that one day we innocent bystanders might find ourselves all wiped out, or perhaps never find it out.

Let this Christmas lead us to ponder the problem of our life and death in all seriousness. Let us in all the humility, and in all the good will of which our hearts are capable, turn our minds to the very grave fact that we have peace today only because we are not shooting at each other, and that such is not the kind of peace we want—a temporary lull in our recurrent armed conflicts—but the kind that will endure because it is in the texture of our hearts and minds.

We want the peace of Bethlehem—the peace not of the proud but of the humble, not of the mighty but of the meek. With such a peace we will have need of no arsenals and no armies, and of no atomic and nuclear bombs. This Christmas should revive the hopes in us that the spirit of Bethlehem will prevail over the world to turn us farther away from the dire prospects of war. In this spirit I wish you all a Merry Christmas.

HIS EXCELLENCY MR. POTE SARASIN—AMBASSADOR OF THAILAND'S NEW YEAR MESSAGE

I wish to thank, first of all, the Washington, D. C. committee for the Pageant of Peace in giving me this opportunity to send New Year's greetings to the people of the United States and the world.

With the year's end, and as a Buddhist country, our thought usually turns to peace and security of the world. We wish the world to live in peace and tranquility, to be free both from fear and from want. And this is no doubt the true aim of the Christmas Pageant of Peace, too.

In leaving the year which just has passed, we recalled the good relations and bond between our country and the United States; and with the approach of the new year we shall look ahead with determination to continue working together in unity.

May I, on this occasion and on behalf of my people extend to the people of the United States and the world our good wishes for a peaceful and prosperous new year.

TEXT OF AMBASSADOR OF VIETNAM TRAN VAN CHUONG'S NEW YEAR GREETING AT THE CHRISTMAS PAGEANT OF PEACE, BROADCAST FROM THE ELLIPSE STAGE IN WASHINGTON, D. C.

To all my human brothers, let me express a wish: I wish freedom for all of you.

To those who are already free, as in the United States, I wish you could spend half a month, not in one of those favored countries frequented by millionaires, but in a Communist-ruled country, in Russia, in China, or in North Vietnam, the last victim of the Communists.

Then, after a half-month stay in one of those Red paradises, and unless you are deaf and blind, you will be much happier for the rest of your life, you will better enjoy your lot whatever it may be.

Now, you are enjoying freedom as you enjoy the air which you breathe, without knowing that you would prefer to die if you were deprived of it if you were to live under Communist rule.

You are very fortunate and you do not know it.

That is why I wish you could go and spend 2 weeks in a Communist-ruled country, in North Vietnam, for instance.

You will know how fortunate you are to be free, and how unfortunate are those who have fallen victim to the Communists.

You will understand that no efforts are too great to deserve and preserve your freedom and that, compared to the problem of stopping the Communists, all your other problems (some of which are only the result of excess of wealth) are very small, indeed.

You will understand that communism is too great an evil to be prevented or stopped by a greater evil; by the evil of war and atomic destruction; that this problem is too vital to each of you to be possibly solved by proxy, by some 100 scientists working for you on more powerful weapons. You will understand that material strength is necessary, yes, but not sufficient, and that this vital problem of protecting you, your family, and your country from the mortal danger of communism can only be solved by your own personal efforts and sacrifices, by your own efforts to understand and help your human brothers, particularly those who have fallen victim to the Communists and those who are directly threatened by them.

Too many millions of them already have slipped or been abandoned to the Communists. You cannot afford to lose any more without soon losing your own freedom, your own way of life.

Indeed, in a world where scientific progress has suppressed distances, where continents are no longer protected by oceans, no one can enjoy peace and plenty, in safety and for long, when hundreds of millions of his human brothers are hungry at his door, hungry for food or hungry for freedom.

After a half-month stay in a Communist-ruled country, you will also feel that half of mankind cannot be abandoned forever to such regimentation, such enslavement, and such darkness, that God and men cannot have abandoned them forever, and that they shall in some way be freed one day.

You will pray and work for this.

Thus you will better deserve and preserve your freedom.

This is the wish I extend to all of you, to those who are free and those who are not.

HIS EXCELLENCY SEÑOR DON JOSE M. DE AREILZA, AMBASSADOR OF SPAIN, NEW YEAR'S GREETING TO UNITED STATES

I wish to extend to the people of the United States, the message fom my country on the occasion of the New Year. We in Spain wish to all the people in this free country, a prosperous, a happy, a wonderful New Year. We believe you deserve it. You are not only the biggest and most powerful nation in the world, but also the one to which the hope of all the free world turns its eyes. North America is like a young giant. She has an overwhelming power. She has the biggest strength in the world, and in her hands she has the torch of the eternal values of the human soul. We Spaniards believe in those values. We believe there is only one difference in the world. Those who believe that a man should be an instrument, in the service of tyranical powers, or of the State, and those who as us, the free of the world, believe that a man is an instrument of God. That a man is a human being. And, inside he has an eternal soul full of fixed values. Therefore, in extending my best wishes, to the people of the United States, to President Eisenhower, for whose entire recovery we all pray from the depth of our hearts, I wish also that you shall have a very joyful, a very happy and a very prosperous 1956.

FEDERAL AID TO SCHOOL CONSTRUCTION

Mr. McNAMARA. Mr. President, the President's proposal of $250 million a year for Federal aid to school construction is a step toward meeting the crying need for more classrooms, but it is a timid, halting step. What we need today, and what we must have, are not timid, halting steps but giant strides toward ending the shocking shortage of classrooms for our children. Seven-league boots are called for—not Lilliputian hops.

Last year, I was cosponsor of a bill which would have provided a half billion dollars a year for 2 years. Even that was on the short side, but the quarter-billion dollars proposed today is woefully short even of keeping up with the annual snowballing need for classrooms.

Look at these figures issued just this week by the National Education Association. There are 31,238,863 children now in our public schools—an increase of 1,272,811 over the 1954–55 enrollments. Using the generally accepted yardstick of $1,000 per student or $30,000 per classroom, more than $1.2 billion is needed merely to catch up with 1 year's increase. In addition, 900,000 children are being forced to go to schools half-days, adding another $450 million to this need.

The $250 million program is, as I said, a step toward solving the problem. But it is far, far short of the part I believe the Government should play in this extremely vital matter.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a clipping from the Washington Post and Times Herald headed "900,000 Students Attend School on Half-Day Basis."

There being no objection, the clipping was ordered to be printed in the RECORD, as follows:

NINE HUNDRED THOUSAND STUDENTS ATTEND SCHOOL ON HALF-DAY BASIS

Nearly 1 million American children are being shortchanged in the school facilities offered them, according to the findings of a National Education Association survey.

The NEA Research Division reported yesterday that at least 900,000 students were attending school on half-day schedules.

The annual study on "Advance Estimates of Public Elementary and Secondary Schools" showed the Nation had entered its 11th straight year of increasing enrollment.

This year there are 31,238,863 youngsters in public schools, the report showed. This is an increase of 1,272,811 over 1954–55 enrollments.

With this increase, all 48 States have reported serious building shortages in urban elementary schools and the secondary-school shortage has now reached substantial proportions in 44 States, the survey said.

Although the District was not included in all phases of the NEA survey, figures show that Washington would need 263 additional grade-school classrooms if all classes were limited to 30 pupils. The District currently has no part-time classes, but the city-wide pupil-teacher ratio is more than 36 to 1.

To meet the tidal wave of pupils nationally, more than 75,000 additional classrooms are needed. In addition, 20,000 classrooms are needed to replace deteriorated and obsolete buildings.

According to the survey, approximately 171,000 new teachers are needed in 1955–56. The rising enrollment is compelling school systems to employ large numbers of teachers who are not fully qualified for standard teaching certificates.

The NEA study pointed out that the enrollment in teacher-education institutions was not gaining rapidly enough to meet the demand for instructors.

These institutions produced 86,696 qualified teachers in June 1955, but on the basis of 1954 experience only about 57,000 of them actually entered the profession in 1955–56.

This number subtracted from the 171,000 needed to reduce class size, fill vacancies and provide for new enrollments leaves a gap of more than 100,000 teachers, the survey reported.

The PRESIDENT pro tempore. Morning business is closed.

CONGRESSIONAL FELLOWSHIPS OF THE AMERICAN POLITICAL SCIENCE ASSOCIATION

Mr. GOLDWATER. Mr. President, some of my colleagues have commented on the American Political Science Association, and I should like to add a few words of my own.

I have recently become connected with this organization. It is a connection which developed through interest stimulated by my having had with me last year an intern from this association. This young man is one of the most outstanding young men who has ever come to my attention. I know, from having talked to those who have served as interns in the Senate and in the House with various Members of Congress, that they too possess the same high standards that he does.

I believe the program of the association is a worthy one. Sending these young men to the Halls of Congress broadens their education with respect to the needs of politicians and politics in general.

In connection with my remarks I ask unanimous consent that there be printed in the RECORD at this point an announcement issued by the American Political Science Association.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

THE AMERICAN POLITICAL SCIENCE ASSOCIATION ANNOUNCES 10 CONGRESSIONAL FELLOWSHIPS FOR POLITICAL SCIENTISTS AND JOURNALISTS

Stipend: Approximately $4,000 for 9-month period.

Qualifications: Preference will be given to applicants in the age group 25 to 35. The following types of experience and training are suggestive rather than binding:

(1) Completion of 2 years' graduate work in political science plus 1 year of experience in politics, teaching, or public administration; or

(2) Bachelor of arts degree (honor graduate) in political science or international relations, with 2 years of full-time practical experience in newspaper, radio, or television work.

Program: One-month orientation period, 4 months as a staff member in the office of a Senator or House Member, 4 months as a staff member of a congressional committee or Congressman active on a committee.

Applications must be submitted prior to January 15.

Appointments will be for a 9-month period in Washington, D. C., November 1 to July 31. Awards will be announced in March. Preference will be given to candidates without extensive experience in Washington, D. C. Further information may be obtained from the American Political Science Association, 1726 Massachusetts Avenue NW., Washington 6, D. C.

Mr. SPARKMAN. Mr. President, I am sure that my colleagues are familiar with the program of congressional fellowships sponsored by the American Political Science Association, which has just been referred to by the Senator from Arizona. I had one of these congressional fellows serving on my staff for several months last year—William C. Gibbons of Harrisonburg, Va.—and I was very much impressed by the caliber of the work which he performed.

This program is made possible through a grant from the Edgar B. Stern Family Fund of New Orleans, La. This grant enables The American Political Science Association to make available the services of these congressional fellows free of charge to Members of Congress and congressional committees.

Each year 5 journalists and 5 teachers of political science are selected. They must be between 25 and 35 years of age. Applicants who are political scientists are required to have graduate training or experience in public affairs; journalists applying must have a bachelor of arts degree and at least 2 years of professional experience in either radio, television, newspaper or magazine work. Preference is given to candidates who have not lived or worked in Washington, D. C.

The applications for this year's program will close on January 15, 1956. I hope that my colleagues will encourage capable candidates to apply before the deadline. Application forms can be obtained from The American Political Science Association, 1726 Massachusetts Avenue NW., Washington 6, D. C. Those chosen in the competition will start their work in Washington immediately after the November election and stay here until July 31, 1957. They will receive a stipend of $4,000, plus travel expenses to and from their place of residence.

These congressional fellows have been able to do a remarkable variety of jobs, including research, writing, handling constituent inquiries, helping on radio and television programs, preparing legislation, and following through on some fairly complex assignments. I have heard some of my colleagues talk about them, and know that they have performed very well in many different situations.

After completing their service here, some of them go back to their home communities, better informed about Congress and able to help interpret the legislative process on their newspapers or in their universities. Others of them remain on congressional staffs. It is my understanding that three of last year's congressional fellows are now working on the staffs of my colleagues, Senators GOLDWATER, HRUSKA, and HUMPHREY. And Bill Gibbons, the congressional fellow who was in my office, is on the staff of Representative SIDNEY YATES.

A new group of congressional fellows arrived in Washington on November 1. They spent their first month in an intensive orientation course, including assigned readings on the legislative process and frequent interviews and discussions with Members of Congress, staff officials on Capitol Hill, and Washington correspondents. Starting in December, the fellows began working on the staffs of House Members and House committees. On April 1 they will all move to the Senate for 4 months of work on this side of the Capitol.

The assignments of these fellows is determined largely by the request of the individual fellow and his own appraisal of where he would like to work. Naturally, with only 10 fellows available, sometimes there is lively competition among Members of Congress interested in having a fellow assist them. In fact, I am told that when a Member of Congress wants a fellow to work with him, he almost has to carry on a "fraternity rushing week" to show the prospective pledge the superior advantages of working with his office.

This year's congressional fellows and their current assignments are:

Robert Blackburn, assistant professor of political science at the University of Rochester, working with Representative HALE BOGGS.

MacAlister Brown, instructor in political science at Dartmouth College, working with the House International Operations Subcommittee.

Jay H. Cerf, assistant in instruction at Yale University, working with Representative WAYNE L. HAYS.

Charles L. Clapp, assistant in the department of political science, University of California, working with Representative PETER FRELINGHUYSEN.

Robert P. Dorang, of the Buffalo Evening News, working with Representative ARMISTEAD SELDEN of my own State.

L. Boyd Finch, of the Ventura (Calif.) Star-Free Press, working with Representative LEE METCALF.

R. Gene Geisler, instructor of political science at the University of Indiana at Gary, working with Representative MELVIN PRICE.

Francis J. Kelley, reporter on the Hutchinson (Kans.) News-Herald, working with Representative WILLIAM H. AVERY.

Richard L. Milliman, reporter on the Lansing (Mich.) State Journal, working with Representative GERALD R. FORD, JR.

Teresa A. Polychronis of the American Broadcasting Co., working with Representative EDITH S. GREEN.

Mr. LEHMAN. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. LEHMAN. I am deeply interested in the statement made by the Senator from Alabama. I was associated in business for 15 or 20 years with Mr. Edgar B. Stern and with his father and his brother. Since he retired and I retired we have maintained close associations in many other activities. I merely wish to say that I do not believe there are any finer people in the world than are Mr. Stern and his family.

Mr. SPARKMAN. I am glad to hear the distinguished Senator from New York make that statement. I know Mr. Stern and the Stern family. Of course, I do not have the familiarity or the close association with them the Senator from New York has had, but I agree with what the Senator said about the fine quality of the family. They have certainly done a wonderful thing in making this grant. From my experience in having one of these fellows in my office and seeing how eagerly he worked so that he might go back to his chosen work in the field of political science and in the field of communication, radio, television, or whatever it may be, I am sure he would certainly be fitted from a practical standpoint to do a fine job.

Mr. IVES. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. IVES. I wish to commend the Senator from Alabama for the very fine remarks he has just made. For a number of years I served as a member of the Advisory Committee of the American Political Science Association, and I think the work which has been done is magnificent. I cannot praise it too highly.

Mr. SPARKMAN. I thank the Senator from New York.

Mr. BARKLEY. Mr. President, I wish to take the time of the Senate for only a moment to express my appreciation of the remarks of the Senator from Alabama concerning the program of the American Political Science Association.

From year to year I have been invited to become a member of the association, and I think I have done myself an injustice by not accepting the invitation to become a member.

In regard to its program, I have in mind a specific instance in my own State by which it can be abundantly justified.

The association is made up of men and women who are devoted to the public service, to political science, and to politics as related to political science. As a part of the program a young man came to Washington from Kentucky a few years ago and served in the House of Representatives under a fellowship in the office of a Member of Congress whose name I do not now recall. He then came to the Senate and served, I think, for approximately 8 months on a subcommittee of which the Senator from Tennessee [Mr. KEFAUVER] was chairman. His name is Ben Reeves.

He is now 33 years of age. He was born and reared in Bowling Green, Ky., and some 4 years ago he became connected with the Louisville Courier Journal as a reporter. He has been assigned by the Louisville Courier Journal to Frankfort, Ky., the capital of the State, to report on the activities of the legislature which is now in session.

If he were present at this time I am quite sure he would testify that his experience as a fellow under appointment of the American Political Science Association to a fellowship in Washington has enhanced his ability, his understanding, and his qualifications to serve the great Louisville Courier Journal, which is one of the outstanding journals of the Nation.

I have been acquainted with Mr. Reeves for 2 or 3 years. He came from that section of Kentucky where my mother was reared. Very naturally, I acquired an interest in his background, his welfare, and his future. From my knowledge of him and of his experience and also of the policy of the newspaper for which he works, I feel that he has a great future in the field of journalism, not only in Kentucky, but in a wider sphere. He is devoted to the welfare of my State and his. He feels a sort of sacred obligation to serve Kentucky politically, intellectually, morally, economically, and socially. I am glad to be able to predict for him a very bright future in journalism in Kentucky and in America, and I am sure that his future has been enhanced and enriched by his experience in Washington for a year through the operation of the association of which the Senator from Alabama has spoken.

I am glad to speak this brief word for the association itself, and particularly for this young man, who is, I think, a very honored member of the journalistic profession in Kentucky, and for whom I have the feeling that he will, in the years to come, enjoy a brilliant future in the field of journalism, and, through that field, in public service to the people of our State and the country as a whole.

Mr. HUMPHREY subsequently said:

Mr. President, I wish to add to comments about the congressional fellowship program of the American Political Science Association. As most of my colleagues now know, the program has been bringing outstanding young political scientists and journalists to work with us here on the Hill and so learn about the functioning of Congress at first hand. It is made possible through a grant from the Stern Family Fund of New Orleans.

This is the third year of the congressional-fellowship program. It began in 1953–54 with 6 fellowships. The recipients were then called internes. Last year and this year the number has been increased to 10. The name has been changed from interneships to fellowships, so as to eliminate confusion with the internes who come from colleges for only short periods to work in congressional offices.

The congressional fellows are an older group with considerably more experience than the able young people who come to us an internes. The average age of the congressional fellows is usually about thirty. They have a number of years experience as teachers of political science or practical working experience as newspaper reporters or radio-television newsmen behind them. They are selected by interviewing boards all over the country. They are usually chosen not only for their proven academic or journalistic ability, but also with an eye to their capacity to learn and grow through their experience in working with the Congress.

When they arrive here in Washington for their 9-month fellowship period, they have a brief orientation, much of which is spent in interviews with key people in the legislative process. These interviews continue through the year and play an important part in the program through which the congressional fellows learn about Congress and its relations with the rest of the Government. I think that all of us who have met with the fellows for one of these interviews know just how informed and probing their cross-examination can be.

Following the brief orientation period, the main part of the congressional fellows program is their work with Members of Congress or with congressional committees. They are required to divide their 9 months equally between the House and the Senate, but make their own choice as to which Member or committee they wish to work with.

Since they do spend at least four months in a Member's office or with a committee staff and are all unusually able men and women, it is possible for them to fit right in and take on the responsibilities of regular staff members. From my own experience of having a congressional fellow in my office last year, I can say that the program not only benefits the individual fellows, but is a benefit to the Congress as a whole.

Of course, the real benefit and purpose of the program is not merely to supply us with additional workers—though that is a pleasant byproduct. The real purpose is to bring these young professors and journalists into the real, day-to-day work of the Congress so that they come to learn how the legislative process actually works.

I am convinced in my own mind that these fellowships do more to make come alive the teaching processes in the field of political science once the fellow returns to his regular assignment than anything which possibly could be done.

The congressional fellowship program is aimed at giving key people in the academic and newspaper professions first-hand insights into the workings of Congress which can only be come by through the experience of working close to the Senate and House over a period of time.

My own observation—both as a former vice president of the American Political Science Association and as a Senator who had a congressional fellow working on his staff—convinces me that the congressional fellowship program is providing a unique opportunity to spread a truer picture throughout the Nation of how Congress makes the laws. I wish to call the program to the attention of my colleagues—if they should not already have had contact with it—and commend it to them as of great benefit to the fellows themselves, to the Congress, and ultimately to the Nation as a whole.

Mr. President, I ask unanimous consent that the statement which I have just made appear in the RECORD following the remarks of the Senator from Kentucky [Mr. BARKLEY].

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL POLICY ON INDIAN WELFARE

Mr. MANSFIELD. Mr. President, the Department of the Interior and the Bureau of Indian Affairs have for the past several years advocated a policy of gradual termination of Federal control over the American Indian; in brief, writing off its obligations and responsibilities to these people. The basic idea of assimilating the Indian into our society as an equal is proper, but it must be done with restraint and careful execution. Under the present program I feel that this is not being done. We must remember that the Indian is the historical responsibility of the Federal Government and this cannot be discarded lightly.

Too many sharp divisions and uncompromising policies exist under the present program. There are a number of Indian tribes which have been relieved of all Federal control, and rightly so. But there are many others which are not ready and will not be for some time to come. They are still in need of much welfare assistance, medical care and, above all, education to prepare them to compete with the remainder of the population. Hasty action in these matters only adds to the over-burdening of State and local governments and discredits the Federal Government.

The most discouraging aspect of the present situation is the apparent eagerness on the part of Interior Department officials to promote relocation and movement off the reservation, knowing full well that according to present policy the Indians will no longer be wards of the Federal Government and thus will be ineligible for Federal aid. Conditions among these Indians are often deplorable. State and local welfare agencies are unable to provide all the necessary assistance. An Indian on a reservation has an opportunity to fight for his rights, but when he leaves, he has lost all. We

must remember, an American Indian is an Indian and an American on or off the reservation

In Great Falls, Mont., there is a settlement of poverty-stricken Indians known as Hill 57. The conditions of this settlement are deplorable. These people live in squalid conditions, comparable to few situations of extreme poverty I have ever seen. They need food and clothing, and they are poorly educated. They are not capable of maintaining their own livelihood under these conditions. State and local welfare agencies are not prepared to give adequate help and the Department of the Interior and the Bureau of Indian Affairs have refused to give assistance because the Indian ceases to be a ward for welfare purposes when he moves away from the reservation. These Indians on Hill 57 are citizens and many are enrolled members of an Indian reservation.

These people cannot and are not prepared to go forth into society and compete with the other citizens of the Nation. If they are to be treated on a basis of equality with other citizens in the communities in which they reside, they need education, improved health facilities and adequate opportunities for economic progress, which they do not have at this time.

In a recent issue of the Great Falls, Mont., Leader there is a feature story on the plight of an Indian family living under circumstances which are similar to the general conditions prevailing on Hill 57. The family of Isaiah Benson, a Cree, his wife and 5 children live in a 14- by 14-foot room on the rise to the north of the Anaconda Co. wire mill. The room's furnishings consist of 2 wood stoves, 2 cots and a few dishes. Visitors to the room either sit on cots or stand.

During the holidays there was not one indication of Christmas in the room, not a branch of fir or a toy. The food was a few crackers in a box, and these were kept for the baby girl. The Benson's story of the past several months is that things were very difficult on the Fort Belknap Reservation, and the family has been wandering over Montana, with Benson seeking work. The children have only been briefly exposed to school. The family did receive food contributions from organizations in the city. This family is only one among many in our Indian population who find themselves in such conditions. It is a problem which cannot be faced alone by the State and local welfare agencies, which have limited resources.

On December 29, 1955, the senior Senator from Montana [Mr. MURRAY], Representative LEE METCALF, and I wrote the Commissioner of Indian Affairs urging a new awareness of the need for assistance and guidance in relocating Indians desirous of leaving their reservations. In order to make a relocation program successful it is necessary that the Indians be adequately briefed on what to expect outside. In addition an educational program is needed at the community level. A relocation program which would help both the Indian and the community in which he locates requires one trained relocation officer on each reservation.

This is a long range program in need of much planning and study. The Bureau of Indian Affairs has indicated that they are in the process of dealing with these problems on the reservation, but the off-reservation Indian who is in need of assistance is still out on a limb.

All indigent Indians should be the responsibility of the Federal Government, regardless of tribal affiliation or location. During the last session of Congress the Interior Department refused to render a favorable report on H. R. 7433, introduced by my colleague, Representative LEE METCALF of Montana, a relief bill for these Hill 57 Indians, after it had been reported favorably by the House Committee on Interior and Insular Affairs. A companion bill, co-sponsored by the senior Senator from Montana and myself, was passed by the Senate. How much longer will these people have to depend on sporadic assistance from various sources?

I have written the Department of the Interior, urging that they reconsider their position in this instance and withdraw the unfavorable report so that some assistance may be made available to these Indians early this year.

In closing I ask that my distinguished colleagues in the Senate give some time and thought to the plight of the American Indian.

Mr. President, I ask that the Department of the Interior letter dated December 2, 1955, the joint letter dated December 29, 1955, to the Commissioner of Indian Affairs, the news story from the Great Falls Leader, dated January 2, 1956, and my letter to the Department of the Interior, dated January 6, 1956, be printed at the conclusion of my remarks.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

UNITED STATES
DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D. C., December 2, 1955.

Hon. MIKE MANSFIELD,
United States Senate,
Washington, D. C.

MY DEAR SENATOR MANSFIELD: This will reply to your letters of October 17 and November 17, 1955, with reference to the Indians on Hill 57 in Great Falls, Mont. Your four questions and our answers are as follows:

1. What constitutes an Indian as a ward of the Federal Government?

The reference to certain Indians as "wards" is not an accurate indication of the relationship which exists between the Indians and the United States. The meaning of the term "ward" varies with the context in which it is used. It has been applied to Indians in at least 10 different senses, and the failure to distinguish among them has caused considerable confusion. (See Cohen: Handbook of Federal Indian Law, pp. 169–173.) Although Congress has broad constitutional power to legislate with respect to Indians—a power often called plenary—Congress has not seen fit to exercise its power by making all Indians eligible for some form of special Federal services. Historically, the United States dealt with certain Indian tribes by treaty or agreement. As reservations were established for Indian tribes or groups the Federal Indian program was applied to the Indians on those reservations, regardless of whether they were members of a tribe with which the United States had signed a treaty or agreement. In the earlier reservation period the Indians were more or less confined to the reservations and were discouraged from moving around. In more recent times, however, all Indians are as free as other citizens to live anywhere they wish to live, but the Federal program of special assistance for Indians has continued to be primarily one of various kinds of assistance for Indians who live on the reservations, and of property management services for Indians whose property is held in trust regardless of where they live.

Although the definition is not applicable to Federal programs, the Montana Statutes define an Indian ward for State welfare purposes as: "* * * A ward Indian is hereby defined as an Indian who is living on an Indian reservation set aside for tribal use, or is a member of a tribe or nation accorded certain rights and privileges by treaty or by Federal statutes. If and when the Federal social security act is amended to define a 'ward Indian,' such definition shall supersede the foregoing definitions." (Amended sec. 3, ch. 199, L. 1951; amended sec. 1, ch. 141, L. 1953.)

2. When does an Indian cease to be a ward of the Federal Government?

As used in the context explained above, namely eligibility for welfare assistance and for property management services, an Indian ceases to be a ward of the United States for property management purposes when the trust over his allotted real property is terminated, and he ceases to be a ward for welfare purposes when he moves away from the reservation.

3. What assistance is available to off-reservation Indians?

No general welfare assistance is available to such Indians through this Department. The Department's general assistance program is confined to needy Indian families who live on Indian reservations, who are not eligible for public assistance under the Social Security Act, and who do not receive general assistance from a county welfare office. Indians are free to leave their reservations as they wish, and they are now found in practically every State and in most cities throughout the Nation. If they become in need of social services or general assistance, it is expected that they will be assisted by the same welfare agencies in the community that serve other needy persons in similar circumstances.

4. What is the departmental policy relative to medical assistance to Indians, particularly if an Indian is away from his own reservation?

As the responsibility of providing medical care for Indians was transferred to the United States Public Health Service in the Department of Health, Education, and Welfare on July 1, 1955, you will probably want to consult that Department directly as to changes made, if any, since the transfer. The following policies applied before the transfer. A program of hospital and medical care of Indians was maintained on Indian reservations. Indigent Indians were entitled to hospital and medical care in the Federally operated Indian hospitals without charge, but Indians who were economically able to pay for the service were required to pay fees based upon the cost of service. (25 CFR 84.8.)

Indians were expected to utilize the medical facilities that were maintained and operated on their reservations for their benefit. If, by his own preference, an Indian sought care in a non-Indian facility, he had to defray the expense of such services from his personal resources.

If the necessary hospital service was not available in an Indian hospital, the superintendent of the reservation or his repre-

sentative was authorized to refer indigent Indians on the reservation to nearby non-Indian hospitals for treatment at the expense of the Government. Economically able Indians, however, were required to make their own arrangements for treatment in non-Indian hospitals. If an emergency case was received in a non-Indian hospital without prior approval of the superintendent or his representative, the hospital was required to obtain, as promptly as possible, a written authorization from the superintendent or his representative if the Indian was indigent and was to be treated at Federal expense. This Department could not pay for hospital services that were furnished to Indians in non-Indian hospitals located off the reservation unless the service was authorized by responsible Government officials. Any other rule would have made it impossible for the Department to operate within the limits of Congressionally appropriated funds.

The program planning concepts discussed by the Acting Chief, Program Coordinating Staff, at the Governors' Interstate Council meeting in Santa Fe, N. Mex., to which you referred in your letter, were based on Commissioner Emmons' announcements in his speech at the triennial conference of the National Fellowship of Indian Workers at Estes Park, Colo., on July 11, 1955. A copy of that speech is enclosed and your attention is called particularly to page 7, et seq., wherein he outlined in broad terms the long-range goals and the broad principles of how they should be attained. At present, guidelines to implement the Commissioner's policy are being prepared for the field staffs.

We are also enclosing a copy of the report on conditions on Hill 57 prepared by the Billings Area Office which you requested orally from the Area Director.

If you wish any additional information, we shall be glad to supply it.

Sincerely yours,

WESLEY A. D'EWART,
Assistant Secretary of the Interior.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., December 29, 1955.

Mr. GLENN L. EMMONS,
Commissioner, Bureau of Indian Affairs, Department of the Interior, Washington, D. C.

DEAR COMMISSIONER EMMONS: During hearings and meetings with Indian leaders this summer, we became aware of the need for the assistance and guidance which only relocation officers can give Indians desirous of leaving their reservations.

We heard of many Indians who left their reservation only to return in a short time because they had had no or inadequate briefing on what to expect outside.

Such incidents are unfortunate, because they discourage other Indians from leaving the reservation to take their rightful place in our society. As you know, the Indian land base is so small that it complicates the general problem of continuing to care for our Indians on reservations.

At the other end of the line is the community in which the Indian locates. There, too, a lack of knowledge of our ways on the part of the Indian, an inability to support himself in many cases because he had no vocational guidance, creates a welfare burden.

A relocation program would help both the Indian and the community in which he locates.

The one trained relocation officer in Montana is grievously overworked. There should be one on each reservation in the United States.

Very truly yours,

JAMES E. MURRAY,
United States Senator.
MIKE MANSFIELD,
United States Senator.
LEE METCALF,
Member of Congress.

[From the Great Falls (Mont.) Leader of January 2, 1956]

PLIGHT OF INDIAN FAMILY HERE OFFERS NEAR PERFECT EXAMPLE OF PROBLEM FACING UNITED STATES

In a 14 by 14 foot room on the rise to the north of the Anaconda Co. wire mill an Indian family of seven persons at present is existing.

The family of Isaiah Benson, a Cree, married to an Assiniboine ward of the Government from the Fort Belknap Indian Reservation, represents an almost perfect example, not only of human suffering, but of a problem facing Congress, the United States Department of the Interior's Indian Bureau, and State and local welfare agencies.

The problem was studied at a hearing conducted here last summer by ORVIN B. FJARE and LEE METCALF, Montana Congressmen, and other representatives of Federal and State Agencies.

Benson's 5 children range from a girl, 2, to a boy, 16.

The room's furnishings consist of 2 wood stoves, 2 cots, and a few dishes.

Visitors to the room either sit on the cots or stand.

Benson knew his first name, Isaiah, had some religious significance.

Isaiah, of course, is the prophet of Christmas time, who prophesied the virgin birth of Christ and who gave the most vivid prophecy of the passion of Christ.

There was not one indication of Christmas in the room, not a branch of fir or a toy. The food was a few crackers in a box and these were kept for the baby girl.

The Benson's story of the past several months is that things were very difficult on the Fort Belknap Reservation and the family has been wandering over Montana, with Benson seeking work. At Inverness this fall the family were briefly exposed to school.

Benson said the boys developed sores and the teacher asked that they see a doctor before they returned to school. He said he had no car then and as the nearest doctor was 45 miles away, the children were kept out of school.

This Christmas season he pursued his will-o'-the-wisp chase for a job here and arrived penniless. He is being trusted for the rent money. His car was stolen after the family arrived here and was recovered at Dutton. At present it is impounded pending payment of charges for its return here, Benson said.

Mrs. Benson said it is needed for hauling water, though she has nothing to wash clothing in.

And this is one more problem family on Great Falls' doorstep, and other Montana communities confront the same problem.

The solution still is being sought by Federal and State officials.

The Salvation Army, always burdened with the desire to help the unfortunate, helps such families with emergency supplies.

The County Welfare Department, when requested, extends limited emergency relief. Benson said a welfare worker had promised to call.

While the family's photo was being taken a car stopped outside the cabin.

Two women carried several boxes of food into the room.

The women, when asked, said they were members of the Carpenters Union Auxiliary. They explained the auxiliary carries on a year-around project helping unfortunate families.

A number of women in Great Falls church organizations carry on similar charitable work, as do some individuals. Lucky, too, for without such aid families like the Bensons would starve.

Congress meets Tuesday soon will be studying the reports of the committee who investigated the problem this summer.

UNITED STATES SENATE,
COMMITTEE ON FOREIGN RELATIONS,
January 6, 1955.

Hon. WESLEY A. D'EWART,
Assistant Secretary of the Interior, Department of the Interior, Washington, D. C.

DEAR MR. D'EWART: In response to your letter of December 2, 1955, relative to certain questions which I raised in reference to the dislocated Indians on Hill 57, I wish to state that while I appreciate the answers to the questions raised, I do not think that they indicate that the policy of the Interior Department is in accord with the facts. It appears to me that insofar as these first Americans are concerned, we should lean over backward to see to it that they are given every consideration and that humanitarian motives vis-a-vis their welfare, education, and economic status should be given primary consideration.

In recent years the Department of the Interior and the Federal Government have established a policy of gradual termination of Federal control over the American Indian; in brief, writing off its obligations and responsibilities to these people. The basic idea of assimilating the Indian into our society is proper, but it must be done with restraint and careful execution. Under the present program I feel that this is not being done. We must remember that the Indian is the historical responsibility of the Federal Government and this cannot be discarded lightly.

Too many sharp divisions and uncompromising policies exist under the present program. There are a number of Indian tribes and individuals who have been and are capable of being relieved of Federal guidance. This is proper in every respect.

What disturbs me about the present situation is the apparent eagerness on the part of the Interior Department officials to promote relocation and movement off the reservation, knowing full well that according to present policy the Indians will no longer be wards of the Federal Government and consequently ineligible for Federal aid. Hasty action in these matters only adds to the overburdening of State and local governments and discredits the Federal Government.

Conditions among many of the off-reservation Indians are deplorable. State and local welfare agencies are unable to provide all the necessary assistance. An Indian on a reservation has an opportunity to fight for his rights, but once he leaves, he has lost all. We must remember, an American Indian is an Indian and an American on or off the reservation.

As you know, in Great Falls, Mont., we have Hill 57, a settlement of poverty-stricken Indians. It is not necessary to elaborate on these conditions, for I believe the situation has been adequately covered by reports from the area office of the Bureau of Indian Affairs and other local sources.

These Indians do not live on a reservation so they must rely on local aid and private donations, which are not sufficient. These Indians are citizens of the United States and in most cases have a history as enrolled Indians in several different tribes. There is a small number who migrated from Canada, not the majority as stated by Department officials on several occasions. Our files contain great quantities of information from the Bureau of Indian Affairs and local sources substantiating the origin of these particular Indians.

These people cannot and are not prepared to go out into society and compete with the other citizens of the Nation. They need education, improved health facilities, and adequate opportunities for economic progress. This is a long-range program in need of much planning and study. The Bureau of Indian Affairs has indicated that they are in the process of dealing with these problems

on the reservation, but what about the off-reservation Indian who is in need of assistance to prepare for his own livelihood?

All indigent Indians should be the responsibility of the Federal Government, regardless of tribal affiliation or location.

I want to reemphasize the dire needs of the Indians on Hill 57, and strongly urge that the Department reverse its present stand in opposition to pending legislation, H. R. 7433 (S. 2556). This legislation would provide immediate aid for these Indians.

The Department of the Interior can be assured of my wholehearted support of any additional legislation necessary to provide assistance for these Indians.

With best personal wishes, I am

Sincerely yours,

MIKE MANSFIELD.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. MANSFIELD. I am delighted to yield.

Mr. LANGER. First, I wish to compliment my distinguished friend from Montana upon the very able statement he has just made.

Mr. MANSFIELD. I thank the Senator from North Dakota.

Mr. LANGER. The Senator from Montana is absolutely correct when he says that the plight of these Indians is deplorable. As a member of the subcommittee on juvenile delinquency, I went, as a committee of one, into Arizona, New Mexico, California, Montana, North Dakota, and South Dakota. I was accompanied a part of the time by the senior Senator from Tennessee [Mr. KEFAUVER], and a part of the time by Representative BERRY, of South Dakota. The situation which has been described by the junior Senator from Montana is absolutely true.

For example, in one reservation in North Dakota and in one in Montana, there were 600 unenrolled Indians, apparently wandering from one State to another, trying to find something to do. I think the Senator from Montana is familiar with that condition.

Mr. MANSFIELD. I certainly am.

Mr. LANGER. We have had the Indian matter under consideration time and again. The situation is still very unsatisfactory. As the Senator from Montana so well knows, because we have discussed it before, for every single white child who dies of tuberculosis, between 30 and 40 Indian children die of that disease.

Mr. MANSFIELD. If the Senator from North Dakota will yield to me, in return, at this particular point, I should like to say that among the northern Cheyennes, in southeastern Montana, the highest tuberculosis rate of the entire country exists. The northern Cheyennes are called the race of sorrows, and we are doing nothing to remedy the condition. They are living by themselves, and the Department of the Interior has no sympathy at all for the plight in which those Indians find themselves.

Mr. LANGER. That is not the only place where Indians have been neglected. As the Senator well knows, in Arizona, near Tucson, or within a hundred miles of Tucson, a hospital belonging to the Papago Tribe burned in 1947. The hospital was never rebuilt, and nothing at all has been done about it, apparently. In the investigation, Dr. Clarence G. Salsbury testified, as did Governor McFarland, of Arizona, and also the attorney general of New Mexico. It developed from the testimony of the doctor, the head of the board of health, that of every 100 Indian children born since the hospital burned, 17 died before they were 1 year old; 42 of them died before they were 6 years old; and 52 died before they were 17 years old.

I returned that report to the senior Senator from Tennessee [Mr. KEFAUVER]. We then contacted the senior Senator from Arizona [Mr. HAYDEN] and the junior Senator from Arizona [Mr. GOLDWATER], and the senior Senator from New Mexico [Mr. CHAVEZ] and the junior Senator from New Mexico [Mr. ANDERSON].

The Department of Health, Education, and Welfare then examined into this Indian problem and sent a man to investigate. He spent between 3 and 4 hours there.

The senior Senator from Arizona, who is now on the floor, immediately offered an amendment to a deficiency appropriation bill, providing $250,000 to start the immediate construction of a hospital. Furthermore, in the coming year, between $1,500,000 and $1,600,000 will be spent to complete the hospital. That is a magnificent piece of work on the part of the Senators from Arizona and the Senators from New Mexico. I have before publicly complimented those Senators on the fine job they did.

But that is only one situation. All over the country there are Indians who are in desperate circumstances. In New Mexico there are 16,000 Indians who cannot speak any English, because they have not been to school. Governor McFarland said there were in Arizona about 8,000 Indian children of school age who were not attending school. In California there are about 25,000 Indians from about 100 tribes who are in similar circumstances.

So it has been decided that the best way to handle the entire matter is to introduce a bill which will provide the Department of the Interior with sufficient funds, for once, properly to take care of the relatively small groups of Indians in the United States.

When John Collier became the Indian Commissioner, the Indian population was about 232,000. As the Senator from Montana knows, Mr. Collier found Indians who were graduates of Harvard and Yale whom he added to the rolls. He found several thousand Indians in New York, Minneapolis, and St. Paul. Some of them were lawyers and doctors. He placed them all on the lists, until the Indian population had been expanded to about 400,000. Many of those Indians are self-supporting.

It seems to me that a great government such as ours, which can send billions of dollars in aid to foreign countries should be able to take care of, roughly, two or three hundred thousand Indians.

I will help the Senators from Montana in this instance all I can. I know that that is the attitude also of the Senators from South Dakota and also of the junior Senator from North Dakota [Mr. YOUNG.]

I could stand here and give illustration after illustration.

At Rolla, N. Dak., there was an insane Indian woman who lived on the second floor of a house. She stayed there for months, living in filth and squalor. It was not until an investigation was made that something was done about the situation by the Department of the Interior.

I shall not go into further details; but when the bill comes up for consideration, I shall join with the Senator from Montana in making certain that, at least, justice will be done to those people.

Mr. MANSFIELD. I thank the Senator from North Dakota. I am only sorry there is not some way of providing more desirable living accommodations for the Indians of Montana—and I am sure the Indians of many other States, as well—who now live under such deplorable conditions. While I am only talking about Hill 52 at this particular time, there are "shanty towns" at Helena and Havre which are a disgrace. Congress ought to take action promptly to improve the welfare of these first American citizens.

Mr. O'MAHONEY. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. O'MAHONEY. I wish to compliment the junior Senator from Montana, and also his colleague, the senior Senator from Montana [Mr. MURRAY], who is the chairman of the Committee on Interior and Insular Affairs, for having presented the matter of which the junior Senator from Montana now speaks to the entire committee at its last session. They did so in a very forceful and persuasive manner.

The committee reported a bill which was agreeable to the Senators from Montana, and the passage of the bill by the Senate followed very speedily. The failure to secure legislation was due to the fact that the bill apparently was not passed in time to secure action upon the floor of the House, where, if I am correctly advised, objection in the closing days was raised.

I wish to have the RECORD made clear that the Senate has followed the recommendation of the junior Senator from Montana and his senior colleague in this matter. The Subcommittee on Indian Affairs was wholly convinced that the conditions which the Senator has been describing this morning existed upon that reservation, and that it was the responsibility of the Federal Government and the Bureau of Indian Affairs to handle the matter.

I shall be very glad to do anything I can, in private conversation with the leaders of the House, to endeavor to secure current action in that body.

Mr. MANSFIELD. I thank the distinguished Senator from Wyoming, my friend of many years, and the chairman of the Subcommittee on Indian Affairs, who handled this proposed legislation in the Senate.

Mr. President, I yield the floor.

PATENTS ISSUED TO AL SARENA MINING CO.

Mr. NEUBERGER. Mr. President, the subcommittee on legislative oversight of the Senate Interior Committee, on which I am privileged to serve, and the subcommittee on public works and natural resources of the House Government Operations Committee, are currently holding public hearings on the highly unusual procedures by which certain mining patents were issued to the Al Sarena Mining Co., by the present Secretary of the Interior, Mr. Douglas McKay, after they had previously been repeatedly denied by the Department under earlier administrations.

These hearings have received considerable attention from the press. The important issue at stake is whether, by extraordinary administrative procedures—or rather disregard of procedures—a favored applicant has been given a bonanza in standing timber in the Rogue River National Forest under the guise of patenting mining claims which are actually almost worthless. Such manipulation of technically legal administrative powers is beginning to be recognized as characteristic of the "giveaway" attitude of the present administration, toward the natural resources temporarily entrusted to its care.

As an example of this recognition, Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an editorial from today's edition of the Washington Post and Times Herald—a pro-Eisenhower newspaper—on the subject of the Al Sarena hearings, and an article by Mr. Russell Baker, from the New York Times of January 12, 1956, on the same subject.

There being no objection, the editorial and article were ordered to be printed in the RECORD, as follows:

[From the Washington Post and Times Herald of January 12, 1956]

ON THE STUMP

In the Al Sarena timber mining hearings which began on Wednesday before a joint congressional committee, the Democrats have unveiled one of their most formidable campaign issues to date. There is a prima facie case of profligacy against the administration quite substantial enough to warrant the most thorough probing. And the importance to the Nation of the natural resources involved makes the issue an extremely dramatic and significant one.

The gist of the Democratic charge in this case is that the Secretary of the Interior, or at any rate, his responsible subordinates, permitted a private company to cut timber in Oregon's Rogue River National Forest on the pretext of a mining claim invalidly obtained. A mining claim affords title to the standing timber, which is sometimes a great deal more valuable than the supposed mineral resources beneath it. Indeed, this is allegedly the case in the Al Sarena claim, which, according to Democratic critics, was obtained through a fraudulent assay of the gold and silver deposits asserted to be under the forest soil. It appears to be a fact that the Al Serena claim was denied a couple of times by Democratic predecessors of Secretary McKay on the ground that an assay of the subsurface gold and silver deposits did not justify the granting of mineral patents but that the incumbent administration granted the patents on the basis of an assay made by a remote firm unqualified to make it. The claimants are said to have garnered a profit in the neighborhood of half a million dollars, regardless of mining operations.

It is too early to judge the merits of this controversy. Mr. McKay has replied that the charge is a political smear; and, in a campaign year, it needs to be analyzed skeptically. The Democrats for a long time have been accusing Secretary McKay and his Department of engineering a "giveaway" program. The series of articles by Warren Unna, currently appearing in this newspaper, offer an examination and appraisal of this accusation. The hearings now in progress should do a great deal to illuminate it, if not to prove it conclusively. A demonstration that the Interior Department actually has been guilty of playing fast and loose with timber resources, with fish and wildlife refuges, with dam sites and with grazing lands, would leave a larger black mark on the Eisenhower administration than the stain given to the Truman administration by mink coats and deep freezers.

[From the New York Times of January 12, 1956]

MINE CONCERN GAINED $110,000 ON PUBLIC TIMBER, DEMOCRATS SAY

(By Russell Baker)

WASHINGTON, January 11.—Democratic congressional investigators charged today that the mining claim awarded to Al Sarena Mines by the Department of the Interior had yielded the company a $110,000 windfall in public-land timber.

Al Sarena received the right to mine silver and gold from Oregon National Forest land 2 years ago, but it has not yet done any mining at the site, said Representative EARL CHUDOFF, Democrat, of Pennsylvania.

The company has, however, cut more than 2 million board feet of timber in that period, according to Robert Redwine, chief counsel for the joint Senate-House investigating subcommittee.

Al Sarena was able to take the timber under a Federal mining law that gives claimholders on public lands the right to timber above ground.

Republicans on the subcommittee, who vigorously protested that the Al Sarena investigation was politically inspired, disputed Democratic estimates of the company's timber windfall.

The National Forest Service estimated in 1949 that the total value of all timber on the claims was only $77,000, the Republicans contended.

Throughout today's 5-hour session, the Republicans hammered away at the theme that the investigation was actually a veiled assault on the whole Eisenhower administration and, particularly, on Douglas McKay, Secretary of the Interior.

They contend that it is part of an attempt to smear Mr. McKay as a man who has used his office to give away public resources to private interests.

In one of the day's many flareups, Senator W. KERR SCOTT, Democrat, of North Carolina, and subcommittee chairman, announced that Mr. McKay would be called later to tell his side of the story.

"Yes," Representative CLARE HOFFMAN, Republican, of Michigan, replied. "After he's been smeared all over the place."

At the end of the day, Senator SCOTT declared that he intended to carry out the investigation thoroughly in spite of the repeated cries of politics and smear.

Mr. HOFFMAN countered with a three-page statement outlining the Republican objections in bitter terms and accusing the Democratic members and staff of having passed from "character assassinations to * * * conduct bordering on legislative committee lynching."

Among other charges, Mr. HOFFMAN accused the Democrats of bias and cowardly tactics; of making inflammatory, prejudiced statements; of relying on "New Deal smear artists"; of abusing the Constitution; of maligning a private company's reputation and of abandoning civil liberties, basic concepts of justice, and ordinary courtesy and decency.

Much of the day was spent in partisan quarreling and issuance of prepared statements and letters from interested Senators. These activities took up so much time that little progress was made in questioning witnesses and developing the case.

The case had its beginning during the Truman administration when Al Sarena, which has its home offices in Mobile, Ala., first applied for mining rights in the Rogue River National Forest near Medford, Oreg.

At that time, assays of the ore showed that the ground could be expected to yield only about 87 cents a ton in silver and gold.

Oscar Chapman, then Secretary of the Interior, held up the claim. Under mining law, the Government is bound to grant claims on public land only if the anticipated return is judged high enough to make the venture commercially feasible for a prudent man. An 87-cent-a-ton return, under almost any mining conditions, is regarded as negligible.

In late 1953, after Mr. McKay had taken over the Interior Department, Bureau of Mines officials in Spokane, Wash., were notified that Al Sarena agents would again take ore samples from the site.

Those samples were assayed by the A. W. Williams Testing Co. of Mobile. The assay report showed that the site might be expected to yield an average of more than $2 a ton in gold and silver.

On the basis of this report, Al Sarena received its claims. Since then, it has been cutting Douglas fir and sugar-pine timber at the claim site, but doing no mining, according to testimony.

DISCREPANCY IN TESTS QUESTIONED

The invesigators are curious about why the 1953 assays showed a much higher gold and silver content in the soil than the 1949 tests. They have also questioned why Al Sarena insisted on having the assaying done by a Mobile concern, whereas the standard practice of Northwest prospectors is to send their samples to west coast assayers.

The witnesses today included Malcolm E. Volin, who had been regional chief for the Bureau of Mines in Spokane when the 1953 samples were taken from the forest.

Mr. Volin testified that this operation was unique in his experience with the Bureau. Normally, it was explained, mining claims were the province of the Bureau of Land Management, not the Bureau of Mines.

Mr. Volin said he received a set of instructions, originating with Clarence A. Davis, Under Secretary of the Interior, for overseeing the Al Sarena sampling.

The instructions, he said, specified that the samples should be assayed by a firm mutually acceptable to himself and to Al Sarena.

After the samples were taken, he said, he proposed sending them to either of two reputable west coast assaying companies. Al Sarena, he said, objected to both companies and proposed the A. W. Williams Co. in Mobile.

Mr. Volin agreed, after checking the William Co.'s reputation with a Bureau of Mines representative in the South.

"If I had not had the instructions which made it necessary to reach an agreement with the mining company about the assayer, I would have sent the samples to one of the west coast firms," he said.

Yesterday, the committee staff produced a letter from the General Services Administration stating that the Williams Co.'s work for

it had in the past been incorrect and inadequate.

No matching samples were kept by the Bureau of Mines to check against those tested by the Williams Co. in case of dispute, Mr. Volin testified.

Richard N. Appling, Jr., the Bureau of Mines agent who actually watched the sample-taking, testified that on the spur of the moment he had decided to take a set of matching samples.

But these, he said, were taken solely against the possibility that those mailed to Mobile might be lost in transit.

When he received the Williams report, he said, he dumped his set in the Rogue River. They had never been intended as check samples, he said.

Mr. Volin said that he saw nothing irregular about this. After looking at the Williams report, he said, he thought that the samples showed only a very low grade mineral content.

The hearing was recessed until next Tuesday.

TWO HUNDRED AND FIFTIETH ANNIVERSARY OF THE BIRTH OF BENJAMIN FRANKLIN

Mr. O'MAHONEY. Mr. President, will the Senator from Oregon yield?

Mr. NEUBERGER. For what purpose?

Mr. O'MAHONEY. I desire to ask him to let the Senate proceed to the consideration of two noncontroversial resolutions, which have been unanimously reported by the Committee on the Judiciary, and which must be passed very speedily if they are to be at all effective.

One of the resolutions has to do with extending felicitations of the Congress to the States of Massachusetts and Pennsylvania for their action in celebrating the 250th anniversary of the birthday of Benjamin Franklin, which will take place on the 17th of January 1956. I am afraid that the birthday anniversary of Benjamin Franklin will have passed before action can be taken on the two resolutions on the calendar.

I am merely asking the Senator from Oregon if he will suspend his speech until the Senate can agree to the two concurrent resolutions.

Mr. NEUBERGER. I yield to the distinguished Senator from Wyoming for that purpose.

Mr. O'MAHONEY. I thank the Senator from Oregon.

Mr. President, the first concurrent resolution to which I referred is Calendar No. 1368. I ask unanimous consent——

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

Mr. O'MAHONEY. I ask unanimous consent first that the pending business be laid aside so that the concurrent resolution may be considered.

The PRESIDING OFFICER. There is no pending business.

Mr. O'MAHONEY. I was misinformed by the Senator from Texas.

Mr. JOHNSON of Texas. H. R. 2889, to provide for the conveyance of certain land in Necedah, Wis., to the village of Necedah, is pending.

The PRESIDING OFFICER. The Chair is informed by the Parliamentarian that H. R. 2889, which is the unfinished business, will come before the Senate automatically at 2 o'clock, and not before that time.

The House Concurrent Resolution 199 will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (H. Con. Res. 199) extending felicitations of the Congress to those participating in the celebration of the 250th anniversary of the birth of Benjamin Franklin.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. O'MAHONEY. Mr. President, 2 resolutions to this effect were introduced, 1 in the House and 1 in the Senate. The Senate concurrent resolution was submitted by the 2 Senators from Massachusetts [Mr. SALTONSTALL and Mr. KENNEDY], by the 2 Senators from Pennsylvania [Mr. DUFF and Mr. MARTIN], and by the Senator from Rhode Island [Mr. GREEN]. The House concurrent resolution, however, was agreed to last Thursday by the House of Representatives. So the Senate Committee on the Judiciary set the House Concurrent Resolution 199 ahead of the Senate concurrent resolution. They are identical in purpose. The committee unanimously recommended the adoption of the concurrent resolution. There has been no objection. I move that the concurrent resolution be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wyoming.

The motion was agreed to.

The concurrent resolution (H. Con. Res. 199) as agreed to, is as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress extends its greetings and felicitations to all those who are participating in the commemorative ceremonies being held in Boston, Mass., and in Philadelphia, Pa., on the occasion of the 250th anniversary of the birth of Benjamin Franklin. The Congress joins with them and with all the people of the United States in expressing its appreciation of the great and indispensable part which Benjamin Franklin played, through his great and varied accomplishments in many fields, in the founding of our Nation and the establishment of a sound basis for the progress and development which our Nation has enjoyed over the years.

The preamble was agreed to.

Mr. SALTONSTALL. Mr. President, will the Senator from Wyoming yield?

Mr. O'MAHONEY. I yield to the Senator from Massachusetts.

Mr. SALTONSTALL. House Concurrent Resolution 199, extending the felicitation of Congress to the States of Massachusetts and Pennsylvania has to do with events which will take place in Boston and in Philadelphia in connection with the celebration of the 250th anniversary of the birth of Benjamin Franklin. I wish, through the Senator from Wyoming, to thank the Committee on the Judiciary for the action it has taken on the resolution.

The Senators from Pennsylvania and the Senators from Massachusetts submitted a similar resolution in the Senate. The resolution which came from the House is identical. We appreciate the prompt action, because certain events are going to take place and certain medals have been struck off by the Federal Government which are to be given to the appropriate societies and appropriate Government officials, both in Boston and in Philadelphia, very soon. So we appreciate this action on the part of the Congress.

Mr. O'MAHONEY. Mr. President, let me say that the adoption of the resolution will not involve the expenditure of any Federal funds. The action the resolution now calls upon the Congress to take can be transmitted to the States of Massachusetts and Pennsylvania under a congressional frank. So there will be no Federal expenditure.

Mr. MARTIN of Pennsylvania subsequently said: Mr. President, the name of Benjamin Franklin is a household name in Pennsylvania. He is a part of our past, our present, and our future.

He has been described as "the patron saint of Pennsylvania" and certainly he is the alltime number one citizen of our commonwealth.

He was born in Boston, Mass., January 17, 1706, the youngest son of Josiah Franklin and his second wife, Abiah. The father, a dyer and tallow-chandler, had sired 17 children.

Benjamin Franklin became a Pennsylvanian by his own choosing. He came from Boston to Philadelphia at the age of 17, and within a matter of weeks had made his presence felt.

Franklin's formal schooling was brief, but, as every school child knows, his self-education was enormous. He assisted his father in the candlemaking business, went to a school for writing and arithmetic, was apprenticed in the printing trade, and became an erudite scholar, learning foreign languages and Latin.

Soon after his arrival in Philadelphia, as a teen-age journeyman printer, he came to the attention of Pennsylvania's Governor Keith, who made him a proposition to become the public printer. After a trip to London and his marriage to Deborah Reed, he became public printer of all the Colonies in the middle area.

The rest of his inspiring career is known in detail by every American. He organized and headed literary, scientific, and political groups, did the staff work and thinking for the Revolutionary military officials, signed the Declaration of Independence, the Federal Constitution, and the treaty of peace with England. In addition, he was Ambassador to France, the founder of the University of Pennsylvania, and the Pennsylvania hospital, which is now the oldest hospital in America. He was brilliant and hard-working; a scholar, a discoverer and an inventor, laboring on all manner of inquiries and projects, from his kite experiment with electricity to his most profitable venture, Poor Richard's Almanac.

He was twice Governor of Pennsylvania: First as president of the Pennsylvania Committee of Safety which wrested control of the Commonwealth from the provincial governors, even before the Revolutionary War, and the second time as president of the Supreme

Executive Council. His son, William, became Governor of New Jersey.

While Gov. Benjamin Franklin served as a delegate to the Convention which framed the Constitution of the United States. Franklin College was named for him during his lifetime. It has since become Franklin and Marshall College.

Franklin died 2 years after he left office as governor, and the intelligence of his death created a profound sensation throughout America and in Europe, where his name was greatly revered.

Franklin and his wife now rest in the Christ Church burial ground in old Philadelphia, with other members of the Franklin family.

Their grave is covered by a plain flat stone with the simple inscription: "Benjamin and Deborah Franklin—1790."

Pennsylvania humbly and proudly pays tribute to this great American, among the greatest of all Americans, on the 250th anniversary of his birth, and solemnly and prayerfully joins in the commemoration.

Mr. MALONE. Mr. President, will the Senator from Pennsylvania yield?

Mr. MARTIN of Pennsylvania. I shall be glad to yield to the Senator from Nevada.

Mr. MALONE. I should like to ask the distinguished Senator from Pennsylvania if he remembers the question asked of Benjamin Franklin when he was called out of the Constitutional Convention at Independence Hall. It seems that lately we get our terms mixed. We get democracy mixed up with "democratic form of government." Franklin was asked by a lady when he emerged from the Convention Hall, "Well, Doctor, what have we got—a republic or a monarchy?" Then Dr. Franklin, with his usual forthright method of speaking, said, "A republic, if you can keep it." Does the Senator remember that quotation?

Mr. MARTIN of Pennsylvania. Mr. President, the distinguished Senator from Nevada, according to my memory, has correctly quoted the distinguished Dr. Franklin when he was called out from the Constitutional Convention.

Mr. MALONE. I thank the Senator from Pennsylvania.

NATIONAL JUNIOR ACHIEVEMENT WEEK

Mr. O'MAHONEY. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1367, Senate Concurrent Resolution 59.

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

The LEGISLATIVE CLERK. Concurrent resolution (S. Con. Res. 59) requesting the President to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. O'MAHONEY. Mr. President, the organization sponsoring National Junior Achievement Week came into being about 1942. It is an organization sponsored by businessmen on a nationwide basis to encourage the study of business practices by students in the local schools. The organization has made a request that the week of January 29, 1956, through February 4, 1956, be declared National Junior Achievement Week by the President of the United States.

The concurrent resolution in the Senate was submitted by the majority leader, the Senator from Texas.

There is no objection to the concurrent resolution, and I hope it will be agreed to. I so move.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wyoming.

The motion was agreed to.

The concurrent resolution (S. Con. Res. 59), as agreed to, is as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to issue a proclamation designating the week of January 29, 1956, through February 4, 1956, as National Junior Achievement Week and urging all citizens of our country to salute the activities of Junior Achievers and their volunteer adult advisers through appropriate ceremonies.

The preamble was agreed to.

Mr. O'MAHONEY. I thank the Senator from Oregon very sincerely for his courtesy in yielding.

Mr. NEUBERGER. Mr. President, I have been happy to yield to my distinguished friend the Senator from Wyoming.

FREE PRESS IN UNITED STATES MUST BE SAFEGUARDED FROM GOVERNMENTAL PRESSURE AND COERCION

Mr. NEUBERGER. Mr. President, in our historical tradition, no area of American life has been more firmly held beyond the limits of governmental concern than the means of expression secured by amendment I to the Constitution of the United States—the rights of free expression, whether religious of secular, by speech or by the press.

In recent days, there has been widespread concern over a congressional investigation which, in the face of this heritage, has appeared to claim a congressional concern with the last named of these—the press. Mr. President, as one who has been a journalist and a writer throughout his adult life, I believe the time has come for a brief statement about the necessity of preserving the freedom of the press and about the danger to all our political freedoms implicit in any governmental investigation of the press or its personnel.

CONGRESS SHARES RESPONSIBILITY FOR PRESERVING FIRST AMENDMENT FREEDOMS

I should like to emphasize at the outset that we must recognize the guaranties enshrined in the first amendment as a beacon of policy, not merely as an irksome constitutional barrier. Too often, in the pursuit of some goal of apparent immediate importance, Congress seems to press to the limits of its powers, and perhaps beyond, leaving it to the courts to determine whether and where the barrier may have been breached. Yet, Mr. President, the freedoms to which the founders of this Nation accorded first place in our Bill of Rights represent the very heart of what sets us apart, as a free society, from our enemies, past and present. They are the crux of our claim to leadership. Their protection and promotion are the responsibility of the Congress and the Executive, as much as of the courts.

Investigation, like legislation, cannot be justified merely by the existence of some technically adequate source of power, some possible theory of legality. No doubt, Congress can and does often legislate in areas which affect the press. Newspapers are businesses. They pay taxes; they use the mails; they engage in collective bargaining. Information about the operation of a newspaper may be as relevant as that about any other business for congressional legislation in such matters. But if Congress begins to seek information on the characteristics and background of journalists and other newspaper personnel, we move onto dangerous ground.

PRESS SHOULD NOT BE INVESTIGATED UNDER GUISE OF EXPOSING COMMUNISTS

In my opinion, no arm of government ought to undertake an investigation of any segment of the press unless it can be affirmatively shown that our traditional press liberties have been abused in violation of law or in another manner adverse to the public interest.

Of course, Mr. President, the hearings which have recently been concluded, but which may be revised soon, I understand, have been defended as an investigation not of the press, but of communism. We have recently lived through a period when, apparently, any person or institution could be pilloried by investigation if charged in any quarter whatsoever with alleged communism. There have been investigations of charges of Communist infiltration into churches, but, of course, not an investigation of churches. Yet, Mr. President, under the open-book charges now in vogue, what is to prevent a committee which is bigoted against a certain church or religion from looking for communism in that particular church? Is this not carte blanche for committees of varying views to investigate trade unions, banks, colleges, libraries, telephone exchanges, fish hatcheries, schools, or temperance groups—all, of course, in the name of ferreting out communism? Can we separate an investigation of alleged communism among the staff of certain newspapers from an investigation, per se, of those papers? How are newspapers selected for an investigation of alleged communism on those papers? What if some other committee decided to probe alleged disloyalty on the staffs of certain newspapers which were suggesting opposition to a unanimous verdict of the United States Supreme Court?

DANGER OF SINGLING OUT NEWSPAPERS FOR INVESTIGATION

Yet what can be the significance of searching out and questioning newspaper employees whose background may include Communist associations, if it is not the implication that the presence of these employees has somehow affected the editorial practices and policies of a newspaper? If it is not the press which is being investigated, then why look for Communists or ex-Communists specifically among newspaper employees at all, any more than specifically among lawyers or farmers or nurses or musicians? Is it not Russia which has government control of its press?

The personnel of a free press probably represents a fair cross-section of society. Saints and sinners are undoubtedly present in the same percentage in the city room of a newspaper as they are in a garage, a beauty parlor, a railroad roundhouse, or a government agency.

In the 1930's a number of misguided people, perhaps disheartened by the mass suffering of the great depression, committed themselves temporarily to the totalitarian and oppressive theories of international communism. In due course, some of these people have turned up on the staffs of newspapers—just as others may be operating trolley cars, performing surgical operations, or selling cans of soup and vegetables.

But, Mr. President, it is both wrong and dangerous to encourage the inference that occasional newspaper employees with Communist backgrounds have shaped the press into a tool of a totalitarian conspiracy. It is wrong, because it takes no congressional investigators to know that the exact opposite is the case. It is dangerous, because it points the way to coercive pressure on the editorial policies of any newspaper which offends temporarily anyone in the position to investigate. It creates the threat that, by the very act of investigating one newspaper and not another, a congressional committee or grand jury may single out a segment of the press which reports facts or favors editorial policies not in agreement with those of a particular committee or prosecutor. Once started, such a course could be never-ending.

A committee in favor of public power could probe the personnel of a newspaper sympathetic to the private utility companies. A committee with a majority favorable to racial integration might decide to question the employees of a newspaper which promoted continued segregation in the public schools. If a newspaper supports liberalization of our immigration laws, a committee opposing that step may decide to investigate whether foreign-born citizens have conspired to infiltrate the press. When many newspapers supported the 21st amendment, should congressional supporters of continuing prohibition have undertaken an investigation of alcoholism among journalists and linotype operators?

Would such investigations be in the public interest? I think not. Quite to the contrary, they would put at the mercy of congressional committees the press freedom and integrity which ought never to be invaded by any arm of Government, at any level whatsoever.

The danger was well stated by the distinguished columnist, Mr. Walter Lippmann, in the Washington Post and Times Herald of January 10, 1956. Mr. Lippmann wrote:

The crucial question posed by the Eastland committee is whether Congress has the power to censor the individual employees of a newspaper. If a congressional committee has that power in case of employees who are, have been, or are charged with being Communists, what is to stop future congressional committees from censoring newspaper employment on other grounds? Let the political climate change, let it become again like that of the thirties, on what legal ground is Congress to be challenged if it chooses to investigate the influence on the press of corporate interests, if, for example, it demands a public accounting of the financial connections and interests of publishers, editors, and reporters?

Mr. President, I ask unanimous consent that Mr. Lippmann's column be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESS AND THE PRESS

(By Walter Lippmann)

The Eastland subcommittee announced last week that "this phase of our hearing is closed for the present." This phase has had to do with Communist infiltration of the newspaper press, and the specific target has been the New York Times.

The committee has shown that over a period of some 20 years, there have been employed on the Times some 30 men who have at one time or another been Communists. Considering that there are now more than 4,000 employees, considering how many thousands more must have worked for the Times in the course of 20 years, the percentage of the infiltrators has been minute. More significantly, almost all of them have held quite subordinate jobs, and none of them has had nearly enough editorial authority to exercise any discernible influence upon the news and opinions of the newspaper.

The objective test of whether there has in fact been infiltration is whether or not the pages of the New York Times show any evidence of the suppression or distortion of news by the members of the staff. If the paper had, indeed, been subverted, any competent investigator would have been able to point to the evidence that the Communist infiltrators had served their cause in the pages of the New York Times. As the Eastland committee has offered no such evidence, has not even hinted that it could offer such evidence, it is as certain as anything can be that there is no such evidence.

What the hearings have shown is that the paper has at one time or another employed a very small number of Communists, and that these Communists have not infiltrated, have not in any visible way subverted, what the paper has thought fit to print.

But while the investigation of the New York Times is a dud, the affair of this investigation has raised a hard question about the freedom of the press and about the rights and duties of newspapermen. Does Congress have the power to investigate the press, and if it has, what if any are the limits of that power? There is no clear and authoritative answer to the question for the very good reason that it is in American experiences a radically new question. Not for many generations, if ever before in our history, has any organ of Government claimed the power to examine and to pass judgment upon who shall work on newspapers.

The law on the subject has not been tested and it is not clear. Judicial opinion ranges from that of Judge Prettyman's decision in the Barsky case, which is that Congress may investigate whatever it suspects is a public danger, to the opinion of Chief Justice Warren in *Quinn* v. *United States* that "the power to investigate, broad as it may be, is also subject to recognized limitations." It has never been determined what those limitations are.

The practical situation is that congressional committees will tend to push the limits of their power as far as the newspapers and public opinion permit. The law on the subject is not set. It is now being made by what we all do and do not do.

The crucial question posed by the Eastland committee is whether Congress has the power to censor the individual employees of a newspaper. If a congressional committee has that power in case of employees who are, have been, or are charged with being Communists, what is to stop future congressional committees from censoring newspaper employment on other grounds? Let the political climate change, let it become again like that of the thirties, on what legal ground is Congress to be challenged if it chooses to investigate the influence on the press of corporate interests, if, for example, it demands a public accounting of the financial connections and interests of publishers, editors, and reporters?

Once it is the accepted principle that Congress has power to set up standards of newspaper employment, the inner spirit and the practical meaning of the first amendment will be deeply impaired. Congress has, of course, no power to pass laws dealing with the standards of newspaper employment. Has it the right to do the same thing by the power to investigate? As exercised by latter-day congressional committees, the power to investigate is a tremendous instrument, combining the power to make laws, to enforce those laws, to judge and to punish men under those laws. This tremendous instrument can be—notoriously it has been—used to harass, to intimidate, to punish, and to destroy. Were it to become the accepted practice that Congress may investigate the press, machinery would exist to nullify the first amendment.

The question, therefore, is whether the newspaper profession shall assent to or shall oppose the claim that Congress has the power to investigate the editorial management of newspapers. The hiring or firing of employees is an essential and a central part of the editing of a newspaper. My own view is that no part of the editorial management should, that no part can under the first amendment, be ceded legitimately to Congress. If we who are connected with newspapers acquiesce in the right of Congress to censor on any grounds whatever newspaper employment, we shall have opened the way to a grave invasion of the freedom of the press.

It has been said, among others, by the New York Times itself that the press is not sacrosanct and that the right of "any investigation of the press by any agency of Congress" should not be questioned. I submit that it must be questioned. Of course, the newspapers are not sacrosanct. They are subject, like every individual and corporation, to all the laws of the land—to the tax laws, to the antitrust laws, to the military laws, to the labor laws, to the building laws, and, if they have watchdogs, to the laws about rabies inoculations. What is sacrosanct is that the freedom of the press shall not be abridged by Congress. Congressional censorship of the employment of newspapermen would, if it is assented to and allowed to become the practice, threaten seriously to abridge the freedom of the press.

The sacrosanct principle of the first amendment was not adopted in order to favor newspapermen and to make them privi-

leged characters. It was adopted because a free society cannot exist without a free press. The first amendment imposes many duties upon newspapermen who enjoy the privileges of this freedom. One of the prime duties of free journalists is that they should to the best of their abilities preserve intact for those who come after them the freedom which the first amendment guarantees.

It is, therefore, our duty, as I see it, to refuse to assent to, and instead to oppose, the setting up of a precedent that can lead to the gravest abuse.

Mr. NEUBERGER. Mr. President, if support for the rights and liberties of our free press were to be granted only on a basis of reciprocity, no Senator would have less reason than I to make the speech I am making today. In my own State there are, I believe, 21 daily newspapers. In the 1954 campaign in Oregon, 18 of these papers suported my Republican opponent, and 3 backed me. That is about the ratio elsewhere in the Nation among the press as a whole—14 percent Democratic, 86 percent Republican.

PRESS OVERWHELMINGLY FAVORS REPUBLICAN CANDIDATES AND POLICIES

Indeed, Mr. President, about the only party that I know of which seems to have infiltrated our press to any degree is the Republican Party, for about 80 or 90 percent of our daily papers and national magazines seem to think the Republican Party can do no wrong. We need only consider the virtual idolatry with which the press discusses President Eisenhower, as contrasted with the verbal denunciations which were inflicted almost daily upon Presidents Roosevelt and Truman. At the same time, a great many reforms or proposals in behalf of the average family never get to first base with the American press.

But these circumstances, Mr. President, are quite apart from the freedom of the press and its protection. The press of my State tried to defeat me for the Senate. In 1952, the press of the Nation helped to defeat for President the man whom I thought best qualified for that great office. The press opposes many policies which I support. But I would not think of encouraging any congressional investigation which would put the slightest governmental pressure on any segment of our press, just as I trust that no segment of the press would try to coerce or intimidate me, other than through legitimate channels of discussion and criticism.

Whatever faults may be its as to political partisanship, taste, thoroughness, and literary quality—and I believe they are many—the American press has demonstrated a high and consistent degree of loyalty to the basic tenets of freedom and liberty on which this Nation was founded. Its faults are not a matter for congressional inquiry but, rather, are something to be judged by public opinion, and to be corrected by the press itself, from within.

Thomas Jefferson, the foremost liberal statesman in our history, said that "no government ought to be without censors; and where the press is free, no one ever will."

RESTRAINT IN THE FACE OF CRITICISM REQUIRED IF PRESS TO REMAIN TRULY FREE

We in Government must exercise restraint, in the face of press advocacies we do not like. Undoubtedly, if we turn loose our investigators on the staff of a large metropolitan newspaper, we can turn up a certain small percentage of former Communists, of alcoholics, of deviates of one kind or another—to the possible embarrassment of that paper. Such individuals exist in our society, and they get on the staffs of newspapers, just as they enter the Army, load boats, work in hospitals, or harvest crops.

In the course of some general inquiry, many individuals may be called to testify about themselves, or about information in their possession. If they happen to include newspapermen, no one is likely to be disturbed. But I doubt if it serves our free institutions of Government for a congressional committee to search for witnesses specifically on the staff of a newspaper, and thus to suggest inferences as to the manner in which the policies of a newspaper may have been shaped.

I repeat, Mr. President, by the very act of selecting one newspaper to investigate and another to escape investigation, a committee can subtly put pressure on a press which should be completely untrammeled and untouched. It will seem only natural that a committee will see grounds for suspicion and for investigation of the staffs of those periodicals which are most diametrically opposed to the committee's own views of public policy.

It is immaterial in this respect that the congressional committees of this Congress—and, we may confidently expect, of future Congresses—will undoubtedly always be motivated by a sincere concern for the public welfare as they see it. The judgments of even the most sincere people are fraught with possible error. The freedom of the American press to report the news as it sees it, and to comment upon it, cannot survive if it is always to be potentially contingent upon the judgment of congressional committtees as to the reliability, trustworthiness, and loyalty of the men and women who gather and write the news. In my opinion, therefore, Mr. President, if Congress shall make no law abridging the freedom of the press, let Congress also make no investigation singling out the personnel of the press, which will only more subtly abridge its freedom.

It may be fortunate, Mr. President, that the important issue which I have been discussing has arisen first with respect to the New York Times—a newspaper which is universally respected as one of the great papers of the world, and which stands as the living demonstration of the value of the free press which we are dedicated to preserve. On its record, the New York Times is in the strongest position to meet the issue squarely, to win the support of other great representatives of the free American press, and in the process to preserve the freedom of others less invulnerable than itself.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. NEUBERGER. I yield to the distinguished Senator from New York.

Mr. LEHMAN. Does not my distinguished colleague from Oregon agree that not only is it a question of an attack on one particular and particularly great newspaper, but that there is involved an attack on the freedom of the press as a whole? Does he not agree that an effect of this investigation, so far as it has been carried on, has been to cast the shadow of a real threat to the freedom of the press, not only for the New York Times, but for other papers as well?

Mr. NEUBERGER. I agree entirely with the distinguished Senator from New York. I think we need only consider this question: If out of the New York Times building there were issued, not a newspaper of wide circulation and influence, but perhaps cartons of groceries, would there ever have been an investigation of the people working in that particular building?

Mr. LEHMAN. Mr. President, will the Senator further yield?

Mr. NEUBERGER. I yield.

Mr. LEHMAN. As I read history it is clear that in adopting the Bill of Rights, the greatest emphasis was laid on the first amendment, which guaranteed freedom of the press.

Certainly anything that would impair the complete freedom of the press would be a disastrous step backward, from which this country would suffer for many years, if, indeed, it recovered at all.

I cannot conceive of anything more hazardous than to place restraints on a free press, to tie its hands, to tell it what it may say, or not say, whom it may employ, or how to handle its editorial policy.

Like every other public official, I have been attacked; I have been criticized; I have been vilified by the press. I have not always liked it, any more than the Senator from Oregon has liked it under similar circumstances. However, I can truthfully say that I believe in the right of the press to criticize me, however wrongfully. I judge it more important to have a free press than to escape even unjustified criticism—and I will admit that there were occasions when some of the criticism of me in the press was even helpful, even when it was based on incorrect facts. The press attacked certain policies which I had supported, policies which were subject to criticism, and made suggestions which proved to be constructive.

I cannot conceive of anything more dangerous to the free institutions of this country than for us to do anything which would limit or abridge the complete freedom of the press both in its editorial policy and its news policy.

On January 5, I felt greatly privileged to place in the RECORD that magnificent and eloquent editorial which was published in the New York Times on that day. It was a truly historical editorial. Subsequently I also placed in the RECORD two fine editorials published in the Washington Post and Times Herald, one entitled "Skating on Thin Ice," and the other "Subverting the Press." While I

have a special and towering respect for that great newspaper, the New York Times, I do not think this is a question just of the New York Times. I would feel exactly the same if an attack had been made on any other newspaper by a congressional committee, intimidating the editors, the reporters, the copywriters, and other members of the staff of the newspaper. Inevitably, because of such intimidation, a newspaper is affected and its courage and determination to present the facts to the public, to criticize where criticism is justified, and to condemn where condemnation is indicated may be affected. Thus the sacred freedom of the press and the rights of our citizens are thereby compromised.

I am very happy and proud at this point to associate myself with the remarks of the Senator from Oregon. They are valuable and useful remarks. I hope that all these remarks on this subject will be read not only by Members of Congress, but by the people of the United States.

I think this is one of the most important issues that can possibly arise in the life of the Republic. I believe that unless we set our faces firmly against any move to intimidate the press, we shall be in serious jeopardy.

I thank the Senator for yielding.

Mr. NEUBERGER. I very much appreciate the cogent observations of the distinguished Senator from New York, who, throughout his entire career, has been dedicated to the basic liberties which are a part of our country.

It seems to me significant that long ago a distinguished writer observed that a country, like a person, sometimes tends to become like that which it fears. Is it not true that it is in Russia, where the press is most intimidated, most coerced, and most suppressed? It seems to me that when we seek to avert communism, both in our country and in the rest of the world, we ought not to pattern our methods after those of the Communists. We ought to avoid, most diligently and scrupulously, any possible intimidation of the press which would smack of that choking off of precious liberties which has occurred in the Soviet Union. I say to the Senator from New York that precedent is a dangerous thing.

Some men may undertake investigation of a newspaper with the very best of intentions. They may feel the utmost patriotism in doing so. However, such investigations open a Pandora's box. It may well be that such an investigation may be undertaken because a man does not like a newspaper because it supported Eisenhower, or because it supported Stevenson, or because it favors a public power, or because it favors private power, or because it may be in favor of a sales tax, or because it may be against a sales tax.

Such investigators may decide that they can embarrass a newspaper on those grounds, or cite some person on the staff of that paper, resulting in the possible humiliation of that person or that paper.

Mr. President, when that has occurred—and I say this to my friend, the Senator from New York—amendment I to the Constitution of the United States, which guarantees freedom of speech, freedom of the press, and freedom of religion, is in danger.

Mr. LEHMAN. Mr. President, will the Senator yield further?

Mr. NEUBERGER. I yield.

Mr. LEHMAN. I know that the Senator has carefully read the thoughtful and sobering editorials which appeared in the New York Times, in the Washington Post and Times Herald, and in other newspapers throughout the country.

Mr. NEUBERGER. I have read those editorials.

Mr. LEHMAN. I should like to ask the Senator's permission to read briefly the last paragraph of the editorial which appeared in the Washington Post and Times Herald on January 5, 1956:

> Senator EASTLAND may not intend to impair the freedom of the press but his investigation threatens to do so. It threatens to impair newspaper independence by making newspapermen fearful that they may be haled before a committee of Congress and called to account for the opinions and associations—or for criticism of congressional committees. It threatens to impair newspaper independence by taking over an aspect of managerial responsibility from editors and publishers. The American press under private management has certainly not been free from serious defects and shortcomings. Nevertheless, it must remain exclusively under private direction if it is to remain American—and free in the American sense of the term. The Eastland subcommittee is skating on thin ice over treacherous and turbulent waters.

Does not the distinguished Senator from Oregon agree with that analysis of the situation?

Mr. NEUBERGER. I may say that I agree with the editorial in the Washington Post and Times Herald and that I concur with the distinguished junior Senator from New York.

It seems to me that the test of a newspaper and of its staff should be in the realm of public opinion. If a newspaper offends through being subversive or if it violates good taste, the American public will take care of that situation. I feel certain that in the long run the reading public is the best and final test of American newspapers.

In conclusion, Mr. President, I ask that there be included with my remarks in the CONGRESSIONAL RECORD an editorial from the New York Times of January 5, 1956, on the subject of the recent investigation of several of its present and former employees, and excerpts from editorials on the same issue from the Washington Post and Times Herald, the St. Louis Post-Dispatch, the Denver Post, the Louisville Courier Journal, the Atlanta Journal, the Minneapolis Tribune, the Kansas City Star, and the Christian Science Monitor.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Times of January 5, 1956]

THE VOICE OF A FREE PRESS

In executive hearings held recently in this city, in public hearings held last summer in Washington, and now again in public hearings held in Washington, a Senate subcommittee headed by Senator JAMES O. EASTLAND, of Mississippi, has been looking for evidence of what it considers to be subversive infiltration of the press. A number of employees of this newspaper have been called to appear as witnesses before the subcommittee.

We do not question the right or the propriety of any investigation of the press by any agency of Congress. The press is not sacrosanct. It is as properly subject to congressional inquiry as any other institution in American life. It is the inescapable responsibility of Congress, however, to make certain that any such inquiry be conducted in good faith and not motivated by ulterior purpose.

A few employees of this newspaper who have appeared before the Eastland subcommittee have pleaded the fifth amendment. A few others have testified to membership in the Communist Party over periods terminating at various dates in the past. So far as we are aware, no present member of the Communist Party has been found among the more than 4,000 employees on our rolls.

The policy of this newspaper with regard to the employment of Communist Party members has been stated many times, and may be stated here again. We would not knowingly employ a Communist Party member in the news or editorial departments of this paper, because we would not trust his ability to report the news objectively or to comment on it honestly, and the discovery of present Communist Party membership on the part of such an employee would lead to his immediate dismissal.

In the case of those employees who have testified to some Communist association in the past, or who have pleaded the fifth amendment for reasons of their own, it will be our policy to judge each case on its own merits, in the light of each individual's responsibilities in our organization and of the degree to which his relations with this newspaper entitle him to possess our confidence.

We may say this, however. We do not believe in the doctrine of irredeemable sin. We think it possible to atone through good performance for past error, and we have tried to supply the security and the favorable working conditions which should exist in a democracy and which should encourage men who were once misled to reconsider and to reshape their political thinking.

We have judged these men, and we shall continue to judge them, by the quality of their work and by our confidence in their ability to perform that work satisfactorily. It is our own business to decide whom we shall employ and not employ. We do not propose to hand over that function to the Eastland subcommittee.

Nor do we propose to permit the Eastland subcommittee, or any other agency outside this office, to determine in any way the policies of this newspaper. It seems to us quite obvious that the Eastland investigation has been aimed with particular emphasis at the New York Times. This is evident from several facts: from the heavy concentration of subpenas served on employees of this newspaper, from the nature of the examination conducted at earlier hearings by the subcommittee's counsel, Mr. Sourwine, and from that counsel's effort, at those hearings, to demonstrate some connection between a witness' one-time association with the Communist Party and the character of the news published in this paper.

It seems to us to be a further obvious conclusion that the Times has been singled out for this attack precisely because of the vigor of its opposition to many of the things for which Mr. EASTLAND, his colleague, Mr. JENNER, and the subcommittee's counsel stand—that is, because we have condemned segregation in the southern schools; because we have challenged the high-handed and abusive methods employed by various congressional committees; because we have de-

nounced McCarthyism and all its works; because we have attacked the narrow and bigoted restrictions of the McCarran Immigration Act; because we have criticized a security system which conceals the accuser from his victim; because we have insisted that the true spirit of Amerian democracy demands a scrupulous respect for the rights of even the lowliest individual and a high standard of fair play.

If this is the tactic of any member of the Eastland subcommittee, and if further evidence reveals that the real purpose of the present inquiry is to demonstrate that a free newspaper's policies can be swayed by congressional pressure, then we say to Mr. EASTLAND and his counsel that they are wasting their time. This newspaper will continue to determine its own policies. It will continue to condemn discrimination, whether in the South or in the North. It will continue to defend civil liberties. It will continue to challenge the unbridled power of governmental authority. It will continue to enlist goodwill against prejudice and confidence against fear.

We cannot speak unequivocally for the long future. But we can have faith. And our faith is strong that long after Senator EASTLAND and his present subcommitee are forgotten, long after segregation has lost its final battle in the South, long after all that was known as McCarthyism is a dim, unwelcome memory, long after the last congressional committee has learned that it cannot tamper successfully with a free press, the New York Times will still be speaking for the men who make it, and only for the men who make it, and speaking, without fear or favor, the truth as it sees it.

[From the Washington Post and Times Herald of January 5, 1956]

THIN ICE

Despite its repeated protestations that it is not investigating the press, the Eastland subcommittee's current questioning of newsmen is moving in a dangerous direction. "We are not investigating newspapers or any one newspaper," Senator EASTLAND declared on Tuesday. But the persons subpenaed to testify at the subcommittee's executive sessions last month were employees of newspapers; and, in point of fact, they were predominantly employees of one newspaper.

Senator EASTLAND expressed hot indignation the other day at an admonitory statement issued by the American Civil Liberties Union. The ACLU warned the subcommittee against trespassing on the area protected by the first amendment, and Mr. EASTLAND accused it of trying to establish "guilt by anticipation"—a nice phrase but not a valid one. For the subcommittee's excursions in the past have compelled libertarians to be suspicious of it; for example, the subcommittee undertook what amounted to a purge of university professors while insisting piously that it was in no sense investigating universities.

Newspapermen do not have any special immunity by reason of the first amendment; they are, of course, as subject as any other citizens to the lawful processes of courts or congressional committees. But when they are questioned, as newspapermen, about past political vagaries which are suspected of having in some way influenced the editorial policies of their newspapers, the inquiry intimately touches the press as an institution.

The responsibility for keeping editorial staffs free from subversive influences, like the responsibility for determining editorial policies, belongs to the publishers and editors of newspapers. It is not a responsibility that can be shared in any way with the Government; and any assumption of this responsibility by a congressional committee, no matter how helpfully intended, is an unwarranted intrusion. In the American system, the press, so far from being subject to censorship of any kind by the Government, was meant, as Thomas Jefferson put it, to serve as a censor of the Government. It can fulfill this vital function only if it remains wholly independent of the Government—wholly free from any kind of governmental control or manipulation.

Senator EASTLAND may not intend to impair the freedom of the press, but his investigation threatens to do so. It threatens to impair newspaper independence by making newspapermen fearful that they may be haled before a committee of Congress and called to account for their opinions and associations—or for criticism of congressional committees. It threatens to impair newspaper independence by taking over an aspect of managerial responsibility from editors and publishers. The American press under private management has certainly not been free from serious defects and shortcomings. Nevertheless, it must remain exclusively under private direction if it is to remain American—and free in the American sense of the term. The Eastland subcommittee is skating on thin ice over treacherous and turbulent waters.

[From the New York Times of January 7, 1956]

EDITORIAL COMMENT FROM OTHER NEWSPAPERS

MIDWEST

St. Louis

Required Reading

The Post-Dispatch (Independent Democrat)

Our mirror of public opinion today contains an editorial from the New York Times that we strongly recommend in its entirety to every one of our readers. While the Post-Dispatch regrets deeply that conditions exist in the United States which make such a statement from that great newspaper necessary, we are glad to add to its circulation by reprinting it in full.

The Eastland subcommittee has for its chairman the senior Senator from Mississippi, who is in open defiance of the United States Supreme Court's unanimous decision in the antisegregation public school cases. He is as near to a Democratic version of Senator MCCARTHY, of Wisconsin, as the Senate contains today.

There are occasions when a newspaper has no choice but to come out swinging and swinging hard. Such an occasion is the investigation of the New York Times by the Eastland subcommittee.

Such an occasion was when Senator MCCARTHY tried to intimidate the New York Post by a star-chamber inquisition of its editor, James A. Wechsler. And in 1940, long before Communist infiltration became an issue, there was such an occasion when a circuit judge in St. Louis adjudged the Post-Dispatch guilty of contempt because we dared to criticize his handling of the Nick racketeering case.

And so we urge our readers to read the Times editorial to its last syllable. It is the voice of a free and aroused newspaper speaking.

Milwaukee

The Journal (Independent)

The New York Times has substantial reason for surmising that a prime objective of the Eastland subcommittee hearings on Communist infiltration of the press is to embarrass, if not smear, the Times, a world-renowned institution.

The Times has been strong and constant in opposing the bigotry and the methods of such as Senator EASTLAND himself, the Mississippi racist; Indiana's JENNER, also on this subcommittee; JENNER's hero, MCCARTHY, and the late Senator McCarran. And it can cite efforts of the subcommittee counsel to point the investigation at the paper's news treatment.

The Times editorial answer, published Thursday morning, is reprinted elsewhere on this page. It is wise, moderate, thoughtful, and rings with the power of truth and right. In its responsible viewpoint and real Americanism, it speaks for the whole free American press.

The editorial readily acknowledges the right of congressional inquiry into any American institution, including the press, so long as it is in good faith and not with ulterior design. Then it restates an employment policy that is a model of precaution combined with fairness and respect for individual rights.

The Times' concluding declaration of independence—its firmness against congressional or governmental pressure to mold newspaper policies, its vow to speak always for itself alone—is in the essential tradition of American democracy.

Louisville

Pigmy Blasts at Press

The Courier Journal (Independent Democrat)

Challenged by a blast from the New York Times, Mississippi's Senator EASTLAND denies that the Nation's great newspaper is under investigation. The Times, says he, "denies when no one has accused it."

We don't think the Eastland subcommittee will get anywhere in attempting to lower public confidence in the New York Times, much less in trying to influence its * * * policies but it can achieve a great deal in lowering public confidence in or respect for the subcommittee or for any congressional inquiry not conducted in good faith and defensible purpose and we are happily confident that long after Mr. EASTLAND himself has ceased to police his own brand of Americanism by counseling defiance of the Supreme Court, the New York Times, as it promises, will still be speaking for the men who made it and only for the men who make it, speaking without fear or favor, the truth as it sees it.

Denver

The Big Floperoo

The Post (Independent)

The past week witnessed a puerile attempt by the Eastland subcommittee of the United States Senate to smear the New York Times, which is perhaps the most influential American newspaper.

The disclosures produced were hardly earthshaking. It developed, for example, that a Times reporter joined the Communist Party 19 years ago and quit it 17 years ago. A proofreader refused to answer questions on various constitutional grounds. An index compiler said he has not been a member of the party for 7 years, leaving the inference that he was a member before that time.

Some members of the subcommittee seemed somewhat shamefaced that a hullabaloo should be made of this kind of trivia. Even Senator EASTLAND, Democrat, of Mississippi, felt called upon to remark that he knows of no evidence of any Communist attempt to influence the content of any recognized metropolitan newspaper.

He sought to justify the investigation with a statement that his subcommittee has a mandate to expose communism "wherever it may be found." Most amazing, although apparently well-intentioned, was a suggestion by Senator HENNINGS, Democrat of Missouri, that the inquiry might be broadened to permit any newspaper to submit evidence that it had not been affected by subversive influences.

He thus left an inference—intended or not—that newspapers should have the privilege of trooping before the subcommittee to proclaim their allegiance and loyalty to the country.

What kind of silly business is this?

Is this merely an attack on the Times? We have no fear that the Times cannot take care of itself in any match with Senator EASTLAND, Senator JENNER, Republican of Indiana, et al.

Of one thing we are sure. Antics of the subcommittee have done nothing to enhance the dignity or prestige of the United States Senate. That should be a matter of concern for all Senators and for all of us who believe our Government and all of its parts should be worthy of popular confidence.

[From the New York Times of January 8, 1956]

EDITORIAL COMMENT FROM OTHER NEWSPAPERS

EAST

Atlanta

The Journal (Democrat)

In all this Nation's history there have been few more flagrant attempted smears than that to which Senators EASTLAND, JENNER and company this week have subjected the New York Times.

With an abandon born of complete disregard for the traditional American concepts of justice and fair play the EASTLAND subcommittee has sought, by the age-old tactics of innuendo and guilt by association, to undermine public confidence in a newspaper which has consistently had the courage to speak out for the right as it sees it.

The New York Times needs no defense before any fair-minded jury. With more than four thousand employees, it would be a mathematical phenomenon if some one or two had not at some time in the threadbare thirties joined up with communism or Townsendism or Aimee Semple McPhersonism.

The point is that the few former Communists EASTLAND has uncovered are in jobs of such consequence that not even he can conscientiously conclude that they could conceivably have had a share in the shaping of Times' policies. Indeed they have no more to do with the thing with which Senator EASTLAND is really concerned—the editorials which cast the light of reason on his demagogics—than the man who sweeps the floor.

MIDWEST

Minneapolis

The Tribune (Independent)

Senator EASTLAND and Chief Counsel Sourwine appear to be chiefly interested in creating distrust in the newspaper which most experts in the field regard as the greatest newspaper in the world.

If EASTLAND, Sourwine and their collaborators in this fishing and smearing undertaking can make people believe that the New York Times has been infiltrated by Communists and Communist sympathizers, they will be able to create doubts about the dependability of news reports and comments in other newspapers and other media of information.

EASTLAND and Sourwine apparently hope by creating distrust in a free independent press, to influence the media of information to embrace their points of view.

The New York Times told EASTLAND and Sourwine that they are wasting their time if they think that a free newspaper's policies can be swayed by congressional pressure.

To those who may have been made uneasy by the EASTLAND-Sourwine insinuations we commend a careful reading of the pages of the Times and other good newspapers. No other institution provides a record of its work and attitude so easily checked upon as the newspaper. What is written under pressure of deadline and sometimes without wholly satisfactory means of checking to the last detail remains in print years after it is published.

Kansas City

The Times and Investigators

The Star (Independent)

The fact that stands out in the EASTLAND Committee's search for Communists among New York Times employees is the Times itself. The patriotism and integrity represented by this great newspaper cannot be questioned. And we have complete confidence in its management's ability to handle any situation that might develop from attempted subversive infiltration of its news and editorial departments. It is more capable than any Congressman of detecting perversion of the news or editorial comment.

Expressive of the character of the Times is the splendid editorial on the congressional investigation which was reprinted in the morning edition of the Star last Thursday. The Times upholds the right of a congressional committee to investigate the press the same as any other American institution—provided the investigation is made in good faith.

The power to investigate is basic in the American system of government. But used for ulterior purposes it can be a highly dangerous weapon readily turned against the fundamentals of our American system.

Probably there is no way to prove the Times' charge that the committee has subjected it to harassment because of its stand on major national issues. At least, the charge shows how the investigating power could be used to destroy the independence of the American press. The same principle applies to investigation of the teaching profession. The basic investigating power must be kept under rigid control or it becomes in itself the present danger to our American way of life.

In the fundamental issue of the last week we stand with the New York Times.

[From the Christian Science Monitor of January 10, 1956]

INTIMIDATION WOULDN'T SUCCEED

We do not share the alarm of those who fear the Eastland-Jenner subcommittee will do great harm to freedom of the press.

The committee has insisted that it was only investigating communism, not the press or any newspaper. The New York Times is persuaded that the inquiry so far has been aimed at it. It cites two facts: A preponderant number of those subpenaed are former or present Times men and witnesses have been asked whether they knew of any Communist influence on the paper. It further says that it was singled out in reprisal for its stand against certain activities of Senators EASTLAND and JENNER and of the committee's counsel.

This is hard to prove, for the committee can say that the very distinguished position of the Times naturally directs attention to it. Certainly the press cannot object if congressional inquiry into infiltration finally gets around to it. But it can reasonably point out that such investigation would have been far more useful in an earlier day—say before 1948 when working newspapermen were battling to break Red control of the American Newspaper Guild.

There is still value in exposure of infiltration. But it is fair to ask what is gained by publicly humiliating a fully cooperative witness who 20 years ago repented a brief excursion into communism.

The press can legitimately point out also that when congressional investigators exceed the constitutional function of inquiries necessary to the preparation of legislation they have double cause to operate with care. They may serve a useful purpose in alerting the people to some evil. But when they get beyond illegal acts and into the realm of personal beliefs, officials can easily slip over into an attempt to control opinion by punishing dissidents.

This was a very real danger when the fear of Communists was hot and when some men used official power most unfairly against weak individuals. But the press is not weak. And in the calmer atmosphere of today we are confident that if any purpose to intimidate or to punish the New York Times exists that purpose will fail. For every day Americans can see what the Times is. They know it as one of the finest examples of the intelligence and industry, the integrity and independence, which make a free press a basic weapon against the ignorance and iniquities of communism.

CRIMINAL OFFENSES AND CIVIL CAUSES OF ACTION COMMITTED ON INDIAN RESERVATIONS WITHIN CERTAIN STATES

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 361, Senate bill 51.

The PRESIDING OFFICER. The Secretary will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 51) to amend the act entitled "To confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such State, and for other purposes."

Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary without amendment, and subsequently reported from the Committee on Interior and Insular Affairs without amendment.

Mr. JOHNSON of Texas. Mr. President, I have assured certain Senators that I would suggest the absence of a quorum before the Senate proceeded with debate of the bill.

First, however, I yield the floor to Senators who wish to transact routine business at this time.

AMENDMENT OF ATOMIC ENERGY ACT TO PERMIT THE PRESIDENT TO REDELEGATE CERTAIN AUTHORITIES REQUIRED TO BE EXERCISED BY HIM

Mr. ANDERSON. Mr. President, today I am introducing a bill to permit the President to redelegate some of the authorities required to be exercised by him under the Atomic Energy Act of 1954. It seems to me that the only way to reduce the load on the President is directly to reduce the load. If every committee in Congress would quietly study the statutes under their jurisdiction and make the same determination, the overwhelming burden on the Presidency would quickly be eased.

In studying the Atomic Energy Act of 1954 I have found the following sections which require Presidential action, which, I believe, can be delegated to someone else in the President's office:

Section 26: Appointment of members of the General Advisory Committee.

Section 27: Appointment of Chairman of Military Liaison Committee.

Section 61: Assent to determination of new material as source material.

Section 67: Permit exploration and mining of national park, monument or wildlife lands for source materials in interest of common defense and security.

Section 145d: To have investigations of groups of personnel made by the Federal Bureau of Investigation instead of by the Civil Service Commission.

Section 162: To exempt Commission contracts from provisions of law relating to contracts.

The sections requiring Presidential action in which no change has been made are:

Section 21: Designation of Chairman of the Commission.

Section 22: Appointment of members of the Commission—with Senate approval—and removal of members of the Commission.

Section 41b: Designation of amounts of special nuclear material to be manufactured by the Commission and the amount to be available for distribution to licensees.

Section 51: Assent to determination of new material and special nuclear material.

Section 91b: The authority to direct the Commission to transfer materials or weapons to the Department of Defense and authorize the Department of Defense to manufacture an atomic weapon or utilization facility for military purposes.

Section 123: To approve agreements for cooperation and determine that the proposed agreement does not constitute an unreasonable risk to the common defense and security.

Section 124. Enter into an international arrangement with a group of nations for cooperation in nonmilitary applications of atomic energy.

Section 144: Authorize agreements for cooperation which transmit certain items of restricted data.

I am introducing this bill as a means of starting the study of this problem. I do not think it should be too difficult. Indeed, consideration of many of the sections involved may easily lead to other solutions. I do think that this problem is an important one, and one which can be easily tackled in its major aspects by all of the committees.

Mr. O'MAHONEY. Mr. President, will the Senator from New Mexico yield?

Mr. ANDERSON. I yield.

Mr. O'MAHONEY. Will the Senator say what the provision of the bill is with respect to the power of delegation? To whom may the President delegate the power?

Mr. ANDERSON. To any officer in the executive office.

Mr. O'MAHONEY. To any officer?

Mr. ANDERSON. In the executive office.

I may say to the Senator from Wyoming that I have not tried to say that what I am suggesting is the only way in which to accomplish the desired purpose. But we have gone carefully through the Atomic Energy Act—or, at least, I have; this has not been the work of anyone else on the committee—to ascertain what things are required of the President that need not be definitely required of him.

The designation of a member of the Military Advisory Committee is important, but it is not something which needs the personal attention of the President. In actual fact, it never receives his consideration until he is presented with a blank, which he sends to the committee telling us about it.

Mr. O'MAHONEY. The facts which the Senator has just related clearly point out the grave consequences of permitting the delegation of Presidential power. The Atomic Energy Act, of course, imposes upon the President great responsibility, which, undoubtedly, in many cases, could be discharged by other persons. But I remember why that was done when the act was passed.

When Congress undertook to give those powers to the President, it was because of the feeling that he was an elected officer of all the people of all the States.

Confirmation by the Senate is required of the nominations of all important officers in the Government, such as the members of the Cabinet, the heads of bureaus and commissions, and the members of bureaus and commissions.

But in this instance we are dealing with atomic energy, a power which is so great that no mind can comprehend what it may bring about. Therefore, I hope the Senator from New Mexico will consider the advisability of so redrafting the bill as to require that the person to whom the Presidential power imposed by Congress is delegated by the President shall be nominated by the President and his nomination confirmed by the Senate, so that the people may know to whom the work will go.

The executive branch of the Government, ever since the beginning of World War II, and perhaps even since the beginning of World War I, has been expanding steadily. More and more work has been imposed upon the President. The executive personnel of the White House has been tremendously expanded, until now, since the war, there are in the White House scores of persons who were not chosen by the people of the United States, and of whose judgment we have no knowledge.

I think it would be extremely dangerous to delegate powers of such gravity in the administration of a law like the Atomic Energy Act without requiring that the names of the persons to whom such delegation is made shall be submitted in the constitutional manner to the Senate for its confirmation.

As the Senator from New Mexico knows, I have the greatest respect for him and for his legislative capacity. I have deep understanding of the burden that is imposed upon the President of the United States, and I know how difficult it is for him to carry that burden. But this is a constitutional matter of the very greatest importance, and I hope that the Senator will ask that the bill be referred to the Committee on the Judiciary.

Mr. ANDERSON. I have no objection to having the bill referred to the Committee on the Judiciary, or to any other committee to which it may be referred. It seemed to me, in going over the Atomic Energy Act of 1954, that requirements were placed upon the President which, in reality, he would not actually exercise. A matter might be prepared by a staff officer, probably, and then transmitted in the normal, routine fashion.

Those matters as to which it seemed it was essential that the President himself should act, I want to retain for the President to act upon. The delegation of authority to the Chairman of the Atomic Energy Commission is extremely important. The appointment of members to the Commission has been important. It seemed to me that when the Senate received a nomination not long ago, I spent a considerable amount of time on it. I believe it is extremely important for the President to use a great amount of time on that kind of problem.

But when it comes to the question of determining whether a new material is a source material, the President has to depend upon the engineers of the Atomic Energy Commission, and upon the persons who are in charge of the program, to reach such a determination, and probably in reality he knows very little about it, as I would know very little about it. A technical question can only be handled, I think, by technical personnel.

I was merely trying to say that in every Department of the Government obligations must be placed upon the President which he need not personally administer. If we were to study the jurisdiction of the various committees and try to determine what those things are, we might substantially reduce the burdens imposed upon the President.

So far as I am concerned, I have no objection to the referral of the bill to whatever committee to which it may be referred. I want to have the subject studied. I did not try to consult the committee to ascertain if they felt the matter should be handled by someone in the executive branch or someone in another branch, or how it should be handled. I hoped that as they considered the bill, they might reach that determination.

Mr. O'MAHONEY. My point is not at all in criticism of the Senator, but is only to make it clear that we are dealing with a most important constitutional matter. Routine duties should not be imposed upon the President; they ought to be withdrawn. But when it is proposed to grant to the President authority to delegate powers which have been conferred upon him by statute a serious constitutional question is presented.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 2917) authorizing the transfer of certain Presidential authority with respect to certain functions required by the Atomic Energy Act of 1954, introduced by Mr. ANDERSON, was received, read twice by its title, and referred to the Committee on the Judiciary.

CRIMINAL OFFENSES AND CIVIL CAUSES OF ACTION COMMITTED ON INDIAN RESERVATIONS WITHIN CERTAIN STATES

The PRESIDING OFFICER (Mr. McNAMARA in the chair). The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated by title.

The CHIEF CLERK. A bill to amend the act (H. R. 2889) to provide for the conveyance of certain land in Necedah, Wis., to the village of Necedah.

Mr. O'MAHONEY. Mr. President, by consultation between the leaders of both sides, the Senator from Texas [Mr. JOHNSON], representing the majority, and the Senator from California [Mr. KNOWLAND], representing the minority, it was decided to lay aside the unfinished business and to proceed with Calendar No. 361 (S. 51) to amend the act entitled "An act to confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes," introduced by the Senator from Montana [Mr. MURRAY].

In compliance with that understanding, I am about to suggest the absence of a quorum.

Mr. HUMPHREY. Mr. President, will the Senator from Wyoming withhold that request?

Mr. O'MAHONEY. Yes.

Mr. HUMPHREY. I wish to join in statements made with reference to the fellowship program of the American Political Science Association.

The PRESIDING OFFICER. Is there objection to laying aside the unfinished business?

Mr. O'MAHONEY. Mr. President, I cannot submit my request until I ask for a quorum, so I was yielding to the Senator from Minnesota. It was understood there should be a quorum call first.

The PRESIDING OFFICER. Does the Chair understand the Senator is insisting on a quorum call?

Mr. O'MAHONEY. Yes. I withheld the request for a quorum call until the Senator from Minnesota could make remarks about another matter.

Mr. HUMPHREY. I may say to the acting majority leader that I would just as soon have a quorum call, if I may proceed after the quorum call, if that will get the motion to consider the bill before the Senate. Following that I should like to have the floor in my own right.

Mr. O'MAHONEY. Does the Senator from Minnesota desire to have the floor in his own right after the quorum call? If so, I cannot agree to that request.

Mr. HUMPHREY. Very well; I can speak now.

[Mr. HUMPHREY addressed the Senate on the question of congressional fellowships of the American Political Science Association. His remarks appear elsewhere in today's RECORD, under the appropriate headline, following the remarks of Mr. BARKLEY on the same subject.]

REQUEST FOR IMMEDIATE ACTION TO BOLSTER LIVESTOCK PRICES

Mr. HUMPHREY. Mr. President, some time ago it was my privilege to join with a number of my colleagues in presenting to the Secretary of Agriculture a letter, under date of December 30, 1955, asking the Secretary to "embark on an expanded purchase program of animal products for school lunch and relief distribution," and at the same time requesting that the program be "geared to increasing the returns to farmers, rather than increasing the profits to meatpackers and processors." I ask unanimous consent that the text of the letter be printed in the body of the RECORD, along with the names of the Senators who signed the letter.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DECEMBER 30, 1955.

The Honorable EZRA TAFT BENSON,
Secretary of Agriculture,
Department of Agriculture,
Washington, D. C.

DEAR MR. SECRETARY: On the eve of another session of the Congress, and a critical new year for American agriculture, the undersigned unite in directing your attention to the increasingly serious economic problem confronting America's producers of beef, pork, milk, eggs, and other animal products.

During the campaign of 1952, General Eisenhower repeatedly pledged to our farmers that such perishable commodities would be treated the same as other commodities designated by law as basic.

Those pledges have not been kept. Hog producers and beef producers are both in serious trouble. The responsibility for recommending a means of protecting them is yours. For 3 years we have waited in vain for any constructive recommendation aimed at carrying out the campaign promises held out to producers of these commodities.

It is generally recognized that these perishable products make up a great proportion of our country's total farm income, and account for a substantial share of the dangerous loss in that farm income.

You have personally said on many occasions that one of the flaws of past and present programs was that they were designed to protect only certain limited farm commodities. Yet we have seen no action on your part to extend that protection, as promised, to these other perishable commodities.

Now we call upon you and the administration to present such recommendations in the President's forthcoming farm message to the Congress.

While awaiting your legislative recommendations for effective protection to our producers of all forms of livestock and animal products, we call upon you to exercise the authority you already possess to alleviate the hardship conditions of depressed prices and income that now exist.

You have invited suggestions. We offer you the following:

We respectfully suggest that you immediately embark upon an expanded purchase program of animal products for school-lunch and relief distribution out of funds available to you for that purpose. Such an expanded program should be geared to increasing the returns to farmers rather than increasing the profits to meatpackers and processors.

We recommend that you immediately reorganize your purchase programs for these products to require bidders submitting offers to the Government to certify that they are buying an equivalent amount of the same product in the open market at prices reflecting to the farmer at least the level of parity authorized by law for the basic commodities.

Ample evidence is now available that your present hog-buying program is failing to bolster effectively hog prices to farmers. Instead, its benefits are going primarily to meatpackers whose profits have already soared during the past year as farm prices declined. The same valid objection was raised to your past beef-buying program. We respectfully suggest that such programs should provide some assurance of increased returns to producers, not just more profits for packers.

Rather than having your own department contribute to downward pressures in a falling market by trying to buy cheaply while expressing the hope prices will improve, we call upon you to take specific action toward stabilizing the livestock market at a level fair and reasonable to farm producers, by insisting that your suppliers certify they are basing their sales offers to the Government upon purchases reflecting a fair price to producers, according to the minimum standard we have suggested.

Ample outlets exist for a far greater distribution of meat and animal products in the school lunch program, through relief and welfare groups, and through voluntary agencies cooperating in overseas rehabilitation work, than you have so far been willing to undertake, despite availability of funds within your department earmarked for such purposes.

If seriously undertaken with a will to make it work, such an expanded purchase program conditioned upon requiring certification of prices paid to producers will surely help turn the tide of the existing economic depression in many of the major areas of agricultural enterprise.

If, at this late date, it proves to be a case of too little assistance too late, we in the Congress will face the task of providing whatever additional authority may be needed for more direct assistance.

But before we take such steps, it seems reasonable to exhaust every mean available under present law to relieve the economic distress caused by depressed prices. We respectfully urge your full and determined action.

Sincerely,

WAYNE MORSE, DENNIS CHAVEZ, W. KERR SCOTT, JAMES E. MURRAY, WARREN G. MAGNUSON, ROBERT S. KERR, PAUL H. DOUGLAS, HUBERT H. HUMPHREY, THOMAS C. HENNINGS, JR., ESTES KEFAUVER, RICHARD NEUBERGER, MIKE MANSFIELD, MIKE MONRONEY

Mr. HUMPHREY. Mr. President, this morning I was pleased to note that, as the Secretary of Agriculture testified before the Senate Committee on Agriculture and Forestry, considerable emphasis is now being placed upon the program for the purchase of meat products. The Secretary assured us that the programs for the purchase of pork products will be expanded over and beyond that which had been contemplated at its inception; and, second, that he was giving serious consideration to the purchase of beef products in order to bolster the beef market. It was my concern, and I may say quite candidly, my admonition that the purchase of beef products be started at once, because today the beef market is at a point lower than its point in 1953.

Mr. LANGER. Mr. President, will the Senator from Minnesota yield for a question?

The PRESIDING OFFICER (Mr. BIBLE in the chair. Does the Senator from

Minnesota yield to the Senator from North Dakota?

Mr. HUMPHREY. I yield.

Mr. LANGER. Did the Secretary of Agriculture say anything at all about imports of beef from Argentina and other countries?

Mr. HUMPHREY. He did not; and I regret to say that I do not recall that any of us interrogated him as to that, even though we should have.

Mr. MONRONEY. Mr. President, will the Senator from Minnesota yield to me?

Mr. HUMPHREY. I yield.

Mr. MONRONEY. I heartily concur with my distinguished colleague, the Senator from Minnesota, regarding the need for the purchase of beef and pork to support the collapsing livestock market. Let me ask whether consideration was given to whether we have a program different from that which Mr. Benson has conducted in the past, which does not support the price of livestock to the farmer, but merely supports the high profits of Armour, Wilson, Cudahy, and the other giant packers.

It will not do any good to pay 10 cents a pound for the hog on the hoof, to relieve the farmers, and to have them receive the 10 cents a pound, but to have the big packers sell the canned pork and gravy for 65 cents a pound, because during the cattle-support program, with which I was familiar, and which was operated a year ago, I found that the buyers—and I have had this information directly from buyers working for the large packers—got out of the market whenever the purchasing program for Government account threatened to raise the market, which was the purpose of the program in the first place. Whenever the price began to go up 6 or 7 cents a pound, they would withdraw from the market, and would wait until the price went down again, and then would buy a little, and then would get out of the market. So the program under Mr. Benson served only to fatten the profits of the processors and to hold down the price, although $200 million or more went into that program.

I very seriously believe that under the program which is now operating on pork, the same thing will occur, namely, withdrawal from the market whenever the increase the Government seeks takes place on the market. In other words, at such a time the buyers for the large packers will withdraw from the market, and will wait for it to collapse again.

Unless the Secretary of Agriculture attaches a condition to reflect 90 percent of parity to the livestock raiser, in the price to be paid for the live animals, the program will serve only to aid the packers, not the livestock raisers.

Mr. HUMPHREY. I thank the Senator from Oklahoma; and his comments are not only timely and appropriate, but historically accurate. The very point the Senator from Oklahoma embraced in his comment a moment ago has been included in the letter to the Secretary of Agriculture; and, as the Senator from Oklahoma knows, he was one of those who joined in signing the letter about beef purchases, which was sent to the Secretary of Agriculture; and in the letter the Senator outlined the very situation to which he has just referred.

I think it is fair to say that the last beef-purchase program of the Government was very expensive; gravy is generally expensive.

Mr. MONRONEY. I thank the Senator from Minnesota.

NECESSITY OF ACTION TO PROTECT WILDLIFE REFUGES

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a letter I addressed to the Secretary of the Interior, the Honorable Douglas McKay, under date of December 29, 1955; and I make the same request in regard to a letter I addressed to the senior Senator from Montana [Mr. MURRAY], and in regard to a letter I addressed to the senior Senator from Washington [Mr. MAGNUSON]. All the letters are under date of December 29, 1955; and they refer to the action of the Interior Department in throwing open to oil and gas leasing the wildlife refuges.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DECEMBER 29, 1955.

The Honorable DOUGLAS MCKAY,
Secretary of the Interior,
Department of the Interior,
Washington, D. C.

DEAR MR. SECRETARY: I am deeply disturbed by your action of December 2 having the effect of throwing open practically all of our 264 national wildlife refuges to oil and gas leasing. As a Senator who has devoted much of my efforts to preserving and protecting our natural resources, I cannot regard this as anything but a completely unjustified giveaway and a shocking betrayal of the trust imposed upon you as the cabinet officer responsible for the administration of our public lands.

Ever since some of us in the Congress warned last spring that with one stroke of your pen you had the power to dispose of and destroy our system of setting aside public lands for the protection and propagation of wildlife, you have publicly denied any such intentions and pledged yourself to preserving these refuges. I am sorry to say that your current action belies those words, and indicates a complete disregard for the intent of the Congress as well as responsibilities of your office.

I call your attention specifically to section 10 of Public Law 585, the Mineral Leasing Act, prohibiting such leases on lands administered for national park, monument, and wildlife purposes except when the President, by Executive order, finds and declares that such action is necessary in the interests of national defense.

I ask under what Presidential Executive order you have now acted to permit oil and gas leases in our wildlife refuges.

I further ask what justification you present as to the necessity of such action in the interests of national defense.

Historically, the United States Fish and Wildlife Service has been comprised of career employees dedicated to the responsibilities assigned them, able to withstand political or economic pressures counter to the objective of protecting our wildlife. I would certainly regret to see it ever become anything else. Yet I am deeply concerned over the effects your order may have in subjecting this service agancy to tremendous pressures of oil and gas interests.

It appears to me you have opened the door to the extent it will be impossible to control wholesale invasion of our refuges, then washed your hands of it by saying from now on responsibility of controlling petroleum operations in these refuges will be up to the Fish and Wildlife Service.

I would appreciate being informed as to what specific recommendation the Fish and Wildlife Service made to you as Secretary in regard to this oil and gas leasing code you have signed, and when. I am interested in seeing a copy of any written report that may have been submitted to you regarding this decision in advance of your decision, not just a statement of their concurrence after you have ordered it.

I would also like some explanation of your justification for approving a noncompetitive lease to a subsidiary of Seagram Distillers a day in advance of your signing the new code, at fees far below those normally obtained through competitive bidding on other public lands when they have been opened in the past to oil and gas leases, such as on Indian Service lands.

It is my understanding that former Assistant Secretary Orme Lewis has held up attempts to open these refuges to oil exploitation. It is rather interesting to note this change of policy was brought about within 6 weeks after Wesley D'Ewart assumed Mr. Lewis' post on an unconfirmed interim appointment as the assistant secretary in charge of public lands. I am sure Members of Congress, before acting on confirmation of Mr. D'Ewart, will certainly want to know more about his role in this deal.

Sincerely,

HUBERT H. HUMPHREY.

DECEMBER 29, 1955.

The Honorable JAMES E. MURRAY,
Chairman, Committee on Interior and Insular Affairs, United States Senate,
Washington, D. C.

DEAR JIM: Enclosed for your information is a copy of a letter I have just sent to Secretary of the Interior McKay, expressing my concern over his action in opening our national wildlife refuges to oil and gas leasing. I consider his action completely unjustified, and contrary to the expressed will of the Congress as spelled out in both the Mineral Leasing Act and the Atomic Energy Act of 1953. Each of those acts contains provisions providing for such leases on wildlife refuges only when the President by Executive order finds and declares such action is necessary in the interests of national defense. I know of no such finding or declaration to justify the present action.

For that reason I ask that your committee undertake a thorough inquiry into this drastic policy change so damaging to the conservation objectives for which sportsmen and others interested in preservation of our wildlife assets have long fought.

I hope you will make it an early order of business for your committee as the Senate reconvenes, and that you will call both Secretary McKay and Assistant Secretary D'Ewart before you to explain why they are going beyond their authority, why they are neglecting their responsibility to protect these refuges, why a lease was signed on one of these refuges a day in advance of the Secretary's December 2 order, and why such a lease was made on a non-competitive basis.

While I realize wildlife refuges normally come under the jurisdiction of the Interstate and Foreign Commerce Committee, the fact that your committee has jurisdiction over oil and gas leasing on public lands generally and will be concerned with any breakdown of the standards imposed in the Mineral Leasing Act and the Atomic Energy Act leads me to conclude that you have primary interest in this matter and should assume responsibility for a thorough-going investigation.

Sincerely,

HUBERT H. HUMPHREY.

DECEMBER 29, 1955.

The Honorable WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, United States Senate, Washington 25, D. C.

DEAR WARREN: You no doubt have read of the recent action of Secretary of the Interior McKay in opening our wildlife refuges to oil and gas leases.

The attitude of the Interior Secretary toward these wildlife refuges, in my opinion, makes it imperative to seek early action on my bill now before your committee, S. 2101 requiring approval of the Congress before the Secretary of the Interior can relinquish all, or any part of, our wildlife refuges.

I urge you to schedule early hearings on this measure, which is of deep concern to all conservationists and sportsmen's organizations in the country.

Enclosed for your information are copies of letters I am sending Secretary of the Interior McKay, and Senator JAMES MURRAY, chairman of the Senate Committee on Interior and Insular Affairs.

Because both your committee and Senator MURRAY's committee have definite interests in this field, I am suggesting a two-way approach through asking Senator MURRAY to investigate Secretary McKay's evasion of the Mineral Leasing Act policy laid down by the Congress in Public Law 585, and urging you to proceed at once toward tightening existing legislation to prevent further raids against our wildlife refuges on the part of an Interior Department negligent in its responsibility to protect them.

HUBERT H. HUMPHREY.

Mr. HUMPHREY. Mr. President, I have asked both the Senate Committee on Foreign Commerce and the Senate Committee on Interior and Insular Affairs to look into this matter and to report to the Congress.

Mr. President, now I desire to discuss another subject.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

OUR FOREIGN POLICY UNDER SECRETARY DULLES

Mr. HUMPHREY. Mr. President, I have another item which I am sure will be of some interest to my colleagues. I do not know whether many of them have had the privilege of reading the January 16 issue of Life magazine. As usual, that magazine is decorative and attractive; and regardless of whether it is factual, let me assure my colleagues that it is interesting. In the January issue appears a feature article which deserves the attention of every Member of the Senate in an effort to preserve what I consider to be the intellectual integrity of this body and the integrity of the reports and actions of this body.

On June 30, 1955, I stated on the floor of the Senate:

> In recent years we have witnessed a growing trend toward the rewriting of history for political purposes. It is understandable that occasionally in the heat of political battle, something may be said which is not historically accurate. But I am speaking now of the calculated and documented attempt to distort historical facts for political gain.

On that occasion I said that I doubted that the hocus-pocus regarding the function of the Formosa Strait patrol would be the last example of the manipulation of historical fact in a politically imaginative way. My prediction turns out to be true.

Lest my colleagues do not have time to refresh their memories on this particular item, let me say that on June 30, last, I was referring to the Presidential statement that the President was removing the Seventh Fleet from the Strait of Formosa in its mission of protecting the Communists from attack by the Nationalists on Formosa, which is to paraphrase what the Chief Executive had to say.

Mr. President, this afternoon, when the fires of adverse world reaction to the statement of the Secretary of State on Goa have scarcely died down, Mr. Dulles apparently is again responsible for a public statement which is bound to reverberate everywhere to the detriment of America's world leadership.

In the January 16 issue of Life magazine, which is on the newsstands this very day, the chief of the Time-Life bureau in Washington quotes Mr. Dulles as saying:

> The ability to get to the verge without getting into war is a necessary art. We walked to the brink and we looked it in the face. We took strong action.

No other responsible American spokesman in our lifetime, so far as I know, has ever described America's diplomatic objective as "the ability to get to the edge without getting into war," or called that a necessary art of diplomacy.

Yesterday Mr. Dulles refused to affirm or deny his responsibility for this statement. I call upon him today to repudiate it. If it means what it says, the American people do not agree with him. If it is merely another artless phrase, tossed upon the winds of public opinion, it joins those artless predecessors like the talk about "unleashing," the talk about "massive retaliation," the talk about "Portuguese provinces," the talk about "new looks," "agonizing reappraisals," and all the other objectives and nonsensical terms which can be conjured up, with which this administration has previously embarrassed all of us.

I predict, with the assurance of the ordinary, casual observer of international affairs, that Mr. Dulles' latest statement will have aroused a storm of worldwide criticism before nightfall tonight. How many more of these indiscretions and miscalculations can we suffer before our image abroad is so distorted that we conform precisely to the requirements of Soviet diplomacy? Must we behave the way the Kremlin radio says we behave?

Is it not interesting, and is it not sad, that the President of the United States, in order to recapture some world opinion in our behalf when he was in Geneva for the conference at the summit, had to assure the statesmen of the world that the United States was for peace? Is it not interesting, and a sad commentary, that a nation of people who are devoted to peace, a nation of people who are generous, a nation which has given so much in the cause of peace, must send its Chief Executive to a world conference to assure the world that we are for peace, simply because of the clatter, the prattle, the loose talk, and the unfortunate statements of responsible official in the military and civilian aspects of our Government?

Few competent observers will agree with Mr. Dulles' rendition of history, as he claims credit for himself and the President for blustering our way out of the debacles of Korea, Indochina, and Formosa. The administration's policies on these matters will now be reopened for adverse reairing, not so much by spokesmen for the Democratic Party as by the great body of responsible commentators at home and abroad who do not recognize as facts what Mr. Dulles reports as facts. Mr. Dulles' history and remaking of history are his own. I doubt whether even the members of his own party have such short memories that they will accept Mr. Dulles' explanation of his role in the Indochina negotiations of 1954.

If the Life magazine article is correct as to what Mr. Dulles' role was in the Indochina war, then the Secretary misinformed the Senate Committee on Foreign Relations. I was present during his testimony, and I say that Mr. Dulles had better say to this Congress that he told us the truth in the Foreign Relations Committee or that he told the truth to the reporter for Life magazine, because he cannot have both stories. He cannot have Life magazine's report of his role in Indochina and, at the same time, his testimony before the Foreign Relations Committee, because they are diametrically opposite. I say regretfully that they are unalterably opposed.

I think we recall pretty well that Mr. Dulles, after the Indochina partition, laid the blame for that very unfortunate settlement on the backs of Eden and Mendez-France.

One of the most disgraceful periods in American diplomacy was when we let down our allies at the Geneva Conference. If this argument and this distortion of history persists, as one Senator, I am going to demand that the testimony given before the Foreign Relations Committee be made public, because Life magazine has too big a circulation to have nonsense and distortion made so-called legal and official history. I think I have said that loud enough so that it can be heard at the State Department.

Most of us had thought that the doctrine of massive retaliation had been so thoroughly discussed, analyzed, and exploded that it had gone into a well-deserved and massive sleep. Apparently Mr. Dulles' pride of authorship has again impelled him, however, to this fraudulent reassertion of a doctrine which, at the time, was widely regarded as having been asserted without thought and without any allies.

I have long insisted that our foreign policy should grasp the new dimensions of the Soviet challenge. Only this week this administration has said so, too. I believe they came around to it yesterday. The administration has said so in words that reflect the concern felt by our United Nations delegates over the rigidity of our past position. The new nonmilitary aspects of the long-range competition now confronting us are becoming more and more obvious. Mr. Dulles himself has belatedly stressed the height and importance which must be

accorded to the political, economic, and social ingredients of our foreign policy. As I recall, that point was stressed as of yesterday.

I regret to report to the Senate that it was not sufficiently stressed at the time Mr. Dulles appeared before the Committee on Foreign Relations a week ago. The political interview which the Secretary of State has just given to Life magazine is a dismally poor beginning at an effort to meet the new Soviet tactics. It will evoke derision, contempt, anger, and fear. It will cause untold trouble with our allies. It will set loose in this country an argument which may become bitter unless the facts are made clear. Needless to say, there will be editorial and political comments from all over the world, because when the Secretary of State becomes the central figure in a major piece in one of the largest publications in the world, and becomes involved in controversial statements which, on their face, at least, have no historical veracity or accuracy, it is bound to provoke bitter, prolonged, and hard debate.

Therefore I repeat that this interview was unnecessary and foolhardy. Furthermore, it is no way to promote bipartisan support for foreign policy. We do not obtain bipartisan support by letting the Democrats have a little "bi" and letting the Republicans have the full "part" in the program. We shall not attain bipartisanship by trying to tailor-make history with political shears, clipping off any part we do not like, rewriting, with the journalist's pencil, any part we choose to review, and then saying, "These are the facts. Accept them."

Mr. President, that is playing politics with our foreign policy. It can lead to nothing by trouble. I have said on the floor of the Senate repeatedly that if history is to be rewritten let the Soviet Union rewrite it. The Soviet Union specializes in the art of duplicity and hypocrisy. Let us not try to get into that field. Let us keep the history of America honorable. Let us keep the reports of our Government factual. Let us keep the statements of our responsible officials responsible and constructive.

I suggest that a disavowal of the article is still possible. However, there will be no graceful exit, I regret to say, from the consequences. I am afraid that a Pandora's box of trouble has been opened. There are those of us who are willing to join with responsible officials of the administration in trying to close the box, if we can have responsibility and if we can have cooperation and if we can have the kind of vision and imagination for future planning which this country deserves and needs in the present world situation.

CRIMINAL OFFENSES AND CIVIL CAUSES OF ACTION COMMITTED OR ARISING ON INDIAN RESERVATIONS—ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the unfinished business, H. R. 2889, to provide for the conveyance of certain land to Nedecah, Wis., be temporarily laid aside, and that the Senate proceed to the consideration of Calendar No. 361, S. 51.

The PRESIDING OFFICER. The Secretary will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 51) to amend the act entitled "To confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes.

Mr. JOHNSON of Texas. Mr. President, three measures are to be considered by the Senate this afternoon. I understand that two of them are noncontroversial. I am hopeful that the Senate may proceed to the consideration of the measures, and that Senators who may wish to make speeches will understand that the Senate will be glad to accommodate them by remaining in session as long as they may desire, so that they may be heard.

The Senators in charge of the bills have remained on the floor, although I observe now that at least two of them have left the floor because of engagements elsewhere. I hope all Senators will permit the Senate to act upon the measures scheduled for consideration at this time before any Senator indulges in a long speech.

Mr. MARTIN of Pennsylvania. Mr. President, will the Senator from Texas yield to me for 3 or 4 minutes on another matter

Mr. JOHNSON of Texas. I cannot refuse to yield to my delightful friend from Pennsylvania. I have been yielding all morning. I do hope that the Senate may proceed to the consideration of the bills which have been scheduled for consideration today. However, I am very happy to yield to the Senator from Pennsylvania.

(Mr. MARTIN of Pennsylvania addressed the Senate on the subject of the 250th anniversary of the birth of Benjamin Franklin. His remarks appear at a prior place in today's RECORD following the adoption of House Concurrent Resolution 199.)

ORDER OF BUSINESS

Mr. MALONE. Mr. President, I should like to introduce a bill and then take perhaps 5 or 6 minutes to make a statement. I should like to have the Senator from Texas yield to me for that purpose after the bill to which he has referred is taken up for debate.

Mr. JOHNSON of Texas. The majority leader cannot refuse the request of the Senator from Nevada. The Senator from Nevada will have not only 5 minutes but 55 minutes, if he desires.

Mr. MALONE. I thank the distinguished Senator from Texas for his courtesy.

Mr. PASTORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the rolll.

The legislative clerk proceeded to call the roll.

Mr. PASTORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BIBLE in the chair). Without objection, it is so ordered.

CRIMINAL OFFENSES AND CIVIL CAUSES OF ACTION COMMITTED ON INDIAN RESERVATIONS WITHIN CERTAIN STATES

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas [Mr. JOHNSON] for the present consideration of Senate bill 51?

There being no objection, the Senate resumed the consideration of the bill (S. 51) to amend the act entitled "An act to confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes."

Mr. O'MAHONEY. Mr. President, it was agreed by the leadership that the unfinished business should be laid aside, and that the Senate should proceed to the consideration of Calendar 361, Senate bill 51. I therefore ask unanimous consent that the unfinished business may be laid aside.

The PRESIDING OFFICER. That has already been done.

Mr. O'MAHONEY. Then I ask that the Senate may proceed with the consideration of S. 51.

The PRESIDING OFFICER. The bill is before the Senate. The clerk will state the committee amendment.

The LEGISLATIVE CLERK. On page 2, line 8, after the word "the", it is proposed to insert "adult."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. O'MAHONEY. I ask that the consideration of amendments be deferred until I have had an opportunity to make an explanation of the bill.

The PRESIDING OFFICER. That was the only committee amendment, and no other amendments have been received.

Mr. O'MAHONEY. I understand. What I shall say may make the adoption of the committee amendment unnecessary, because there has been an agreement between those who have supported the action of the committee and those who have opposed it. Perhaps we can legislate by unanimous consent, if I may have an opportunity to explain the bill.

May I ask if the clerk has before him Calendar No. 361, Senate bill 51?

The PRESIDING OFFICER. That is correct.

Mr. O'MAHONEY. On August 15, 1953, Public Law 280 of the 83d Congress was enacted. The bill was introduced in the House by former Representative Poulson, of California. The purpose of the bill was to allow the State of California to assume civil and criminal jurisdiction over offenses committed upon Indian reservations or by Indians, and over civil cases arising upon the reservation. The bill was finally enacted, and pertained to the States of California,

Minnesota, Nebraska, Oregon, and Wisconsin. Under the concluding two sections of the bill, namely, section 6 and section 7, authority was granted to all States to assume jurisdiction over Indians without their consent. Under section 6 the various States which had enabling acts or constitutions or statutes prohibiting them from assuming jurisdiction over criminal offenses by Indians on the reservations, or civil actions, were given consent of the United States to change their restrictive constitutions and laws if the people approved.

Section 7 granted the consent of the United States to all other States to assume such jurisdiction.

So section 7 was a grant of Federal consent for the future. Section 6 was a grant in the present for the States to assume control over these civil and criminal offenses. But section 6 carries this proviso:

Provided, That the provisions of this act shall not be effective with respect to such assumption of jurisdiction by any such State until the people thereof have appropriately amended their State constitution or statutes, as the case may be.

Here was a direct declaration in the law that the States could not have Federal consent to assumption of such jurisdiction over Indians unless their laws were approved by the people of the State or by the legislature.

Mr. WATKINS. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. WATKINS. That was required, was it not, because in the enabling act they were required to adopt a constitution having a provision which would prevent them from assuming jurisdiction?

Mr. O'MAHONEY. That was because the constitutions of some of them did not contain such a provision.

Mr. WATKINS. That was in the enabling act.

Mr. O'MAHONEY. That was the reason.

Mr. WATKINS. Following out the provision of the enabling act, they did adopt constitutional provisions.

Mr. O'MAHONEY. But the Senator did not get my point. My point is that the proviso which I have just read made it clear that the consent of the people of the various States affected by section 7 would have to be given before the provisions of their constitutions could be changed.

Mr. WATKINS. It would have to be given simply because constitutions had already been adopted to the contrary, and it would be necessary to change the constitutions.

Mr. O'MAHONEY. That is correct; and the constitutions could not be changed unless the people gave their consent. But then the statute—Public Law 280 of the 83d Congress—went on to provide that jurisdiction over the Indians could be taken by the States without the consent of the Indians.

So we were, on the one hand, saying, "You may do nothing to increase the burden of the State unless the people of the State agree," but on the other hand, we were saying "You may change the jurisdiction to which the Indians must submit without their consent."

The result was that when the President signed the bill——

Mr. WATKINS. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield.

Mr. WATKINS. The enabling act, of course, provided that the States had to include those provisions in their constitutions. That became a legal necessity. But with respect to the Indians, when the Indians became citizens of the United States and exercised their rights of citizenship, there was no longer any further consent necessary than the fact that they had representation; they had been given a part in the Government, the same as any other citizen.

Mr. O'MAHONEY. That is an argument; it is not a statement of fact, if the Senator will permit me to say so.

Mr. WATKINS. That is a conclusion of law, which I think is admissible.

Mr. O'MAHONEY. This particular law of 1953 which we are trying to amend did two things. It required the consent of the people of the State before the jurisdiction over the Indians could be assumed, but it did not require the consent of the Indians to enable the people of the States to take jurisdiction.

Mr. WATKINS. Only in those States which had constitutions containing such a provision.

THE PRESIDENT CRITICIZED 1953 ACT

Mr. O'MAHONEY. Of course, it makes no difference whether it was only those States or not. The point is that the white people were being treated in one way, and the Indian people in another. This so disturbed the President of the United States, Mr. Eisenhower, that in his statement accompanying the signature of the bill, he said:

My objection to the bill—

He was making an objection to the bill even though he signed it—

My objection to the bill arises because of the inclusion in it of sections 6 and 7. These sections permit other States to impose on Indian tribes within their borders, the criminal and civil jurisdiction of the State, removing the Indians from Federal jurisdiction, and, in some instances, effective self-government. The failure to include in those provisions a requirement of full consultation in order to ascertain the wishes and desires of the Indians and of final Federal approval, was unfortunate. I recommend, therefore—

This is the recommendation of President Eisenhower:

I recommend, therefore, that at the earliest possible time in the next session of the Congress the act be amended to require such consultation with tribes prior to the enactment of legislation subjecting them to State jurisdiction, as well as approval by the Federal Government before such legislation becomes effective.

In order to carry out the recommendation of the President, the junior Senator from Arizona [Mr. GOLDWATER] introduced Senate bill 27, amending the 1953 act so as to provide for the consent of the Indians.

The senior Senator from Montana [Mr. MURRAY], the chairman of the Committee on Interior and Insular Affairs, introduced an identical bill, the one now before us.

The bills were so drawn as to require, not consultation alone, but the consent of the Indians, and they provided the manner in which that consent should be obtained. The only issue before the Senate, if we desire to follow the suggestion of the President and the suggestion of the Senators from Arizona and New Mexico, and the recommendation of the Committee on Interior and Insular Affairs, is whether it is desired to acquire mere empty consultation with the Indians or to give them the right to demand the same consent now required in the case of the States.

That, in brief, is the meat of the bill. While we have been waiting to get the measure before the Senate, consultations have been proceeding between myself and the Senator from Utah, who is the ranking minority member of the Subcommittee on Indian Affairs and who was chairman of that subcommittee during the 83d Congress.

My colleague, the senior Senator from Wyoming [Mr. BARRETT], has also been consulted, as have other Senators. It has been suggested to me that if we should agree to amend the committee bill so as to make it merely a repealer of sections 6 and 7, to which the President made objection, we would have accomplished his purpose and the purpose of the committee. After consulting with members of the Committee on Interior and Insular Affairs, I think I am in position to say that the committee will agree to that modification.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. O'MAHONEY. Certainly.

Mr. BARRETT. If the bill before the Senate is amended and sections 6 and 7 of the Act of August 15, 1953, are repealed, then, so far as the Indians are concerned, the status quo will have been restored, and each State or group of States might come forward with separate bills. Is that correct?

Mr. O'MAHONEY. The Indians in particular States and the States themselves could then ask for Federal consent for transfer of jurisdiction.

Mr. BARRETT. And that would obviate the objections made by the President of the United States and those interposed by various Indian tribes throughout the country, would it not?

Mr. O'MAHONEY. It seems to me that is precisely what the result would be.

Mr. BARRETT. That is the situation, and it seems to me that would form a very fine compromise.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield to the Senator from New Mexico.

Mr. ANDERSON. I should like to ask the chairman of the committee a question. It is a little difficult to understand this matter. Does the proposal meet the objections of the Indians?

Mr. O'MAHONEY. It does; and I will assure the Senator that, as a matter of law, it does precisely what the President wanted to do.

Mr. ANDERSON. The Senator from Arizona [Mr. GOLDWATER] and I have spent a great deal of time on the matter, because we tried to exempt the Indians of our State at the beginning. It was as a result of an amendment brought up on the floor that we got into this situation.

I do not desire another floor amendment to accomplish the same result. Is it certain that the Indians of New Mexico and Arizona—I shall limit my inquiry to those States at the moment—will not be brought under the bill unless the Indians themselves give prior approval?

Mr. O'MAHONEY. Unless the Congress should pass another bill, which the Senators from New Mexico and Arizona might sponsor, to transfer jurisdiction, and I do not think the Senators would do that.

The whole trouble arises from sections 6 and 7. With those sections out, the only States affected would be those which are named in the law, namely, California, Minnesota, Nebraska, Oregon, and Wisconsin.

If any State not named in the bill assumed jurisdiction over criminal and civil affairs of Indians in any particular State, it would be done under the consent contained in the law we are trying to amend. Any action already taken would not be affected by the repealer of those sections, because this repealer has no retroactive effect. The repealer, however, would absolutely protect the Indians of New Mexico, Arizona, and all other States, not already affected by the 1953 act, from loss of their jurisdiction without their own consent.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. O'MAHONEY. I yield to the Senator from Arizona.

Mr. GOLDWATER. I know the deep concern of the Senator from New Mexico over this legislation, because he and I joined forces in 1953 to try to prevent the happening of what the Senator suggested did happen.

Mr. WATKINS. Mr. President, will the Senator from Arizona yield to me for a question?

Mr. GOLDWATER. I yield.

Mr. WATKINS. I wish to call attention to the fact that sections 6 and 7 were not inserted in the bill on the floor of the Senate; that was done in the House.

Mr. ANDERSON. But there was an amendment made after the bill had been passed which did change the situation.

Mr. WATKINS. In the Senate?

Mr. ANDERSON. In the Senate.

Mr. WATKINS. What was that amendment?

Mr. ANDERSON. The amendment of the Senator from Wyoming [Mr. BARRETT], which I am sure he offered in complete good faith.

Mr. BARRETT. To which amendment does the Senator from New Mexico refer?

Mr. ANDERSON. To the jurisdictional provision.

Mr. BARRETT. I do not believe the Senator from New Mexico is correct about that. I am not on the Subcommittee on Indian Affairs at this time. The only matter brought up was the amendment offered by the committee itself.

Mr. ANDERSON. I accept the correction.

Mr. GOLDWATER. I think the Senator will recognize that the changes were made by House amendment.

After hearing the objections of the Indians in Arizona—and Arizona has more Indians than has any other State in the Union, so my primary concern is with them—I introduced S. 27, which was aimed at precisely what S. 51 proposes to do.

After discussing the matter with the chairman today, and with other members of the Committee on Interior and Insular Affairs, I believe that the suggestion made by the distinguished chairman to amend the bill so that sections 6 and 7 shall be removed from the original act will accomplish everything the Senator from Montana [Mr. MURRAY] and I desired to have accomplished by the bills which we introduced.

The Indians of my State, I feel confident, without having talked with them about the change, would welcome the deletion of the two sections from the law, as it would then apply to the five States specifically mentioned in the body of Public Law 280. If Arizona desired to come in under the provisions of the law at a later date, it could do so by State action or other action.

As a sponsor of the proposed legislation and as a member of the subcommittee, I concur in the suggestion made by the Senator from Wyoming.

Mr. O'MAHONEY. Mr. President, in order to present the matter formally and in parliamentary form, I offer the following amendment:

On line 3, page 1, of the bill, after the quotation marks and before the word "To," to insert the words "An act," which, of course, is the proper technical description of the act of August 15, 1953.

On page 2, line 1, to strike out all after "(67 Stat. 588)", including all of section 8, and substitute in lieu thereof the following language: "is hereby amended by striking out sections 6 and 7 of said act."

If that amendment is adopted, then it will be necessary to amend the title of the bill by inserting in the first line of the title, before the quotation marks, the words "an act". That is necessary to correct a technical error in the preparation of the bill.

Mr. President, that is the amendment I propose to offer.

Mr. LANGER. Mr. President, will the Senator from Wyoming yield for a question?

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). Does the Senator from Wyoming yield to the Senator from North Dakota?

Mr. O'MAHONEY. I yield.

Mr. LANGER. Aside from these five States, how will it affect other States?

Mr. O'MAHONEY. It will leave them exactly the way they are now, and they cannot assume jurisdiction unless they obtain the consent of Congress.

Mr. LANGER. The constitution of North Dakota and the constitution of Montana are different from the constitutions of other States.

Mr. O'MAHONEY. That is correct.

Mr. LANGER. I want to be certain about that.

Mr. O'MAHONEY. The Senator may be certain that if the amendment we propose is adopted the Indians will be protected.

Mr. ANDERSON. Mr. President, will the Senator from Wyoming yield to me?

Mr. O'MAHONEY. Certainly.

Mr. ANDERSON. Merely for the purpose of trying to establish the legislative history, let me say that I know the Senator from Wyoming understands the difficulties under which some of us who are not lawyers struggle. Will he state again whether this will or will not make it impossible to bring Indians under the civil jurisdiction of these States without their consent?

Mr. O'MAHONEY. No State which is not named in Public Law 280 of the 83d Congress and no State which, although not named in that law, took action under sections 6 and 7, will be affected by this amendment. No other State can take criminal or civil jurisdiction over the Indians under the 1953 act if this bill is passed.

Mr. ANDERSON. I should like to have the Senator state whether the Indians can be placed under the civil jurisdiction of the State without their consent?

Mr. O'MAHONEY. They cannot in any State except those States which are named in this act, Public Law 280, 83d Congress, and as to which the Indians consented, and in the States, like the State of Nevada, where there has been some action under this law.

Mr. WATKINS. Mr. President, if the Senator from Wyoming will yield, let me say that I doubt that it is the intention of the Senator from Wyoming to say that no Indians can be brought in without their consent.

Mr. O'MAHONEY. If I said that, I certainly made a mistake. What I mean is that this law, if amended as we recommend, will not empower any State to take over jurisdiction.

Mr. WATKINS. That is correct; the question of the consent of the Indians is not involved in the amendment. A State has to have the consent of Congress before it can move?

Mr. O'MAHONEY. That is correct.

Mr. WATKINS. And the question about the Indians giving or not giving consent would not be in this bill at all under the Senator's amendment?

Mr. O'MAHONEY. That is correct. Jurisdiction could not be assumed except by new special legislation.

Mr. WATKINS. That is correct.

In that connection, I should like to call attention to a part of my individual report on the bill S 51; I read now from page 3 of my report:

> 5. As a practical matter, no State that has a large Indian population is going to assume civil and criminal jurisdiction over Indians without Indian cooperation, and without some form of a termination program or a program for Indian contribution to the cost of law enforcement. Also, as a practical matter, in the States that already have assumed jurisdiction the system has worked well, even though the transition was originally opposed by the Indians.

I am calling attention to that statement because I recognized at that time that as a practical matter there would have to be a cooperative effort between the States, the Indians, and the United States. Although nothing was said about the consent of the Indians in sections

6 and 7, there would have to be consultation and cooperation with the Indians. In the past, the practice had been for each State, when it wanted jurisdiction and when it was in position to assume the obligations involved, to have a special bill introduced to take care of the situation so far as it affected that State and the Indians involved.

Also, I wish to call attention to the fact that these two sections, 6 and 7, were placed in the bill in the House of Representatives.

Mr. O'MAHONEY. Yes.

Mr. WATKINS. They were placed in the bill by amendments on the floor of the House of Representatives, as I understand.

When I talked to the President about these two sections, the President said he felt the Indians should be consulted, and that it had been reported to him that they had not been consulted with respect to those two sections, because they were added on the floor of the House of Representatives.

I certainly agree with the President that the Indians should be consulted. As a practical matter, it will be difficult for any State to take over jurisdiction of civil and criminal law in those States unless they have Indian help, particularly when there are large groups of Indians and when Indian property is for the most part held in trust by the United States. In other words, if the States cannot tax Indian property, the burden on the States will be a heavy one.

I had intended to submit an amendment to Public Law 280, or to introduce a separate bill, to authorize the Department of the Interior to enter into contracts with the States which were ready to assume jurisdiction over Indians, so as to provide for the payment of at least a part of the costs which would be incurred by reason of that action.

Mr. O'MAHONEY. I hope the Senator from Utah will introduce such a bill.

Mr. WATKINS. Because in many counties, three-fourths of the county is made up of Indian land, and that is where the Indians live; and those counties would be loaded with an extraordinary burden unless they received some help. In the transition period I think there should be some help on the part of the United States.

However, I assume that the Senator from Wyoming would not wish me to offer such an amendment at this time, although I have one prepared for that purpose.

Mr. O'MAHONEY. I may say to the Senator from Utah that it is important to have that measure introduced as a separate bill, so that we may submit it to the executive departments and have the opinion thereon of the Bureau of the Budget and the Bureau of Indian Affairs. I assure the Senator from Utah that if he will introduce such a bill, I will make it a matter of early action in the subcommittee, in order that we may dispose of the suggestion.

Mr. WATKINS. That same suggestion was offered in a statement made by the Senator from Oregon [Mr. MORSE] to the House subcommittee, on Indian affairs on June 27, 1955.

Mr. President, I ask unanimous consent to have the statement by the Senator from Oregon printed at this point in the RECORD.

Mr. O'MAHONEY. Mr. President, I hope such permission will be granted.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF HON. WAYNE MORSE, OF OREGON, BEFORE THE INDIAN AFFAIRS SUBCOMMITTEE OF THE HOUSE COMMITTEE ON INTERIOR AND INSULAR AFFAIRS, ON H. R. 5957

Mr. Chairman and members of the subcommittee, I appreciate your courtesy in permitting me to make a few brief remarks in support of the bill H. R. 5957.

The worthy purpose of this bill came to my attention not long ago when a resident of Klamath County, Oreg., told me of the heavy burden that has been assumed by the county in maintaining law and order and in providing law enforcement for the Klamath Indian Reservation. The county has been doing an outstanding job in this respect.

The problem of law enforcement at the Klamath Reservation came into focus shortly after the enactment of Public Law 280 of the 83d Congress. As you will recall, the act conferred upon certain States, including Oregon, jurisdiction over criminal offenses and civil causes of action originating on Indian reservations. It also removed legal impediments to the assumption of such jurisdiction.

Public Law 280 became effective on August 15, 1953, but it was not followed by the State's assumption of actual jurisdiction over civil and criminal matters on the reservation, nor were Federal grants-in-aid made available to Oregon by the United States to assist in defraying the costs of administering the program of Public Law 280. As a result of this sudden shift of responsibility to the State government, the problem of law enforcement on the Klamath Reservation became increasingly difficult.

The problem was further complicated by the fact that there was uncertainty as to whether a political subdivision such as Klamath County could act, with respect to criminal and civil matters originating at the reservation, under the jurisdiction conferred upon the State of Oregon by Public Law 280. The question was resolved when the courts of Oregon handed down a decision to the effect that such jurisdiction could be exercised by political subdivisions.

The people of Klamath County, Oreg., are to be commended for the manner in which they met the problem of law enforcement on the reservation. They did not wait for outside financial assistance; they undertook voluntarily an exacting task. Their success shows what can be accomplished through the intelligent, well-planned action of a local community.

Despite the fact that Klamath County does not receive tax revenues from the reservation and will not receive such revenues until 1958, it assigned 3 deputies and 1 peace officer for service at the Indian reservation. The cost is substantial. For example, in May 1955, the salaries and travel expenses of the deputies and peace officer totaled $1,697.78. Also, Klamath County spent over $5,000 for the purchase of two police vehicles to be used at the reservation.

We think it is unfair and unjust to place this financial burden solely upon the taxpayers of Klamath County when it, in fact, involves primarily a Federal responsibility. Until the termination of Federal supervision over the reservation, as provided by Public Law 587 of the 83d Congress (August 13, 1954), there remains an obligation on the part of the Federal Government to assist in maintaining law and order and in administering justice at the reservation. This obligation continues until all Federal supervision is terminated by proclamation of the Secretary of the Interior.

Furthermore, I am pleased to advise the committee that there is no question about the fact that assumption of this law enforcement responsibility by county officials has greatly improved the administration of justice for the better protection of both Indian and white residents of the county. Very responsible citizens and officials of the county have informed me that the activities of the county have proved to be of great benefit in handling juvenile problems, in preventing breaches of the peace on the reservation, checking quarrels between Indians and white, and in reducing crime generally. I wish to make it clear that the removal of a conflict of law situation between the reservation and county is resulting in greater protection to all inhabitants of the county, Indian as well as white. Outstanding leaders of the tribe would deplore a situation in which law enforcement would revert to so-called tribal justice. Most of the white residents of the county would resent it. Uniformity of justice and equal protection of the law calls for the administration of law enforcement by county officials. It keeps at a minimum conflicts and misunderstandings between the Indian population of the reservation and the rest of the county.

The Federal Government has a definite financial obligation to assist in this matter and all that H. R. 5957 does is authorize the Secretary of the Interior to enter into a contract with county officials to undertake a fair share of such costs.

H. R. 5957, if enacted, will clear away legal obstables to the assumption of a share of the burdens of law enforcement on the Indian reservation. Its objectives are excellent. I respectfully recommend it for favorable consideration by members of this committee.

Mr. BARRETT. Mr. President, will my colleague yield to me?

Mr. O'MAHONEY. Certainly.

Mr. BARRETT. Do I correctly understand that my colleague's amendment will leave section 8 in the bill, and will add new language?

Mr. O'MAHONEY. Oh, no; it strikes out everything on page 2 of the bill, including the proposed section 8.

Mr. BARRETT. Everything after the parenthesis?

Mr. O'MAHONEY. I believe the amendment I have offered is at the desk; if so, Mr. President, let me ask that the amendment be read.

The PRESIDING OFFICER. The amendment will be read.

The LEGISLATIVE CLERK. On page 1, in line 3, after the word "entitle", it is proposed to strike out "To" and to insert "An act to."

On page 2, in line 1, after "(67 Stat. 588)", it is proposed to strike out the remaining language of the bill, and to insert: ", is hereby amended by striking out sections 6 and 7 of said act."

Mr. O'MAHONEY. Mr. President, my amendment was to strike out all after the parenthesis in line 1, on page 2, so that the bill then will read:

Be it enacted, etc., That the act entitled "An act to confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes," approved August 15, 1953 (67 Stat. 588), is hereby amended by striking out sections 6 and 7 of said act.

Mr. BARRETT. I think that covers the matter very well.

Mr. O'MAHONEY. I offer that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendments of the Senator from Wyoming, on pages 1 and 2 of the bill.

The amendments were agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendment, the question is on the engrossment and third reading of the bill.

The bill (S. 51) was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The question now is, Shall the bill pass?

The bill (S. 51) was passed.

The title was amended so as to read: "An act to amend the act entitled 'An act to confer jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States, and for other purposes'."

Mr. O'MAHONEY. Mr. President, I ask unanimous consent to have inserted in the RECORD, immediately following the passage of the bill, a copy of the President's statement with respect to this measure.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

AUGUST 15, 1953.

STATEMENT BY THE PRESIDENT

Although I have grave doubts as to the wisdom of certain provisions contained in H. R. 1063, I have today signed it because its basic purpose represents still another step in granting complete political equality to all Indians in our Nation.

The bill confers jurisdiction on the States of California, Minnesota, Nebraska, Oregon, and Wisconsin, with respect to criminal offenses and civil causes of action committed or arising on Indian reservations within such States. The bill has resulted from a process of exhaustive study of the innumerable laws and regulations applying to our several Indian groupments and was arrived at in the States affected after long negotiation in full consultation with the Indians themselves. The Indian tribes regard this as a long step forward in removing them from the status of second class citizens.

Indeed, in the five States where State jurisdiction will soon be paramount, the Indians have enthusiastically endorsed this bill. The bill preserves the basic safeguards against loss of property rights accorded the Indians by Federal treaties, agreements and statutes, and further safeguards the tribal customs and ordinances of the tribes affected when not inconsistent with the general laws of the respective States.

Three Indian tribes that have effective law and order organizations of their own, asked to be excluded from the purview of the bill. These tribes are the Red Lake band of Chippewa, in Minnesota; the Warm Springs tribe in Oregon; and the Menominee tribe in Wisconsin. Because of their effective organizations, they are, in response to their wishes, excepted from this bill.

My objection to the bill arises because of the inclusion in it of sections 6 and 7. These sections permit other States to impose on Indian tribes within their borders, the criminal and civil jurisdiction of the State, removing the Indians from Federal jurisdiction, and, in some instances, effective self-government. The failure to include in these provisions a requirement of full consultation in order to ascertain the wishes and desires of the Indians and of final Federal approval, was unfortunate. I recommend, therefore, that at the earliest possible time in the next session of the Congress, the act be amended to require such consultation with the tribes prior to the enactment of legislation subjecting them to State jurisdiction, as well as approval by the Federal Government before such legislation becomes effective.

I am requesting the Secretary of the Interior to press forward vigorously with the program of cooperative study that he has already so successfully undertaken with the Indians. I also wish to express my earnest hope that the Governors of the several States will fully cooperate with the Secretary of the Interior in this program, and will ascertain the views of the Indians of their States in connection with any action proposed to be taken under sections 6 and 7 of the bill.

Much progress has been made and much greater progress will result through full consideration being accorded our Indian citizens.

Mr. WATKINS. Mr. President, I ask unanimous consent to have inserted at this point in the RECORD, immediately following the statement submitted to the Senator from Wyoming, the minority views on the bill.

There being no objection the minority views were ordered to be printed in the RECORD, as follows:

I believe that the enactment of the bill will be contrary to the basic philosophy of our constitutional form of government and that it will not be in the best interest of the Indians themselves.

I believe also that the bill should be returned to the committee for further consideration in view of these facts:

1. The Department of the Interior reported adversely on the bill.

2. No departmental witnesses were heard.

3. The alternative approach recommended by the President and by the Department, and which I proposed as S. 1606, was never considered or scheduled for a hearing by the committee.

The issue presented, as stated in its simplest terms, is whether we shall obtain from the Indians their consent, or whether we shall follow a procedure of consultation with the Indians before they are subjected to State, civil, and criminal jurisdiction. The issue is consent versus consultation. Although the immediate issue is restricted to civil and criminal jurisdiction, there will be an inevitable tendency to expand the principle to all other fields of Indian administration.

When the President approved Public Law 280, 83d Congress, he recommended that the law be amended to require full consultation with the Indian tribes, before State law is made applicable to them. He did not recommend that the consent of the Indians be required. This is clearly indicated in a subsequent letter from the President to the Commissioner of Indian Affairs, which is quoted in the Department's letter printed on page 3 of the committee report.

The majority report states that, historically, the Federal Government has dealt with the Indians on the basis of consent, and cites a few specific examples. As a matter of fact, however, the overwhelming mass of Indian legislation is not based upon Indian consent. The practice of negotiating and contracting with Indians by treaty or agreement was ended in 1871. Since that time most Indian legislation has been enacted by following the same procedures that are applicable to legislation for all other groups.

The committee's citation of the law repealing the Indian liquor legislation is misleading, because although the Indians do have the option of prohibiting the sale of liquor on an Indian reservation, they may not permit the sale in violation of State law. Furthermore, the committee's citation of the part of Public Law 280 that excluded the Menominee, Red Lake, and Warm Springs Reservations from its scope, nevertheless fails to point out that Public Law 280 included the Umatilla Reservation over the express and emphatic objection of the Indians of that tribe because Congress felt that such action was in their best interest.

The majority report also states that to deny the Indians the right to consent is to deny them the right of self-government. The unsoundness of this argument is apparent from the fact that State government is itself self-government, based upon the participation of the citizens of the State. Indians are full-fledged citizens and have the same right to participate in self-government through State and local procedures that is enjoyed by all other citizens. No one would allege that the inhabitants of any town in the United States are denied the right of self-government merely because their consent is not a prerequisite to the application of State law. Indians were made citizens in 1924 and they are entitled to no more and to no less than other citizens.

Rather than merely criticize the views expressed in the majority report, I prefer to advance the following impelling reasons why Indian consent should not be required:

1. Under our representative form of government, the consent of the governed is expressed through their elected representatives. The Indians are qualified voters, and they participate in the election of the Members to this Congress, which passes laws affecting them. It is inconsistent with our constitutional form of representative government to give any group of citizens the right to exclude themselves from laws of general applicability because they happen to be born of Indian blood.

2. The concept that the Indian peoples exist within the United States as independent nations has been rejected. The Indians have all the rights of United States citizenship, and they should not have additional political rights that are denied to non-Indian citizens. We cannot be placed in the position of recognizing a nation within a nation. To do so would require us to obtain Indian consent before making any laws applicable to them.

3. In many instances the Indians' law and order system has broken down. The non-Indian population surrounding such areas have a legitimate interest in extending the State system under such circumstances. It is not in the best interest of either the Indian or the non-Indian population to perpetuate the ineffective Indian system because of the lack of Indian consent.

4. It is a point of no little concern that many Indian law and order systems are financed with gratuity funds appropriated by Congress. Is it reasonable that by withholding consent the Indians can require the Federal Government to appropriate money for the administration of a separate law and order program?

5. As a practical matter, no State that has a large Indian population is going to assume civil and criminal jurisdiction over Indians without Indian cooperation, and without some form of a termination program or a program for Indian contribution to the cost of law enforcement. Also, as a practical matter, in the States that already have assumed jurisdiction the system has worked well, even though the transition was originally opposed by the Indians.

I have found it necessary to file these independent views because there was no adequate opportunity to develop them before the committee. The hearings that were held

by the subcommittee were for the purpose of hearing certain Indians who were then in Washington and who desired to testify on this and other pending legislation before returning to their reservations. This convenience was extended to them in order to avoid the added expense involved in requiring them to return to testify at a later time. There was no advance notice of the hearings and there was no indication that further hearings would not be held to obtain the views of the Department and other interested persons.

ARTHUR V. WATKINS.

Mr. O'MAHONEY. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an editorial entitled "Indian Consent," which was published in the New York Times of today.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

INDIAN CONSENT

Many Indian experts in this country—led by the Association on American Indian Affairs—have been expressing concern over the tendency to terminate Federal responsibility for the Indian tribes and to lessen various forms of Federal protection. They fear that such policies may leave the Indian prey once again to the kind of exploitation and degradation to which the white man subjected him decades ago.

While the Interior Department and its Bureau of Indian Affairs vigorously defend their approach, the lay critics, including representatives of numerous Indian tribes themselves, have repeatedly attacked the broad shift in emphasis by both administration and Congress away from guardianship over traditional Indian rights, privileges, and tribal organization.

As a case in point Congress passed more than 2 years ago a law authorizing any State to assume complete civil and criminal jurisdiction over all Indian reservations within its borders. We pointed out at the time that this bill was a threat to the historic rights of self-government of many Indian tribes, guarded by treaty, law, and custom, and we asked that it be vetoed. The President signed it, but in doing so did explicitly call for amendment "at the earliest possible time" to include provision for "full consultation" with the affected Indian tribes before such drastic change in their mode of life should become effective.

We do not think consultation is sufficient. We think that the key to the whole issue is Indian consent. The circumstances in which our tribal Indian populations find themselves are obviously different from those of any other American citizens, and we therefore think that the Interior Department is straining a point in stating that the principle of Indian consent "has most serious constitutional implication." A bill is in the Senate now to require consent by referendum before any State can assume civil or criminal jurisdiction over its Indian tribes. We think that such an amendment to the 1953 law is merely giving the Indian his just due.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that there be printed in the RECORD at his point as a part of my remarks several telegrams from Indian leaders in Arizona.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

TUCSON, ARIZ., *January 11, 1956.*

Hon. BARRY GOLDWATER,
United States Senate Building,
Washington, D. C.

DEAR HONORABLE SENATOR GOLDWATER: I have been informed that Senate bill 51 will reach United States Senate this week for a vote. The Apache Tribe would like to go on record to support bill 51, which was introduced by Senator MURRAY. So, Honorable Senator, we are supporting this very strongly, the bill 51. Please support that bill for us.

I believe that bill is to the consent of the Indians. I also notice that bill, S. 27, was introduced which is similar, but I would rather support S. 51. I think this bill, S. 51, quite important to protect the interest of the Indians; so please do all you can to support the interest of the Indians; so please do all you can to support this bill with us.

Sincerely yours,

JESS J. STEVENS,
Chairman, San Carlos Tribal Council.

PEACH SPRINGS, ARIZ., *January 11, 1956.*

Hon. BARRY M. GOLDWATER,
United States Senate Office Building,
Washington, D. C.:

The Hualapai tribe through its official governing body, the Hualapai Tribal Council, favorably endorses Senate bill S. 51, to amend Public Law 280, now before the United States Senate. The Hualapai Tribal Council respectfully urges the United States Senate to favorably vote for said bill.

RUPERT PARKER,
President, Hualapai Tribal Council, Hualapai Reservation, Peach Springs, Ariz.

TUCSON, ARIZ., *January 10, 1956.*

Senator GOLDWATER,
Senate Office Building,
Washington, D. C.:

Ten Papago tribe urges that you support Senate bill 51. Our people are learning to adopt our customs to State laws and are modifying our law and order code every few years to bring it closer to State law. Any arbitrary interference with these orderly changes will be very hard on our people please let us do it our way.

MARK MANUEL,
Chairman, Papago Council, Sells, Ariz.

MALADMINISTRATION IN OFFICE OF COLLECTOR OF INTERNAL REVENUE, PHILADELPHIA, PA.

Mr. WILLIAMS obtained the floor.

Mr. PASTORE. Mr. President, I realize that a number of Senators are desirous of making speeches. I regret very much that they have been delayed. Before he left, the majority leader suggested that we might pass two more noncontroversial bills. I am quite sure that they will not take as much time as did the preceding bill. If Senators will be patient, we can dispose of them. The Senators in charge of the two bills have been in the Chamber since 12 o'clock noon.

Mr. WILLIAMS. That is where they are supposed to remain. However, I shall be glad to yield, with the understanding that I do not lose my right to the floor, in order that certain bills may be passed.

The PRESIDING OFFICER. The Chair observes that the name of the Senator from Oklahoma [Mr. MONRONEY] was first on the list. The Chair recognized the Senator from Delaware on the assumption that he desired to speak on a certain bill.

Mr. WILLIAMS. I beg the Chair's pardon. The Chair recognized the Senator from Delaware because he sought recognition. I claim the floor in my own right. I am willing to yield with the understanding that I do not lose the floor, in order that certain bills may be disposed of. Otherwise I shall proceed to speak.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. PASTORE. Will the Senator yield long enough for us to dispose of the other two bills? They are short, and the explanations are very brief.

Mr. WILLIAMS. I shall be glad to yield with the understanding that I not lose my right to the floor. Otherwise I shall proceed.

Mr. President, last week a Federal grand jury in the city of Philadelphia, Pa., submitted a most damaging endictment charging serious maladministration in the office of the collector of internal revenue of that city.

The charges made by this group of grand jurors are such that they cannot be ignored by the Congress of the United States.

The entire report will be incorporated in the RECORD, but first I quote excerpts to emphasize the seriousness of the conditions in that office:

It is the unanimous conclusion of the grand jurors that two causes were directly responsible for what occurred. The first cause was the clear inadequacy of the procedures employed by the Internal Revenue Service to detect nonfiling by an individual liable for income tax. The second was serious maladministration in the office of the then collector of internal revenue.

In pointing out a specific case of how an individual with an income of over $1¼ million had gotten away without either paying any taxes or filing returns for the 8-year period between 1947 and 1954, the grand jury stated "that this was no mere coincidence, and finds from the evidence that the failure to expose Mr. Schofield's delinquencies involved both gross inefficiency and lack of integrity on the part of those responsible to take action."

The grand jury also pointed out in this report that this same individual had, over a period of years prior to this nonfiling and nonpaying era, been an habitual delinquent in his taxes, and the grand jury in emphasizing the maladministration of the Philadelphia office said:

One of the situations which should lead to prompt discovery of failure to file returns arises where the taxpayer owes income taxes for prior years. Where a taxpayer's past deficiencies are large, it is the duty of the officers charged with collecting his deficiencies to verify that he has filed his current returns. Mr. Schofield's situation was one in which such verification should definitely have been made. The evidence revealed not only failure to perform this duty, but criminal misconduct within the Internal Revenue Service.

I repeat:

The evidence revealed not only failure to perform this duty, but criminal misconduct within the Internal Revenue Service.

The grand jury states in this report that "from documentary evidence produced before them the grand jurors have concluded that Mr. Schofield's failure to file his returns for 1947 and 1948 was known in 1949," and that "from all of the evidence the grand jury reached the conclusion that Mr. Schofield's failure

to file his 1947 and 1948 returns was a fact known to the chief field deputy, and that this knowledge was improperly and illegally suppressed."

The grand jury did not return any indictments against the individuals involved and gave as the reason that one of the major officials involved had since died and the others were excused for lack of sufficient evidence to support indictment for offenses committed within the period of the statute of limitations.

I quote their exact language:

These officials and all other Internal Revenue Service employees who were examined denied knowledge of Mr. Schofield's failure to file returns until public announcement was made after his death. After full consideration the grand jury concluded that there was insufficient evidence to support indictment against any of them for offenses committed within the period of the statute of limitations. Their names are therefore not disclosed in this presentment.

In this report the grand jury not only charges gross inefficiency and maladministration in the Philadelphia office but also recommends additional legislation as being required.

I ask unanimous consent that a copy of the entire grand jury report of January 5, 1956, be incorporated in the RECORD at this point.

The PRESIDING OFFICER. Is there objection?

Mr. LANGER. Mr. President, reserving the right to object—and I shall not object—I should like to ask the purpose. Does the Senator feel that the Statute of Limitations has run, so that there can be no prosecution?

Mr. WILLIAMS. That is the report of the grand jury, but I feel that such serious charges and recommendations are involved in this report, both as to current conditions in the office, and as to the need for additional legislation, that the situation should be called to the attention of Members of Congress, in order that we may give attention not only to the administrative policy, but also to the possible need for additional legislation. I feel that both the Congress and the Department should give recognition to the questions raised in this report.

Mr. LANGER. If the distinguished Senator from Delaware will draft legislation along that line, the Senator from North Dakota will be delighted to join in sponsoring such legislation.

Mr. WILLIAMS. I am asking the department to recommend to the committee any additional legislation which it deems necessary, after this report has been studied both by the department and by the Congress.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Delaware?

There being no objection, the report was ordered to be printed in the RECORD, as follows:

IN RE GRAND JURY INVESTIGATION (MATTER OF INCOME TAXES OF LEMUEL B. SCHOFIELD)

PRESENTMENT

To the HONORABLE J. CULLEN GANEY, Judge of the United States District Court for the Eastern District of Pennsylvania:

The grand jury for the eastern district of Pennsylvania, convened by this court on October 11, 1955, submits herewith its presentment of the results of its investigation into the matter of the income taxes of the late Lemuel B. Schofield, Esq.

Lemuel B. Schofield, an attorney at law, who had been for many years a member of the Philadelphia bar, died on July 3, 1955. On August 7 it was disclosed that no Federal income tax returns had been filed by Mr. Schofield for 6 years before his death. The responsibility for the failure to detect such delinquencies was the purpose of the investigation.

At the outset of the investigation it was ascertained that the last Federal income tax return ever filed by Mr. Schofield was his return for the calendar year 1946. No returns were ever filed in his lifetime for the years 1947 to 1954, inclusive. It was unmistakably established that the failure to file these returns was deliberate. The persons whom Mr. Schofield had employed for many years to keep his books and to prepare yearly summaries of his income and expense, testified that they had prepared such summaries for each of the years in which Mr. Schofield had omitted to file returns and had presented them to him so that the returns could be prepared, as customary, by an accountant. There was further testimony that Mr. Schofield was repeatedly reminded of his delinquencies, commencing with that for the calendar year 1947, but that he never permitted any of the returns to be prepared.

A serious and permanent loss of revenue has resulted from the failure to assess and collect Mr. Schofield's taxes as they fell due. For the years 1947 to 1954, inclusive, Mr. Schofield's gross income, his net income (subject to audit), and the taxes assessed were as follows:

Year	Gross income	Net income	Taxes
1947	$137,127.08	$81,130.42	$47,039.86
1948	183,942.09	120,165.95	73,214.22
1949	159,267.83	98,644.64	56,423.06
1950	115,565.05	60,397.56	29,916.78
1951	209,874.73	131,366.07	92,099.15
1952	190,619.36	103,311.54	69,016.39
1953	184,388.84	89,640.08	57,065.07
1954	172,165.67	35,822.84	10,450.74
Total	1,352,950.65	720,479.10	435,225.27

The addition of penalties and interest bring the total assessments to $931,009.14. Mr. Schofield's net estate is estimated at approximately $280,000.

In the attempt to discover how a taxpayer having total income of over a million and a quarter dollars, on which over $425,000 in taxes was due, could file no returns for 8 years without being called to account, 21 witnesses were called, and all existing documents which were in any way pertinent examined.

It is the unanimous conclusion of the Grand Jurors that two causes were directly responsible for what occurred. The first cause was the clear inadequacy of the procedures employed by the Internal Revenue Service to detect non-filing by an individual liable for income tax. The second was serious maladministration in the office of the then Collector of Internal Revenue.

Findings as to procedures

The procedures used to detect the nonfiling of Federal income tax returns were described in detail by experts in the Internal Revenue Service. These procedures were found to be totally inadequate to accomplish their purpose. The most glaring defect was the absence of any system to check the filing of current returns by taxpayers who had filed returns in previous years. A card index is made each year of taxpayers filing returns in that year, but the cards are then filed away and are not used to determine whether the same taxpayers are filing in subsequent years. Prior to 1940 a "master card" system was in use, under which each taxpayer was assigned a permanent card on which records of filing were posted each year. These records were continuously checked for current filings and delinquencies were automatically detected. The system was abandoned when the volume of taxpayers was greatly increased by a broader tax base, and was not replaced by any comparable substitute. A system similar to that in use before 1940 would have brought Mr. Schofield's delinquencies to light, since he had previously filed returns for over 20 years.

The only procedure now in use by the Internal Revenue Service which is designed for the purpose of detecting nonfiling is the information return system. Employers are required to report the names of all wage earners on W–2 forms, and corporations must report the names of payees of dividends on form 1099. These information returns are processed at a clearing center to determine whether the names of all payees reported match with returns filed by the payees. Where the name of the payee on a W–2 or 1099 form is not associated with a return, the forms are returned to the collection district as unmatched documents. It is then the responsibility of the district to follow through and require the filing of the return if investigation verifies that none was filed. In theory this system will automatically disclose nonfiling by all wage earners and all stockholders receiving dividends. In theory it would have disclosed Mr. Schofield's nonfiling, since he received both salaries and dividends which were duly reported throughout his period of delinquency.

In practice the system was valueless throughout the period under investigation. By 1944 the volume of unmatched documents returned to the districts was too great to be handled by personnel available. For 8 years no attempt was made to solve the problem. The unmatched documents were never inspected, and were destroyed periodically. It was not until after reorganization of the Revenue Service in 1952 that steps were taken to restore the operation of this system. Instead of sending back to the districts a mass of documents that could not physically be examined, certain segments selected alphabetically are returned for examination each year. The system is now approaching effectiveness, but the change came too late to be of use in the Schofield case.

There are eight other ways by which failure to file Federal returns may be detected. None of these is specifically designed for the purpose. Their success depends in the first instance upon the chance that the situation causing inquiry will arise. In the second instance success depends on the efficiency and integrity of the officials presented with the opportunity. It was disclosed by the evidence that in the course of the contacts of the Internal Revenue Service with Mr. Schofield 5 of the 8 situations which could lead to detection of his failure to file did in fact arise. The grand jury has concluded that this was no mere coincidence, and finds from the evidence that the failure to expose Mr. Schofield's delinquencies involved both gross inefficiency and lack of integrity on the part of those responsible to take action.

Findings as to maladministration

One of the situations which should lead to prompt discovery of failure to file returns arises where the taxpayer owes income taxes for prior years. Where a taxpayer's past deficiencies are large, it is the duty of the officers charged with collecting his deficiencies to verify that he has filed his current returns. Mr. Schofield's situation was one in which such verification should definitely have been made. The evidence revealed not only failure to perform this duty, but criminal misconduct within the Internal Revenue Service.

Mr. Schofield was a chronic delinquent in the payment of his income taxes. For many

years he had failed to pay the full taxes due on the returns he had filed, and warrants for unpaid taxes were constantly outstanding in the hands of tax collectors. By the end of 1947 his delinquencies had reached serious proportions. He had paid only half of his taxes due for 1944, a small fraction for 1945, and none of the tax due on his 1946 return. For these years he owed over $39,000. Warrants for collection of these deficiencies were outstanding, but the efforts at collection had been half-hearted, and the collections were comparatively small. In April of 1948 these warrants were assigned to a deputy collector who commenced vigorous action. This deputy succeeded in collecting over $10,000 from Mr. Schofield in less than 4 months and seemed well on his way to collect the balances owed. Nevertheless, in November 1948 he was called off the case and ordered to surrender the Schofield warrants. This order was given him without explanation by the chief field deputy, the official having supervision over collection of all delinquent taxes in the district, and a direct subordinate of the Collector of Internal Revenue. In obedience to this order the Schofield warrants were turned over to the chief field deputy. From November 1948 until January 1951 no collections whatever were made on Mr. Schofield's tax deficiencies. During this period his delinquencies, which had been reduced to $29,000 by the deputy who was called off the case, rose to $37,000 as the result of audits of his returns. During the same period Mr. Schofield's net income was $159,000, but he neither filed returns nor paid anything on his delinquent taxes.

The chief field deputy who had directed the surrender of the Schofield warrants died in 1952. Every one of his subordinates who was in any way concerned in the Schofield tax collections was called before the grand jury. There were some who knew of the incident resulting in the failure to make any collections from Mr. Schofield for over 2 years. They all denied knowledge of the reason or motive for the action of the chief field deputy.

From documentary evidence produced before them the grand jurors have concluded that Mr. Schofield's failure to file his returns for 1947 and 1948 was known in 1949. There was discovered among Mr. Schofield's effects a letter to him from the chief field deputy dated October 10, 1949, which read as follows:

"DEAR MR. SCHOFIELD: It is requested that you call at my office, room 1100, Gimbel Building, 35 South Ninth Street, Philadelphia 7, Pa., at 11 a. m., Wednesday, October 19, 1949.

"The enclosed financial statements, forms 433, are to be executed and presented in duplicate at the time of the conference. Please bring copies of income tax returns as filed for the years 1947 and 1948."

A memorandum of Mr. Schofield's shows that the date of the conference was changed to October 26. It was established that this letter was personally dictated by the chief field deputy. An examination of all of his case files in existence disclosed that in some 1,500 cases which he personally handled he had called upon a taxpayer for copies of returns in only 1 other case. In that case the chief field deputy's notes in the file showed that he had called for copies of the returns because the originals had not been found after search. It was the practice in all cases handled by the chief field deputy to have written memoranda made of his conferences with taxpayers, which were placed in the file of the taxpayer along with the case correspondence and notes as to the action decided upon. The evidence established that a file for Mr. Schofield's case had been maintained. No such file could be located, however, although in the course of an extensive search over 1,500 of the chief field deputy's case files covering the period from 1947 to 1950 were located, and appeared to be intact.

From all of the evidence the grand jury reached the conclusion that Mr. Schofield's failure to file his 1947 and 1948 returns was a fact known to the chief field deputy, and that this knowledge was improperly and illegally suppressed.

In November 1950, the warrants for collection of Mr. Schofield's tax deficiencies for 1944 to 1946 were reassigned to a deputy collector, who brought about the serving of levies in January 1951. After a conference between Mr. Schofield and the chief field deputy, the levies were withdrawn and an agreement was made under which Mr. Schofield was permitted to liquidate these deficiencies then amounting to $37,000, over a period which extended late into 1953. During this period the deputy collector assigned to the case and his supervisor were admittedly charged with the duty of checking on Mr. Schofield's current filings. Their failure to do this was, at the least, gross inefficiency. When Mr. Schofield in late 1953 completed payment of the deficiencies on his taxes through 1946 his accounts were cleared and he had from that time on no further dealings with the collection officials.

These officials and all other Internal Revenue Service employees who were examined denied knowledge of Mr. Schofield's failure to file returns until public announcement was made after his death. After full consideration the grand jury concluded that there was insufficient evidence to support indictment against any of them for offenses committed within the period of the statute of limitations. Their names are therefore not disclosed in this presentment.

In two other situations which arose in Mr. Schofield's dealing with the Revenue Service, efficient and intelligent performance of duties would have exposed or prevented his delinquencies.

Late in 1947 Mr. Schofield's returns for 1944 to 1946 were audited. At this audit it was learned that no estimated returns had been filed for any of those years, and penalties were imposed. Had the examining agent insisted upon the filing of an estimated return for 1947, as was his duty, the subsequent delinquencies might never have occurred.

From 1949 to 1954 Mr. Schofield had regularly made requests for extensions of time to file his income tax returns. The requests were granted (each for 30 or 60 days) but no further attention was given the matter and the failure to file the returns covered by the requests passed unnoticed. Mr. Schofield's letters requesting these extensions were filed away and are still in existence. The excuse for failing to verify the filing of these returns was that such action was not required. The Grand Jury has been advised that directives now specifically require followup of extension requests.

There were yet two further ways in which the Revenue Service had the means at hand to discover these delinquencies. One arose out of the fact that Mr. Schofield until his death regularly filed employer's Federal withholding returns. A crosscheck of his income tax returns, which is not an infrequent practice, would have revealed the whole situation. It did not happen. The final failure to employ a means at hand was an unfortunate coincidence. In late 1950, a revenue agent working on the case of another taxpayer felt that information in Mr. Schofield's returns for 1948 and 1949 could be helpful. He requested a requisition of those returns from his group chief. This request was denied for the reason that such a collateral investigation would be unproductive.

The end result was the failure of all the means of detection through a combination of inefficiency, design, and chance. The discovery of Mr. Schofield's delinquencies after his death was brought about by information from a person unconnected with the Revenue Service.

Recommendations

It is obvious from the facts disclosed by this investigation that the procedures of the Revenue Service must be drastically overhauled. The grand jury strongly recommends that a system be reinstated for keeping a complete record of individuals liable for income tax which is checked annually to verify current filings. The system should be adapted for machine operation by assigning a permanent account number to each taxpayer. The present system of matching information documents against returns should be integrated into the master index system. This system should be made as nearly foolproof and tamperproof as possible by substituting machine operation for manual operation to the greatest possible extent.

It is recommended that an effective control system be placed over the collection procedures, to avoid or detect such scandalous incidents as occurred in the Schofield case. One of the worst defects found in the organization of the collector's office was that such controls as were in use were left in charge of the very officials over whom the controls were intended to operate. This condition made it readily possible for prolonged delays in collection action to go uncorrected. A system of external controls appears essential.

The grand jury heard considerable evidence as to the action which has been taken to correct the causes of maladministration within the Internal Revenue Service. It is clear that the reorganization, which began to show its results in 1953, has already eliminated the condition of complete disorganization which existed in the former office of the collector of internal revenue for this district. There was convincing evidence of a marked improvement in morale in the present collection division within the last two year. The newly organized inspection service is a vast improvement over its predecessors. Appointments and promotions are apparently now being made on merit, directly contrary to the practice found to exist before the reorganization when in some instances promotion seemed the reward for neglect of duty. The vigorous continuance of such measures is obviously required.

Finally, the grand jury recommends legislation imposing severe penalties for nonpayment of income taxes. It was clear from the evidence that the practice of deliberately failing to pay taxes is widespread. It had been carried on by Mr. Schofield for nearly 20 years. If returns are filed, the only penalty for nonpayment of the taxes is the imposition of interest, which has proved an insufficient deterrent. Criminal penalties should be considered for the most flagrant cases.

The grand jury feels that no time should be lost in taking the corrective action recommended. The loss of revenue in the Schofield case alone is sufficient proof of the need for immediate action.

Wetterau, Julia Morris, foreman, grand jurors.

JANUARY 5, 1956.

Mr. WILLIAMS. In addition to calling the grand jury report to the attention of the Congress, I think it should also be called to the attention of Members of Congress that the Treasury Department had been put on notice as to the conditions in that office over 4 years ago. There is no reason why the condition should have gone so long undetected.

For example, as early as December 28, 1951, I wrote the then Commissioner of Internal Revenue, Mr. John B. Dunlap, calling his attention to the Philadelphia situation. My letter was as follows:

UNITED STATES SENATE,
Washington, D. C., December 28, 1951.
Mr. JOHN B. DUNLAP,
Commissioner of Internal Revenue,
United States Treasury Department,
Washington, D. C.

DEAR MR. DUNLAP: I am receiving many complaints from taxpayers in the Philadelphia area, calling my attention to the fact that they are receiving bills for taxes for which they have receipts. These complaints are coming in in such number that I believe the Philadelphia office should be checked.

I would like to see a copy of the most recent report by your Audit Section of this office to see what conditions they found at their last examination.

Yours sincerely,
JOHN J. WILLIAMS.

That letter was replied to under date of January 17, 1952, at which time Mr. Dunlap said that similar complaints had been called to his attention. He stated that a supervisor of accounts was making an examination and that the supervisor would take the necessary steps to clean up the situation.

Later, under date of January 22, 1952, I again wrote Mr. Dunlap, to which he replied under date of January 31, 1952.

Again, on February 29, 1952, I wrote to Mr. Dunlap and I again called his attention to the urgency of his taking some steps to correct the conditions shown to exist in the Philadelphia office. That letter was replied to under date of March 7, 1952. In that letter Mr. Dunlap said:

The examination is being pushed as rapidly as possible commensurate with completeness. I expect that it will be some weeks yet before it is completed to my satisfaction.

On September 29, 1952, which was a considerable length of time after the matter had first been called to Mr. Dunlap's attention, I directed another letter to Mr. Dunlap, asking what conditions he had found to exist in the Philadelphia office.

Mr. Dunlap replied to my letter under date of October 13, 1952, in which he said that, although the examination had been completed, information as to the conditions that were found to exist would be made available only to the Committee on Finance, but that the report would not be made available to me.

I was given no information in answer to my inquiry, or with respect to any of the allegations that were turned over to him, or concerning any reports he had received from his investigators.

I ask unanimous consent that the entire correspondence be incorporated in the RECORD as a part of my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

UNITED STATES
TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER
OF INTERNAL REVENUE,
Washington, D. C., January 17, 1952.
Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: I have delayed answering your letter of December 28 relative to complaints you say you are receiving concerning our Philadelphia office until I could ascertain the facts.

One of our best Supervisors of Accounts and Collections, with a complete staff, has been examining the Philadelphia office meticulously since November 1, 1951, and will correct any deficiencies found.

It is true that a number of bills on accounts which had been paid were sent out by that office. This was occasioned by the fact that the remittances had been placed in suspense accounts pending identification, and due to shortage of help, it was impossible to identify the remittances and post them to the proper accounts as quickly as we usually do.

The Supervisor in Charge making the examination advises me that to date he has found nothing seriously wrong with operations of the Philadelphia office.

Sincerely yours,
JOHN B. DUNLAP,
Commissioner.

UNITED STATES SENATE,
Washington, D. C., January 22, 1952.
Mr. JOHN B. DUNLAP,
Commissioner of Internal Revenue,
United States Treasury Department,
Washington, D. C.

DEAR MR. DUNLAP: With further reference to your letter of January 17, 1952, regarding conditions existing in your Philadelphia office, you state that the Supervisor in Charge advised you that to date "he has found nothing seriously wrong with operations of the Philadelphia office."

Will you please furnish for my information a copy of the summary of the Supervisor in Charge which accompanied his most recent audit.

Yours sincerely,
JOHN J. WILLIAMS.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER
OF INTERNAL REVENUE,
Washington, D. C., January 31, 1952.
Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: In reply to your letter of January 22, 1952, you are advised that the supervisor of accounts and collections checking the Philadelphia office has not completed his investigation and therefore has not submitted his final report. We do not anticipate that he will complete his investigation before another 6 weeks have elapsed.

Sincerely yours,
JOHN B. DUNLAP,
Commissioner.

UNITED STATES SENATE,
Washington, D. C., February 29, 1952.
Mr. JOHN B. DUNLAP,
Commissioner, Bureau
of Internal Revenue,
Treasury Department,
Washington, D. C.

DEAR MR. DUNLAP: On previous occasions I have called your attention to the fact that I was suspicious of the conditions in the Philadelphia office of the Bureau of Internal Revenue.

I am not questioning the sincerity of your reply that there is nothing seriously wrong in that area; however, I continue to get complaints, and the nature of those complaints is such that I cannot help but feel there must be something radically wrong in the management of that office. We both know that loose management promotes conditions where irregularities can prevail.

As soon as you receive a report from the supervisor of accounts and collections, whose duty it is to audit that office, I would appreciate seeing a copy.

Yours sincerely,
JOHN J. WILLIAMS.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER
OF INTERNAL REVENUE,
Washington, D. C., March 7, 1952.
Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: In reply to your letter of February 29, 1952, relative to our examination of the office of the Collector of Internal Revenue at Philadelphia, Pa., you are advised that since our last correspondence on this subject I have found it advisable to greatly broaden the scope of the examination.

The examination is being pushed as rapidly as possible commensurate with completeness. I expect that it will be some weeks yet before it is completed to my satisfaction.

Sincerely yours,
JOHN B. DUNLAP,
Commissioner.

UNITED STATES SENATE,
Washington, D. C., September 29, 1952.
Hon. JOHN B. DUNLAP,
Commissioner of Internal Revenue,
Treasury Department,
Washington, D. C.

DEAR MR. DUNLAP: Earlier this year we had a series of correspondence relative to the conditions existing in the Philadelphia, Pa., office, and on March 7, 1952, you said that you had found it necessary to greatly broaden the scope of your examination but that you expected to have a report within the next few weeks.

I notice from tonight's paper you are now in the process of reorganizing this office.

I would appreciate having a report on the conditions as you found them.

Yours sincerely,
JOHN J. WILLIAMS.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER
OF INTERNAL REVENUE,
Washington, D. C., October 13, 1952.
Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

DEAR SENATOR WILLIAMS: I have your letter of September 29, 1952, stating that you would appreciate a report on the conditions existing in the Philadelphia, Pa., office as revealed by our periodic examination thereof.

I will be most happy to furnish this report to the Finance Committee of the Senate upon proper request from the chairman thereof.

Sincerely yours,
JOHN B. DUNLAP,
Commissioner.

Mr. WILLIAMS. The last letter is dated October 13, 1952. In that letter I was advised that the information would be made available only upon application of the Committee on Finance.

At that time Congress was not in session.

Beginning in January 1953—on January 29, to be exact—I called this matter to the attention of the Committee on Finance. At that time I urged that we should continue the investigation of the Treasury Department. In particular, I emphasized the need of examining the situation in the Philadelphia office. In emphasizing the need for such an examination I outlined to the committee my previous correspondence which I had had with the Treasury Department, and recited some of the cases which had been called to my attention.

As Senators will remember, I was unsuccessful in persuading the committee to continue the investigation.

On March 30, 1953, as appears in the CONGRESSIONAL RECORD, I incorporated a letter in the RECORD, which I had directed to the chairman of the Committee on Finance, the Senator from Colorado [Mr. MILLIKIN]. The letter is dated March 18, 1953. In that letter I outlined a series of allegations with respect to certain offenses throughout the country. In the last paragraph I specifically mentioned the Pennsylvania area as one of the areas which needed to be examined.

I ask unanimous consent that my letter of March 18, 1953, be printed in the RECORD at this point. It was originally printed in the CONGRESSIONAL RECORD on March 30, 1953.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

MARCH 18, 1953.

The Honorable EUGENE D. MILLIKIN,
Chairman, Committee on Finance,
United States Senate,
Washington, D. C.

DEAR SENATOR MILLIKIN: In accordance with your request I am outlining as nearly as possible the scope of the investigation which I think should be explored by a special subcommittee of the Senate Finance Committee.

In so doing I want it understood that I am not entering charges against any particular district office or individual in the Treasury Department; however, during the past few months certain allegations have been made which if correct should be exposed.

Among these allegations which should be further investigated are:

1. Bribes: Charges that certain employees (or recent employees) had accepted contributions or bribes from taxpayers whose cases they were handling.

2. Compromise settlements: Many instances have been discovered where compromise settlements have been made for small fractions on the basis of inability of the taxpayer to pay. Such settlements have been made without obtaining from the taxpayer the required financial net-worth statement. Large racketeers are among those who have settled their tax obligations for small factions without filing this net worth statement.

3. Overassessments: Charges that certain Government agents have deliberately overstated the taxpayers' deficiencies solely for the purpose of using such overstated figures for bargaining in compromise settlements.

4. Influence: Charges that undue pressure has been exercised to influence decision on certain tax cases.

5. Collections: There is one case which has been reported to the full Finance Committee wherein a collector of Internal Revenue in one of the mid-western offices just a few days prior to the deadline for the filing of his financial statement under the new Reorganization Act converted approximately $40,000 of unexplained cash into Government bonds. While we fully recognize that there is no law against a man's having cash in his possession, nevertheless for a collector of Internal Revenue to show up with $40,000 of unexplained currency raises a question which should be explored further.

6. Abatements: The allegation has been made that in certain collectors' offices, particularly in the New York area, unusually large amounts of taxes have been abated during recent months without the proper effort being made toward collection. A sample check should be made of at least one area, and if the fears are justified the check should be continued until satisfaction can be established that such practices were not prevalent throughout the Department.

7. Racketeers: The Kefauver Crime Committee made the specific charge that prominent members of the underworld were being given preferential treatment by the Treasury Department. Last year in conjunction with Commissioner Dunlap a sample check was made of 10 of the Nation's top racketeers, and it was found that in 7 of the 10 cases proper attention had not been given toward auditing or collecting taxes from this group. As a result of that sample check a further study should be made to determine who was responsible for this undue leniency.

8. Improper delay: Allegations have been made that large tax cases have been pigeonholed until the statute of limitations for criminal prosecution has expired, while the civil case unduly delayed until collection possibilities were negligible.

9. Audits: At irregular intervals the various district offices are audited by the Accounts and Collections Division (comparable to bank examiners); however, these reports are submitted to the Department here in Washington. In the past there have been many instances where damaging reports have been completely ignored. The subcommittee should request from the Department copies of these routine audit reports for those areas against which complaints are received, with particular attention being given to the Pennsylvania, California, and Illinois areas.

Yours sincerely,

JOHN J. WILLIAMS.

Mr. WILLIAMS. Mr. President, under date of August 22, 1955, after the most recent disclosure, I directed the following letter to the Honorable T. Coleman Andrews, then Director of Internal Revenue Service:

UNITED STATES SENATE,
Washington, D. C., August 22, 1955.

Hon. T. COLEMAN ANDREWS,
Commissioner of Internal Revenue, Department of the Treasury, Washington, D. C.

DEAR MR. ANDREWS: On several previous occasions I have called both to your attention and to the attention of your predecessor Mr. Dunlap certain complaints that the accounts in the Philadelphia Office were not being properly supervised and maintained. Cases involving duplicate and even triplicate payments have been noted, and recently there was disclosed the other extreme—a prominent citizen, Mr. Lemuel B. Schofield was not even filing any returns.

With the records of an office being maintained in such a manner that duplicate, triplicate, or no payments cannot be disclosed until they are first called to the attention of the Bureau by outsiders I am glad to note from the press that at last a more detailed examination of this office has been authorized.

In this connection I would appreciate receiving a copy of the report of the examiners when the new investigation has been completed.

Yours sincerely,

JOHN J. WILLIAMS.

On September 7, 1955, I received an acknowledgment from Mr. Andrews, in which he said he would be happy to see what he could find out and would submit a report on it. That is the last information I had until the grand jury rendered its report of last week.

I ask unanimous consent that the letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES TREASURY DEPARTMENT,
Washington, D. C., September 7, 1955.

Hon. JOHN J. WILLIAMS,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: I have your request of August 22, 1955, for a copy of the report of the investigation being made by the regional commissioner at Philadelphia to determine what circumstances or conditions existed which permitted to go undetected the alleged failure of Lemuel B. Schofield to file Federal income-tax returns for several years.

We will be happy to provide you with such information as may be properly disclosed when the report has been received and studied.

Very truly yours,

T. COLEMAN ANDREWS,
Commissioner.

Mr. WILLIAMS. Mr. President, under date of March 16, 1955, I incorporated in the CONGRESSIONAL RECORD a list of delinquent accounts in the various tax-collection districts of the United States. In that list was included the office of the city of Philadelphia. For the information of the Senate, I should like to read the situation as it existed in the Philadelphia office as of March 16, 1955.

At that time the delinquent accounts in that office amounted to $63,450,420.

The withholding tax cases delinquent totaled 16,991 and the amount of money involved was $15,027,004.90.

There were 74,363 delinquent individual tax cases and the amount of this delinquency was $42,436,595.51.

Delinquent corporation tax cases numbered 366, and amounted to $2,916,008.74.

In the case of corporation taxes, it should be noted that all of this might not have been actual delinquencies—although I do not know to what extent—this could be due to the fact that legally some of the corporation taxes were being paid in installments.

There were 3,078 delinquent cases on excise taxes, amounting to $2,199,549.84. Estate and gift taxes amounted to three cases, and $197,777.08. Delinquent unemployment tax, 1,023, amount of $673,-483.93.

I have asked the Internal Revenue Service for a more recent statement, which I expect to have available in the near future. I hope it will show the status of the accounts in that office to have improved since that date.

I have called the attention of the Senate to this grand jury report because I believe in this instance not only the Department of the Treasury, but Congress also, and, specifically, the two Committees on Finance, have the responsibility to study the grand jury report in connection with the allegations and recommendations which are made therein. To the extent that the charges involve inefficiency and mismanagement or maladministration, it is our responsibility to correct. To the extent that it shows the need for the enactment of additional legislation, we should likewise give that subject our prompt attention.

The men involved are not named by the grand jury. The statute of limitations has expired in these cases, and since they could not be prosecuted, the grand jury did not mention names.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I shall be glad to yield in a moment. However, Mr. President, I do think that the American people and particularly the taxpayers in the Philadelphia area, have a right to know the facts and in all fairness to all other employees in that office who were

not involved they should not be left under any cloud. Therefore, it seems to me that those responsible and charged in the indictment should be named. The charges should be outlined even at this late date and an opportunity given to those involved to answer those charges.

We have a right to have that information. Those people who were guilty and are still on the Federal payroll should be removed forthwith. Although the statute of limitation may have expired, that fact does not excuse the moral question involved.

I believe that every official involved in this situation who knew about the existence of these conditions since 1949 and did nothing about it should be identified.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. WILLIAMS. I yield.

Mr. LANGER. Did the Senator, in 1949, 1950, 1951, 1952, 1953, 1954, and 1955 bring this matter to the attention of the Attorney General?

Mr. WILLIAMS. No; I did not do so. I did not do it because I could not prove the charges and also at that time under the law, the Attorney General had no legal right to investigate the Treasury Department or any of its employees even though evidence of fraud had been presented.

That ridiculous situation was not corrected until late 1953 when Congress amended the law upon my request. I did call the matter to the attention of the Treasury Department, and I asked them to check on it but could get no report as to what they found. It seems to me the very least they could have done was to tell me whether the allegations submitted were founded or unfounded. They refused to give me any report whatever on the matter. Therefore, I do not know what the investigations disclosed. I do know, however, that no action was taken. Last week the grand jury brought forth the damaging indictment to which I have referred.

This grand jury report specifically charges certain unidentified officials as having been guilty of concealing evidence of irregularities until after the Statute of Limitations had expired. Those officials should be identified.

Mr. LANGER. Did the Senator get any report from the Treasury Department?

Mr. WILLIAMS. No; I did not. I referred to the Department for their investigation every allegation received except that I did not give them the source of my information. Some of the complaints refer to double and triple billing for tax. One man had paid his tax and then received bills on four different occasions. He kept explaining to the Department that he had paid his tax. They ignored his letters in which he gave the date on which the bill had been paid. He sent me a photostatic copy of the check. It showed that it had been properly cashed. Of course I do not know whether it had been properly credited. The Department went so far as to threaten the sale of the man's property for taxes which had been paid. Finally the Department had to admit that it had made an error and that the man's account had been paid up for two or three years.

They might have excused that as an error once but it kept being repeated thereby making it clear that to say the least there was gross inefficiency in that office. Still nothing was done.

There are any number of these complaints, Mr. President. In the case to which I have just referred their attention was called four times to the fact that the bill had been paid. Each time the man would receive a bill he would write back and tell them when it had been paid. Of course, Mr. President, I recognize the fact that in bookkeeping matters errors can be made, but when a man calls it to their attention four times, surely something was wrong.

In one case there was an amount of $89 involved, and they were trying to attach the man's wages for payment. He kept repeating the fact that instead of him owing the Government they owed him $89. It took them 2 years to get that situation straightened out, and then they found the he was correct only after I entered the case.

There were entirely too many cases of that kind pending which showed gross inefficiency. They were called to the Department's attention 4 years ago, and they did not do anything about it. That is the indictment against the Department. They should now tell us the whole story and put the names on the record and let us know whether or not those who have committed the errors are still on the public payroll.

Mr. President, I ask unanimous consent that an editorial appearing in the Philadelphia Inquirer of January 7, 1956, in which they raise these same unanswered questions be incorporated in the RECORD as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GRAND JURY REPORT ONLY A START IN SCHOFIELD CASE

The Federal grand jury report on large-scale tax delinquencies of the late Lemuel B. Schofield raises as many questions as it answers. That's why it can be regarded only as a start toward cleaning up the shocking situation it reveals.

There are two key questions:

First, how much did Schofield owe the Government, and what has been done—or should be done—to collect?

Second, who in the Internal Revenue office was responsible for the astounding failure to collect Schofield's taxes at a time when ordinary taxpayers were made to pay in full, and on time?

With respect to the first question, the grand jury cites Schofield as owing the United States a total of $931,009. It notes that the Schofield estate is estimated at $280,000. But no suggestion is made as to an inquiry to see where his huge income was siphoned off, and how it might be recovered to settle his debt to the Nation.

As to the second question, the grand jury mentions various officials but since "there was insufficient evidence to support indictments against any of them within the period of the statute of limitations * * * their names therefore are not disclosed." Most of us will ask: Why not?

The jury's report finds that Schofield's failure to file returns was "deliberate"; that the failure was known in the Internal Revenue Bureau; that the knowledge was "improperly and illegally suppressed;" that the file on Schofield's case could not be located; and that such attempts as were made to collect his taxes were halted within the Bureau.

When Federal Judge J. Cullen Ganey asked why the grand jury presentment was made at all, since no indictments were returned, United States Attorney W. Wilson White replied that the purpose was to expose "a very mysterious case" and reveal "deplorable conditions" in the Internal Revenue Service.

That being so, Mr. White should now proceed vigorously to discover the whereabouts of Schofield's other income, and fix responsibility not on phantoms but on actual people in the Revenue Bureau. Even if those people cannot be prosecuted due to the statute of limitations—they certainly ought to be fired, and their other activities put under closest scrutiny.

This grand jury report is only a start—not a finish—to the Schofield case.

Mr. LANGER. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS. I yield.

Mr. LANGER. Has the distinguished Senator read the Thorpe case arising in North Dakota, in which Mr. Thorpe was arrested? The matter dragged along through 1951, 1952, 1953, and 1954. It was taken up at St. Paul, Minn., and in the regional office at Chicago. Finally it came before the Attorney General in Washington. Then the case went into the Federal court at Fargo, N. Dak. It went along for a week, and then on motion of the United States attorney it was dismissed when the attorneys for the defense showed that the men employed by the Internal Revenue Bureau had made the mistakes. In one case there was an error of $25,000; in another case, $2,000; and in another case, $6,000. The United States attorney stated in open court that the prosecution never should have been undertaken.

If the Senator from Delaware wishes me to do so, I shall be glad to furnish him with the information.

Mr. WILLIAMS. I should be glad to see it. I am not familiar with that case. Certainly the Department has a responsibility to protect the good name of every taxpayer the same as to protect the name of their good employees and let us not forget that the overwhelming majority of Government employees are honest.

Mr. LANGER. I agree with the Senator.

Mr. WILLIAMS. In some of the cases I called to their attention they were carrying individuals on their books and charging them with delinquency, when that was not true. It is inexcusable that the matter had to be called 3 or 4 times to their attention, and they did nothing to correct their errors. I admit that errors can occur, but certainly they have a responsibility to pay some attention to such complaints.

Let us hope that the new Commissioner who is just assuming his office will prove to be diligent in such cases.

It is mandatory that this agency of the Government which handles such a large percentage of our income maintain the confidence and respect of the American people.

I urge that every Member of Congress read this grand jury report, and that the Treasury Department give to the Congress their answer to the serious questions raised therein.

ORDER OF BUSINESS

Mr. MALONE. Mr. President, I understand that the acting majority leader has a matter to bring before the Senate.

Mr. PASTORE. Mr. President, I understand that one of the bills involves really a question of repassage, and I understand that it will not take much time.

Mr. MALONE. Mr. President, I do not intend to take very much time, but, in my opinion, what I shall have to say is more important than are the bills which are about to be passed. I am willing to yield for one of those bills. I shall yield only for one of them.

Mr. PASTORE. One of them involves only a formality.

Mr. MALONE. That is the one for which I intend to yield.

Mr. MAGNUSON. Will the Senator yield for the one that involves a formality?

Mr. MALONE. Yes. I do not wish to be interrupted when I begin my remarks.

Mr. MAGNUSON. We have been waiting all afternoon.

Mr. MALONE. So have I; and there is a line of Senators ready to speak, and it will be midnight before we get started.

Mr. MAGNUSON. It will take only about half a minute.

Mr. MALONE. I yield for half a minute, and then I shall start on my remarks.

AMENDMENT OF MERCHANT MARINE ACT OF 1936

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to consider Calendar 1175, Senate bill 2286.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (S. 2286) to amend the Merchant Marine Act of 1936, so as to provide for the utilization of privately owned shipping services in connection with the transportation of privately owned motor vehicles of certain personnel of the Department of Defense.

Mr. LANGER. Mr. President, may we have a brief explanation of the bill?

Mr. MAGNUSON. Mr. President, I am going to place in the RECORD an explanation of the bill. It merely provides that at the request of the Department, civilian personnel or military personnel may ship automobiles by MSTS or by private merchant marine ships if they choose.

The PRESIDING OFFICER. This bill was passed during the first session of the 84th Congress and the action was reconsidered and the bill restored to the calendar. Is there objection to the present consideration of the bill?

There being no objection, the bill (S. 2286) was considered and passed, as follows:

Be it enacted, etc., That section 901 of the Merchant Marine Act of 1936 is amended by inserting "(a)" after "SEC. 901."; and (2) adding to the end thereof a new subsection as follows:

"(b) (1) That notwithstanding any other provision of law, privately owned American shipping services may be utilized for the transportation at Government expense of motor vehicles owned by personnel of the Armed Forces and by civilian employees of the Department of Defense and of the Departments of the Army, the Navy, and the Air Force on other than temporary duty orders, except that nothing contained herein shall be construed to authorize the inland transportation of any motor vehicle within the United States. The Secretary of Defense may by regulations authorize such transportation by commercial means if available at reasonable rates and conditions or by Government means on a space available basis, and shall limit such transportation to one vehicle for the personal use of each authorized person. Transportation other than by water (unless in an overseas area as a part of a move involving transportation by water) shall not be authorized except upon approval in advance of the Secretary of Defense or such other officials as he may designate."

Mr. MAGNUSON. Mr. President, I ask unanimous consent to place in the RECORD an explanation of the bill; and I would say to the Senator from California [Mr. KNOWLAND] that the bill carries out the recommendations of the Hoover Commission on this subject.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

BRIEF SUMMARY OF S. 2286, TO AUTHORIZE TRANSPORTATION ON COMMERCIAL VESSELS OF PRIVATELY OWNED AUTOMOBILES OF DEFENSE PERSONNEL

S. 2286 would implement one of the recommendations of the Hoover Commission's Subcommittee on Transportation, namely, that "legislation be sought amending present law to permit shipment on private vessels of automobiles belonging to armed services personnel."

Transportation of such privately owned vehicles is authorized by congressional act (63 Stat. 1020; 10 U. S. C. 825) which allows them to be transported on Government-owned vessels. This law has been interpreted by the Defense Department to mean that they can be carried on Government vessels only.

With 71,667 such automobiles transported on MSTS vessels in fiscal 1954, restriction of their transportation to Government vessels creates a competitive situation greatly to the detriment of the United States merchant fleet. Automobiles are low weight cargo. When a substantial number are stowed aboard ship, it is necessary that weight cargo be placed in the lower hold to provide stability. Thus MSTS must keep more ships in active use to carry the automobiles, and for each load of vehicles, must carry a great deal of general-weight cargo, which commercial vessels could, and should, carry otherwise. Thus MSTS is forced to violate the spirit of the directive of October, 1949, which established the Service. This directive provides that there should be a nucleus fleet suitable in types and sizes to carry out logistics needs of military departments which cannot be met by commercial interests.

Passage of S. 2286, by removing the requirement that Government vessels be used, would pave the way for a reduction in the size of the Government nucleus fleet, and by so much reduce the competition with private shipping against which the Hoover Commission has levied such vigorous criticism.

It is the only legislative action necessary. The other problems arising out of MSTS competitive practices can be handled administratively by the Department of Defense.

Mr. LANGER. Mr. President, will the Senator from Washington yield?

Mr. MAGNUSON. I yield.

Mr. LANGER. Was the report of the subcommittee unanimous?

Mr. MAGNUSON. Yes; the report was unanimous.

I wish to thank the Senator from Nevada for yielding.

ORDER OF BUSINESS

Mr. MALONE. Mr. President, I do not wish to be placed in the position of delaying legislation, but I have a very important committee meeting at 3:30. I have been here an hour and a half. It will take me approximately 20 minutes to complete my remarks, and then I can go to my committee meeting, although I shall be late.

Mr. PURTELL. Mr. President, if the Senator will yield, I think the next matter can be disposed of in a minute and a half.

Mr. MALONE. I yield for a minute and a half.

Mr. PURTELL. Mr. President, I understand that the Senator from Rhode Island wishes to call up another bill.

Mr. MALONE. How long will it take?

Mr. PURTELL. About a minute and a half, I understand.

Mr. PASTORE. Mr. President, I shall wait.

Mr. PURTELL. Then I shall have to wait with the acting majority leader.

Mr. MALONE. Mr. President, I am willing to cooperate.

Mr. PASTORE. Mr. President, will the Senator from Nevada yield?

Mr. MALONE. Certainly.

Mr. PASTORE. I cannot read my statement in a minute and a half. I may take 8 or 10 minutes. If that is too long, I do not ask for any time.

REPEAL TRADE AGREEMENTS ACT AND RETURN TO THE CONSTITUTION OF THE UNITED STATES

Mr. MALONE. Mr. President, I introduce for appropriate reference a bill to amend the 1930 Tariff Act and to repeal the 1934 Trade Agreements—so-called reciprocal trade—Act as extended for 3 years during the 1st session of the 84th Congress.

The Constitution, in article I section 8, provides that the Congress shall have power to lay and collect taxes, duties, and imposts, meaning tariffs. The Constitution also states in the same article and section that Congress shall have power to regulate commerce with foreign nations.

RESPONSIBILITY OF LEGISLATIVE BRANCH

It is clear that the constitutional responsibility of Congress is to regulate foreign trade in the interest of the national economy, general welfare of the country and the common defense—article I, section 8.

Congress abdicated its power and responsibility to adjust duties or tariffs in the regulation of our foreign commerce in 1934 when it passed the Trade Agreements Act.

CONSTITUTION ILLEGALLY AMENDED WITHOUT SUBMISSION TO STATES

Congress, in effect, Mr. President, repealed these vital provisions of the Constitution and thus amended the Constitution without submitting it to the States, which it clearly has no power to do. The Trade Agreements Act is unconstitutional, of course; and if it were constitutional it would be unwise to shift the legislative power to the President with full authority to transfer it to Geneva, Switzerland, which he has done.

CONSTITUTIONALITY SUIT

There is at present before the United States Court of Appeals for the District of Columbia Circuit a case challenging the constitutionality of the 1934 Trade Agreements Act.

The suit contends that the act is unconstitutional because Congress illegally delegated its authority to the executive branch of the Government, contrary to article I, sections 1, 7, and 8, and article II, section 2 of the Federal Constitution.

MALONE BILL TO REPEAL TRADE AGREEMENTS ACT SUBMITTED

Mr. President, I ask that the bill which I am submitting for appropriate reference be printed at this point in the RECORD, as a part of my remarks.

MALONE BILL TO REPEAL TRADE AGREEMENTS SUBMITTED

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 2926) to amend the Tariff Act of 1930, and for other purposes, introduced by Mr. MALONE, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc.—

DECLARATION OF POLICY

SECTION 1. It is declared to be the policy of the Congress—

(a) to facilitate and encourage trade with foreign nations on the basis of fair and reasonable competition.

(b) to maintain an investment climate through the principle applying equally to the whole country.

(c) to provide necessary flexibility of import duties thereby making possible appropriate adjustments in response to changing economic conditions;

(d) to assure the accomplishment of these objectives by returning to the provisions of the Constitution (art. 1, sec. 8) in the control over American import duties now subject to international agreements.

RESTATEMENT OF EXISTING IMPORT DUTIES

SEC. 2. Title I, paragraphs 1 to 1559, inclusive, of the Tariff Act of 1930 are hereby amended by repealing the classifications and rates therein contained and substituting therefor the classifications and rates obtaining and in effect on the expiration of 90 days after the date of enactment of this act, by reason of proclamations of the President under section 350 of the Tariff Act of 1930 or otherwise; and all other acts and parts of acts inconsistent with any of the provisions of this act are hereby repealed.

ADMINISTRATION OF TRADE AGREEMENTS

SEC. 3. Title III, part II, of the Tariff Act of 1930 is amended by adding after section 331 the following new section:

"SEC. 331a. Administration of trade agreements.

"(a) All powers vested in, delegated to, or otherwise properly exercisable by the President or any other officer or agency of the United States in respect to the foreign trade agreements entered into pursuant to section 350 of this act are hereby transferred to, and shall be exercisable by the Commission, including, but not limited to, the right to invoke the various escape clauses, reservations, and options therein contained, and to exercise on behalf of the United States any rights or privileges therein provided for the protection of the interests of the United States.

"(b) The Commission is hereby authorized and directed—

(1) to terminate as of the next earliest date therein provided, and in accordance with the terms thereof, all the foreign trade agreements entered into by the United States pursuant to section 350 of this act;

"(2) to prescribe, upon termination of any foreign trade agreement, that the import duties established therein shall remain the same as existed prior to such termination, and such import duties shall not thereafter be increased or reduced except in accordance with this Act."

PERIODIC ADJUSTMENT OF IMPORT DUTIES

SEC. 4. Title III, part II, section 336, of the Tariff Act of 1930 is hereby amended to read as follows:

"SEC. 336. Periodic adjustment of import duties.

"(a) The Commission is authorized and directed from time to time, and subject to the limitations hereinafter provided, to prescribe and establish import duties which will, within equitable limits, provide for fair and reasonable competition between domestic articles and like or similar foreign articles in the principal market or markets of the United States. A foreign article shall be considered as providing fair and reasonable competition to United States producers of a like or similar article if the Commission finds as a fact that the landed duty paid price of the foreign article in the principal market or markets in the United States is a fair price, including a reasonable profit to the importers, and is not substantially below the price, including a reasonable profit for the domestic producers, at which the like or similar domestic articles can be offered to consumers of the same class by the domestic industry in the principal market or markets in the United States.

"(b) In determining whether the landed duty paid price of a foreign article, including a fair profit for the importers, is, and may continue to be, a fair price under subdivision (a) of this section, the Commission shall take into consideration, insofar as it finds it practicable—

"(1) The lowest, highest, average, and median landed duty paid price of the article from foreign countries offering substantial competition;

"(2) Any change that may occur or may reasonably be expected in the exchange rates of foreign countries either by reason of devaluation or because of a serious unbalance of international payments;

"(3) The policy of foreign countries designed substantially to increase exports to the United States by selling at unreasonably low and uneconomic prices to secure additional dollar credits;

"(4) Increases or decreases of domestic production and of imports on the basis of both unit volume of articles produced and articles imported, and the respective percentages of each;

"(5) The actual and potential future ratio of volume and value of imports to volume and value of production, respectively;

"(6) The probable extent and duration of changes in production costs and practices;

"(7) The degree to which normal cost relationships may be affected by grants, subsidies (effected through multiple rates of export exchange, or otherwise), excises, export taxes, or other taxes, or otherwise, in the country of origin and any other factors either in the United States or in other countries which appear likely to affect production costs and competitive relationships.

"(c) Decreases or increases in import duties designed to provide for fair and reasonable competition between foreign and domestic articles may be made by the Commission either upon its own motion or upon application of any person or group showing adequate and proper interest in the import duties in question; *Provided, however*, That no change in any import duty shall be ordered by the Commission until after it shall have first conducted a full investigation and presented tentative proposals followed by a public hearing at which interested parties have an opportunity to be heard.

"(d) The Commission, in setting import duties so as to establish fair and reasonable competition as herein provided, may, in order to effectuate the purposes of this act, prescribe specific duties or ad valorem rates of duty upon the foreign value or export value as defined in sections 402 (c) and 402 (d) of this act or upon the United States value as defined in section 402 (e) of this act.

"(e) In order to carry out the purposes of this act, the Commission is authorized to transfer any article from the dutiable list to the free list, or from the free list to the dutiable list.

"(f) Any increase or decrease in import duties ordered by the Commission shall become effective 90 days after such order is announced: *Provided*, That any such order is first submitted to Congress by the Commission and is not disapproved, in whole or in part, by concurrent resolution of Congress within 60 days thereafter.

"(g) No order shall be announced by the Commission under this section which increases existing import duties on foreign articles if the Commission finds as a fact that the domestic industry operates, or the domestic article is produced, in a wasteful, inefficient, or extravagant manner.

"(h) The Commission, in the manner provided for in subdivisions (c) and (f) in this section, may impose quantitative limits on the importation of any foreign article, in such amounts, and for such periods, as it finds necessary in order to effectuate the purposes of this act: *Provided, however*, That no such quantitative limit shall be imposed contrary to the provisions of any foreign trade agreement in effect pursuant to section 350 of this act.

"(i) For the purpose of this section—

"(1) the term 'domestic article' means an article wholly or in part the growth or product of the United States; and the term 'foreign article' means an article wholly or in part the growth or product of a foreign country;

"(2) the term 'United States' includes the several States and Territories and the District of Columbia;

"(3) the term 'foreign country' means any empire, country, dominion, colony, or protectorate, or any subdivision or subdivisions thereof (other than the United States and its possessions);

"(4) the term 'landed duty paid price' means the price of any foreign article after payment of the applicable customs or import duties and other necessary charges, as represented by the acquisition cost to an importing consumer, dealer, retailer, or manufacturer, or the offering price to a consumer, dealer, retailer, or manufacturer, if imported by an agent.

"(j) The Commission is authorized to make all needful rules and regulations for carrying out its functions under the provisions of this section.

"(k) The Secretary of the Treasury is authorized to make such rules and regulations as he may deem necessary for the entry and declaration of foreign articles with respect to which a change in basis of value

has been made under the provisions of subdivision (d) of this section, and for the form of invoice required at time of entry."

AMENDMENT OF SECTION 337

SEC. 5. Title III, part II, section 337, of the Tariff Act of 1930 is hereby amended as follows:

(a) Subdivision (a) thereof by striking out the word "President" and substituting therefor the words "Tariff Commission."

(b) Subdivision (b) thereof is hereby repealed.

(c) Subdivision (d) thereof is hereby repealed.

(d) Subdivision (e) thereof is hereby amended to read as follows:

"(e) Exclusion of articles from entry: Whenever the existence of any such unfair method or act shall be established to the satisfaction of the Commission, it shall direct that the articles concerned in such unfair methods or acts, imported by any person violating the provisions of this Act, shall be excluded from entry into the United States, and upon information of such action by the Commission, the Secretary of the Treasury shall, through the proper officers, refuse such entry."

(e) Subdivision (f) thereof is hereby amended to read as follows:

"(f) Entry under bond: Whenever the Commission has reason to believe that any article is offered or sought to be offered for entry into the United States in violation of this section, but has not information sufficient to satisfy it thereof, the Secretary of the Treasury shall, upon its request in writing, forbid entry thereof until such investigation as the Commission may deem necessary shall be completed; except that such articles shall be entitled to entry under bond prescribed by the Secretary of the Treasury."

(f) Subdivision (g) thereof is hereby amended to read as follows:

"(g) Continuance of exclusion: Any refusal of entry under this section shall continue in effect until the Commission shall find and advise the Secretary of the Treasury that the conditions which led to such refusal of entry no longer exist."

STATISTICAL ENUMERATION

SEC. 6. Title IV, part III, section 484 (e), of the Tariff Act of 1930 is hereby amended to read as follows:

"(e) Statistical enumeration: The Chairman of the Tariff Commission is authorized and directed to establish from time to time, after consultation with the Secretary of the Treasury and the Secretary of Commerce, a statistical enumeration of imported articles in such detail as he may consider necessary and desirable to effectuate the purposes of this act. As a part of each entry there shall be attached thereto or included therein an accurate statement giving details required for such statistical enumeration. The Secretary of Commerce is hereby authorized and directed to make such reasonable and proper digests from, and compilations of, such statistical data as the Chairman requests. In the event of a disagreement between the Chairman and the Secretary of Commerce as to the reasonable and proper nature of any request the matter shall be referred to the President, whose decision shall be final."

REVISED TEXT OF TARIFF ACT

SEC. 7. The Tariff Commission, as soon as practicable, shall prepare and cause to be printed as a public document available for public distribution a complete revised text of the Tariff Act of 1930 as amended: *Provided*, That all acts or parts of acts conflicting herewith are hereby repealed.

EFFECTIVE DATE

SEC. 8. This act shall take effect upon the expiration of 90 days after the date of its enactment; but no foreign trade agreement shall be entered into under section 350 of the Tariff Act of 1930, as amended, after the date of enactment of this act.

CONGRESS TO THE PRESIDENT TO GENEVA

Mr. MALONE. Mr. President, when in 1934 Congress transferred its constitutional responsibility of regulating foreign trade and the national economy to the President, it abdicated its constitutional authority.

The President, in 1947, transferred by Executive order the complete constitutional responsibility of Congress to regulate the national economy and foreign trade to the General Agreement on Tariffs and Trade, commonly referred to as GATT, at Geneva, Switzerland.

I do not believe there is a Member of the Senate who would have voted for the passage of the 1934 Trade Agreements (so-called reciprocal trade) bill if he had known that it contained full authority for the President to send it by Executive order to Geneva, Paris, London, or wherever the spirit moved him.

The 1934 Trade Agreements Act, as it has been amended and extended from time to time—it has now been extended for 3 years by this Congress—contained provisions giving the President the power to transfer the constitutional responsibility of Congress to Geneva, Switzerland, and to set up an organization which is called the General Agreement on Tariffs and Trade, or GATT.

UNITED STATES MARKETS COMPLETELY INTERNATIONALIZED

GATT is an organization consisting at present of 35 nations, whose members sit around a table and divide up the markets of the United States as though they were a nice, juicy beefsteak.

Congress has no authority over and little knowledge of this organization, and is not advised until the trades are made. Congress has no representation at Geneva, and even the President of the United States is only perfunctorily represented.

Mr. President, regardless of whether the Trade Agreements Act of 1934 violates the letter of article I, section 8, of the Federal Constitution, certainly it violates the spirit of that article and section. I agree with the declaration in the suit which has been filed that the act is unconstitutional.

WHO IS REPRESENTED AT GENEVA?

What part of the people of the United States is represented at Geneva, Switzerland? Article I, section 8, of the Constitution provides that the legislative branch of the Government shall regulate duties or tariffs, trade, and the national economy. It gives Congress not only the right but also the responsibility of regulating duties and tariffs.

Why was the legislative branch chosen for this important work? It was because every precinct in the United States is represented on the Senate floor, and every precinct in the United States is represented on the House floor. But there is no precinct in the United States which is represented at Geneva, Switzerland.

ORGANIZATION FOR TRADE COOPERATION

Last year a bill was introduced which is now before the Senate Committee on Finance, to provide for an agency to be called the Organization for Trade Cooperation. That is a clever piece of proposed legislation.

If Congress passes it, we shall be approving the transfer of the constitutional authority and the constitutional responsibility of Congress to the President, and his action of transferring that responsibility to Geneva, Switzerland. But if Congress does not approve it, we shall not touch the General Agreement on Tariffs and Trade, which will continue to function under the 1934 Trade Agreements Act. The proposal is very clever, since it appears that the whole question is being put before the Congress.

EVERY UNITED STATES PRODUCT IN THE HANDS OF FOREIGN NATIONS

Mr. LANGER. Mr. President, will the Senator yield for a question?

Mr. MALONE. I yield.

Mr. LANGER. Does that include tariffs on such items as antimony, tungsten, silver, lead, and similar raw materials?

Mr. MALONE. Not only those items but it includes textiles, machinery, precision instruments, and 5,000 other products produced by our high-living-standard working men and women and our own investors hard-earned money.

Mr. LANGER. Everything that we import or export?

ALL AMERICAN TRADE AT MERCY OF GATT

Mr. MALONE. Everything we import, export, manufacture, or otherwise produce in this country is at the mercy of 35 foreign nations at Geneva with only one objective, that of each getting a part of the only real markets of the world.

Mr. LANGER. In other words, we have turned over that power to a group of people at Geneva.

Mr. MALONE. By the vote of the Senate and the House. I am sure the Members of Congress did not know what they were doing in 1934. I am certain they did not know that the act which they passed contained sufficient authority for the Executive in turn to transfer their power to Switzerland, or to Moscow, if the President so desired.

DULLES' TESTIMONY RECALLED

The Secretary of State testified before the Senate Committee on Finance last year that the 1934 Trade Agreements Act contained all the authority necessary to establish the General Agreement on Tariffs and Trade at Geneva. Therefore, if the 1934 act were extended it would not disturb the operations of the 35 nations at Geneva even if the Organization for Trade Cooperation, OTC, were not passed.

Mr. President, Congress was given the sole authority to lay and collect duties for a purpose—for two purposes, in fact. One was to provide for the common defense; the other was to provide for the general welfare of the United States.

TRADE ACT HAS IMPAIRED NATIONAL DEFENSE

Senate Report No. 1627 of the 83d Congress offers impressive proof that the Trade Agreements Act, which Congress substituted for the Constitution, has impaired the common defense, and has made us dependent on distant foreign lands for many, if not most, of the strategic and critical materials without

which we cannot fight a war or live in peace.

To digress, the foreign nations can stop the shipment of these materials to us in peacetime, as well as in war.

India, for example, stopped the shipment of monazite sands to the United States in peacetime. Luckily, we are not dependent upon India for monazite sands. As a matter of fact, we can make the Western Hemisphere self-sufficient for all the materials we need, whether in peacetime or to fight a war.

Mr. LANGER. Mr. President, will the Senator yield?

Mr. MALONE. I yield.

Mr. LANGER. Is it not true that when monkeys were needed for experimental purposes in connection with the study of poliomyelitis, India stopped the exportation of monkeys to the United States for a short time, until pressure was brought to permit the monkeys to be shipped?

Mr. MALONE. I think that is true; and I think India had a perfect right to do that, and we could not quarrel with them. The only thing we can quarrel with is Congress, which has put us in such a position that foreign countries can do that.

Mr. LANGER. The Senator from Nevada knows, does he not, that if 2 or 3 of his constituents, for example, mine owners, came to Washington, they would meet, first, with a small group of so-called experts who would be going on to Geneva. They would meet, first, with a group of men who were not elected by the people. If the Senator wanted to talk to them about tungsten, antimony, copper, or whatever it might be, he would have to bow down before that group and say, "Gentlemen, will you not be so good as to let a United States Senator speak with you for about 5, 10, or 15 minutes?"

UNITED STATES INDUSTRIES HAVE NO REPRESENTATIVE OR VOICE AT GENEVA

Mr. MALONE. I would say to the Senator from North Dakota that he could not go to Geneva and get an audience, unless it would be for some purpose which has not been allowed up to now. Here in the United States one would go before a committee which would have no knowledge of what he was talking about.

At Geneva there is a long-range international policy which amounts, in effect, to the worldwide socialistic principle of the division of wealth, and of seeking to police all the nations of the world in order to divide the markets which are the basis of our wealth.

UNITED STATES INVESTMENT CLIMATE DESTROYED BY TRADE ACT

The Trade Agreements Act has utterly and completely destroyed the favorable investment climate this country once enjoyed, except in the public utilities and dominant American industries which for the most part now have or contemplate branch plants in lands behind the low-wage curtain.

Such plants enable these companies to manufacture their product abroad and to furnish the rest of the world with products from the low-wage locations. Then these foreign-produced products can then be shipped back to the United States under our free trade policy, with their shipment involving only the low-cost water transportation between the foreign countries and the United States market, the only real market in the world, and which ultimately will have been destroyed.

I shall have more to say about this later in my remarks.

TRADE ACT ENDED PRINCIPLE OF EQUALITY IN UNITED STATES MARKETS

The Congress, when it abandoned its constitutional responsibilities over foreign trade and commerce in 1934, also abandoned the historic principle which had guided our economy for 140 years, and had brought us from a struggling group of colonies with 3 million poverty-ridden citizens to the richest and most powerful nation in the world.

That principle was equality in our markets, brought about by flexible duties or tariffs adjusted by the people's representatives in Congress upon a basis of fair and reasonable competition. For this principle Congress substituted the policy of trying to establish world peace through the division of wealth, while it is the people's representatives in Congress who have to go home and face the votes of their people every so often.

Representation of the people by Congress on the basis of a principle was the reason that provision was placed in the Constitution of the United States, and why it was provided that the legislative branch should have jurisdiction, so that tariffs and the regulation of our commerce could not be transferred to Geneva or Moscow or Paris or Peking, and allow other nations to say what the people in North Dakota, Nevada, Pennsylvania, or Vermont are going to do. That can be done now.

STATE DEPARTMENT WANTS TAXPAYERS TO REIMBURSE INDUSTRIES IT DESTROYS

There is a bill in Congress on the subject, which has just been introduced. And there has been talk for several years of an arrangement whereby we would put up the money in the event certain industries are destroyed, as they may be, and as Mr. Dulles stated before our committee. It was stated that if any industry in this country is destroyed because of this Government's following a certain foreign policy, there is a right to do that. I invite my colleagues to read the evidence. It will scare them to death.

BILL TO CARRY OUT ACHESON-DULLES' PROPOSALS NOW PENDING

There is a bill now before the Congress to provide funds if such a thing happens. The State Department has advocated such a principle for 10 or 15 years. Mr. Acheson advocated it when he was Secretary of State. What is it proposed to be done when communities or industries are destroyed or distressed economically? That we reimburse the investors and furnish money to transfer working men and women.

IRON-CURTAIN PROGRAM OF TRANSFERRING WORKERS ADVOCATED

Mr. President, I was behind the Iron Curtain for 2 months and a half last year, and that is what is done there, only behind the Iron Curtain it is not necessary to introduce a bill.

I hope no such bill passes this Congress, that we get our feet on the ground, and that we again adhere to the Constitution of the United States and the Bill of Rights, which provided us the means of having and maintaining the principle of developing industries in the whole country alike, and did not allow the Executive or the State Department, or Geneva to remake the industrial map of the United States.

BILL ASKS DISTRESS VICTIMS TO HELP FINANCE OWN RELIEF

The Congress of the United States is asked, through the same taxpayers who may be distressed because of such policies, to put up money to reimburse investors who are in bad straits or without jobs. They are in poor straits or unemployed because of the very legislation enacted by the Congress in 1934, and extended from time to time, until we now have 3 more years facing us in which Geneva will run the industrial setup of this country.

No private investor can possibly spend money wisely under such a situation.

The last tariff law based on fair and reasonable competition was in 1930. Under that law if any person just out of school or anyone else who desired to go into business—if he could figure out how to manufacture a product in competition with any other American producer—could go to his friends for money and go into business.

Then he had to compete only with his own people, and would pay the same taxes and approximately the same wages as his competitor.

BUSINESSMEN NOW MUST FACE COMPETITION FROM EVERY COUNTRY OF THE WORLD

Now such a person has to figure out what the competition will be from South Africa, from Italy, from Yugoslavia, from France, from Japan, and from other countries.

The textile industry is beginning to think about that now, of course. Mr. Dulles was able to persuade Japan, according to reports, that it would be unwise for them to flood this country with textiles until this Congress is out of the way. But the textile industry, too, is utterly in the power of Japan, as is every industry in the power of the chief competitive nation making a particular product.

Equality of opportunity and equality of competition was assured all of our citizens, investors, industry, and labor under the constitutional principle which the Congress abandonded in 1934.

STATE DEPARTMENT ENABLES FOREIGN COMPETITORS TO UNDERCUT ALL AMERICAN PRODUCERS

Today no textile worker, no livestock grower, no coal or metal miner, no craftsman, or manufacturer has any assurance of equality of competition with foreign producers in his own American market, and he has no such assurance because the Trade Agreements Act permits the State Department to arrange for foreigners to undercut him in our markets with products of low-wage, low-tax, low-living-standard foreign labor.

FOREIGN COMPETITION SUBSIDIZED BY BILLIONS IN UNITED STATES AID

Cut-rate foreign competition against American producers has been subsidized

by more than 52 billion taxpayers' dollars, including dollars from the same textile workers, miners, and craftsmen being hurt by the deals arranged by our State Department to flood our markets with foreign products and enrich foreign manufacturers with greater profits.

TRADE ACT REPEAL WOULD TAKE PROFIT OUT OF SWEATSHOP FOREIGN LABOR

Repeal of the Trade Agreements Act will take the profit out of foreign sweatshop labor and put dollars back in the pockets of America's own working men and women.

It will compel the foreign producer to compete on equal terms with the American manufacturer and wage earner, which he will be able to do when he brings his own wage standards up to ours, and is content with profit margins no greater than those enjoyed by American producers.

That is to say, Mr. President, give them equal access to our markets, but no advantage. No one objects to that. But when machinery, which has been largely paid for by our taxpayers, is transferred to low-wage countries, that is unfair. Many times our own investors, for their own salvation have gone behind that low-wage curtain after this principle was established. Superintendents and other skilled personnel have gone into foreign mines and other industries. Only low-cost water transportation is between them and the finest market in the world.

FREE TRADE POLICIES MAKE LOW FOREIGN WAGES PROFITABLE

By our own policies we make the maintenance of low-cost wages profitable to producers in foreign lands. If the profits were taken out of sweatshop labor at the water's edge, then competition would be equal. If the profits from sweatshop labor were taken out when competitive products reached this shore, how long do my colleagues think the wages in foreign countries would be held down? Wages there would be permitted to go up, because that would encourage markets in their own foreign countries. That is the only way a market was created in this country.

MALONE BILL RESTORES HISTORIC PRINCIPLES TO FOREIGN TRADE

There is nothing drastic about my bill. All that it does is to put the economy and foreign trade back on the same safe track it was on from 1789 to 1934, when we were constantly expanding our national economy without wars, inflation, and high taxes.

Here is what the bill would do:

CONGRESS WOULD DECLARE POLICIES

First, it would declare a policy of the Congress.

Congress has no policy now on foreign trade and commerce, except to leave everything in the hands of the executive branch and its State Department, which has transferred that authority to Geneva 3,000 miles away, and left it in the hands of 35 foreign nations, each with an eye on a part of the United States market.

The State Department has no policy except to turn the whole problem over to GATT—the General Agreement on Tariffs and Trade—and to bow to the policy set by the 34 other nations who are members of GATT.

FREE TRADE FOR THE UNITED STATES; PROTECTION FOR REST OF WORLD

The policy of these foreign nations is free trade for the United States and high protection for themselves, through high tariffs, import licenses, quotas, and other devices, such as multiple exchange rates for trade advantage.

There is no nation on the face of the earth, except the United States, which does not protect its own workingmen and its own industries, once they are established within its borders, even if the industries are branches or subsidiaries of American firms.

For instance, Mr. President, just try to ship a little oil into Venezuela or a little copper into Chile or a few textiles into Japan, and see how far you get. That is nothing against the people of those countries. I am in favor of all of them, because they have sense enough to protect their own men and women who are working for a living or who are investing their hard-earned cash in a business.

As a corollary of the policy of "free trade for the United States, protection for ourselves," these foreign nations also have a policy of requiring the United States to furnish them dollars for purchases of products they buy from us. So they win and we lose, both ways.

FOREIGN-AID, FREE-TRADE TWINS HELP FOREIGN NATIONS INVADE OUR MARKETS

Tariff reductions give foreign nations greater access to our markets and a greater potential profit margin, and foreign aid gives them the money to pay for what they need from us. This is the old world policy our State Department has gone along with for 20 years, but it is the old world's policy, not ours, except through adoption, if one can adopt an illegitimate offspring of foreign free traders. They call themselves liberals. I would say to you, Mr. President, that, far from being liberals, they are following the oldest policy in the world, one which is centuries old, namely, free trade and the one-world economic policy that our so-called foreign traders are so fond of.

GATT SETS THE POLICY AT SECRET SESSIONS

GATT members shape the policy at secret meetings in Geneva, Switzerland. We blindly accept its policy after the GATT sessions have ended and the State Department has informed us what it is.

Mr. President, I think it is time that the United States determines its own policies of trade and commerce, and that this be done in the constitutional way, through the Congress, as the Constitution directs.

MALONE PROPOSAL FOR CONGRESS' POLICY DECLARATION

So my bill contains a declaration of policy as follows:

It is declared to be the policy of Congress—

A. To facilitate and encourage the importation into the United States of foreign goods and products in quantities sufficient to supply the needs of the United States economy,

B. To foster and provide for the export of the products of American industry and agriculture in quantities sufficient to pay for the needed imports,

C. To develop and promote a well-balanced, integrated and diversified production within the United States so as to maintain a sound and prosperous national economy and a high level of wages and employment in industry and agriculture.

D. To provide necessary flexibility of import duties thereby making possible appropriate adjustments in response to changing economic conditions;

E. To assure the accomplishment of these objectives by returning to and maintaining hereafter in the United States the control over American import duties now subject to international agreements.

Mr. President, my bill would encourage trade among the nations on a basis of fair and reasonable competition.

HOW BILL WOULD APPLY TO JAPANESE TEXTILES OUTLINED

Let us consider the situation in a foreign nation producing textiles as its chief competitive product. If Japan raises its standard of living, the tariff or duty would be correspondingly reduced; and when the Japanese begin to live under about the same standard as ours, free trade would automatically result. There would be no incentive to hold down Japanese wages, as is now the case, to 19 cents an hour, when $1.80 or $2 is paid in the United States, because American investors are going into Japan; they have to, if they are going to remain alive. Similarly, American investors go into England and into Scotland.

But if the profit is taken out at the water's edge, these persons would remain in the United States, invest their money here, and give employment to American working men and women.

MALONE BILL WOULD RESTORE ECONOMIC INDEPENDENCE

Mr. President, the policy of my bill is an American policy, for Americans and by Americans. It is substantially the policy that guided America for the first 140 years of our Republic, 140 years of economic independence as well as political independence. Economic independence is almost, if not equally, as important as political independence, as President Washington well knew. It was under George Washington that the first Tariff Act was enacted, and enacted by the 1st Congress at the beginning of its 1st session.

WASHINGTON QUOTED ON TRADE, INTERNATIONAL COMMERCIAL ENTANGLEMENTS

Washington was a champion of economic independence. He warned against placing our reliance on foreign sources of supply for defense materials, as we do now; and he asked:

Ought our country to remain dependent on foreign supply; precarious because liable to be interrupted? If the necessary article should in this mode cost more in time of peace, will not the security and independence thence form an ample compensation?

Washington would have frowned upon our subservience to GATT and its control over our commerce and import duties. He said:

The great rule of conduct for us in regard to foreign nations is, in extending our commercial relations—

Meaning trade and tariffs—

To have with them as little political connection as possible.

STATE DEPARTMENT IGNORES WASHINGTON'S ADVICE

Yet today our State Department maintains direct political connections with 34 foreign nations through GATT, and wants to strengthen these political connections through creation of a new international agency, to be called OTC, or Organization for Trade Cooperation, which is merely to be a protective disguise for GATT.

Washington was in favor of an American policy and so were Lincoln, William McKinley, and all our other great Presidents who helped make this Nation strong and economically independent.

Mr. President, in passing I wish to say—and at this session of Congress I shall have more to say in this regard—that there are several approaches to destroying the United States through international socialistic schemes. There are political approaches which include the communistic approach and such political developments as resulted not long ago in the arrangement by which a GI or any other person in our Army is subject to the rules and laws of a foreign country in which he is quartered if charged with the commission of certain acts. There is the economic approach, such as we witness through GATT, and all of it forms a gigantic web surrounding the United States with foreign policies, foreign made. That situation exists at this time; we simply have not waked up to the fact.

As a result, today we are on a war economy, with $34 billion or $35 billion a year in expenditures to defend ourselves and hold up our economy.

ABRAHAM LINCOLN'S PLATFORM PLEDGED FAIR TARIFFS TO DEVELOP INDUSTRIAL INTERESTS OF THE WHOLE COUNTRY

In 1860 President Lincoln ran on a platform pledged to adjust duties on imports so as "to encourage the development of the industrial interests of the whole country."

Mr. President, North Dakota, Nebraska, Oklahoma, and all the other Western States would never have been developed under the policy we now have, which is designed to move the industries out of those areas, so that the benefits will accrue to those who trade at the waterfront. Our industrial production is being traded for what? It is being traded for the benefit of a group of waterfront brokers who receive a commission of 10 percent, no matter which way the traffic passes through the ports.

CONGRESS IN LINCOLN'S ADMINISTRATION PROTECTED UNITED STATES INDUSTRY

During Lincoln's administration Congress did adjust tariffs, almost doubling the protection given American industry, until by 1865 the North was collecting more revenue from duties than it had ever collected before the war, when both North and South were united. The Congress had a policy, and the Government had a policy.

Today, Congress should have a policy on foreign trade and commerce; and my bill would provide it—a policy based on principle.

Mr. President, it is Congress that fixes the policy, in accordance with the Constitution.

We often hear it said in various organizations that they are going to hold a meeting at which they will write down the policies and principles the United States should follow. One of the hardest things to obtain in a book store, today, is the Constitution of the United States. If we just read it again, together with the Bill of Rights, we shall find in those two documents all the rules and regulations we need.

ONLY THE PEOPLE HAVE A RIGHT TO AMEND CONSTITUTION

We do not need any trick organizations forming a new set of rules for us to live by. If we are to change the Constitution, if it appears to Congress that it is necessary that it be changed, let us not violate the Constitution by seeking to amend it through a mere act of Congress, and then, regardless of its constitutionality, following it through.

We should submit the question to the people, as the Constitution of the United States provides. If they say they want their industry, their labor, and their investments in industry regulated in Geneva, Switzerland, no more will be heard on that question from the senior Senator from Nevada. But the question has never been so submitted.

TARIFF COMMISSION NOW HELPLESS TO CARRY OUT ITS FUNCTIONS

Mr. President, under my bill tariff functions now nominally performed by the President, but actually by the State Department, and subordinates in the State Department at that, would be vested in the Tariff Commission, an agency of Congress, its membership divided equally between the two major parties.

That is what we decided long ago. That policy can be changed by Congress; but let Congress change it in accordance with the Constitution of the United States.

The Tariff Commission is now as helpless as a babe in arms. It has no authority whatever except to follow the direction of a State Department which is at this moment subservient to the General Agreement on Tariffs and Trade, at Geneva, 3,000 miles away.

When the tariff function is vested in the Tariff Commission, then, and then only, can we have a truly bipartisan foreign trade and economic policy, while now, as I said before, we have no policy at all except one fixed 3,000 miles away from us, so far as trade is concerned.

HOW MALONE BILL WOULD RESTORE COMMISSION'S FUNCTIONS

The Tariff Commission, under section 3 of my bill, would be authorized and directed—

First. To terminate as of the next earliest date therein provided, and in accordance with the terms thereof, all the foreign trade agreements entered into by the United States under the Trade Agreements Act.

Second. To prescribe, upon termination of any foreign trade agreement, that the import duties established in the agreement shall remain the same as existed prior to the termination, and that import duties shall not be increased or reduced except after a determination by the Commission based on certain factors embodying the principle of fair and reasonable competition and submission of such determination to the Congress.

In other words, Mr. President, tariffs could be modified only on the basis of principle under my bill, and the Congress could accept or disapprove the Commission's determinations.

COMMISSION WOULD ACT ON BASIS OF FIXED PRINCIPLE

What is the principle? First, it is simply the principle of fair and reasonable competition between domestic articles and like or similar foreign articles in the markets of the United States.

A foreign article would be considered as providing fair and reasonable competition to United States producers when the landed duty-paid price represented a fair price, including a reasonable profit to the importers. It would not be a fair price if substantially below the price an identical or similar article produced in the United States, could be offered to consumers in the United States markets.

CRITERION ESTABLISHED TO GUIDE AND AID COMMISSION

The commission would have, to assist it in determining when there is a fair or unfair price on an imported article, a criterion set by statute and by Congress. Under this criterion the commission would consider the following:

First the lowest, highest, average and median landed duty paid price of the article from foreign countries offering substantial competition.

Second, any change that may occur or may reasonably be expected in the exchange rates of foreign countries either by reason of devaluation or because of a serious imbalance of international payments.

TAKE PROFIT OUT OF DISHONEST CURRENCIES

Mr. President, the way the system operates at present is this: When the State Department or the Executive adopts a trade agreement for 3 years, a simple change in the exchange rates completely nullifies the effect of the trade agreement, and the foreign products continue to pile in. But the Tariff Commission could take that situation into consideration. It could make it unprofitable for foreign countries to have dishonest currencies.

Ninety percent of the nations of the world have dishonest currencies, because they set the price of their currencies in dollars, above the market price, and naturally no one will pay it except a Congress through appropriations such as the $5 billion now proposed for foreign nations, and the some $57 billion previously voted.

The Commission would consider:

Third. The policy of foreign countries designed substantially to increase exports to the United States by selling at unreasonably low and uneconomic prices to secure additional dollar credits.

Mr. President, the governments of foreign nations control the trade. They

can subsidize an exporter of a product which they want exported, and make up the loss through an unfair or dishonest exchange rate.

FOREIGN AID SUBSIDIES TO BE FACTOR IN ADJUSTING TARIFFS

The Commission would also weigh and study:

Fourth. Increases or decreases of domestic production and of imports on the basis of both unit volume of articles produced and articles imported, and the respective percentages of each.

Fifth. The actual and potential future ratio of volume and value of imports to volume and value of production.

Sixth. The probable extent and duration of changes in production costs and practices.

Seventh. The degree to which normal cost relationships may be affected by grants, subsidies, excises, export taxes, or otherwise, in the country of origin, and other factors which appear likely to affect production costs and competitive relationships.

In other words, they can compensate for the manipulations which now completely eradicate any competition from the United States whatever, even in its own market.

COMMISSION EQUIPPED TO DEAL WITH PROBLEM BUT NOW HAS NO POWER

This operation would not impose an undue burden on the Commission, Mr. President.

Most of these factors are considered and weighed now by the Commission in its escape-clause cases. But the escape-clause procedure now is a travesty for a number of reasons, and can be nothing else.

Duties in effect were not set on the basis of any principle or criterion but at the whim of some subordinate in Government here or abroad to further some real or imagined political advantage.

That is what the Secretary of State testified before the Senate Finance Committee. He testified that the Department had the right, under the 1934 Trade Agreements Act, to do just what I have described, to carry out any foreign policy. It could dry up any industry in the United States by carrying out the foreign policy.

PRESENT DUTIES MEANINGLESS AS YARDSTICK IN DETERMINING FAIR TARIFF

Duties, in effect, were not set on the basis of any principle or criterion, but at the whim of some subordinate. Thus the existing duties are meaningless as a yardstick, in terms of mutual trade or economy. There is no yardstick. There is no fundamental principle laid down, of fair and reasonable competition. The purpose of present tariff rates was simply to carry out the foreign policy, whatever it might be, and use the markets of the United States to trade for any policy advantage, either imagined or real. Experience shows that in the long run the policy for which we have traded our markets, jobs, and industries is never carried out.

Tariff duties have been chopped, cut, and reduced until they are valueless either for revenue purposes or protection.

TRUE COSTS OF FOREIGN PRODUCTION HIDDEN BY DOLLAR HANDOUTS AND FOREIGN MANIPULATION

Actual costs to the foreign producer have been obscured by dollar subsidies and foreign aid, manipulated exchange, tax and other rebates, or government controls over allocations and pricing of raw materials. As long as the United States continues to pour out billions of dollars to foreign countries to stimulate foreign competition against American products, foreign cost determinations will continue to puzzle tariff commissioners in escape clause cases.

Furthermore, whatever may be the conclusions of the Tariff Commission in escape clause cases they are without force or effect, but are subject to rejection or modification by the executive branch, which has made no study of the facts, has little if any knowledge of the domestic industry or its problems, and is, in the main, more concerned with encouraging foreign trade and expansion than in the plight of the applicant American industry.

We use the phrase "foreign trade and expansion." That has come to mean domestic investments abroad, behind a low-wage curtain, not only to supply the markets of the nation in which the investments are located, but the remainder of foreign nations, all low-wage nations; then, through free trade, bringing the products back here in competition with American investors and workingmen.

LEAD AND ZINC ESCAPE CLAUSE FIASCO CITED

As an example, in the lead and zinc escape clause case, the Tariff Commission was unanimous in recommending tariff relief. Several of the departments were reliably reported to have concurred. However, the State Department, according to the same sources, protested, and no relief was granted. Even if relief is granted in a case, it is not granted on the basis of any policy or principle. Moreover, 10 minutes after relief is granted under an escape clause, more manipulation of the currency for the foreign country's advantage could eliminate any fairness included in the escape.

CONGRESS IMPOTENT IN ESCAPE CLAUSE CASES

Finally the Tariff Commission, and the injured industries that appeal to it, have no relationship, insofar as their problems are concerned, with the Congress, and can obtain no assistance or backing from the Congress, which under the Constitution is the branch of our Government designated to represent every State, county and precinct in the Nation and to serve their common defense and general welfare.

I still remember, when I was acting as consulting engineer to the old Senate Military Affairs Committee during World War II, and the Senator from Colorado, Big Ed Johnson, now the distinguished Governor of Colorado, a member of the Military Affairs Committee, which is now the Committee on Armed Services, asked me to go before the Commission, which represented the State Department, and to hold the Commission in session until he could get there to make a case on one of the minerals which is mined in Colorado. I did that.

I have the picture in my mind now—and I shall never forget it—of Big Ed Johnson standing in front of the Commission, of which none knew any of the background of the situation, and none of them speaking with any authority, but merely listening to testimony which later would be filed away in some nook or cranny, with no one ever looking at it again—of Big Ed Johnson figuratively standing before that Commission, with hat in hand, and begging the Commission not to shut down that industry until it had a chance to investigate it. But they did shut it down.

The irony of it is that some of the same Senators who one by one went before that little nonentity of a Commission and begged it not to shut down an industry in their States, voted for the act which allowed the Government to set up that Commission. Two years later that work of the Commission was transferred to Geneva, where 34 or 35 nations sit down and divide the markets of the world in the same way that a juicy steak is divided up.

COMMISSION HELPLESS TO ENFORCE FINDINGS AND RECOMMENDATIONS

The Tariff Commission, which could be the most useful agency of our Government in preserving our free-enterprise system and strengthening our economy, and which is an agency of Congress, is therefore hamstrung and impotent.

It is impotent because the Trade Agreements Act set up the Executive as the supreme voice in matters of foreign trade and commerce, just as the Reichstag in prewar Germany set up Hitler as the supreme voice in all matters of government both domestic and foreign, and as other legislative bodies in other lands turn over their authority to an all-powerful executive.

My bill would restore to the Tariff Commission the responsibilities and functions for which it was created, subject to the concurrence of the Congress, representing the people and the Constitution.

INJURED INDUSTRIES HAVE RECOURSE ONLY TO BUSY PRESIDENT

Today, under our present system and the Trade Agreements Act, the injured industrialist has ultimate recourse only to the Chief Executive. He has none to the courts, and will have none until the Supreme Court ultimately passes on the constitutionality of the Trade Agreements Act, which the Justice Department is seeking to avoid. Meanwhile GATT or the State Department, or both in close collusion, may conspire to injure him further, or destroy him.

That is the point, Mr. President, that Congress should understand, namely, that no individual investor now dares to invest his money in the manufacture of any one of 5,000 products, because they can be manufactured cheaper in low-wage countries and find a free-trade market here. All of that takes jobs and trade away from the workingmen and investors of this country.

MALONE BILL WOULD GIVE STRICKEN INDUSTRIES RECOURSE TO THE CONGRESS

My bill would offer him recourse to the Congress, through Representatives for

which the citizens of his State or district voted, and who have a direct interest in the welfare of their districts and their economy.

The Tariff Commission, under my bill, would have authority to make adjustments in import duties to provide for fair and reasonable competition between foreign and domestic articles either upon its own motion or upon application of any person or group showing proper interest in the import duties in question, subject to three specific conditions.

One is that any change in any import duty could not be ordered by the Commission until after it first conducted a full investigation and held a public hearing.

The second is that no increase in duties could be ordered when the Commission finds that the domestic industry threatened by cut-rate imports is operating in a wasteful, inefficient or extravagant manner.

And, third, that before any order of the Commission becomes effective it must be submitted to the Congress. Congress would have full power to disapprove the order, in whole or in part, by concurrent resolution within 60 days after it was submitted.

QUOTAS PERMITTED IN MALONE BILL

Mr. President, my bill also provides that Congress, through the Commission, may impose quantitative limits on the importation of any foreign article, in such amounts, and for such periods, as it finds necessary in order to effectuate the purposes of the act.

Quantitative restrictions are more popularly known as quotas. Many foreign countries, including the United Kingdom, apply quotas to imports of articles from other countries. The United States employs quotas, properly I think, to restrict importation of agricultural commodities which receive price supports at taxpayers' expense.

Supporters of quotas as a preferred method of safeguarding our economy should find the remedies they seek in this bill, as well as those who advocate fair and reasonable tariff rates in the interest of our common defense and general welfare.

TRADE ACT A PRIMARY CAUSE OF NATION'S DISTRESSED AREAS

Mr. President, in my opinion this is necessary legislation. It is forthright legislation to relieve an acute problem in the most direct and less costly method possible.

We know there are distressed areas.

We know there are distressed industries.

The administration is concerned about them.

The Republican Party, and I am sure the Democratic Party as well, is concerned about them. It is a shameful thing, Mr. President, that in a country in which most of the population is enjoying unprecedented prosperity there are still hundreds of thousands who are hungry, who are unemployed.

It is a shameful thing that a city or an area may be stagnating in the depths of a depression while only a few miles away other cities are enjoying their greatest boom.

BASIC INDUSTRIES, JOBS, DESTROYED BY GATT

The reason for this disparity is obvious. The hungry and the unemployed are those who had the misfortune to make their life's work employment in an industry the State Department, or its master, GATT, has decided to destroy for the advantage of a foreign competitor.

The distressed area or city is one which throughout its history, or over a period of many years, developed an industry which the State Department now chooses to sacrifice.

Unemployment, in this era of widespread prosperity, is a matter of great embarrassment to the administration, as it was to the preceding administration, or to any administration which experiences it.

PRICE OF FREE TRADE—ECONOMIC DISTRESS

The present administration has been spending many hours and much thought on how to erase the black spots in our economy, and at the same time avoid the inevitable direct solution.

The only solution to our checkerboard economy, Mr. President, is to equalize the opportunities of each community and each industry to meet the ever-mounting competition, and this can only be done by a flexible import fee or tariff adjusted in the manner provided by the Constitution.

The administration, which for some strange reason does not want to admit a mistake which was not made by it, but made by a predecessor administration of opposite party, has come up with a purported solution which, in reality, is no solution at all but a compounding of the difficulties.

The administration now wants to extend a pittance of foreign-aid type assistance to our own depressed areas which have been stricken by a deluge of imported products undercutting and flooding their markets, many of these products the produce of far vaster amounts of aid to foreign countries.

Instead of the $50 billion plus in foreign aid to build up the economies of foreign countries, the administration would set up a mere $50 million revolving fund to aid our own economically distressed and suffering communities and their citizens and industries. Fifty million is one-tenth of 1 percent of $50 billion.

Of the $50 billion plus given to foreign countries, $41 billion were in outright grants, meaning that no monetary return was expected, but that foreign countries would have that much money to play with in increasing their production of goods, including goods to send back to the United States, entering our markets at low tariff rates or free of duty.

Another $11 billion were in loans and credits to be paid back over the years with the budget recommending additional billions per year to replace the money that might be paid back or not be paid back, as the foreign country chooses.

But the pitiful little $50 million proposed for our own unfortunate and distressed citizens would be in the form of a revolving fund.

Then too, the administration is sponsoring an appropriation of $370,000 for area development in our depressed regions stricken by the folly of free trade, and a sort of point 4 program for these communities.

HOW PLAN TO HELP UNITED STATES DISTRESSED AREAS AND FOREIGN AID COMPARE

Communist Yugoslavia has received 15 times more aid, India 7 times more aid, and Pakistan 3 times as much as it is proposed to spend under this proposed program on our own distressed areas. Indochina has received 6 times as much and Indonesia 5 times as much as would all of our depressed districts combined if the administration program is approved.

Mr. President, real relief can be offered to these areas without the expenditure of one taxpayer's dime. It can be offered by affording an opportunity for these areas to produce their historic products, maintain their historic industries and crafts and skills, without being destroyed by free trade and cut-rate imports.

Have not these foreign countries received enough in taxpayers' dollars without giving them our markets, too? Can they not, with the $50 billion plus that we have given them, compete in our markets on equal terms with American producers, or must we forever give them preference and advantage in deals arranged through GATT, meeting at Geneva?

Passage of my bill would still afford them full privilege to compete against American labor and investors in our markets on equal terms with our own producers, but would remove the free trade bonus and advantage.

Mr. President, the administration's interest in these distressed areas seems to me to be somewhat belated.

As early as March 31, 1954, I was speaking on the Senate floor, calling attention to their plight, and pleading for the Senate to let the Trade Agreements Act expire so that these areas would have a chance to recover under their own power.

On April 1, 1955, I addressed the Senate again on this matter, and listed the areas which were distressed, and their principal industrial or other source of distress.

I said then, and I repeat today, that in the great preponderance of these areas, the industries that were suffering were those which have been forced into unfair and cut-throat competition with imports from foreign countries which have had the advantage of reduced tariffs negotiated under the Trade Agreements Act or through GATT. The employees who had lost their jobs had lost them not to other Americans but to foreign workers receiving a fraction of the wages paid American labor.

CITIES IN DISTRESSED AREA LIST 2 YEARS AGO STILL IN DISTRESS

In my original speech on distressed areas I mentioned Lawrence and Lowell, Mass., as long victims of unemployment and distress. That was nearly 2 years ago, Mr. President, when I first called attention to their plight. In December 1955, only a few weeks ago, they were still on the Labor Department's distressed area list which the Labor De-

partment designates as "areas of substantial labor surplus," meaning people without jobs.

Textiles were the industries in those cities most severely hurt by imports.

I mentioned Biddeford, Maine, where declines in jobs had centered in the manufacture of textile machinery, and Providence, R. I., where textile employment had slumped sharply as foreign countries dumped their textile products on the United States market.

FUEL OIL IMPORTS WRECK COAL INDUSTRY CENTERS

I mentioned Cumberland, Md., which once employed 11,000 citizens in its textile industry, and thousands more in coal mining, hit by imports both of foreign textiles and foreign fuel oil.

I mentioned Scranton, Pa., and Wilkes-Barre, both once great coal centers, and Charleston, W. Va., where glass, chemicals, and coal production once had thrived; Jasper, Ala.; Hazard and Madisonville, Ky.; Middlesburg-Harlan, and Paintsville-Prestonburg, also in Kentucky, all coal-mining areas, and, yes, Pikeville, Ky.-Williamson, W. Va. Coal mining. Imports of fuel oil from Venezuela, the Near East, other remote foreign areas, had knocked thousands of miners off their jobs.

I mentioned Terre Haute and Vincennes, Ind., more coal-mining areas—or at least they used to be—Herrin-Murphysboro-West Frankfort, Ill., and Tacoma, Wash., where lumber and plywood workers had to compete with imports, and many other communities across the Nation.

Well, these cities are still on the distressed area list and so are 62 others and it is proposed to put them on a tiny dribble of point four and foreign aid. That is like sending dandelions to a dying patient or promising to contribute a meager amount to the expenses of his funeral.

Mr. President, every Member of the Senate wants to help these areas and the industries scattered throughout the United States which are in distress.

I think they want to extend real help, not a mere token of the assistance we have been pouring out in Egypt, Indochina, Africa, and to Europe's far-flung desert and jungle colonies scattered around the world—or a bargain basement imitation of the foreign boondoggle that has gone on ever since the war.

SOUND INDUSTRIAL CLIMATE THE GREATEST NEED

To give them real aid we must improve our own industrial climate, and to do that we must give American producers equal access to own markets. My bill will provide that access in the traditional American way, the constitutional way.

We could give our depressed industries and distressed areas $500 million or $5 billion and it would be only money if they could not sell their goods in the rich American market.

When the money was gone they would be in the same dire predicament they are in now—competing against the products of foreign labor receiving peon, coolie, or sweatshop wages.

If they are shifted to other industries they first dilute the employment already existing in those industries—spreading the jobs as it were and spreading them thinner throughout the Nation—or they set up new targets for foreign competitors to shoot at with the State Department helping their aim with more tariff cuts.

AMERICA MUST RETURN TO AMERICAN POLICY FOR AMERICANS

Mr. President, there is only one way to permanently help the economy of the whole country as President Lincoln put it. That is to get back to the American policy, the Washington and Lincoln and McKinley policy of establishing tariffs requiring foreigners to enter our markets with their products on equal terms with our own people. We must serve the whole people.

My bill provides that that be done.

Mr. President, for many years we have heard the fiction that our tariff rates are high; that they are barriers to world trade. The facts belie this free-trade propaganda.

FICTION OF HIGH TARIFFS EXPOSED

The Tariff Commission recently prepared tables showing up that myth of high tariffs in the present era.

One table shows the imports for consumption from 1791 to 1890, those free and those dutiable, the total, the duties collected, and the average ad valorem rate of duty on all imports.

The second shows the same plus the percentage of imports free and imports dutiable from 1890 to and including 1954.

RETURN TO WASHINGTON, LINCOLN, M'KINLEY TARIFF POLICIES IMPERATIVE

Mr. President, there is only one way permanently to alleviate the situation that exists today, and that is to follow the constitutional policy of Washington, Lincoln, and McKinley, the policy of establishing duties or tariffs requiring foreigners to enter our market on equal terms with our own people.

When an American investor, someone who is willing to borrow the money, who is endeavoring to establish an industry and who is young enough to do so, finds he can compete with another American company in the American market, he can establish a very good business, but businessmen not only have to estimate whether they can produce and sell in competition with American labor, but they have to know whether they can compete with all the sweatshop labor of the world in areas where they can manufacture or produce similar articles. It is an impossible situation today.

OFFICIAL TARIFF RECORD BY YEARS SINCE 1791

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, as a part of my remarks, tables showing imports into the United States with duties collected and average ad valorem rates of duty from 1791 to 1890, inclusive.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Imports into the United States with duties collected and average ad valorem rates of duty,[1] 1791–1890

[Years ended Sept. 30, 1791–1842; June 30, 1843–90]

Year	Imports for consumption[2]					Year	Imports for consumption[2]				
	Free	Dutiable	Total	Duties collected	Average ad valorem rate of duty[3] on free and dutiable		Free	Dutiable	Total	Duties collected	Average ad valorem rate of duty[3] on free and dutiable

1804	(1)	(1)	48,768,403	19,888,622	23.40	1821	$1,730,725	$41,965,680	43,696,405	18,883,252	34.64
1805	(1)	(1)	67,420,981	22,299,968	18.49	1822	3,554,146	64,841,527	68,395,673	24,095,337	30.17
1806	(1)	(1)	69,126,764	24,825,592	19.18	1823	2,626,630	48,684,106	51,310,736	22,416,277	30.93
1807	(1)	(1)	78,856,442	25,530,990	18.43	1824	3,083,408	50,763,159	53,846,567	25,516,966	35.36

[1] Values are estimated for the years 1791 to 1820, inclusive. No statistics are available showing the value of free and dutiable imports separately for that period.

[2] Net imports, 1791–1866.

[3] The annual average ad valorem rates of duty prior to 1853 are based upon the values of the gross imports; from 1853 to include 1866, upon the value of the net imports, and after 1866 upon the values of imported merchandise entered for consumption, as returned by collectors of customs, considering ordinary duties only. The reason for basing the average ad valorem rates of duty prior to 1853 upon the values of the gross imports is that the amounts of "duty collected" for those years include the duties afterward refunded upon exports of foreign merchandise.

Imports into the United States with duties collected and average ad valorem rates of duty, 1791–1890—Continued

[Years ended Sept. 30, 1791–1842; June 30, 1843–90]

[1] Nine months, October 1842 to June 1843, inclusive.

NOTE.—For the period 1791 to 1866, inclusive, net imports are shown, that is, total United States imports less foreign exports. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in the same condition as when imported.

From 1867 to 1890 inclusive, United States imports for consumption are shown, that is, imports for immediate consumption plus withdrawals from warehouse for consumption.

Source: Youngs' Tariff Legislation of the United States, 1872 (years 1791–1801); Statistical Abstract of the United States, 1890 (years 1802–90).

Mr. MALONE. Mr. President, I also ask unanimous consent to have printed in the RECORD at this point a table of average ad valorem rates of duty on imports into the United States, by years, under specified tariff acts.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Average ad valorem rates of duty on imports into the United States, by years, under specified tariff acts

[There are 2 fundamental difficulties in measuring average rates of duty under different tariff acts by the use of statistics of imports: (*a*) The change in the character and quantity of the articles imported from year to year, and still more from decade to decade; (*b*) the change in the general price level and even in the prices of single major commodities. Unless due regard is given to these changes, comparisons between different years are likely to be misleading.]

FREE TRADE PROPAGANDA BELIED BY FACTS

Mr. MALONE. Mr. President, for many years we have heard the fiction that our tariff rates are too high and that they are barriers to world trade. The facts belie this free-trade propaganda. I have just submitted tables showing the unreliability of such information. One table shows imports from 1791 to 1890, those free and those dutiable, with the total duties collected and the average ad valorem rate of duties on all imports.

I wish to say, in closing, that there are slogans and catch-phrases coined and put out all over the Nation. Of course we have the slogan "dollar shortage"; we have "trade, not aid"; we have "reciprocal trade"; and no one can define any of them. If they were defined, the people would immediately stop supporting them.

The people have been taught to say, "We must have foreign trade; so we must have free trade." Mr. President, at this time there is a smaller percentage of exportable goods being exported from this country than there was in 1934 when the act was passed.

AMENDMENT OF COMMUNICATIONS ACT OF 1934

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar 1246, House bill 5614.

The PRESIDING OFFICER. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (H. R. 5614) to amend the Communications Act of 1934 in regard to protests of grants of instruments of authorization without hearing.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Rhode Island [Mr. PASTORE], who has prepared a brief explanation of the bill.

Mr. PASTORE. Mr. President, H. R. 5614 amends section 309 (c) of the Com-

munications Act of 1934, as amended, so as to remove ambiguities; to make definite and certain, procedural and legal steps involved in protests; and to prevent an abuse of the protest procedure and promote the public interest. Generally, the bill attempts to remedy the situation by three principal means:

First. Eliminating the necessity for holding full evidentiary hearings with respect to facts alleged by a protestant which, even if proven to be true, would not constitute grounds for setting aside the grant which the Commission has made;

Second. Giving the Commission some discretion to keep in effect the authorization being protested where the Commission finds that the public interest requires the grant to remain in effect, but requiring the Commission to affirmatively find and set forth in a decision that the public interest requires the grant to remain in effect; and

Third. Authority to the Commission to redraft issues urged by the protestant in accordance with the facts or substantive matters alleged in the protest.

Our committee was specifically concerned about the possible retroactive effect of enactment of the proposed legislation upon pending protest proceedings. The Commission through its witnesses and in a letter made part of the committee report stated that where the Commission has already made a determination that a protest should be set for evidentiary hearing or that the effectiveness of a grant should be postponed pending such hearing and the matter has proceeded on this basis, reconsideration of these determinations would not appear to be required and would normally appear to serve no public purpose. Our committee concurred with this view and construes this to apply to any protest on file with the Commission prior to the enactment of this bill. In addition, our committee agrees with the Commission's view, however, that where it has finally acted on a protest and has denied it, either with or without an evidentiary hearing, and where, as a result, the grantee has built his station and is on the air, the Commission should have the authority, in the event its decision is subsequently reversed on appeal, to consider such further proceedings as may be required by the court's decision in the light of the amended provisions of section 309 (c), if they have been enacted into law. This special authority is necessary in view of the real problems involved of depriving the public of established service upon which it has come to rely. The retroactive effect of this legislation shall apply only to those situations where the stations are now on the air and shall not apply to any other protest pending prior to the enactment of this bill.

Mr. PURTELL. Mr. President, will the Senator yield for a question?

Mr. PASTORE. I yield.

Mr. PURTELL. The Senator referred to page 4 of the report, from which he quoted the following:

Your committee was specifically concerned about the possible retroactive effect of enactment of this legislation upon pending protest proceedings. The Commission through its witnesses and in a letter made part of this report stated that where the Commission has already made a determination that a protest should be set for evidentiary hearing or that the effectiveness of a grant should be postponed pending such hearing and the matter has proceeded on this basis, reconsideration of these determinations would not appear to be required and would normally appear to serve no public purpose.

I believe the Senator has referred to the same thing.

Your committee concurs with this view and construes this to apply to any protest on file with the Commission prior to the enactment of this bill.

Is it the Senator's understanding that the language I have just read refers not only to protests filed under section 309 (c), but also to objections filed under section 309 (b), prior to the enactment of the bill?

Mr. PASTORE. The subject matter to which the Senator from Connecticut now refers and calls to my attention in the form of a query was called to my attention by him yesterday. So as to obviate any doubt at all about our position in answering that question, I had a member of the staff communicate with the Federal Communications Commission in order to get a direct, positive answer to the question. This is the answer I have, and I think it answers the Senator satisfactorily and in the affirmative.

Mr. PURTELL. It does.

Mr. PASTORE. It reads as follows:

I was specifically concerned about the possible retroactive effect of enactment of this legislation upon pending proceedings. Insofar as the protests that are pending prior to the enactment of this bill, the report is very clear. In order to avoid any possible misunderstanding as to the situation where a party in interest has filed an objection or opposition in a proceeding prior to the enactment of this bill and such objection or opposition is denied without a full hearing, and a protest under 309 (c) is filed by such a party in interest at a later date, this bill will not apply. In other words, 309 (c) as it presently is written will apply.

In other words, section 309 (c) as it is written at present will apply. This is no denial of any pending rates; it is merely to simplify the procedure before the Federal Communications Commission.

Mr. PURTELL. I thank the Senator from Rhode Island.

Mr. IVES. Mr. President, in this connection, I have prepared a statement in support of the bill, which I ask unanimous consent to have printed in the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR IVES

In 1952, section 309 (c) was added to the Communications Act of 1934. It was an attempt by Congress to insure that an interested party could obtain a hearing when he alleged considerations of public interest to the effect that an authorization granted without a hearing should not have been made. It was thought that the status quo should be maintained and the proposed authorization should be frozen until disposition of the protest hearing.

A few years of experience with this section has demonstrated that, while it has its merits, it has been used by competitors to effectively prevent a new radio or television station from going on the air for a considerable period of time. In section 309 (c), certain radio and television stations have found a ready tool to postpone competition effectively. Whenever we find that a law, such as this, lends itself to abuse, we should be alert to correct it, while preserving the protection to the public that it was designed to give.

In my opinion, that is what the bill as reported would accomplish. It eliminates the necessity for holding full evidentiary hearings with respect to facts alleged by a protestant which, even if proven to be true, would not constitute grounds for setting aside the grant which the Commission has made. It gives the Commission some discretion to keep in effect the authorization being protested where the Commission finds that the public interest requires the grant to remain in effect. It grants the Commission the power to redraft issues to make them conformable with the facts or substantive matters alleged in the protest.

There is no excuse for continuing a system which lends itself to dilatory tactics. The accelerated expansion of wire and radio services and the complexities of new technical developments have multiplied greatly regulatory and administrative burdens. In the past 5 years, the Commission's workload has more than doubled. Figures for a recent period indicate that over 25 percent of the Commission's time was devoted to protest cases.

This is an area where we can give the Commission definite help without cost, at a saving of time and expenditures and without sacrificing the public interest. I am convinced that this is what H. R. 5614 would do.

Mr. LANGER. Mr. President, may I ask the Senator from Rhode Island if the report of the committee was unanimous?

Mr. PASTORE. Yes; it was.

Mr. LEHMAN. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. LEHMAN. I am very strongly in favor of the bill. I do not understand that the bill goes into the merits of any application whatsoever. It simply makes it possible for the Commission to use its discretion in suspending a license for the operation of a plant during the time between the filing of a protest and the hearing thereon.

It would be entirely possible to work a great hardship on large communities if a television system were forced to go out of business pending a delay which ensued between the time of the filing of a protest and the earliest time at which the Commission could hear the protest.

I favor the bill.

Mr. PASTORE. Mr. President, I ask unanimous consent that remarks prepared by the senior Senator from Ohio [Mr. BRICKER] on the proposed legislation may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BRICKER

The Federal Communications Commission is one of the busiest agencies of the Government. In the last fiscal year, for instance, it had to process 430,000 applications of all kinds, 850,000 incoming letters and 20,000 tariffs and reports of common carriers requiring review. In addition, there were 500 hearing cases, thousands of petitions and other legal findings in connection with hearings and rule-making proceedings. Attention had to be devoted to nearly 100 court

cases affecting the Commission. When we consider the fact that the Commission operates with less than 1,100 employees, it is truly remarkable that it can accomplish as much as it does.

In 1952, the Congress enacted section 309 (c) to the Communications Act of 1934.

It was our intention by so doing to protect the public interest, without adding unnecessary redtape. Under section 309 (c), the Commission has the power to grant certain routine authorizations without a public hearing, but a party in interest is permitted to raise questions of public interest by way of protest.

Experience has shown that this provision is being abused by persons who wish to stifle competitors.

The Commission has pointed this out to the Interstate and Foreign Commerce Committee. The Commission says this section is being used as a tactic by competing radio or television interests to delay a proper grant for a year or more for their own selfish interest.

The amendment to the act reported by the committee protects the public interest. It would continue the policy of allowing a hearing in meritorious cases or in cases raising serious considerations of public interest. However, it would also permit the Commission to dispense with a full evidentiary hearing when the facts alleged would not be grounds for setting aside the grant, even if later proved true in a full hearing. This is a power commonly possessed by courts and administrative boards. It is plain common sense.

Furthermore, the bill would grant the Commission some discretion to keep in effect the authorization being protested where the Commission finds that the public interest so requires. In such a case, however, the Commission must make a specific finding to that effect and set it forth in its decision.

Finally, the Commission would be authorized to redraft issues to make them conform to facts or substantive matters set out in the protest. This is in harmony with better administrative procedures and would further a prompt disposition of the case.

In short, the bill before us gives the Commission an efficient tool which should prove of great value in lightening somewhat the enormous administrative load we have placed on its shoulders. In view of the heavy demands on the Commission's time, this is the least we can do to assist it in disposing of applications with promptness and efficiency in the public interest.

The PRESIDING OFFICER (Mr. LONG in the chair). If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H. R. 5614) was ordered to a third reading, read the third time, and passed.

ORDER FOR ADJOURNMENT UNTIL MONDAY

Mr. JOHNSON of Texas. Mr. President, before announcing the program for Monday, January 16, I ask unanimous consent that when the Senate completes its business today, it adjourn until Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM FOR MONDAY—CALL OF THE CALENDAR

Mr. JOHNSON of Texas. Mr. President, on Monday, January 16, it is planned to have a call of the calendar from the beginning. I ask unanimous consent that at the conclusion of the morning business on Monday there be a call of the measures on the calendar to which there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANNOUNCEMENT OF HEARINGS ON THE FARM BILL

Mr. DOUGLAS. Mr. President, I should like to announce that the senior Senator from Louisiana [Mr. ELLENDER] desires the Members of the Senate to know that the Senate Committee on Agriculture and Forestry will hear Members of Congress—both Senators and Representatives—on the farm bill, beginning at 10 o'clock in the morning, next Tuesday, January 17.

AMENDMENT OF THE NATURAL GAS ACT, AS AMENDED

Mr. JOHNSON of Texas. Mr. President, following the call of the calendar on Monday, as previously announced, the Senate will proceed to the consideration of Calendar No. 1234, Senate bill 1853, the so-called natural-gas bill. I ask unanimous consent that that bill may now be made the unfinished business.

The PRESIDING OFFICER. The clerk will state the bill by title.

The CHIEF CLERK. A bill (S. 1853) to amend the Natural Gas Act, as amended.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Texas?

There being no objection, the Senate proceeded to consider the bill (S. 1853) to amend the Natural Gas Act, as amended, which had been reported from the Committee on Interstate and Foreign Commerce with an amendment.

SOUTHERN CALIFORNIA AND THE UPPER COLORADO RIVER STORAGE PROJECT

Mr. WATKINS. Mr. President, for several years, now, residents of 16 western reclamation States have watched with dismay as southern California water interests have spent millions of dollars in pernicious propaganda which they hoped would retard or defeat development of Colorado River water by the States of Arizona, Colorado, New Mexico, Utah, and Wyoming. This unjustified and atrocious program of misrepresentation and untruthful propaganda has held up very worthwhile water resource projects proposed by those five States, and also has caused great damage to the reclamation movement as a whole.

During this bitter and frustrating battle, most Californians from the central and northern sections of the State have kept silent, approving by their silence the tactics of their associates from below the Tehachapi. This was not true, I hasten to add, of a few stalwart exceptions, such as Representative CLAIR ENGLE and Representative B. F. SISK, both of whom have cautioned their colleagues from southern California that their unwarranted attack upon reclamation could have serious repercussions upon the State of California in its $15 billion program of future water development. Representative ENGLE also has given loyal and continued support to the proposed upper Colorado River water development program.

However, now it appears that other advocates of water development in California are becoming concerned about the efforts and tactics of the well-organized and heavily-financed southern California water lobby.

In fact, the suspicion has dawned on the good residents of northern California that the Colorado River Basin States are not the only ones concerned about southern California's poorly concealed designs to get water that doesn't belong to them. Southern California, it appears now, also is out to take over a vital dam site required for a desperately needed water development project in California's Central Valley.

This latter admission is made in a two-article series on the Colorado River Board of California, which appeared last week in the highly respected Sacramento Bee.

The Bee articles, in fact, make two rather serious charges against southern California:

First. That southern California's lobbying activities have resulted in such ill repute throughout the country that the Colorado River Board probably will be kept out of the the New California State Water Department, now in formation.

Second. That while Governor Knight and other State officials have favored construction of the proposed San Louis project as a Federal project, integrated with State water development plans, southern California interests have tried to forestall this program, which they may not be able to control, by urging immediate State purchase of the San Luis site.

The Bee articles also disclose that my estimates last session of the high finances involved in the Southern California fight against non-California development of the Colorado River were entirely sound.

I had a compilation made last spring of receipts reported by three major lobbying organizations maintained here in Washington by southern California interests. These reported lobbying receipts totaled roughly $855,000 for a period beginning in 1951, following announcement of the upstream development plans, and I made the charge that southern California was spending millions to acquire a water resource worth billions.

Now the Sacramento Bee reports that the total cost of supporting the Colorado River board, including legal expenses furnished the State attorney general's office, will be an estimated $425,000 during the current fiscal year. The articles also indicated that a similar amount would be requested of the State legislature for 1956, and stated that Mr. Northcutt Ely, southern California's chief lobbyist, would earn $75,000 from State sources this year.

This means that, if State contributions to this southern California water

board amounted to only half the present level since its organization, the total California tax money contributed for this legal and lobbying service has amounted to more than $4 million since 1937. When current lobbying receipts reported by other southern California water interests are added for the period 1951–55, the grand total will be more than $5 million to supposedly protect California's interests in a river which has been almost fully developed in the California portion of the lower basin, largely at Federal expense.

In view of the interest shown by other States in the efforts of southern California to spend millions to prevent upstream development of water allocated by solemn interstate compact in 1922, I ask unanimous consent to have these two articles, written by Mr. Robert J. Markson, reproduced in the RECORD following these remarks. I also wish to express appreciation to the McClatchy Newspapers, Inc.—publishers of the Sacramento, Fresno, and Modesto Bees—for publishing this revealing information as a service to California and the other 47 States.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

COLORADO RIVER BOARD FIGHTS INCLUSION IN STATE AGENCY

(By Robert J. Markson)

A movement is afoot to keep the Colorado River board out of the proposed new State water department. This would leave the agency, as it is now constituted, free to speak and act independently of the State government although it is State tax supported.

The board would be, as it has been for the past 18 years, a powerful, uncontrolled force in water politics, yet representing only six special interest groups in southern California.

Board critics have complained its policies have not always been in the best interests of the State as a whole.

FAVOR ONE DEPARTMENT

Many leading water spokesmen believe the first thing necessary to solve California's water problems is an effective State water department with one voice expressing statewide water policy.

The State assembly committee on government organization, under the chairmanship of Assemblyman Caspar W. Weinberger, Republican, of San Francisco, is preparing a bill to accomplish this. Governor Goodwin J. Knight will call a special legislative session in March if an acceptable measure is drafted.

The Weinberger committee will hold hearings on the water consolidation bill in San Francisco Thursday and in Sacramento Friday.

BOARD EXCEPTED

The group's announced objective is to put in the proposed new department practically all the various independent State agencies dealing with the water problem except the Colorado River Board.

At the committee's recent Los Angeles hearings board members strenuously objected to being included at least until the end of a lawsuit involving rights to Colorado River water pending in the United States Supreme Court.

CREATED IN 1937

What is the Colorado River Board?

It was created by the 1937 legislature to protect southern California's rights to Colorado River water.

The board comprises 6 members. They must be picked from 6 southern California agencies: The Palo Verde irrigation district, the city of San Diego, the Imperial irrigation district, the Coachella Valley County water district, the Metropolitan water district of southern California and the Los Angeles Department of Water and Power.

BEYOND CONTROL

Although the board is one of the most powerful State water agencies, its members are beyond the control of the governor's office.

This is why: Each of the participating agencies submits to the governor a list of not less than 2 persons for nominations to fill vacancies. The governor must appoint 1 person from each list.

Thus, should the governor wish to discharge a member for any reason at all the successor would be picked from the special-interest agency, which could submit the names of the ousted man and only 1 other.

The effect of this is to give the board a freedom from administrative regulation not available to other State governing bodies.

This is irksome to Governor Knight, although he has not commented on the situation, because it is contrary to his expressed stand in favor of direct chain of command arrangements for good governmental operations.

SUPPORT IS STRONG

The board's support is strong in the State legislature because of the large Southern California delegation of assemblymen and senators and because its members also are members of the strongest water groups south of the Tehachapi.

While the latter is true, the board members do not represent a unanimity of opinion so far as Southern California is concerned.

For example, Harold W. Kennedy, Los Angeles County counsel, and the California Mutual Water Co.s, representing citrus interests in the south, have voiced opinions on State water policy sometimes at odds with the other groups.

CONFUSION SURROUNDS MAKEUP OF COLORADO RIVER BOARD

(By Robert J. Markson)

The confusion which surrounds the makeup of the Colorado River Board is typical of the jumbled morass of California water policy, expressed by a myriad of disconnected State governmental agencies. The State Assembly Committee on Government Organization is attempting to bring order by proposing a bill to consolidate in one statewide agency the various water groups. The committee will meet in San Francisco tomorrow and in Sacramento Friday.

Present talks tend to exclude the Colorado River Board from the proposed new organization.

SPECIAL INTEREST GROUPS

The board is composed of 6 members who also are leaders in 6 special-interest groups in southern California.

When speaking for the board, they say one thing; when acting as officials of their own organizations they say another.

For instance, Evan T. Hewes of El Centro is a member of the board and also a leader in the Imperial Irrigation District, the largest and richest such district in the State. It is the dominant force in the Irrigation Districts Association of California.

Speaking before the assembly committee in Los Angeles recently Hewes said the association favors independent counsel for the new State water agency, thereby restricting more the attorney general's activities in water law.

Yet he also admitted the Colorado River Board is working suitably hand in hand with the attorney general in southern California's court fight over rights to Colorado River water.

Hewes also says the irrigation group wants a State board to make water policy instead of a director appointed by the Governor.

DIRECTLY OPPOSITE

This statement, made by a member of a State agency supposedly under the control of the Governor, is directly opposite to Gov. Goodwin J. Knight's ideas. Knight wants an effective chain-of-command operation.

The Colorado River Board wants to stay out of the new department because of its restricted sphere of action, confined to protecting rights on the Colorado River.

Board spokesmen say this ultimately will be of definite benefit to the entire State. They say unless southern California continues to get all the Colorado River water it needs it will have to turn to northern California for additional supplies.

Thus, the board says it wants to stay independent because of its restricted field of activity but wants State support because it contends its problem is statewide.

OPPOSE PLAN

Governor Knight has favored exploring the possibility of Federal construction of the San Luis Reservoir with integration with the State's proposed Feather River project. But the Metropolitan Water District of Southern California, the Los Angeles Water and Power Department and the Irrigation Districts Association, all members of the Colorado River Board, have urged immediate State purchase of the San Luis site. Federal officials have stated this would block Federal construction.

From recent events in Washington, D. C., it can be assumed the Colorado River Board would be a powerful voice free to act independently of statewide water policy if it were kept out of the new department.

When the board speaks in the Nation's Capital it is difficult for Congressmen from other States to realize it is not voicing the official policy of California's government.

Concern has been expressed that the board's uncompromising lobbying activities in Washington on behalf of its own special interests will have an adverse effect on efforts to obtain such Federal projects as the Trinity River and San Luis developments. There is fear the board will alienate Congresssmen from other States who otherwise would be friendly to these and like western projects.

COSTS $425,000

The total cost of supporting the Colorado River Board, including legal expenses furnished the State attorney general's office, will be an estimated $425,000 during the current fiscal year.

A similar amount is expected to be requested in the 1956–57 budget which will be viewed by the legislature in March.

The money is supplied from the State general fund but no administrative control over the board's functions is provided the governor's office. Under the board's setup the members can name their own successors.

HIGH PAID LOBBYIST

The board has the second highest paid lobbyist in Washington, Northcutt Ely, whose total income from California government sources this fiscal year may reach $75,000.

The board members receive no pay but the chief engineer, Raymond Matthew is paid $15,000 annually, more than several State division chiefs receive.

The decision whether to put the Colorado River Board into the new State department may be the subject of a fight in any special legislative session on water. The board has strong support from the large southern California legislative delegation.

But a compromise to avoid such a fight is being studied by the assembly committee on government organization under the chairmanship of Assemblyman Caspar W. Weinberger (R) of San Francisco, which is preparing the water department bill.

This proposed arrangement would leave the board outside the new water setup until the court fight over Colorado River water rights is completed. Then it would be absorbed into the new department.

Mr. WATKINS. Mr. President, on another occasion, I will discuss how southern California has alienated support from other States for needed water resource development for its own State, and how southern California, at the same time, has managed to get the lion's share of water resource appropriations allocated to the Golden State.

Mr. MONRONEY obtained the floor.

Mr. KUCHEL. Mr. President, I wonder if my good friend from Oklahoma will be generous enough to yield to me for a few moments, so that I may make a brief comment on the statement of the Senator from Utah.

Mr. MONRONEY. Mr. President, I yield for only a very brief comment, so that I may protect the rights of Senators following me on schedule.

Mr. KUCHEL. I thank my friend very much.

Mr. President, I have had the honor of representing, in part, the State of California in the United States Senate for 3 years. I have tried, to the best of my ability, to present the position which I thought ought to be taken in behalf of the 13½ million people of that State upon every question which has come before the Senate for debate and discussion. In all that time I have never denounced any other State of the American Union or any other Member of the Senate of the United States, or any of the people any other Senator represents.

In all I have endeavored to do, either in favor of proposed legislation or in opposition to it, Mr. President, I have done it as courteously as I could, as vigorously as I could, and as persuasively as I could.

Mr. President, on a number of occasions I have brought forward proposed legislation of interest to the people of California, and I am glad that upon many of those occasions my friend from Utah has helped me to have such measures passed by the Senate. But, Mr. President, I very much wish that my good friend from Utah would not take the time of this body in an endeavor to punish any people from any segment of the State from which I come simply because they may have a different opinion of legislation than does my good and honorable friend from Utah.

In the future I intend to conduct myself in exactly the same fashion as I have in the past. I will stand on this floor, and I will honorably debate against those bills which I feel are inimical to the best interests of the people of California, or the United States, but there shall never come from my lips any invective against people simply because they sincerely disagree with my position.

Mr. WATKINS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. LONG in the chair). The Senator from Oklahoma has the floor. Does the Senator from Oklahoma yield?

Mr. MONRONEY. I do not want to become involved in any debate between Representatives of two great States.

Mr. WATKINS. I merely wished to reply to what the Senator from California has just said. I am not criticizing the Senator from California. I stand on the statement I have made. I think it is a fair criticism of the activities of some people in central California. I think it is a proper introduction to the articles from the Sacramento Bee, one of the leading papers in southern California. I intended to cast no reflections upon my friend from California. He has been courteous. However, many times when we are faced with a situation such as the people in my area of the country face, it is necessary to bring the truth before the people. That is what I intend to do, no matter what section of the country may be involved. Even if people in my State were affected, I would bring out the truth.

Mr. KUCHEL. If my friend will yield for a moment more.

Mr. MONRONEY. Mr. President, I shall be glad to yield to my fellow Episcopalian for the purpose of closing the debate with a second rebuttal.

Mr. KUCHEL. I thank the Senator for his fine generosity.

Mr. President, sometimes in representing our States—certainly it is true in a commonwealth which now is the second largest in population in the American Union—there are going to be differences of opinion between people whom one represents on all questions which come before the United States Senate.

Mr. President, I endeavor to resolve those differences and to speak out as I see the light; but certainly, whether they be in Utah or California or Oklahoma, I do not want to punish any people in any one State of the American Union who happen to disagree with Senators from other States.

I thank the Senator for his personal comment about me.

MONTHLY DISCLOSURES ON GAS BILLS TO CONSUMERS IN THE DISTRICT OF COLUMBIA

Mr. MONRONEY. Mr. President, I am most happy to announce to the United States Senate that the chairman of the Senate Committee on the District of Columbia has agreed to refer to the full committee the truth-in-billing legislation, which I introduced for myself, the Senator from Arkansas [Mr. FULBRIGHT], the Senator from New Mexico [Mr. ANDERSON], and the Senator from Texas [Mr. DANIEL], last Monday.

The chairman of the District of Columbia Committee, the Senator from West Virginia [Mr. NEELY], has agreed to refer the bill to the full District of Columbia Committee as soon as practicable, and has said he would be glad to hold hearings on this proposed legislation for truth in billing.

The bill, as my colleagues know, provides the simple requirement that the franchised gas utility shall show on the face of each and every household consumer's bill the average price paid to the producer for the raw gas for the nearest calendar period for which statistics are readily available, and also to show the cost of the gas to the franchised gas utility at the city gate. Such information would be in clear and ordinary terms used in the natural gas industry. The bill would also require the franchised gas utility to show the spread between its cost at the city gate and its charges for delivery to the burner tip, which might be called the city delivery cost.

Mr. President, it is a simple bill, which merely provides that the public—the consuming public—has a right to see what share of its gas cost goes for the material it burns, how much goes for the overhead of interstate transportation, and how much goes for cost of delivery within the Washington area—the District of Columbia, and the nearby Maryland and Virginia.

Mr. President, I have been rather astounded by some of the comments appearing in the newspapers. I was particularly astounded by articles which appeared in the Evening Star and the Washington Post and Times Herald which quoted President Everett J. Boothby, as claiming that Senate bill 2890, requiring truth in billing for gas sold in the District of Columbia, is an effort to punish the Washington Gas Light Co. for its sacrificial devotion to the interests of its customers. Mr. Boothby is mistaken. Even if devotion to consumer interest were a punishable offense, the Washington Gas Light Co. is clearly not guilty of any consumer devotion.

The Washington Gas Light Co.'s innocence is demonstrated by the fact that the great benefits from its conversion from mixed artificial gas to natural gas have been reserved to and received by stockholders rather than the consumers of gas.

The cost of gas, measured in heating units, to the Washington Gas Light Co. in 1954 was 5 cents per 1,000 cubic feet less than the cost for mixed artificial gas in 1946, the last full year prior to conversion to straight natural gas.

During the same period, the average price charged the residential consumer increased 11 cents for cooking gas to 12 cents for heating gas. This resulted in a total increase in the spread between the company's cost of gas and its sale price of 16 to 17 cents. This increased spread meant greatly increased profits. It was reflected in the company's net earnings, which increased 350 percent over 1946. I repeat, the net earnings increased 350 percent over earnings in 1946.

It was reflected in its dividends, which increased 300 percent during the same period. It was thus the Washington Gas Light Co.'s stockholders, rather than the consumer, who received the benefit of its conversion to natural gas. They got cheaper gas by 5 cents a thousand cubic feet, a rate increase of 12 cents, and an increase of 17 cents in the spread between its cost and the rate charged the consumer; and this increase in the spread between the company's cost and the amount paid to it by its customers represented an additional revenue from resi-

dential consumers only. In fact, Mr. President, I am speaking here only of the residential consumers.

At the current volume of sales, this 17 cents increase in the spread between the company's costs and prices received represents, in additional revenues from residential consumers, a grand total of $2,516,000.

Mr. Oscar Berry, the attorney for the Washington Gas Light Co., complains that the producer has increased his prices by 120 percent. Mr. Berry does not mention the cost in cents; he does not say that since 1950 the producer got a 1.7-cent increase. After all, when we deal in percentages, if a price of 1 cent is increased to 2 cents, that is a 100-percent increase, but it is still an increase of only 1 cent. However, when a rate already is high—such as the rate the Washington Gas Light Co. charges—then an increase of 12 cents in the rate does not appear to constitute a very important or large percentage. However, it is an important part of the consumers' gas bill, which has been added, even though the supply of natural gas is 5 cents a thousand cubic feet cheaper than it had been before the conversion to natural gas from artificial gas.

I do not know why Mr. Berry is so anxious to refer to what he says is a 120-percent increase to the producers, because the Washington Gas Light Co. does not purchase natural gas from the producers. It purchases the gas from the long interstate pipeline; and the important figure, if there is a figure which is important to Mr. Berry, is in connection with his claim that there was a 64-percent increase to the pipelines. Well, Mr. President, there is a difference between the 120-percent increase which he says the producer got and the 64 percent which he says the pipeline got; and in that connection it might be well for us to consider the increased revenues the Washington Gas Light Co. received, as that increase is reflected in the 350-percent increase in its earnings and the 300-percent increase in its dividends. Mr. Berry seems to think that the few cents per thousand cubic feet increase received by the producer and by the pipeline company constitutes a curse. However, Mr. President, it seems to me that instead of trying to place the blame on the few cents increase which they receive—the 1.7-cent increase received by the producer since 1950—Mr. Berry might well look a little closer to home, to see why the Washington Gas Light Co.'s rates to the consumers are high.

The Washington Gas Light Co.'s lack of enthusiasm for truth in billing—requiring them to show the part of the consumer's gas bill represented by the cost of gas and by distribution charges—is understandable.

Mr. President, at this time let me refer to the chart displayed in the rear of the Chamber. It has been prepared by the Library of Congress, and it shows rather clearly exactly how the consumer's bill for natural gas is shared. For each thousand cubic feet of natural gas which reaches the city gate of Washington, and is burned at the burner tips in the households of the Washington consumers, 12½ cents goes to the producer; that is the average amount he receives. The price delivered at the Washington City gate is 41 cents a thousand cubic feet. That amount includes the 12½ cents per thousand cubic feet which is received, on the average, by the producer. The big spread or increase, in the amount of an additional 90 cents, occurs between the time the gas is received at the city gate of Washington and the time when it is burned in the burner in the consumer's home—for instance, in the burner that it is used to heat my home.

I have obtained these figures by referring to the gas bill which I have to pay. I began to study it, in an attempt to ascertain how much I was really paying for the gas used in my home, and in an attempt to penetrate the curtain of confusion which exists in connection with the billing for this gas. So I find that I pay a spread or increase of 90 cents per thousand cubic feet, in order to obtain the gas used in my home; that spread or increase occurs after the natural gas is delivered at the city gate of Washington. I find that the charge to move that gas from the Washington City gate to my home is 90 cents a thousand cubic feet, or about eight times what the gas cost when it left the wells in Oklahoma, Arkansas, or Texas. I am sure that in passing through the lines, the gas does not wear out by friction the obsolete plant of the Washington Gas Light Co.

I may even say that there is a difference between natural gas and artificial gas, as regards the condition of the lines. In the use of lines over a period of many years, there is an accumulation of tar, which tends to coagulate within the lines used to transport or transmit artificial gas. As a result, the lines become somewhat worthless; they deteriorate. But I am advised by competent authority that when natural gas runs through the lines, because of its chemical properties, it acts as a cleansing agent, and cleans out the tar within a few years, and restores the lines to their capacity usefulness. Of course some of the lines are so old that when the tar is cleaned out, the lines leak. I have an idea that some of the high cost of conversion to the use of natural gas arises from the necessity to repair obsolete lines which, once the natural gas cleaned out the tar, were found to spring a few leaks.

But it a is a little strange to me that, with all the spread in price, which is so obvious—and on the chart which Senators now see, here in the rear of the Chamber, I point out that the total rate is shown, and the chart or graph shows the delivered cost at the city gate and the cost when it is delivered to the burner tip in the consumer's home—there is an increase of 90 cents in the charge per thousand cubic feet for delivery of the gas from the city gate to the consumer. Of course, if the natural gas is used for cooking purposes, there is a spread of $1.10 a thousand cubic feet; but if the gas is used for heating, the spread is 84 cents a thousand cubic feet.

So it is a little strange that such big tears should be shed by Mr. Boothby, as reported in the articles published in the Washington Star and the Washington Post and Times Herald.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. FULBRIGHT. Is it not a fact that under the terms of the bill which has been introduced the escalator clause to which Mr. Boothby objects so strongly in the article—the so-called favored nation escalator clause—is subject to review by the Commission?

Mr. MONRONEY. Absolutely. I am surprised that anyone charged with the management of a gas company of this size has not bothered to read the bill, or, if he has read it, does not understand it.

Mr. FULBRIGHT. The Senator will remember that such clauses were objected to by some of the distributors; and the committees in both Houses, specifically to meet such objections, inserted the provisions which make such clauses subject to review. No increase under such clauses can be passed on to the consumer without the approval of the Commission.

Mr. MONRONEY. The distinguished junior Senator from Arkansas is entirely correct. All the escalator clauses, including the favored-nation clause which the Senator mentions, are subject to the approval of the Federal Power Commission, as to whether or not the cost can be passed on to the consumer.

The only one that is exempt is the regular 20-year type of contract, which has fixed periodic step-up stages. If one leases a building for 20 years, for example, he agrees to pay a low rent when he starts in business, for the first 5 years. He agrees, as his business grows, to pay a little higher amount during the following period. It was known to Mr. Boothby, or to the company which supplies Mr. Boothby with the gas, exactly what the periodic stepups were. They are in there for a very good reason, and I should like to explain it, because they benefit the gas consumer; they benefit the pipeline; and they benefit the distributing company. The step-up stages benefit the distributing company by giving it a low rate at the start, and stepping up the rate gradually. The low rate at the start enables the distributor to build its gas load. Thereby it is in better shape to pay the next stage of the rate increase, perhaps at the end of 5 years, the increase being perhaps 2 cents, or something of that kind.

Mr. FULBRIGHT. I know the Senator and other Senators will explain the bill on its merits when we reach that point in the debate. What amazes me is that the manager of a large distributing utility could display such complete ignorance of legislation which he is opposing.

Mr. MONRONEY. Let me say to the Senator that I doubt whether it is complete ignorance. I think the distributor is a member of a club which has been formed by some distributors, which includes the richest, oldest, companies and those with the widest cost-of-delivery spreads in the country. They organized behind an attack on the producers, to conceal the unconscionable profits which they are exacting for the job of distributing the gas from the city gates to the burner tip.

Mr. FULBRIGHT. I thought it was more charitable to allege ignorance than to question his motives at this time. I agree that perhaps that might be well, but, having no personal knowledge of the situation, I did not wish to question his motives at this time.

Mr. MONRONEY. I do not wish to question his motives.

Mr. FULBRIGHT. It is obviously one thing or the other, because his statement is clearly untrue.

Mr. MONRONEY. Let us not question his motives, but let us read his words in the article which the distinguished Senator placed in the RECORD. I read from the article in the Washington Star:

To that proposal—

For truth in billing—

Mr. Boothby and his associates say they will comply to the best of their ability if it becomes law. But they doubted it would have any useful purpose, and rather confuse the bills and cause a substantial extra cost which would become a charge against consumers.

He talks about confusion of bills. I think if anyone were to read the printing on the back of the bill, in terms of therms, four-stage steps, with decimal points, and the fine print as to how additional costs are taken care of, he would like to be "confused." I believe the Washington consumers would love to be "confused" by having a simple statement of the breakdown, showing who gets what part of the dollar they are paying for gas. Incidentally, the gas rates in Washington are among the highest in the country, as I shall show.

The Washington Gas Light Co. doubted it would have any useful purpose.

They doubt whether the information called for would serve any useful purpose. They say that the expense of compiling the data would be substantial, and would be an unnecessary burden on the gas consumer.

One could call the gas company this afternoon and the company could tell him exactly the breakdown. It is in the record book. The printer's ink to put it on the bills would not cost much. The printing would not be required until 90 days after the passage of the act, so the company could prepare for it. We even provide that the company may use the figures for the most convenient calendar year for which data are readily obtainable.

Who is misleading whom? Who was misleading the public with respect to the escalator clause? I am sure that Mr. Boothby is laboring under a misapprehension when he states that the information called for would serve no useful purpose.

The poor, disfranchised people of the District of Columbia have no voice in their government and no representation in the District of Columbia in framing their laws or appointing their public utility commissioners. They have only the Congress and the newspapers. Strangely enough, this seems to be a story for the want-ad page. Perhaps the newspapers themselves do not feel that there is any keen interest on the part of citizens to know the composition of their gas rate, and what city delivery costs them. I wish I could persuade the newspapers to print an invitation to the disfranchised thousands of citizens of the District of Columbia to write letters to the editors of their newspapers, stating whether they oppose or favor the idea of truth in billing. Perhaps we might focus for those disfranchised people, over and beyond the Washington Board of Trade, the high cost of gas in the District of Columbia.

Why is there such a strange reluctance to override the Washington Board of Trade? Perhaps the opposition to telling the facts as to the composition of the rates of one of the leading members of the Washington Board of Trade is understandable. But the people can be heard if they will write the editors of newspapers and tell them that they are interested; and I should like to receive carbon copies of such letters, if the people are interested in this problem.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. LONG. Do I correctly understand the Senator to say that since Washington converted to natural gas the cost to the distributor in the city has been reduced by about 5 cents a thousand cubic feet?

Mr. MONRONEY. That is correct.

Mr. LONG. Am I to understand that, notwithstanding the reduction of 5 cents a thousand the gas company had raised rather than reduced the price of gas?

Mr. MONRONEY. The Senator is exactly correct.

Mr. LONG. Can the Senator tell me how much?

Mr. MONRONEY. By 12 cents.

Mr. LONG. So, while the price should have gone down by 5 cents, it went up by 12 cents.

Mr. MONRONEY. That is correct.

Mr. LONG. Then if I correctly understand, the increase, for no other purpose than merely to increase the profits of the Washington Gas Light Co. is almost as much as the entire price the producer is receiving for the gas.

Mr. MONRONEY. The Senator is correct. The increase in the price of gas for house heating has been 12 cents. It has gone up from $1.13 for house heating to $1.25, or an increase of 12 cents. For purposes other than heating, it has gone up from $1.40 to $1.51 since conversion.

Mr. LONG. Looking at the problem from the standpoint of the housewife, the Washington corporation, which had its cost reduced by 5 cents, proceeded to increase the price to the housewife by 12 cents.

Mr. MONRONEY. The Senator is correct.

Mr. LONG. The amount of the increase is approximately 50 percent more than the gas producer receives for producing the gas. That was the markup imposed on the housewife.

Mr. MONRONEY. That accounts for the 350-percent increase in net earnings, and the 300-percent increase in dividends paid to stockholders.

Mr. Boothby says that the 40 fat distributing utilities have been organized to protect the consumer. So far as the fat distributing companies are concerned, the consumer is the forgotten man.

As practically all of them increased tremendously their earnings after conversion to natural gas, a precious little has been passed on to the consumer.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield to the distinguished Senator from Texas and leader of the Senate.

Mr. JOHNSON of Texas. It seems to me that the very able argument which the Senator from Oklahoma is making is that if the Washington Gas Light Co. follows in the future the practice it has followed in the past, the only effect, if the producers reduced their price, would be that the consumer would have to pay a sizable increase in his rate.

Mr. MONRONEY. That is correct. In other words, I do not believe that the consumer could stand any more of a so-called reduction in the gas rate, because such a reduction would undoubtedly be passed on to the consumer in the form of an increase in his rate.

Mr. JOHNSON of Texas. In other words, when the Washington Gas Light Co. benefited, to the extent of a material reduction in cost by conversion from manufactured to natural gas, the consumer received a substantial increase?

Mr. MONRONEY. The Senator is correct.

Mr. JOHNSON of Texas. Now the president of the Washington Gas Light Co. says to the consumer in effect, "I want to protect you from the producer who got a 10-cent increase in his rate by charging you a dollar." Is that correct?

Mr. MONRONEY. That is correct.

Mr. JOHNSON of Texas. It may be that the consumers will understand the truth before this fight is over.

Mr. MONRONEY. If we could let the consumers know that by writing letters to the editors of the local newspapers they have a voice in the Government, I am sure something could be done. If that could be done, instead of letting all of it go by default to the Washington Board of Trade, of which, I am certain, the Washington Gas Light Co. is a substantial member, the people of Washington could have a part, as the people of other cities have, in forcing down the rate. The people in other cities, who can vote, have considerably lower rates, in many cases. The average charge for Washington city delivery—and that is for delivery from the city gate to the burner tip—is 98 cents. That is the average charge. Detroit, where people can vote, has an average delivery charge of 49 cents. That is for city delivery. Detroit is a comparable city to the city of Washington. Atlanta, Ga., another comparable city, pays 47 cents, as compared with Washington's 98 cents.

Memphis pays 46 cents. Memphis has a municipally owned gas company, which operates in the TVA pattern. They are trying not to make a profit, but are making a profit on the 46-cent delivery charge, which is less than half of the Washington charge. Louisville, Ky., has a charge of 35 cents, as compared with the 98-cent charge in Wash-

ington. Kansas City has a charge of 28 cents. The Denver amount is 26 cents.

I could talk about the rates in Oklahoma, but it might be confusing to do so, because Oklahoma is near the gas field. The other cities I have mentioned are on long lines.

After all, Mr. President, it does not matter how far a city is from a gas field. The city delivery spread is about the same comparative charge, or should be, wherever a city is located, because certainly it is not necessary to drill through granite in the District of Columbia to lay pipe lines. Apparently it was necessary to do so, judging by the distribution rate we are being charged in the city of Washington.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield further?

Mr. MONRONEY. I am happy to yield.

Mr. JOHNSON of Texas. Does the Senator mean to tell the Senate that this outfit, called the Washington Gas Light Co., is charging the people of the District of Columbia twice as much for gas as is charged in the city of Atlanta, or in Detroit?

Mr. MONRONEY. It is charging almost four times as much as in Denver. It is charging nearly four times as much as in Kansas City, and about two and a half times as much as in Louisville, Ky. It is charging about twice as much or more than is being charged in Memphis, Atlanta, or Detroit.

I do not know the reason for it. I am certain it is not because of lack of volume, because the Washington Gas Light Co. increased its volume by about 300 percent since its conversion to natural gas. It has many more customers today than ever before. In fact, it boasts of about a 40 percent increase in consumers.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield to the Senator from Arkansas.

Mr. FULBRIGHT. Perhaps it is because the other companies do not have Mr. Boothby at their head.

Mr. MONRONEY. Or perhaps it is because the managers of the other companies understand the escalator clause. I would rather not say.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MONRONEY. I yield.

Mr. LONG. When a company has a monopoly like the monopoly the Washington Gas Light Co. has and is supposed to be limited to a fair return on its investment, how can a 300 percent increase in profit be justified?

Mr. MONRONEY. I am trying to get the figures. They will show some interesting facts. There has been a write-off of $4,700,000 because of conversion costs. That writeoff has occurred in 5 years. We might well inquire what happened to the best real estate in Washington, on Virginia Avenue, overlooking the broad Potomac River, which land belonged to the Washington Gas Light Co., but is now being developed as a multi-million-dollar apartment site. Was that land worth less after the gas tanks were removed, or more? Were those gas tanks and the land on which they stood worth less or more than the land after it had been cleared of those gas tanks. Yet there is that $4,700,000 chargeoff in about a 5-year period for the conversion and to take care of the obsolescence of the plant.

It is worth quite a study. I hope when the Senator from West Virginia [Mr. NEELY], chairman of the Committee on the District of Columbia, conducts hearings on the subject, he will permit us to go before the committee to urge the passage of the truth-in-billing bill, and that the committee will ask some questions about the company's writeoff, and about who got an advantage from the writeoff on that very valuable real estate. It is rather difficult to get figures on those points. It is not difficult to get figures on the rate. All that is necessary to get those figures is to pick up a telephone and to call the company. However, it is difficult to find out about the bookkeeping that goes on in the establishment of a rate basis. We are trying to get that information. I hope I will be able to supply it to the distinguished Senator.

Mr. President, I feel this is a matter of vital importance, not only to the Senate, but to the hundreds of thousands of silent people in Washington who are paying this exorbitant rate for city delivery, as compared with the rates charged in other cities of comparable size.

I hope that the Washington newspapers will see the wisdom of the truth in the billing proposal, and notify their subscribers in a prominent place in their papers that they will print letters from their subscribers, for and against the bill, and in that way give the people of the District of Columbia an opportunity to be heard. The greatest public forum in the world is still in the newspaper columns of the free press of America.

During the delivery of Mr. MONRONEY'S speech,

Mr. FULBRIGHT. Mr. President, will the Senator from Oklahoma yield to me?

Mr. MONRONEY. I am glad to yield.

Mr. FULBRIGHT. Did the Senator from Oklahoma place in the RECORD the article by Mr. Warren, quoting Mr. Boothby?

Mr. MONRONEY. I was going to refer to it. I shall appreciate having the Senator from Arkansas place the entire article in the RECORD, and I should be glad to have the full article follow my remarks in the RECORD. I shall quote from the article, if I may, so as not to delay the Senate unduly in carrying out its program for today.

Mr. FULBRIGHT. Mr. President, will the Senator from Oklahoma yield to me for 2 minutes, so as to enable me to place the article in the RECORD, along with a short comment by myself?

Mr. MONRONEY. I shall be glad to do so, if that is agreeable to the distinguished Senator from Maine [Mrs. SMITH], who is to be the next speaker.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent to have printed in the RECORD the article by Mr. Warren, together with a comment by me, both to be printed in the RECORD at the conclusion of the remarks of the Senator from Oklahoma.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. FULBRIGHT. Mr. President, first I submit the article by Mr. Warren, published in the Washington Star of January 11.

The article is as follows:

BOOTHBY SEES RATE RISE IF GAS MOVE SUCCEEDS

(By Don S. Warren)

Passage of the Fulbright-Harris measure to exempt producers of natural gas from Federal regulation "undoubtedly would result in unnecessarily higher costs" to the consumers, Everett J. Boothby, president of the Washington Gas Light Co., declared today.

That, he told the Star, is why his firm is represented in the Council of Local Gas Companies, an organization of distributors fighting the exemption bill.

He said his officers and directors knew they could expect to be singled out for criticism from proexemption factions in Congress. But he said they agreed they had to join in the fight against the "powerful producer lobby" because they felt they must serve the interests of their own customers.

ATTACKED IN SENATE

The gas company has been attacked on the Senate floor by Senator MONRONEY, Democrat, of Oklahoma, supported by Senators FULBRIGHT, Democrat, of Arkansas, and DANIEL, Democrat of Texas.

These three, with Senator ANDERSON, Democrat of New Mexico, had joined in introduction of a bill to require the company to print on its monthly consumer bills a statement of a breakdown of the average consumers' bill here—this is designed to show how much of the average bill goes to the company as against a smaller portion to the pipeline companies and a still smaller amount to the gas producer.

To that proposal, Mr. Boothby and his associates say they will comply to the best of their ability if it becomes law. But they doubted it would have any useful purpose, and rather confuse the bills and cause a substantial extra cost which would become a charge against consumers.

They voiced the belief, also, that without new law the District Public Utilities Commission could order such a change if it found it to be in the public interest.

Senator MONRONEY and others from gas-producing States joined in accusing the Washington company of charging excessive rates and with getting an exorbitant and an unconscionable share of the ultimate consumer prices for the natural gas.

All this Mr. Boothby and his associates deny.

Mr. Boothby told how and why the gas company—its officers and directors all reside in the metropolitan area, and 63 percent of its common-stock holders also live here—got involved in the bitter national fight over free enterprise or regulation for gas producers, thousands of miles west.

TELLS HIS STORY

This is how he described his part of the story:

"The decision of the Supreme Court rendered June 7, 1954, held that independent producers of natural gas are subject to Federal regulation under the Natural Gas Act and should be regulated in the consumer interest.

"At first this was repugnant to our basic philosophy. The thought of extending any regulation was in conflict with our belief that business, as far as possible, should be regulated by competition.

"Later, as steps were taken by the producer interests to prepare the way for legislation to nullify the effect of the Supreme Court decision, we were asked to join the producers' team to seek such legislation. We did not join their team.

In view of what was happening to producers' gas prices as the result of favored-nation clauses and escalator clauses in their contracts, we reluctantly came to the conclusion that such legislation should not give the producers complete freedom.

JOINED IN PROPOSAL

We were among others who proposed, in connection with the Harris bill in the House, that the legislation should provide freedom from regulation provided the insidious forms of favored-nation and escalator clauses were omitted from the producer's contracts.

Meanwhile, independent producers of natural gas have staged a tremendous publicity campaign, spending millions of dollars in an effort to convince the public that the decision of the Supreme Court should be nullified by the passage of the bill exempting gas producers.

Feeling strongly that the passage of the Fulbright bill exempting producers from regulation would undoubtedly result in unnecessarily higher costs of natural gas which would have to be paid by their customers, 60 local gas distributing companies formed the Council of Local Gas Companies.

The objective of the council is to see that all of the facts concerning the effect on their customers of the exemption of gas producers are made known to the public and the Congress.

While the council cannot hope to match the lavish spending of the producer's lobby, we are making an earnest effort to protect our customers from higher costs.

REALIZED POSITION

The company realized, when it joined the council, that because of its location in the District, it could be singled out for criticism by those who are proposing the exemption of gas producers from regulation. Nevertheless, this company will not refuse to recognize its responsibility to the public it serves, and will not stand idle while incomplete and misleading information is disseminated by the powerful producer lobby for the purpose of securing passage of their exemption legislation.

"The proposal to exempt gas producers would make it possible for the few thousand gas producers to get substantial windfall profits from millions of gas users.

"The provisions of the bill purporting to protect consumers will not give the protection that consumers deserve, in our opinion, and will only serve to validate higher charges by gas producers if they should be free from regulation.

"The gas company stands, with the Council of Local Gas Companies, unalterably opposed to the passage of the Fulbright bill."

CALLED DANGEROUS

Local distributors say the so-called favored nation and escalator clauses are most dangerous.

As Washington gas officials explain it, this means a lot of things they never before understood to be free-enterprise. They say, for instance, that if their pipeline company made a contract with a producer for a certain price for a certain quantity that didn't mean just that.

If, later, that pipeline made a deal with another producer for a higher price both lines and all parties would be affected. But further, they say, if another pipeline outfit made a contract for a still higher price with a different producer that would mean that the latest highest price would apply to everybody, even in the earlier contracts.

While pipeline company rates are subject to Federal Power Commission regulations, there is a gimmick to this, gas company officials explained.

The local company has no control over such gateway prices. They automatically become charges against operating expenses, paid by the ultimate consumer. But since 1954, this has become more definite. If the pipeline files a new tariff with the FPC it goes into effect after 30 days unless the FPC takes adverse action and the case is adjudicated. And under regulations, any change in pipeline gas service is automatically reflected in Washington consumer rates.

Mr. FULBRIGHT. Mr. President, in connection with that article, I wish to make the following statement.

Everett J. Boothby, president of the Washington Gas Light Co., has evidently not even read the Fulbright-Harris bill which he opposes. The bill spells out Federal review and control of natural-gas prices in the field. It does not—it positively does not—exempt from regulation the amounts paid to producers.

The bill will also make it possible to continue all the competitive bargaining which has keep field prices of natural gas to the low levels which the Nation enjoys today. The actual prices arrived at, through this competitive action, however, will be reviewed by the Federal Power Commission, and the Commission must be completely satisfied that these prices are reasonable.

In denouncing the producing industry for price adjustments in the field which have occurred in the past few years, Mr. Boothby and others completely avoid the fact that these price changes were specified and spelled out in writing in contracts between the pipeline companies and the producers. A person would have to be incredibly naive to think that distributors did not know exactly what went into these contracts or, in fact, may actually have dictated many of the terms.

We must remember that in the competitive United States economy, sellers have no more control over conditions of sale than do purchasers. An auctioneer can ask for any price he wants, but a buyer must actively initiate a bid, if an agreement is to be reached.

If the prices paid by a few distributors, including Washington Gas Light Co., are unsatisfactory to them, they must have displayed a great deal of ineptitude in not examining the contracts at the time of purchase.

However, the Fulbright-Harris bill will definitely help these distributors in their problems, even though these problems are of their own making. Mr. Boothby specifically objects to favored-nation clauses and escalator clauses in contracts to which he, at one time, gave hearty approval.

If Mr. Boothby will read the Fulbright-Harris bill, he will find that price changes under these clauses are subject to review by the Federal Power Commission, and cannot be placed into effect unless the Commission finds that they are entirely reasonable.

I think the public should know that by far the greatest share of the consumers' payment goes to the distributor. In 1954, for example, for gas sold in Washington, D. C., the producer received 12.5 cents per thousand cubic feet, the pipeline company received a little less than 29 cents for a thousand cubic feet, but Washington Gas Light Co. received—over and beyond these figures—96 cents per thousand cubic feet. In other words, Washington Gas Light got nearly 800 percent more for the gas than did the producer—and with a minimum of risk.

I am in sympathy with the need of local utilities to raise rates because of costs being affected by inflation. It does not make sense, however, for these utilities to denounce the producing industry for much smaller changes. Truly this is a case of an elephant denouncing a mouse for taking up too much room in the zoo.

The Fulbright-Harris bill is endorsed strongly by the Federal Power Commission, which probably is the best informed of all gas regulatory agencies. The bill meets the objectives set forth by President Eisenhower's Cabinet Committee on Energy Supplies and Resources Policy. The Senate bill had bipartisan support in committee, and was recommended by an 11 to 4 majority.

The bill is supported by all producers and by all major pipeline companies. The only resistance to it comes from some forty-odd utilities which have banded together in a high-pressure lobby. Many utilities, however, do not oppose passage of the bill.

In talking with representatives of some very vocal companies that make up the Council of Local Gas Companies, I have learned that these companies are primarily concerned about price competition from other fuels. These companies are buying gas for as little as they had anticipated, the terms for such purchase having been spelled out in contracts for 20 years to come, but they are not able to sell to industrial accounts in some communities because other fuels are cheaper.

In other words, competition is keeping prices down. This is what the producing industry has said all along.

However, the Fulbright-Harris bill adds the additional safeguard of Federal review of field prices. If distributors will just read the bill, they will get much comfort from it.

I thank the Senator from Oklahoma for yielding to me.

Mr. MONRONEY. I thank my distinguished colleague, because what he has just said helps bear out and to show more clearly the wide discrepancies and the lack of public knowledge regarding the items on which the rate charged by the Washington Gas Light Co. for natural gas for household use is based.

PRINTING OF ADDITIONAL COPIES OF COMMITTEE PRINT ON AUTOMOBILE MARKETING PRACTICES

Mr. MONRONEY. Mr. President, I submit a resolution which provides for the publication of the result of the automobile dealers' poll which was sent to 40,000 automobile dealers throughout the country, and on which an unusually large number of returns were received. The poll was broken down State by State. We would like to have a sufficient number of copies printed so that they may be sent to all the automobile dealers who answered the poll, and to others.

We would like to permit Senators to send out those copies, and we would be glad to address and insert those booklets if the Committee on Rules and Administration should see fit to allow us to have additional copies printed.

The PRESIDING OFFICER. The resolution will be received and appropriately referred.

The resolution (S. Res. 181) submitted by Mr. MONRONEY was received and referred to the Committee on Rules and Administration as follows:

Resolved, That there be printed 45,000 additional copies of a committee print of the report of the Subcommittee on Automobile Marketing Practices of the Senate Committee on Interstate and Foreign Commerce.

PROPOSED 5-YEAR MEDICAL RESEARCH PROGRAM

Mrs. SMITH of Maine. Mr. President, I have today introduced a bill designed to initiate a bold new program of medical research in this great Nation of ours.

Before outlining the details of my proposal, I wish to make it clear that I am following in the footsteps of some of the most distinguished Members of this body—such leaders and experts as the Senator from Alabama [Mr. HILL]—in proposing an expanded program of medical research. During the 1st session of the 84th Congress, the Senator from Alabama, together with the Senator from New Hampshire [Mr. BRIDGES] sponsored a bill for research laboratory construction, and the Senator from Alabama, and an additional 11 Senators from both parties, sponsored a bill to aid medical education. I heartily commend these efforts and I am deeply and humbly aware of the inspiring leadership of these distinguished Senators.

I believe that my proposal is unique in one very important respect. It is an attempt to blueprint a long-range plan for medical research. It is an omnibus proposal, inasmuch as it covers all the elements which we must combine to create a total offensive against disease.

Mr. President, I propose that the Federal Government spend an additional $1 billion over the next 5 years for 3 major purposes:

First. A doubling of the present research and training expenditures of the National Institutes of Health, the research arm of our National Government. During the current year the Institutes have been allocated approximately $100 million for their research, training, and related activities. I propose that, starting with fiscal 1957, this be raised to $200 million a year.

Second. A desperately needed program for the construction of laboratories and other medical research facilities. These construction funds shall be made available at the rate of $30 million a year for the next 5 years, and they shall be matched in equal part by the institutions receiving them.

Third. A long-range plan of aid to our medical schools, the keystone of medical research in this country. I propose that $70 million a year be allocated over the next 5 years for the construction of medical-school teaching facilities, and that these sums be matched by the medical schools receiving them.

I have been concerned with the question of medical research for a long time. However, an editorial in a great Maine newspaper—the Bangor Daily News—last July set me to thinking about ways in which I, as a legislator, could further medical research and save thousands of precious American lives. The editorial, entitled "How About $1 Billion for Health?" got to the heart of the problem in these simple but eloquent words:

There are occasions when we feel Congress is too generous about spending the taxpayers' money. But today we'd like to point out an instance in which we think the Federal legislators are being downright niggardly. We refer to funds for medical research on major killing diseases * * * Why not $1 billion? This may sound startling, at first. Yet what better investment could be made for the welfare of the Nation? Let us suppose the sum found the answer to dreaded cancer, for instance. Suppose it gave us new information on heart ailments and their treatment * * * It occurs to us that we Americans may have lost our perspective as to the relative importance of things. A Federal highway program running into many billions undoubtedly will be put on the books within a short time. We are spending billions upon billions for national defense. Other billions have been poured overseas in the form of foreign aid. Yet we discuss medical research in terms of only millions. * * * We startled and frightened the world with the atomic bomb. Would we not win the gratitude of the world if, by a billion-dollar research program, we were able to give the human race the answers to the diseases that kill and cripple?

On November 19 of last year, in a follow-up editorial, the Bangor Daily News urged immediate action in this editorial statement:

The important thing is to set our sights higher and get busy. We know that a single billion dollar appropriation isn't going to win the war against disease, any more than a single billion can win a modern war between humans. But it would be a starting point. It would put the problem in proper perspective. There's something wrong in our thinking when Americans spend more on lipstick than on cancer research, more on ball-point pens than on heart studies.

For some time I have studied the facts underlying this problem and last winter I began the drafting of the proposal which I submit to the Senate today.

My first line of study was to determine the dimensions of the problem of disease in this country. Were the proponents of expanded medical research exaggerating the size and extent of the problem?

In my study of this subject I leaned heavily upon the volumes of hearings issued by the House Interstate and Foreign Commerce Committee following more than 6 months of intensive investigation during 1953 and 1954. Under the brilliant guidance of its chairman, Representative CHARLES A. WOLVERTON, the House committee conducted the most thorough study to date of the impact of illness upon our economy.

In a statement on January 28, 1954, Representative WOLVERTON summed up the highlights of the committee findings in these words:

We were told that heart disease is the leading cause of death in the United States, causing more than 1 out of every 2 deaths each year. It is the leading cause of death among children, and exacts a toll from every age group.

At the rate at which we are acquiring cancer, 50 million of the present population of the United States probably will acquire cancer, and about 25 million will die from that disease.

The number of mentally ill patients in the United States exceeds the number of patients suffering from any other type of disease. Furthermore, approximately one-half of the 1,425,000 hospital beds in the United States are needed and used for the various mental illnesses.

Arthritis, with a total of 10 million victims today, and with 1 million people permanently disabled, afflicts more people, cripples and disables more people, and brings more pain to more people than any other chronic disease.

Last year more than 250,000 Americans of working age were unable to work because of active tuberculosis.

In the committee report summing up the massive evidence gathered from more than 100 physicians and scientists and from countless agencies, there is this statement which should give pause to every single one of us in this great country.

Four major diseases alone—heart, cancer, tuberculosis and arthritis—have resulted in an annual loss of 370 million man-days of productivity. This accounts for over half of the total man-days lost annually due to chronic diseases.

During the course of our hearings we received startling testimony that the annual cost to the Nation from illness is roughly equivalent to the total income tax revenue, or $30 billion annually.

Mr. MONRONEY. Mr. President, will the distinguished Senator from Maine yield?

Mrs. SMITH of Maine. I would prefer to complete my statement, but I am glad to yield to the Senator from Oklahoma.

Mr. MONRONEY. I merely wished to compliment the distinguished Senator from Maine for the tremendously hard but effective work she has done in preparing a comprehensive aid-to-health bill which she is now presenting and explaining to the Senate. I was glad to cosponsor the bill and cooperate with the Senator from Maine. The purpose of the bill is to facilitate the discovery of new remedies, new cures, new vaccines, such as the polio vaccine, which will pay off in the saving of human lives and in economic savings the money invested by the Congress.

I merely wish to compliment the Senator for her outstanding work in this field and for bringing the matter to the attention of the country.

Mrs. SMITH of Maine. I thank my distinguished and able colleague for his kind words, and I wish to say that it has been a very great help to have him cosponsor the bill. I thank him very much.

Mr. President, I do not think I need present any further evidence of the staggering size of the problem. But what have we done in the way of mounting an offensive against these diseases which bring heartbreak to millions of American families?

In 1953 the President's Commission on the Health Needs of the Nation summed

up our national medical research effort in these words:

Last year's (1952) total expenditure of $180 million amounted to only three-tenths of 1 percent of the Nation's defense budget. It was less than the amount spent on monuments and tombstones * * *. Last year, one industrial company spent more on business and product research than our entire Nation spent on research into heart and circulatory diseases. * * * The Federal Government itself spends over 200 times as much on military research as on research in heart disease.

A year later, the National Science Foundation released a set of figures which dramatically illustrated how little of all research moneys was going into medical research. It listed total governmental and nongovernmental research of all types as exceeding $4 billion annually. Industry spends more than a billion dollars annually searching for new products and improving existing ones. The chemical industry alone spends $300 million annually and this expenditure has made possible a four-fold increase in chemical sales from 1939 to 1954. Furthermore, American industry will spend $300 million in the next 4 years on atomic-energy research.

In 1954 the Federal Government spent approximately $2 billion on research of all kinds. Of this sum more than 85 percent, about $1,700 million, was allocated to military-weapons research. Medical research expenditures were near the bottom of the list.

The major criticisms of the inadequate level of Federal support for medical research have come most recently from the distinguished reports of the Hoover Commission. In both task force and full Commission reports, the Commission has criticized both the inadequate sums expended for medical research and the lack of any long-range plans. In these reports there is a recurrent plea for a 5-year program, and I am frank to state that the arguments of the Commission have had a great influence upon me in proposing an overall 5-year plan. I would like to quote just a few of the more telling points made in these Hoover Commission reports released during 1955:

A. Task Force on Federal Medical Services of the Hoover Commission. In its report, released in February 1955, the task force gave powerful support to the whole idea of a 5-year plan. Criticizing short-term annual research grants as uneconomic and lacking in stability, the report stated:

Where the Federal Government has made its grants for research in the form of 5-year block grants to institutions or agencies instead of short-term awards to individuals, persons conducting the research have been able to plan their studies without fear of an abrupt end of financial support; and also the Federal administrative authority has had help from the institutions in the difficult task of appraising individual requests for research grants. * * *

The task force recommends that the present system of project grants for research pertinent to health be modified and that it be gradually replaced by a system of 5-year block grants to institutions or agencies which would be in accordance with an approved overall plan for health research submitted by each.

The task force also attacked what it referred to as a 35 percent cut between 1952 and 1954 in Federal health grants for preventive campaigns against the major diseases. As an example, it singled out the inadequate sums being spent against mental illness. It proposed a $5 million additional annual Federal appropriation in the mental-health field, with most of the money earmarked for increases research grants to universities and other research centers for investigation of mental health and disease and for continued and expanded grants for advanced training for psychiatrists and workers in allied fields.

B. The full Hoover Commission Report on Research and Development in the Government, released in May 1955 included a sharp criticism of the Department of Health, Education, and Welfare for requesting inadequate sums for medical research, and for neglecting basic research. The report noted:

Of all the special research and development activities inside and outside the Federal Government, the most beneficent to mankind has been in medical and health research. Basic research in these fields covers such subjects as anatomy, physiology, biochemistry, bacteria, viruses, their contagions and their control. * * * The actual Federal expenditure applicable to basic research in the medical field is only about $18 million, or less than 1 percent of the total Government research and development expenditures. The report of this Commission on Federal medical services, together with our task-force report, have outlined constructive steps toward better organization and support in this field.

It should be noted that, although Congress has treated appropriations requests for medical research and development generously, there are still many approved projects which have not been undertaken because of the lack of funds. These projects, primarily in the field of basic research, have been approved by several important research agencies.

An instance is the so-called backlog of 723 projects totaling about $7,400,000 which the National Institutes of Health predict will not be undertaken by them in fiscal year 1956 because funds have not been requested by the Department of Health, Education, and Welfare or the Bureau of the Budget. Of this amount, about $1,900,000 is for basic medical research. We are concerned over the apparent failure of the executive branch to indicate these backlog projects to the Congress. That such amounts have not been recommended to the Congress or supported by the Congress may indicate a tendency to deemphasize basic and medical research. Possibly, this results from the belief that the Congress will be more receptive to requests for funds devoted to projects likely to produce startling and dramatic results. But it should be noted that there are also the dramatic accomplishments of basic and medical research.

* * * We must make sure of general support to this field which daily demonstrates such potential benefits for mankind. We urge also that this is a problem for the Nation as a whole. We therefore recommend that greater Federal support be given to basic and medical research.

I was additionally influenced in making my proposals by some remarkable figures recently released by the National Health Education Committee. Startling as they are, they deserve the sober attention of all of us.

With 10 million American men and women victims of heart disease, we are spending only about $1.60 per person afflicted to find cures and better methods of treatment for this most vicious of killers.

With the American Cancer Society estimating that 25 million Americans now alive will die from cancer unless new treatments, cures, or preventive measures are found, we are spending only $1 on research for each of these potential victims.

With mental illness costing this country approximately $2½ billion a year, we are spending far less than 1 percent of this sum for psychiatric research.

In May of last year Dr. Paul Dudley White, the distinguished cardiologist who is now attending our great President, appeared before a Senate appropriations subcommittee to testify about medical research on heart disease. Dr. White, in his quiet methodical way, startled the committee with some of the evidence he presented. He pointed out that each year heart disease was growing in its power to destroy precious American lives. In 1935 heart disease claimed 450,000 victims; in 1945, 600,000 victims, and in 1954 more than 800,000 victims.

Dr. White also presented figures on the ravages of heart disease during World War II. During the 4 years of our participation in that conflict, 2 million people die in this country of diseases of the heart and circulation—nearly 8 times as many people as were killed in action in the Armed Forces. More than 300,000 men in the prime of their life were refused induction into the Armed Forces because of heart disease. In addition, 97,500 men were given disability discharges from military service or died in military service from heart disease during the years 1942–45. This manpower loss from heart disease, a total of 397,500 men, would have been sufficient to man 27 army infantry divisions.

During the Korean conflict, the ravages of heart disease increased far beyond the World War II figures. Out of 245,000 registrants for military service examined between July, 1950, and June, 1951, 16 percent, or close to 40,000, were rejected for heart disease.

Dr. White also pointed out that heart disease causes tremendous productive and economic losses on the mobilization front. According to the United States Department of Commerce, heart disease causes a $2 billion annual loss to our economy. In a period when we are trying to stretch every dollar to increase our military procurement, this $2 billion could purchase 1,500 to 2,000 of our latest combat fighter planes, or it could outfit 29 infantry or airborne divisions at a per division cost of $69 million. In addition to all this we must remember that compensation and pension payments to veterans with heart disease are costing us another $200 million a year.

Dr. White also stressed the fact that, contrary to popular impression, heart disease is far from confined to the elderly. For example, among children under 15 more than twice as many die of heart disease as of polio. More significant is the fact that heart disease cuts down 1 out of every 3 Americans in the prime of life in the years from 40 to 65. Only in recent years has American industry begun to face one of the most serious challenges in our productive economy—that many of its young executives, after years of training for top posts, fall victim of coronary heart disease and hypertension just as they begin to realize their full potential.

If heart disease continues to exact its present annual toll, 83 million Americans now alive will eventually fall victim to it.

Appealing for greatly increased funds for heart research, Dr. White, in forthright fashion, laid the facts on the table in these memorable words:

It happens that the United States is one of the most unhealthy countries in the world today, in large part because of this serious threat of coronary heart disease. I have traveled widely and have found that any citizens of any country in the world who live the way we do are subject to this disease. In most countries, however, only a relatively small percentage of the population can afford to live the way we do and in that sense can afford to be sick in the same serious way. While everyone knows about the very bad health conditions in south Asia and Africa due to infections and undernutrition, not so many have realized that at the opposite extreme, in countries like the United States which boast of their sanitary conditions, the health of the professional and business leaders is constantly threatened and apparently more and more so every year. This problem, therefore, is just as vital as that of the starving multitudes in countries far away.

Despite the fact that there are many researches going on in this country on animals and to a certain extent on man, we have not the answer yet * * *. If I had had time, I would have shown you today a man in the thirties crippled by angina pectoris at this early age because we don't know how to prevent the disease as yet or even how to delay its onset. There are many thousands of patients of his age and a little older but still relatively young men who are similarly affected. This problem seems to have been increasing greatly within the last decade or two. Why this is so and what we can do about it remains the $64 question. Fortunately, researches in this field have been increasing steadily but many more are being contemplated, more than we can afford to pay for now.

These are the considered words of a great scientist who today is treating our President and who has treated members of this body. And this man, in 1955, had to spend money out of his own pocket because Government funds were not available for the vital research he was pursuing.

In the light of all the foregoing evidence, I think that it is beyond dispute that this country must spend vastly increased sums to reduce the toll exacted by disease and premature death. I, therefore, regard my proposal for an additional $100 million a year over the next 5 years as a modest one, limited in scope only by the availability of the research scientists and facilities needed to carry on this additional research. During the past few years congressional committees of both Houses have received documented evidence from the Nation's most eminent scientists that inadequate financial support is the great bottleneck to a major expansion of medical research.

However, there are always those who argue that expansion cannot go much further because the men and the laboratories are not immediately available. In answer to them, I cite the example of the magnificent clinical center of the National Institutes of Health. It cost $60 million to construct and it is regarded today as the finest research plant in the entire world. Yet when appropriations for it were under consideration before Congress a few years ago, there were some who argued that it would never be possible to staff so enormous a research enterprise. How wrong they have been proved. On the site of what was once a sleepy Maryland farm, there are now more than 4,000 medical researchers and auxiliary personnel engaged in a magnificent offensive against the killers of our time. And all this has happened within the past decade.

As the various Hoover Commission reports noted, and as prominent scientists have pointed out in congressional testimony, there are thousands of research ideas in all parts of this land which need only financial backing to come to fruition. Furthermore, many of our most talented young research workers leave the field because they see no real evidence of a long-range plan with some guaranty of continued financial support. We must plan, and plan boldly, if we are to win the total war against disease.

Mr. President, I should now like to address myself to a very important question. If we double our present research expenditures over the next five years, what kind of return can we expect on our investment? In other words, apart from humanitarian considerations, is it good business sense to invest additional moneys in medical research?

The history of medical research over the past few years offers an eloquent answer. Over the past decade alone, medical research has added five full years to the life expectancy of the average American. This increase which encompasses a reduction in deaths from all causes of about 10 percent, occurred between 1944 and 1952. We all know something of the wonders of penicillin, streptomycin, isoniazid, cortisone, and a host of other battlers against disease. These miraculous products of medical research, along with new surgical techniques and blood plasma, have brought about these percentage reductions in the death rates of some of the major killers and cripplers:

	Percent
Influenza	77
Appendicitis	69
Acute Rheumatic Fever	66
Syphilis	56
Tuberculosis	50
Pneumonia	50
Kidney Diseases	43

Now let us translate this into terms which a hard-headed businessman can appreciate. During those 8 years, a total of 845,000 American lives were saved. These 845,000 people, who would have died if research knowledge had remained constant, earned and added approximately $1,500,000,000 to the national income in 1952 alone. And from these earnings in 1952, the Federal Treasury received approximately $234 million additional in income and excise tax receipts. Please note that this increase in tax receipts was more than 7 times the $33 million spent on research in 1952 by all the major institutes of the United States Public Health Service. Putting it very simply, medical research has returned $7 in Federal taxes for every dollar spent by the United States Public Health Service.

Medical research has even made for better and cheaper agricultural crops and fatter and healthier cows, pigs, and chickens. The antibiotics provided by medical research have initiated a revolution in both the quality and quantity of livestock and poultry production.

Mr. President, I could cite scores of examples of the savings resulting from medical research. All of us in this body know that tuberculosis, once one of the most terrible scourges visited upon man, is now coming increasingly under control due to the new drugs supplied by medical research. In the past 7 or 8 years, the tuberculosis death rate has dropped a gratifying 66 percent. Tuberculosis hospitals all over the country are closing their doors. Last year, New York City saved $46 million in hospital and construction costs because of the new advances in tuberculosis therapy.

We all know of the wonders of the Salk vaccine, and we have high hopes that poliomyelitis will soon fade into insignificance.

Mr. President, let me give one small example of what a single Federal research grant did in one area of disease. It was a grant of only $41,000, but it resulted in the discovery of the cause of a condition which was producing blindness in prematurely born children.

Over the past decade 8,000 children had been blinded by this disease. Their special care and training through their average life span will cost $100,000 each, or a total of $800 million, according to Dr. Cornelius Traeger, one of the Nation's leading neurologists.

As Dr. Traeger pointed out before a Senate committee, had that $41,000 worth of research been undertaken 10 years earlier we would have saved that $800 million. But the grant was finally made, the research was successful, and for the small investment of $41,000 we will, through each future decade, save the precious sight of 8,000 children and save ourselves hundreds of millions of dollars.

Granted, then, that medical research is a blue-chip investment paying fantastic dividends, can this Nation afford additional expenditures for it? One of the most eloquent answers to this question is contained in a volume of the 1953 report of the President's Commission on the Health Needs of the Nation, devoted to how we can finance a broader health and medical-research program for America.

The testimony of some of the Nation's economists recorded in that volume reflects deep puzzlement and concern as to why this Nation is not spending more for medical research and health services. Economists, aware of the fact that in an expanding economy we must provide millions of new jobs to achieve a growing rate of national productivity, do not understand why we are not making plans now to shift many of our workers into medical research and health services.

Viewed in the cold perspective of an economist, our national research and medical plant is woefully underfinanced, handicapped by obsolescent physical facilities, and hamstrung by severe shortages of manpower and inadequate salaries. These deficiencies reap an inevitable harvest.

Those areas of the country where medical research and health services are at the lowest point are the very same areas where industrial productivity is low, and consequently, Federal and State tax revenues are low.

In pointing out that this Nation could not much longer afford a $30 billion annual drain upon its productivity, the 1953 report argued that medical research must become big business if it is to succeed. It recommended that the Federal Government spend an additional billion dollars a year for medical research and related health activities. It put the problem this way:

Medical research must learn from American industry the cardinal fact that it cannot expand properly until it recruits and holds more of this country's top brains. It cannot do this on a skimpy financial base. If medical research is to compete with industrial research for skilled investigators, it must build up its physical plant and it must offer these workers good salaries and reasonable security.

I submit, Mr. President, that human life is the most precious commodity we have in this democracy of ours. However, our federal budget seems to belie this. During the current fiscal year, about $60 million will be spent by the National Institutes of Health on research activities designed to save human lives.

Compare this with more than $90 million appropriated by the last session of Congress for the research activities of the Department of Agriculture. And add to this $90 million for the Department of Agriculture the sum of $250 million which is paid out to farmers for soil conservation practices.

I do not want to imply that I am not heartily in favor of greatly expanded agricultural research. I have always supported these research activities, but I think it is about time this country brought research on human lives up to the level of research on animals and plants.

I have proposed a medical research expenditure of $200 million a year with full knowledge of comparable expenditures by the American people. In 1955, the people of this Nation spent approximately $10 billion on alcoholic beverages and more than $5 billion on tobacco products. Our annual expenditure for chewing gum, $264 million, is $64 million more than I am asking for research to save human lives.

Mr. President, the second part of my proposal would provide $150 million over a 5-year period in matching grants for the construction of research laboratory facilities. For the most part, these grants would go to hard-pressed medical schools, hospitals, and private foundations in all parts of the country.

This proposal is a most conservative one. In 1953, the Senator from Minnesota [Mr. THYE], then chairman of the Senate Appropriations Subcommittee on Health, Education, and Welfare, sent out a questionnaire to all research installations in the country, asking them for a detailed analysis of what additional laboratory facilities were needed to expand medical research in this country. He received replies indicating that these installations needed in excess of $150 million in matching grants to expand their very vital work.

I commend the two volumes of the Thye report to every Member of this body. It presents a picture of the shocking physical conditions under which medical research is carried on in many parts of this land. I think millions of Americans would be ashamed to learn that much medical research today is being carried on in firetraps, reconverted barns, and abandoned tombstone factories.

After a careful study of the Thye report, the members of the Senate Committee on Labor and Public Welfare voted unanimously in 1955 to hold a series of hearings on this critical situation in medical research. In that same year the Senator from Alabama [Mr. HILL], and the Senator from New Hampshire [Mr. BRIDGES], introduced a bill providing $90 million over the next 3 years in matching laboratory construction grants. In 3 days of hearings, the Senate committee received irrefutable documentation to the effect that this country's rundown medical research plant was holding back hundreds of vitally important research projects.

In the report unanimously adopted by the full Senate Labor and Public Welfare Committee, the research laboratory crisis is stated in these words:

Actual experience in the making of research grants through the National Institutes of Health has disclosed a serious deficiency which is not only holding up already planned and much-needed research projects but which threatens the future of medical research insofar as it is serving to block the entry of young scientists into this field. Experience has shown that often the most potentially gifted men in the field of research, men who could and would devote their lives and their talents to the attempt to conquer diseases, men who had been chosen by the advisory councils of our National Institutes of Health as admirably qualified to carry on essential research projects, are unable to make their services available to the people of America simply because they do not have the laboratories, facilities, and equipment with which to do the work the Nation and the Congress very much want to have done.

We have, of course, provided excellent facilities and equipment, chiefly at the National Institutes of Health, where men of science employed by our Government have been and are carrying on promising research projects. But we neither can nor should we try to concentrate all medical research in Federal laboratories. Hundreds of established leaders in medical research and thousands of young scientists eager to work with them if it were possible are identified with non-Federal hospitals, universities, and other nonprofit research institutions scattered throughout the Nation. If we are to enlist their services in our behalf, we must help build the laboratories and other essential facilities where they and their patients are.

In the course of the hearings, many of the Nation's most distinguished scientists not only urged passage of the bill, but pointed out that research construction grants made by the Congress prior to the Korean conflict had meant an enormous saving of human lives. The report has this to say of the testimony of Dr. Cornelius Rhoads, generally regarded as America's greatest cancer researcher:

Dr. Cornelius Rhoads, scientific director of the oldest cancer hospital in the United States, the Memorial Center for Cancer and Allied Diseases in New York, and director of the Sloan-Kettering Institute for Cancer Research, gave us three succinctly stated reasons for his enthusiastic endorsement of this bill. He said:

"1. It is the best possible investment in terms of the economic as well as the social welfare of this country.

"2. It is an absolute necessity that these facilities be made available if hundreds of thousands of lives are not to be needlessly lost.

"And, thirdly, if they are made available, this wastage of life can be prevented, from all the indications presently before us."

Dr. Rhoads went on to tell us that cancer is costing us from three to ten billion dollars a year directly and indirectly and explained how a $250,000 laboratory has saved nearly a thousand lives over the last 5 years in his institution alone. Two hundred and fifty dollars for a human life.

Dr. Sidney Farber, director of research at the Children's Cancer Research Foundation in Boston, told the Senators of how a construction grant to his institution speeded up the miraculous development of the Salk vaccine. I quote the committee report on Dr. Farber's testimony:

He told of a $300,000 grant made to the Children's Cancer Research Foundation by the National Institutes of Health some years ago. With that seed money to go on, the trustees of the foundation went out and raised $1,600,000 more.

It was in the building thus created that Dr. John Enders conducted that epochal research which resulted in the discovery of a method of growing the poliomyelitis virus in tissue culture and won for Dr. Enders the Nobel prize. It was this discovery which made possible first the mass testing and now the mass-immunization program with Salk vaccine. As Dr. Farber told us, because of the construction of this one building, as the result of a Federal grant, it is conservative to say that Dr. Enders' work was brought to fruition some 2 to 3 years ahead of the time it would have taken in his former antiquated and totally inadequate quarters.

In the light of this impressive testimony, the Senate unanimously passed the Hill-Bridges research construction bill in July of last year. I hope that the House will take immediate action on this problem and that it will vote the full $150 million provided in my proposal. I am confident that the Senate will accept the higher figure in conference.

The final section of my bill would provide $70 million a year over the next 5 years in matching grants for the construction of medical-school teaching facilities.

The medical school is the backbone of our medical-research effort in this country. Our Nation's 81 accredited medical schools not only do the bulk of medical research but they train practically all our research scientists. However, with the decrease in private endowments and the rise in the cost of modern medical education, our Nation's medical schools have run increasingly into the red.

The full Hoover Commission report on Research and Development in the Government expressed itself in the strongest possible terms on the manner in

which the financial plight of the medical schools was causing an alarming restriction of medical research and a desperate shortage of doctors and research technicians. I quote from that report, as follows:

We are greatly concerned over the inadequate public and State support of our medical schools where our research technicians are trained and an important part of basic medical research is carried forward. No greater instance of university research need be cited than the dramatic accomplishment at the University of Pittsburgh by Dr. Jonas Salk in basic research which produced the polio vaccine. The universities have contributed much to understanding and alleviation of mental diseases, cancer, and many other fields. The National Fund for Medical Education, which raises about $2 million annually to support the medical schools, has repeatedly stated that these institutions in the United States are carrying an aggregate annual deficit of $15 million which in the instances of university medical schools must be made up by diversions from other branches of education. One consequence is that the medical schools are compelled to restrict the amount of their research, and the number of their students. The Nation is today short of both technicians and doctors. And there are today a large number of youths who have completed their premedical education and cannot find admission to medical schools.

We cannot afford stagnation of our medical research in our medical schools or the training of our technicians.

The task force on Federal medical services of the Hoover Commission also pounded away at the need for greater Federal support for medical education. It singled out the schools of public health as an illustration of how inadequate financing was jeopardizing the Nation's health. I read the following statement prepared by the task force:

The United States needs additional trained public health personnel—physicians, dentists, engineers, nurses, health educators, laboratory scientists, and other types of professional people, the report noted. "Many positions in public health agencies now are unfilled because of the lack of qualified applicants. A tenth of all budgeted positions for public health personnel in official health agencies—Federal, State, and local—were unfilled in 1951 (the latest study) with the budgeted positions representing only a fraction of the real need. More than half of the over 35,000 persons now employed in public-health work have received inadequate training. It has been estimated that to meet its needs, the Nation's schools of public health should, in the next 5 years, provide postgraduate education for some 20,000 people. Yet, as of 1952–53, these schools were granting postgraduate degrees to only about 600 persons each year.

Obviously, the Nation's 10 accredited schools of public health cannot, as they now operate, educate enough students to meet the Nation's needs for additional trained public-health personnel. Already the schools have serious financial problems; increased enrollment based on present financing methods would only compound existing difficulties. * * * The average cost to the schools of educating 1 student in 1952–53 was $4,100, only 14 percent of which was met by tuition and fees. * * *

We believe that these schools should have Federal financial assistance. * * * The majority of the task force concluded that the Federal Government, without interfering with the internal affairs of the schools, should make grants to accredited schools for training at the graduate level, and provide funds on a matching basis for capital outlays at the schools.

The National Fund for Medical Education, of which former President Herbert Hoover is honorary president, has estimated that the Nation's medical schools need from $250 million to $300 million in construction funds, and an additional $15 million a year to overcome operating deficits.

Early this year the Senator from Alabama [Mr. HILL], and other Senators from both parties, introduced S. 1323, a bill which would provide $250 million in matching construction grants to the medical schools over a 5-year period. At Senate hearings in May 1955, the Committee on Labor and Public Welfare was informed that 96 percent of the medical school deans endorsed the bill. It has also been strongly endorsed by the American Medical Association.

It is important to realize that research knowledge is of no use unless there are enough doctors to apply it to sick people. In testifying for S. 1323, Dr. Howard A. Rusk, chairman of the Health Resources Advisory Committee, warned the Senate committee that the doctor shortage in this Nation had reached a critical point. Dr. Rusk quoted the following from an official report which his committee, made up of some of the Nation's leading physicians, had transmitted to the Office of Defense Mobilization in February of last year:

There are unmet demands today in medical education, public health, mental and tuberculosis hospitals, industry, and rehabilitation, to name only a few areas. Many rural areas and small towns are in need of practicing physicians. * * * If the threat of attack on the cities of this country were to materialize in any of the presently predicted forms, the combined effect of civilian casualties and casualties in the health professions would place a considerably heavier burden on the population than did the last war, when the civilian population suffered neither military attack nor such an occurrence as the influenza pandemic of the First World War. A civilian disaster of the magnitude possible today could put an incredible load on the civilian health personnel.

The sum of $350 million is recommended for the medical schools as an absolute minimum. S. 1323 provides for construction only. However, there is need for at least $20 million a year for the next 5 years to bolster the operations of the medical schools.

There is no argument about this. The Rusk Report pointed out that only 21 of the 72 4-year medical schools meet present faculty standards set by the American Medical Association. There are close to 300 unfilled full-time positions on medical-school staffs, due to the desperate shortage of doctors. Eighty percent of the medical school faculties are composed of part-time men.

I view this Federal grant program as complementary to the many commendable private efforts being made to bolster the financial condition of our medical schools. I was heartened, as I know all of us were, by the recent announcement that the Ford Foundation would grant $90,000,000 in endowment income to the Nation's 42 private medical schools.

In a comprehensive article analyzing the impact of the Ford grants upon the medical schools, Earl Ubell, the distinguished science editor of the New York Herald Tribune, pointed out that the Ford grant will merely enable the medical schools to keep up with the ever-rising cost of medical education. Here is what Mr. Ubell wrote:

Because the needs have run so far ahead of income, the Ford grant, even though it will increase by 10 percent the medical schools' annual funds for instruction, can do no more than hope to preserve the status quo. The total additional money which will become available annually out of interest from endowment will be between $3,500,000 and $4 million. Even $10 million a year—if it could be raised—would not keep up with medical school budgets growing at a rate of $11 million a year.

Furthermore, it is important to realize that the Ford grant provides no money for construction or equipment. In my proposal, a minimum of $250 million, and possibly $300 million, would go for construction.

Mr. President, I want to emphasize very strongly that my overall proposal has absolutely nothing to do with any aspect of socialized medicine. I am unalterably opposed to socialized medicine. This program would have no aspects of socialized medicine, since it is in keeping with recommendations and endorsements made by the Hoover Commission, the American Medical Association, the Administration's Health Resources Advisory Committee, the Nation's medical school deans, and the country's leading research scientists.

Mr. President, I believe there is nothing closer to the heart of Americans than medical research. Surely it is not a matter on which to practice false economy. Surely it is a matter for imperative, immediate, and sustained expansion. Surely it is a wise investment that American taxpayers will gladly and unstintingly make and give.

The promise of medical research is a really fabulous one. It is now merely on the threshold of its greatest advances against disease and premature death. Our young children growing up today will live longer and be more productive and useful citizens because in the past 15 years we have begun to support medical research. On November 7, 1955, Dr. Leonard A. Scheele, the distinguished Surgeon General of the United States Public Health Service, expressed this magnificent potential of medical research in words far more eloquent than any I can summon. I quote Dr. Scheele:

It would seem then that in another generation—2 or 3 decades hence—the population of the United States could be as free of venereal disease, tuberculosis, paralytic poliomyelitis, rheumatic fever and rheumatic heart disease, and the complications of streptococcal infections as it is today from smallpox, typhoid fever, yellow fever and malaria.

This healthier population would present the Nation with a military potential virtually free of such former causes of rejection as dental decay, ear defects due to streptococcal infections, chronic nephritis, tuberculosis, disabling rheumatic heart disease, and crippling due to poliomyelitis. * * *

As the scientific, medical, and public-health professions have overcome difficult

problems in the past, we may expect to solve many of the remaining problems through full cooperation of our scientific, medical, and health services potential. Healthier in its freedom from many diseases now prevalent, the population of tomorrow will expect, and will enjoy, higher levels of physical and mental health.

Mr. DOUGLAS. Mr. President, I wish to congratulate the Senator from Maine for her very able and public-spirited address.

Mrs. SMITH of Maine. I thank the Senator from Illinois.

THE NATURAL GAS BILL

Mr. DOUGLAS. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a very able article entitled "Gas Producers Planned Consumers' Gouge." The article was written by Mr. Charles S. Rhyne, general counsel of the National Institute of Municipal Law Officers, and appeared in the Alabama Municipal Journal for October 1955.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GAS PRODUCERS PLANNED CONSUMERS' GOUGE

(EDITOR'S NOTE.—We are pleased to present this article which is an exposé of the plans of the big natural gas producers to exploit the Nation's natural gas consumers to the extent of approximately $40 to $50 each year. It is written by one of the Nation's most capable young men—Mr. Charles S. Rhyne. He followed the fight in the last session of the Congress on the so-called Harris bill. He knows it to be not in the public interest and he points out the reasons why it isn't.)

The Harris-Fulbright bill, which will be considered by the Senate in the next session of Congress, is the most important bill to natural gas consumers before the Congress. If Congress adopts it, the estimated increased cost to each consumer, as computed by informed experts, will be from $40 to $50 or more a year.

The bill squeaked by the House Committee on Foreign and Interstate Commerce, after protracted and hotly-contested hearings, by a vote of 16 to 15. Originally the vote was 14–14 but the proponents mustered 2 more votes for a 1-vote majority.

ROUGH SAILING IN HOUSE

The House Rules Committee voted it out by a 6–5 margin, 1 member not voting. The non-voting member subsequently voted against passage of the bill on the floor of the House.

Finally, the Harris bill passed the House by a vote of 209 to 203 after lengthy debate and an attempt to recommit to committee failed.

The Senate committee voted it out by 11–4 with 2 of the 11 giving separate half-hearted approval.

Why the great hue and cry regarding this bill? Why the closeness of the vote, the splitting of party lines, the unusual voting by the Members of Congress? The answer is quite simple. A powerful, rich, and well-organized group is directing the fight by means of clever propaganda and sophistry unparalleled in congressional history. Their admitted operating expenses are $1,500,000, which they have put to the most effective use. Page advertisements have been inserted in all major newspapers in the Nation. A great selling job has been done. In order to see the reason behind this great campaign, the background of events leading up to the drafting of the bill is quite enlightening.

In 1938 Congress passed the Natural Gas Act.

Under this act, the Federal Power Commission was granted jurisdiction to determine whether rates charged in all sales of natural gas in interstate commerce for resale, by producers, gatherers, pipelines, or any other persons were just and reasonable. The act requires that the FPC allow natural gas companies a just and reasonable rate of return, and these companies may compel the granting of such a return by appeal to the courts.

PRICE GOUGING OF CONSUMERS

The Natural Gas Act grew out of an investigation by the Federal Trade Commission which revealed price gouging and exploitation of consumers by sellers of natural gas in interstate commerce. The Supreme Court of the United States had previously held that neither the State of origin nor the State of destination could stop this gouging and exploitation by controlling the rates charged by these sellers in interstate commerce. The Court held that under the Constitution, the Federal Government has exclusive jurisdiction in this field. The act was thus adopted to bridge this gap or hiatus in Federal-State jurisdiction by providing Federal protection for consumers which the States may not constitutionally provide. The Harris-Fulbright bill removes the jurisdiction of the Federal Power Commission (FPC) over these sales for resale by independent producers, effectively scuttles the Natural Gas Act and returns consumers to the very uncontrolled price gouging and exploitation which the Natural Gas Act was adopted to end.

PRICE REGULATION DODGING

Ever since the inception of the act, the independent producers have been attempting to squirm out from under FPC regulation. A running battle has been waged for years and various bills, such as the Moore-Rizley, the Lyle-Harris, the Kerr, and other bills, have been introduced in the Congress to scuttle FPC jurisdiction over these independent producers.

On June 7, 1954, after a 4-year court battle, the Supreme Court held that the FPC had jurisdiction over independent producers and gatherers and that such jurisdiction must be exercised. This was the famous case of *Phillips Petroleum Co.* v. *State of Wisconsin, City of Detroit, et al.* (347 U. S. 672). Should the Senate pass the Harris-Fulbright bill, the price at which gas enters the pipelines will no longer be subject to any real regulations by the FPC and all consumer protections will be effectively destroyed. With Federal protection removed, and the States constitutionally helpless to protect consumers, an unregulated, and unprotected, twilight zone would result. Captive natural-gas consumers, who cannot turn to other fuels without losing their investment of several billions in burning equipment, will be gouged and exploited any way the oil and gas interests may desire. No one can stop them.

When the Natural Gas Act went into effect, the FPC conducted numerous rate investigations which, up to 1946, resulted in rate reductions to consumers aggregating in excess of $157 million in such cities as Detroit, Kansas City, Cleveland, Fort Wayne, Dallas, and other cities located in Illinois, Kansas, Nebraska, Ohio, Pennsylvania, Michigan, and other States. This experience demonstrates that the consumers needed protection and that the act provided such protection.

However, since World War II there has been a tremendous growth in the natural-gas industry. A tremendous network of pipelines now brings natural gas to nearly all the major cities in the Nation. The pipelines were built for the most part under the present act and under the representation that natural gas would be made available to consumers at a reasonable rate, much cheaper than other fuels. Municipalities and consumers supported this pipeline development in reliance on these representations. Local distribution companies have instituted, city by city, a changeover in equipment as natural gas became available. Millions of consumers are now absolutely dependent upon those who sell gas in interstate commerce for resale. Natural gas is now a public service commodity just as are water, electricity, and other historically regulated public service commodities. Stoves, heating units, and hot water heaters have been converted to this fuel at an expense of millions of dollars. Gas is the only fuel that can be utilized by this equipment. Consumers cannot change suppliers if the particular company upon whom they have become dependent increases the price. Distributors are committed under long-term contracts to buy gas from the pipeline which serves them at a price fixed by the FPC. Interstate pipelines, in turn, are bound to sellers in a given field or fields by the physical location of their pipelines, which cannot readily be moved to a new field in search of a better price. Unless the FPC has jurisdiction to control that initial price in the field, no effective control exists.

SERVICE BY VIRTUAL MONOPOLY

Should the gasoline for his automobile prove unsatisfactory, or should his cigarettes disagree with him, there is the simple expedient open to the user of changing brands. But the only choice open to the person who is serviced by a natural-gas company, which furnishes the wherewithal to enjoy a warm home, or a hot meal, is to endure whatever the particular inconvenience is or to use another fuel.

This, patently, is no choice at all. Once a person has installed costly gas-burning equipment with which to heat and cook, then the cost of changing to another fuel, measured in terms of time, inconvenience, and most important of all, money, is absolutely prohibitive. Congress was fully aware of these facts when it provided that the Federal Power Commission should regulate all sales in interstate commerce for resale. To limit the act to sales by pipelines, as the pending bills propose, eliminating sales to pipelines in interstate commerce would be to ignore obvious evils which the present act eliminates.

LACK OF PRODUCER COMPETITION

The great danger in this is the fact that there is a lack of producer competition which results in a monopoly market since competition is only between buyers—not sellers.

In Wisconsin, one producer—Phillips Petroleum Co.—supplies all of the gas sold in that market. And elsewhere the competition which exists is competition between buyers—the very reverse of the true competitive situation that protects consumers by competition between sellers. An FPC study shows that 42 producers sold 70 percent of all gas purchased by pipeline companies in 1953. And 10 companies own 43 percent of the total reserves in the United States. Whether there are 2,300 producers, 4,000 producers—or, according to the industry's latest figure—8,000 producers, is indeed of little consequence since the small producers own so little of the existing gas reserves.

MORE COMPELLING FIGURES

Even more compelling figures were published in the Wall Street Journal of November 2, 1954. Therein it was shown that two companies, the Phillips Petroleum Co. and Humble Oil, lead all other producers in estimated reserves of natural gas. Humble, which is a subsidiary of Standard Oil Company of New Jersey, estimated its reserves at 16 trillion cubic feet. This fantastic amount of gas is topped only by the gas reserves of the Phillips Petroleum Co., whose holdings exceed 18 trillion cubic feet. Thus, 2 companies control 34 trillion cubic feet,

or one-sixth of the total natural gas reserves of the entire industry in the United States.

Each 5 cents per thousand cubic feet added to field prices increases the value of their combined reserves by $1,700,000,000. Is it any wonder they oppose regulation? If the Harris-Fulbright bill causes an increase of 15 cents per thousand cubic feet, these two companies alone stand to profit by $5,100,000,000.

FIELD DOMINATED BY FEW

The great Hugoton field in Kansas and Oklahoma is dominated by 6 pipeline companies and 16 independent producers who control 75 percent of the acreage. Phillips Petroleum, Stanolind Oil & Gas (Standard Oil of Indiana), Panhandle Eastern Pipeline Co., Republic Natural Gas Co., Cities Service, Northern Natural Gas Co., Skelly Oil Co., Magnolia Petroleum Co., and Peerless Oil & Gas own two-thirds of the total natural-gas acreage.

They operate in a monopoly market. A small percentage of the industry controls more than the lion's share of a valuable commodity which is in great demand. What chance does a small consumer have competing against giant oil companies? Either Congress retains the present act's protection of just and reasonable rates or the consumer really has no chance.

AT MERCY OF BIG COMPANIES

Sixty million consumers will be placed at the mercy of the big oil and gas companies—the monopolistic producers—who can raise prices $200 million to $800 million annually or higher.

If the FPC is not allowed to effectively regulate the price to be charged by these producers on wholesale interstate sales to the pipelines, the consumers are absolutely without protection against price gouging because the States are constitutionally prohibited from acting in this area.

There was 8.7 trillion cubic feet of natural gas (8.7 billion mcf) consumed in 1954. Contract prices since 1949 have more than doubled for gas sold wholesale in interstate commerce at the point of initial sale in interstate commerce, i. e., the wellhead, in the well, or 50 miles from the well. In many incommerce, i. e., the wellhead, in the well, or 50 miles from the well. In many instances, producers have already received 3 to 5 price increases. And due chiefly to such increases, $106 million in yearly rate increases were granted in 1954 by FPC. And $286 million in additional increases were pending before FPC at the end of that fiscal year.

SHALL CONGRESS O. K. INCREASES?

The Congress will be legislating into effect these vast rate increases—those now pending, and all future producer increases—if it adopts the Harris-Fulbright bill. It is not amiss to assume that because of the monoply in production control, and lack of competition between sellers in the field, prices will rise 2 cents to 5 cents per mcf annually. And these prices, of course, will be paid by the ultimate consumer. Over the estimated 20-year life of the existing reserves, even these modest increases would amount to from $4.5 billion to $17.6 billion.

A quick appraisal of the main tenets of the bill shows that it is definitely not in the public interest. It is designed in the main to free the so-called independent producers of natural gas who sell their gas in interstate commerce from regulation under the Natural Gas Act of 1938. The United States Supreme Court, in the Phillips case, on June 7, 1954, held that the Federal Power Commission had jurisdiction "* * * over the rates of all wholesales of natural gas for resale in interstate commerce whether by a pipeline company or not and whether occurring before, during or after transmission by an interstate pipeline company." The proposed legislation, if enacted into law, would overrule this decision but it would also go much further towards negating the primary aim of the Natural Gas Act which the Supreme Court held to be the "protection of consumers against exploitation at the hands of natural gas companies."

WOULD EXEMPT INTERSTATE FOLKS

The provisions of the two new subsections to section 2 (10 and 11) vitally constrict the reach of the Natural Gas Act with respect to interstate transportation and sale of natural gas.

Since the provisions of the bill apply equally to the so-called independent producers and to pipeline companies and their affiliates, the transportation of natural gas in interstate commerce by any person in or near the vicinity of the field or fields where the gas is produced would be exempt from regulation.

Proposed subsection 11 includes only such sales as are made after commencement of transportation of natural gas as defined in subsection 10 and excludes any sale occurring in or within the vicinity of the field or fields where the gas is produced at or prior to the commencement of such transportation. This definition would exclude from the jurisdiction of the Federal Power Commission sales of natural gas in interstate commerce within or in the vicinity of the gas fields where made.

(1) by an independent producer to a pipeline company,

(2) by an affiliate to a pipeline company, or

(3) by one pipeline company to another pipeline company.

Thus, the amendment would limit the Commission's jurisdiction over sales in interstate commerce for resale to those sales between pipeline companies or sales by pipeline companies to distributing utilities which occur outside of the vicinity of the fields where the gas is produced.

WHAT IS REASONABLE PRICE?

New subsection (b) proposed to be added to section 5 of the act requires the Commission to consider whether the price paid, pursuant to contract with a producer, is the "reasonable market price" when the pipeline company is asking for an increase in rates based upon a new or renegotiated contract. In such consideration, the Commission is directed to consider the effect of the contract upon the assurance of supply and the reasonableness of the contract provisions as they relate to existing or future market field prices. The meaning of this directive as to what should be considered by the Commission is quite unclear. After the Commission has considered, it is directed to allow the pipeline company to charge as an operating expense for the gas purchased under the contract only such market price plus a fair gathering charge in those cases where the price is determined before gathering is completed.

SO-CALLED ESCALATION CLAUSE

In the first place, the control proposed would only apply to new or renegotiated contracts which form the basis of an application for an increase in rates submitted to the FPC by a pipeline company. This means that the Commission could not consider prices in existing contracts which were increased through escalation and favored-nation clauses.

Further, "new contract" is not defined. If a pipeline company entered into a contract with a producer for a new gas supply to be connected 6 or 9 months later to the pipeline system and 1 month after connection is made the pipeline company applies for a rate increase, the question would immediately arise as to whether the contract was a new contract within the meaning of the subsection.

CRITERION FOR RATEMAKING

However, the biggest gimmick of all is the use of "reasonable market price" as the criterion for setting rates. In order to ascertain what is a reasonable market price, the Commission would have to check it against other contract prices existing in the particular field where the conditions of sale are comparable as to quality and quantity of the gas, contract terms, the contracted volume of reserves dedicated to the service and other factors which enter into contract negotiation for the purchase and sale of natural gas in the field. But other contract prices, unless they were executed at about the same time and were also comparable in other respects, would not serve to test the reasonableness of the contract price under review. An impossible burden of proof would be placed upon the Commission or consumers in order to show that the contracted volume of gas could not be purchased for a lesser price from other producers. It would seem in the absence of such proof or proof of collusion that the negotiated contract price would be the evidence which the Commission must perforce accept as the reasonable market price.

One of the more flagrant examples of windfall profits which the bill presents to producers is section 5 (c).

COMMISSION'S HANDS TIED

The Commission is directed by new subsection (c) to include in operating expenses of pipeline companies the "reasonable market price" for gas they produce from their own gas wells and to treat the gas produced by their affiliates in the same manner. This proposal is similar to that included in the Moore-Rizley bill, H. R. 4051, 80th Congress. It makes mandatory the new regulatory theory which the Commission used in the recent Panhandle Eastern Pipe Line Co. rate case which is now being litigated by the city of Detroit, in the United States Court of Appeals for the District of Columbia circuit.

PRICES IN FIELDS JUMP

The "reasonable market price" is presumably to be determined in the same manner as indicated above with respect to the gas purchased from nonaffiliated producers. Under this method, the most recent market price for comparable gas must be used by the Commission. The trend of prices in the field has been progressively higher and higher in the past 10 years and there is no reason to believe they will decrease in the future or even level off in the absence of Federal control. Thus, the pipeline company having gas reserves of its own will be able to inflate its operating expenses and add to its profits in the future through higher and higher allowances for its produced gas. It is granting a fictitious price to pipeline companies for which the consumers will pay.

TAILORED FOR SPECIAL INTERESTS

There are many other aspects of the bill which cannot be covered because of space limitations. However, the main points have been touched and we believe it has been shown that the proposed bill is tailored to meet the desires of so-called independent producers for exemption from Federal regulation and of the pipeline companies who own natural-gas reserves and desire higher profits therefrom. At the same time, the bill is intended to present the appearance of providing a measure of protection to consumers from excessive field prices of natural gas. But, the purported protection would be ineffective, impractical, costly of application, and in certain respects it is clearly in conflict with constitutional limitations on public utility ratemaking.

PROTECTING LITTLE FELLOW

It is a basic tenet of our free-enterprise system that the helpless little fellow must be protected from those in a position to exploit him. We have antitrust laws, laws requiring fair and truthful advertising, a minimum-wage law, and a whole series of other regulatory acts designed for this express purpose.

The Natural Gas Act, with its "primary aim of preventing exploitation of consumers," fits clearly within the basic tenets of our free-enterprise system and should not be changed so as to place these helpless little people at the mercy of sellers of natural gas in interstate commerce. It must be kept in mind that this is regulation of an essential public service and not an unreasonable interference with private business or private ownership of business.

SEEKING CONGRESSIONAL EDICT

It is contrary to the traditions of our free-enterprise system, whereby Government regulations are designed to protect the weak who cannot protect themselves, to subject these thousands of helpless consumers to exploitation by the great oil and gas companies—the real sponsors of this proposed legislation. These companies are seeking a congressional edict freeing them from all possible controls whereby consumers can be protected against their exploitations. This legislation should not be passed by the Senate.

Mr. DOUGLAS. Mr. President, in the last few weeks I have had compiled some very interesting figures on the amount of gas shipped in interstate commerce from various States and the amount of receipts of natural gas brought into States, so that we may see which States are the producing States and which are the consuming States. I ask unanimous consent that the table, which I believe to be as accurate as the figures from Gas Facts and the Federal Power Commission make possible, be printed at this point in the body of the RECORD.

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). Without objection, it is so ordered.

The table submitted by Mr. DOUGLAS is as follows:

Interstate shipments and receipts of natural gas, classified by States, 1953

State	Number of producers [1]	Interstate shipments, M c. f.	Percent of total interstate shipments	Number of consumers	Interstate receipts, M c. f.
I. GAS-PRODUCING STATES EXPORTING MORE NATURAL GAS THAN IS IMPORTED					
Kansas	228	295, 677, 000	7.10	440, 900	174, 520, 000
Louisiana	254	772, 025, 000	18.54	486, 200	80, 974, 000
Mississippi	22	121, 832, 000	2.93	192, 600	86, 032, 000
New Mexico	271	232, 257, 000	5.58	113, 500	52, 688, 000
Oklahoma	229	261, 940, 000	6.29	499, 700	26, 863, 000
Texas	829	2, 218, 689, 000	53.30	1, 683, 400	104, 347, 000
Wyoming	19	36, 030, 000	.86	49, 900	2, 999, 000

III. STATES WHICH EXPORT NO NATURAL GAS					
Arizona				177, 000	73, 709, 000
California				3, 319, 800	357, 108, 000
Connecticut				132, 000	6, 402, 000
Delaware				[4]	2, 138, 000
District of Columbia				181, 700	13, 658, 000
Florida				15, 700	19, 670, 000
Georgia				262, 200	124, 793, 000
Idaho					
Iowa				273, 100	109, 197, 000
Maine					
Massachusetts				527, 700	19, 435, 000
Minnesota				329, 800	105, 462, 000
Missouri				655, 500	179, 027, 000
Nebraska				218, 200	77, 122, 000
Nevada				[5]	
New Hampshire				26, 700	921, 000
New Jersey				283, 900	62, 850, 000
North Carolina				37, 400	6, 885, 000
Oregon					
Rhode Island				20, 600	690, 000
South Carolina				13, 600	9, 115, 000
South Dakota				34, 600	13, 963, 000
Tennessee				205, 100	109, 023, 000
Vermont					
Washington					
Wisconsin				414, 500	39, 616, 000
Total	[6] 62			7, 129, 100	1, 330, 784, 000
Grand total	[7] 4, 790	4, 163, 246, 000	100.00	19, 959, 200	[8] 4, 163, 246, 000

[1] Source: FPC Study.
[2] No breakdown available. Are included in total of 62 for group III.
[3] Less than 0.005 of 1 percent.
[4] Not available.
[5] Nevada acquired natural gas in 1954, although none is reported for 1953.
[6] No breakdown available.
[7] Includes 435 duplications of producers who operate in more than 1 State.
[8] Includes 59,000 M c. f. for which no breakdown is available.

Source: Gas Facts, 1954.

Mr. DOUGLAS. Mr. President, I should like to comment on some of the figures which are revealed in the table.

In the first place, there are only 7 States, out of the 48 States plus the District of Columbia, which in 1953 exported more natural gas than they imported. The most notable State is of course, Texas, which exported 2,218,689,000 M. c. f.—or thousand cubic feet—of gas, and imported only 104,347,000 M. c. f.

Then we have Louisiana, which exported 772,000,000 Mcf and imported only approximately 81,000,000 M. c. f.

Other exporting States were Kansas, Oklahoma, and New Mexico, while Mississippi and Wyoming were small net exporters. These are the seven exporting States whose producers would gain by the passage of the gas bill.

Even here, Mr. President, I should like to call attention to the large number of consumers of gas in the seven so-called gas exporting States.

For example, in the State of Texas there are 1,683,000 consumers of natural gas, and only 829 producers. It has always seemed extraordinary to me that there is a tendency to consider the producing interest of a State and to ignore the consuming interest of a State. If the pending gas bill passes Congress and is signed by the President—and I say God forbid that it should be—and we have an increase of 10 cents a thousand cubic feet, while it may actually benefit the 829 producers in Texas, it will injure the 1,683,000 consumers in the State of Texas.

In the State of Louisiana there are 486,000 consumers, as compared with only 254 producers. It seems to me that the interests of the nearly half a million consumers should be considered in this matter, and not merely the interests of the 254 producers, because the half million consumers in Louisiana will pay more if this bill passes.

Similarly, in Kansas there are 441,000 consumers and only 228 producers.

In Oklahoma there are almost precisely half a million consumers and only 229 producers.

I urge that these figures be studied by Members of this body from the exporting States, to see where the real interest of their States actually lies. If these figures are studied I think they should produce a change of attitude on the part of many Members of the Senate from such States.

There are 16 States which, while they exported some gas, imported appreciably more gas than they exported. Those States are Alabama, Arkansas, Colorado, Illinois, Indiana, Kentucky, Maryland, Michigan, Montana, New York, North Dakota, Ohio, Pennsylvania, Utah, Virginia and West Virginia.

The figures for some of these States are very interesting. The figures for the State of Arkansas are extremely interesting.

There are only 27 producers in the State of Arkansas, and they shipped out 1,441,000 thousand cubic feet, only three

one-hundredths of 1 percent of the total amount of gas which crossed State lines. However, they imported 142 million thousand cubic feet, or 100 times as much.

It is sometimes forgotten that Arkansas is a great gas importing State. In addition, there were 210,000 consumers in the State, who burned gas either to heat their homes or to heat water, or to cook with. Thus there are 210,000 consumers in Arkansas, but only 27 producers.

The State of Colorado has 253,000 consumers and 17 producers, with imports of more than five times the quantity of gas which they exported.

In the State of Pennsylvania there are a great many small producers. There are 923 producers. Nevertheless, this State imports approximately nine times the amount of gas which it exports.

Ohio, with 54 producers, has nearly 1,800,000 consumers, and imports approximately 10,000 times as much gas as it exports.

West Virginia, which has more than 1,400 very small producers, represents about a standoff. It imports slightly more gas than it exports, but it has 313,000 consumers.

I hope that these figures will give Senators from the various States a little sense of proportion. I hope they will be studied carefully.

There are 26 States, if we include the District of Columbia, which export absolutely no gas whatever, but which import large quantities of gas. These are: Arizona, California, Connecticut, Delaware, District of Columbia, Florida, Georgia, Idaho, Iowa, Maine, Massachusetts, Minnesota, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, North Carolina, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Vermont, Washington, and Wisconsin.

There are 6 of those States which imported no gas in 1953, 1 of them being the State of the distinguished senior Senator from Maine [Mrs. SMITH]. I will comment upon those States in a moment. What I should like to point out is that in the 26 States, if we include the 6 which consume no gas, there are more than 7 million consumers. I hope that the real interest of the people of those States will be studied.

There is a tendency on the part of some people in the six States referred to—namely, Idaho, Maine, Nevada, Oregon, Vermont, and Washington—which import no gas, to say that they are not concerned in this struggle.
